Special or normal diets...we make them both

Whatever diet you need for your laboratory animals, you'll find it in our new Diets Manual. It covers a wide selection of recognized and rigidly controlled diets and dietary ingredients.

Recognizing that the basal diet is the factor generally most responsible for variation in biological response, we enclose protocols showing the exact formulation and control inspection with each polyethylene-sealed diet.

We can help you with special diets, too. Our Biological Diets Division will formulate special diets at a very nominal charge, and keep your formulation in strictest confidence. Just write your special diet requirements to us. We assure you our fullest cooperation.

Write today for our new and free Diets Manual. If you wish, we'll also mail you our free Research Biochemicals Catalog containing over 3500 items.

How to succeed in spectrophotometry

1. Make a reliable instrument – the Unicam SP800 Ultraviolet Recording Spectrophotometer has more than 5 years' trouble-free service to its credit and in this time has become the best-selling instrument of its type in the U.K.

2. Add a choice of accessories like the SP820 Constant Wavelength/Wavenumber Scanner, the SP825 Pro- gramme Controller, the SP830 Automatic Cell Changer, and the SP850 Scale Expansion Accessory giving up to 20 times expansion of the absorbance scale.

3. Give it additional and unique features such as a second sample position for turbid samples and unbeatable performance and repeatability as illustrated in the spectrum below.

4. Write to Pye Unicam Ltd today for complete technical details, a quotation, or a demonstration. Our success could help you to further your success in spectrophotometry.

A Fraction Larger

Yes, our Fraction Collector, The UltroRac, is a fraction larger than some others on the market, but we do not consider this a disadvantage and neither do our customers who only speak of the ADVANTAGES of owning an LKB UltroRac. The UltroRac gives users reliable collection, ease of operation, easily varied test-tube capacity and freedom of choice in the method of collection. Any number of test-tube racks can be removed from the collecting platform without interrupting the collecting process.

Write or phone LKB today for a fully illustrated brochure on this QUALITY instrument and the many others in the LKB Laboratory Instruments Line.

- Space Saving
- Coldroom Use
- Standard Test Tubes
- Removable electronic unit
- 200 test-tube capacity
- Time, drop and volume
- Stainless steel support rods
- Polypropylene racks
- Provision for event marking
- Power outlet for flow pump
- Electronic counting system
- Positive flow control
A ‘highly commended’ series

**Progress in Medicinal Chemistry - Volume 7**

Edited by G. P. Ellis, BSc, PhD, FRIC and G. B. West, BPharm, DSc, PhD.

These collections of reviews are written for the chemist, biochemist, pharmacologist and clinician. The treatment of the subject matter and the individual emphasis reflect the authors’ special interest and experience.

The newest volume in this respected series will be published early next year. To enable collectors to complete and consolidate as well as begin their sets, a special offer will accompany every purchase of Volume 7. Volumes 1–6 will be available for the reduced price of £20, and individual volumes may be purchased at the following prices:

- £2 5s. 2—£2 5s.
- £3 5s.
- £2 15s.
- £5 5s.
- £7.

**THE BUTTERWORTH GROUP**

**BUTTERWORTHS-ILIFFES-NEWNES**

88 Kingsway London WC2

---

**UNIVERSITY OF GLASGOW**

**Department of**

**Oral Medicine & Pathology,**

**Glasgow Dental Hospital and School**

**Graduate Biochemist**

Graduate Biochemist required to take part in studies of electrolyte metabolism in salivary glands and their secretions. Excellent research facilities are available at the new Glasgow Dental Hospital and School.

The work will be suitable for an M.Sc. or Ph.D. degree and will involve analytical, isotopic and enzymological techniques.

The appointment will be for two years in the first instance. Salary range £900—£1470 per annum.

Applications, with curriculum vitae and the names of two referees, should be lodged not later than 28th November, 1969, with Professor D. K. Mason, Department of Oral Medicine and Pathology, Glasgow Dental Hospital and School, 211 Renfrew Street, Glasgow, C.3.

**ROBT. T. HUTCHESON**

Secretary of the University Court

---

**NEW APPOINTMENT**

**Senior Grade**

**BIOCHEMIST**

To be responsible for the organisation of clinical biochemistry undertaken at the three main hospitals of the Tunbridge Wells Group. First or Second Class Honours Degree or Associateship or Graduate Membership of the Royal Institute of Chemistry required. The person appointed should have had at least five years experience of hospital clinical biochemistry in the basic grade. Facilities for research are available in the Group. The salary scale £2,040, rising by annual increments to £2,515.

*Applications to the Group Secretary, Tunbridge Wells Group Hospital Management Committee, Sherwood Park, Pembury Road, Tunbridge Wells, Kent.*

---

**STOCKPORT AND BUXTON HOSPITAL MANAGEMENT COMMITTEE**

**BIOCHEMIST**

**Basic Grade**

Applications are invited for the above post in the Group Pathology Laboratories based at Stepping Hill Hospital, Stockport, Cheshire.

This is a busy well-equipped department catering for the requirements of the Group’s fourteen hospitals covering most specialities. The post offers good facilities for training.

Applications stating qualifications and experience together with the names of two referees to the
