

The Postal Strike

Every effort has, and is, being made to ensure that back issues of Volume 121 are despatched complete to all subscribers. Orders for 1971 despatched to our Publications Department, 7 Warwick Court, London WC1R 5DP, will be processed as quickly as possible. To avoid further delay subscribers are asked not to forward complaints of non-receipt of any parts of Volume 121, either direct or through their agents, until it is reasonable to suppose that the postal backlog has been cleared. Queries that obviously arise from the effects of the strike cannot be answered, but it is to be hoped that subsequent deliveries of delayed despatches will nullify most complaints. Please accept our apologies for any inconvenience or subsequent delays in deliveries.

The Biochemical Journal

THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1970-71

Chairman of the Committee
G. A. D. HASLEWOOD

Committee Secretary

A. N. DAVISON

Meetings Secretary

H. M. KEIR

International Secretary

A. P. MATHIAS

Treasurer

W. F. J. CUTHBERTSON

Assistant Treasurer

D. F. ELLIOTT

Committee

J. S. D. BACON

W. BARTLEY

R. B. BEECHEY

R. M. C. DAWSON

D. T. ELMORE

R. HOFFENBERG*†

A. KORNER

H. A. KREBS

D. J. MANNERS*†

S. V. PERRY

D. C. PHILLIPS

P. J. RANDLE

D. S. ROBINSON*†

R. M. S. SMELLIE‡

D. G. WALKER*†

* *Ex officio* Member of Committee.

† Representative of Editorial Board of the *Biochemical Journal*.

‡ Representative of Editorial Board of *Clinical Science*.

§ Symposium Organizer.

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9).

The *Biochemical Journal* is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1971. The index for each volume is published separately.

Subscriptions to the *Biochemical Journal*. For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the 1971 subscription is \$110 per year (\$22 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), 7 Warwick Court, London WC1R 5DP.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims can be entertained if they are received later than three months after the date of posting of the Journal.

Back Numbers. Enquiries for volumes 1-19 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., Berkeley Square House, Berkeley Square, London W1X 6BA, or to the Biochemical Society.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9). Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1-89 (1906-1963) have been recorded on microfilm by Micro Methods Ltd., East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

CONTENTS

iii

	PAGE
The metabolism by rats of phenylmercury acetate. By J. W. DANIEL and J. C. GAGE	24P
C ₂₉ -carboxylic acid intermediates of cholesterol biosynthesis in rat liver. By G. M. HORNBY and G. S. BOYD	24P
The effect of dietary cholesterol on cholesterol biosynthesis and other processes in mammalian liver. By R. BOOTH, K. W. GREGORY, E. M. MALONE and I. ROBERTSON	25P
The identification of 17 α -hydroxy-17 β -methylandrosta-1,4-dien-3-one as a metabolite of 17 β -hydroxy-17 α -methylandrosta-1,4-dien-3-one in man. By B. S. MACDONALD, P. J. SYKES, P. M. ADHIKARY and R. A. HARKNESS	26P
Exchange of sterols between rat brain membranes. By N. L. BANIK and A. N. DAVISON	26P
Further studies on the biosynthesis of androsta-5,16-dien-3 β -ol and the subcellular location of the site of biosynthesis. By K. H. LOKE and D. B. GOWER	27P
The effect of sex hormones on the activity of tryptophan oxygenase and other corticosteroid-inducible enzymes in rat liver. By I. P. BRAIDMAN and D. P. ROSE	28P
The formation of nitrosamines by human intestinal bacteria. By G. HAWKSWORTH and M. J. HILL	28P
Effect of glucagon on spheroplasts of <i>Escherichia coli</i> . By J. L. R-CANDELA, M. C. GARCÍA and A. NIETO	29P
A catalytic mechanism for pig plasma benzylamine oxidase. By C. TAYLOR and P. F. KNOWLES	29P
Kinetic studies of the <i>N</i> -demethylation of ethylmorphine by a cytochrome <i>P</i> -450-dependent enzyme system in human liver microsomes. By S. S. THORGEIRSSON and D. S. DAVIES	30P
The electrophoretic mobilities of native and chemically modified human placental alkaline phosphatase isoenzymes. By D. M. THOMAS and D. W. MOSS	30P
Characterization of an alkaline phosphatase from rat heart. By E. MÜLLER, A. G. E. PEARSE and D. W. MOSS	31P
Protease and ribonuclease activities in bovine pituitary lobes. By J. C. PICKUP and D. B. HOPE	31P
Relationships between kinetic properties and structure of caeruloplasmin substrates. By G. CURZON and S. N. YOUNG	32P
Immunochemical studies on human calcitonin M leading to information on the shape of the molecule. By P. G. H. BYFIELD, M. B. CLARK, K. TURNER, B. M. NATHANSON, G. V. FOSTER and I. MACINTYRE	33P
Patterns of serum γ G-globulin heterogeneity in health, rheumatoid arthritis and cancer. By J. WATKINS and D. E. H. TEE	33P
Extraction of polymeric collagen from human skin. By M. J. O. FRANCIS and D. C. MACMILLAN	34P
Some simple and rapid thin-layer chromatographic methods for clinical purposes. By R. S. ERSSER, J. W. T. SEAKINS, B. C. ANDREW and E. A. HUGHES	35P

