

CONTENTS OF VOLUME 122, No. 5, 1971

	PAGE		PAGE
Enzymic explorations of the structures of starch and glycogen. The fourth CIBA Medal Lecture. By W. J. Whelan	609	A survey of the interaction of calcium ions with mitochondria from different tissues and species. By E. Carafoli and A. L. Lehninger	681
Rabbit Tamm-Horsfall urinary glycoprotein. Chemical composition and subunit structure. By A. M. S. Marr , A. Neuberger and W. A. Ratcliffe	623	Dielectric dispersion in aqueous solutions of oxyhaemoglobin and carboxyhaemoglobin. By E. H. Grant , G. P. South , S. Takashima and H. Ichimura	691
Metabolic effects of the major component of bovine growth hormone. By N. I. Swislocki , M. Sonenberg and M. Kikutani	633	Stoichiometrical proton and potassium ion movements accompanying the absorption of amino acids by the yeast <i>Saccharomyces carlsbergensis</i> . By A. A. Eddy and J. A. Nowacki	701
The distribution of some hydrolases in glomeruli and tubular fragments prepared from rat kidney by zonal centrifugation. By D. G. Taylor , R. G. Price and D. Robinson	641	Histone kinase and cell division. By A. R. Pawse , M. G. Ord and L. A. Stocken	713
Glycosaminoglycans of cat vertebral disc. By W. F. Butler and C. M. Wels	647	Histone phosphokinase activity in nuclear and cytoplasmic cell fractions from normal and regenerating rat livers. By G. Siebert , M. G. Ord and L. A. Stocken	721
Synthesis of pyruvate carboxylase from its apoenzyme and (+)-biotin in <i>Bacillus stearothermophilus</i> . Purification and properties of the apoenzyme and the holoenzyme synthetase. By J. J. Cazzulo , T. K. Sundaram , S. N. Dilks and H. L. Kornberg	653	Inhibition of adenosine 5'-triphosphate-creatine phosphotransferase by substrate-anion complexes. Evidence for the transition-state organization of the catalytic site. By E. J. Milner-White and D. C. Watts	727
Synthesis of pyruvate carboxylase from its apoenzyme and (+)-biotin in <i>Bacillus stearothermophilus</i> . Mechanism and control of the reaction. By T. K. Sundaram , J. J. Cazzulo and H. L. Kornberg	663	Studies on the origin of choline in the brain of the rat. By G. B. Ansell and S. Spanner	741
Electrophoretic and immunological characterization of rat neurophysin. By A. Norström , J. Sjöstrand , B. G. Livett , L. O. Uttenthal and D. B. Hope	671	Exchange of sterols between myelin and other membranes of developing rat brain. By N. L. Banik and A. N. Davison	751
Radiation-target molecular weights of urease and of L-glutamate dehydrogenase and their relevance to the size of the functional subunits. By E. Blum and T. Alper	677	Subcellular distribution of taurine and cysteinesulphinat decarboxylase in developing rat brain. By H. C. Agrawal , A. N. Davison and L. K. Kaczmarek	759
		SHORT COMMUNICATION	
		The dipole moment of myoglobin. By E. H. Grant , G. P. South and I. O. Walker	765

Proceedings of the Biochemical Society

	PAGE
Possible modes of organization of protein molecules in membranes. By N. M. GREEN	37 P
The proteins released from intact erythrocyte 'ghosts' at low ionic strength. By J. R. HARRIS	38 P
The proteins of erythrocyte membranes: where are they? By M. S. BRETSCHER	40 P
Separation and partial characterization of some human erythrocyte membrane protein components. By M. J. A. TANNER and D. OWENS	40 P
Some properties of mitochondrial membrane proteins dissolved in chloroform-methanol. By P. J. CURTIS	41 P
Fractionation of the proteins of liver plasma membranes. By J. W. GURD, W. H. EVANS and H. R. PERKINS	43 P
Properties of mesosomal membranes isolated from <i>Micrococcus lysodeikticus</i> and <i>Bacillus megaterium</i> . By D. J. ELLAR, T. D. THOMAS and J. A. POSGATE	44 P
The bactoprenol content of plasma and mesosome membranes from <i>Lactobacillus casei</i> . By K. J. I. THORNE and D. C. BARKER	45 P
Control of respiration in <i>Azotobacter vinelandii</i> membranes. By C. W. JONES, S. K. ERICKSON and B. A. C. ACKRELL	46 P
Membrane-bound enzymes in adrenal medulla: an adenosine triphosphatase characteristic of the Golgi apparatus. By F. DUBOIS, I. BENEDECZKY and A. D. SMITH	46 P
Stereochemical and energetic evaluation of the phosphorylation of histones in chromatin. By S. LEWIN	47 P
Some aspects of the effect of deuterium oxide (D ₂ O) substitution for water (H ₂ O) on the helical stability of yeast transfer ribonucleic acid. By S. LEWIN and J. R. STOW	48 P
Radioactive labelling of multiple-drug-resistance factor in <i>Escherichia coli</i> . By G. R. BARKER, N. HARDMAN and T. M. TWOSE	48 P
Genetic expression of sex-factor after transfer into irradiated cells of <i>Escherichia coli</i> uvrA ⁻ . By G. R. BARKER and T. M. TWOSE	49 P
Protein content of myelin. By W. L. G. GENT, N. A. GREGSON, C. A. LOVELIDGE and A. F. WINDER	49 P
Improved separation of viable neurons and glia from rat brain. By P. P. GIORGI	50 P
An enzyme catalysing the hydrolysis of phosphoric acid diesters in rat liver. By C. DONNINGER, B. T. NOBBS and K. WILSON	51 P
Solubilization procedures cause changes in the response of brain 'neurotoxic esterase' to inhibitors. By M. K. JOHNSON	51 P
Antigen-antibody interaction in the presence of sodium deoxycholate. By M. J. CRUMPTON	52 P
Phosphodiesterase and ribonuclease activities of the plasma membrane of rat liver and hepatoma. By K. A. NORRIS, M. L. E. BURGE and R. H. HINTON	53 P
Amino-azo-dye-binding protein in the soluble cytoplasm of the rat liver. By B. KETTERER and D. BEALE	53 P
Rotational mobility of a fluorescent rhodopsin derivative in the rod outer-segment membrane. By T. TAO	54 P
Differences in the permeability of bovine erythrocytes to fructose. By I. A. NIMMO and J. G. HALL	55 P
The inhibition of urea synthesis by leucine in the perfused rat liver. By P. J. BUTTERY and K. N. BOORMAN	55 P
Enzymic and electron-microscopic analysis of extracellular matrix vesicles associated with calcifica- tion in cartilage. By S. Y. ALI, H. C. ANDERSON and S. W. SAJDERA	56 P
The subcellular distribution of colchicine-binding protein(s) ('microtubule protein') in rat brain. By J. R. LAGNADO, C. LYONS and G. WICKREMASINGHE	56 P
The bacterial oxidation of picolinamide. By C. G. ORPIN, M. KNIGHT and W. C. EVANS	57 P
The bacterial oxidation of <i>N</i> -methylisonicotinate. By C. G. ORPIN, M. KNIGHT and W. C. EVANS	58 P
Biosynthesis of ergotamine. By R. A. BASSETT, E. B. CHAIN and K. CORBETT	58 P
The metabolism <i>in vitro</i> of phenothiazine drugs. By D. S. HEWICK and A. H. BECKETT	59 P
The extraction of a protein fraction rich in glycine, serine, tyrosine and phenylalanine from Merino wool. By B. KINGHAM, S. P. RILEY and A. ROBSON	60 P

CONTENTS

iii

	PAGE
Studies on chicken actomyosin. By J. M. JONES	61 P
An improved method for the electrophoresis of enzymes using a polyacrylamide-starch gel. By B. H. PARKIN	61 P
Factors affecting the interactions of proteins isolated from erythrocyte membranes. By A. H. MADDY and P. G. KELLY	62 P
Recombination <i>in vitro</i> of proteins and lipids from mammalian erythrocyte membranes. By R. F. A. ZWAAL and L. L. M. VAN DEENEN	62 P
Separation of lipid-protein complexes of rat brain myelin by isopycnic centrifugation. By W. L. G. GENT, N. A. GREGSON, C. A. LOVELIDGE and A. F. WINDER	63 P
Resolution of protein components in lysophosphatidylcholine-solubilized rat brain myelin. By W. L. G. GENT, N. A. GREGSON, C. A. LOVELIDGE and A. F. WINDER	64 P
Interaction of lysophosphatidylcholine with central-nervous-system myelin. By W. L. G. GENT, N. A. GREGSON, C. A. LOVELIDGE and A. F. WINDER	64 P
Amino acid sequence of the basic protein of human brain myelin. By P. R. CARNEGIE	65 P
Trypan Blue: reaction with myelin. By J. P. DICKINSON and S. G. R. APARICIO	65 P
Proteins of the plasma membrane lining the lumen of the rat bladder. By B. KETTERER and R. M. HICKS	66 P
The identification of the site of action of dicyclohexylcarbodi-imide as a proteolipid in mitochondrial membranes. By K. J. CATTELL, C. R. LINDOP, I. G. KNIGHT and R. B. BEECHEY	66 P