PAPERS ACCEPTED FOR PUBLICATION

- The rate-limiting step of protein synthesis *in vivo* and *in vitro* and the distribution of growing peptides between the puromycin-labile and -non-labile sites on polyribosomes. By D. C. N. EARL and S. T. HINDLEY
- An anaerobic reaction between lipoxygenase, linoleic acid and its hydroperoxides. By G. J. GARSEN, J. F. G. VLEGENTHART and J. BOLDINGH
- The binding of radioactive labelled phenacetin and related compounds to rat tissues *in vivo* and to nucleic acids and bovine plasma albumin *in vitro*. By R. NERY
- Some new aspects of the metabolism of phenacetin in the rat. By R. NERY
- The effect of pH on cathepsin activities in mouse liver heterolysosomes. By J. L. MEGO
- Dihydroxyacetone phosphate. Its structure and reactivity with α -glycerophosphate dehydrogenase, aldolase and triose phosphate isomerase, and some possible metabolic implications. By S. J. REYNOLDS, D. W. YATES and C. I. POGSON
- Properties of fractionated chondroitin sulphate from ox nasal septa. By ÅKE WASTESON
- Bacterial metabolism of 4-chlorophenoxyacetate. By W. C. EVANS, B. S. W. SMITH, P. MOSS and H. N. FERNLEY
- Metabolism of 4-chloro-2-methylphenoxyacetate by a soil pseudomonad. Preliminary evidence for the metabolic pathway. By J. K. GAUNT and W. C. EVANS
- Metabolism of 4-chloro-2-methylphenoxyacetate by a soil pseudomonad. Ring-fission, lactonizing and delactonizing enzymes. By J. K. GAUNT and W. C. EVANS
- Bacterial metabolism of 2,4-dichlorophenoxyacetate. By W. C. EVANS, B. S. W. SMITH, H. N. FERNLEY and J. I. DAVIES
- Proteins of normal hair and of cystine-deficient hair from mentally retarded siblings. By R. J. POLLITT and P. D. STONIER
- Synthesis and oxidation of aminoalkyl-onium compounds by pig kidney diamine oxidase. By W. G. BARDSLEY, J. S. ASHFORD and C. M. HILL

NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Theoretical contributions will be considered equally with papers dealing with experimental work. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1971), 121, 1] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 15p. post free). In general the *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society)]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC-IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1971), 121, 11]. For chemical nomenclature the IUPAC Rules should be followed [see *Biochem. J.* (1971), 121, 11]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Oxford: Clarendon Press).

Two types of paper are accepted by the editors: **Full-length papers.** Papers submitted for publication should be sent together with an extra copy of the synopsis to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper

containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative title, by the names of the authors and by the name and address of the establishment where the work was performed. Details of financial support may appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including references and legends of tables and figures) on sheets of uniform size with wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted *in duplicate*, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications must not exceed 1200 words of text, but in addition may include either one table, typed on a separate sheet, or one figure, drawn according to the rules of the Journal. If no figure or table is included the text may be expanded to 1400 words. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.
