K. M. Jones	K. Murray	F. R. Whatley

Editorial Secretary: **J. D. Killip**

*Nominated by the British Biophysical Society

London: **The Biochemical Society ©1971**

Price £2.25 (U.S.A. \$5.40)

THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1971-72

Chairman of the Committee

T. W. GOODWIN, F.R.S.

Treasurer

D. F. ELLIOTT

Meetings Secretary

H. M. KEIR

Committee Secretary

A. N. DAVISON

International Secretary

A. P. MATHIAS

Committee

J. S. D. BACON

R. B. BEECHEY

E. A. DAWES

R. M. C. DAWSON

D. T. ELMORE

R. HOFFENBERG*‡

G. D. HUNTER

V. H. T. JAMES

A. KORNER

C. F. MILLS

H. R. PERKINS†

S. V. PERRY

D. C. PHILLIPS, F.R.S.

P. J. RANDLE

D. S. ROBINSON†

T. A. SCOTT

D. G. WALKER*†

A. M. WHITE

Symposium Organizer: R. M. S. SMELLIE

* *Ex officio* Member of Committee.

† Representative of Editorial Board of the *Biochemical Journal*.

‡ Representative of Editorial Board of *Clinical Science*.

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9).

The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1971. The index for each volume is published separately.

Subscriptions to the Biochemical Journal. For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the 1971 subscription is \$110 per year (\$22 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), 7 Warwick Court, London WC1R 5DP.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims will be entertained if they are received later than three months after the date of posting of the Journal.

Back Numbers. Enquiries for volumes 1-19 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., Berkeley Square House, Berkeley Square, London W1X 6BA, or to the Biochemical Society.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP (01-242 1076/7/8/9). Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1-89 (1906-1963) have been recorded on microfilm by Micro Methods Ltd., East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

CONTENTS

iii

	PAGE
Separation of ribonucleic acid from immature rat uterus on polyacrylamide gels and the effects of oestradiol-17 β . By J. T. KNOWLER and R. M. S. SMELLIE	33P
Alkylated components in rat liver ribonucleic acid: a possible index of true biological turnover. By A. W. CRAIG and P. J. O'CONNOR	34P
Studies on the methylated regions of HeLa-cell ribosomal and nucleolar ribonucleic acids. By M. SALIM, R. WILLIAMSON and B. E. H. MADEN	34P
'Fingerprinting' studies on ³⁵ S-labelled mammalian-cell ribosomal proteins. By J. SHEPHERD and B. E. H. MADEN	35P
Effects of amino acid starvation on ribosome formation in HeLa cells. By B. E. H. MADEN.	36P
Methylation of newly synthesized ribonucleic acid by isolated rat liver nuclei: a means of characterizing ribonucleic acid synthesized <i>in vitro</i> . By D. RICKWOOD	36P
Control of histone modification within chromatin by adenine nucleotides and steroid hormones. By R. H. BURDON and C. A. PEARCE	37P
Methylation of newly synthesized and older deoxyribonucleic acid. By R. L. P. ADAMS	38P
Effects of insulin and adrenaline on rat epididymal-fat-pad pyruvate dehydrogenase. By H. G. COORE, R. M. DENTON, B. R. MARTIN and P. J. RANDLE	38P
Properties of pyruvate dehydrogenase from fat-cell mitochondria and its hormonal control. By R. M. DENTON, B. R. MARTIN, H. G. COORE and P. J. RANDLE.	39P
An immuno-electrophoretic assay of β -lipoprotein and albumin in human aortic intima by direct electrophoresis from the tissue sample into an antibody-containing gel. By E. B. SMITH and R. S. SLATER	39P
The action of fructose on ethanol metabolism by intact isolated liver cells. By M. N. BERRY	40P
The action of pyruvate on ethanol oxidation by intact isolated liver cells. By M. N. BERRY.	41P
Determination of the operational molarity of solutions of bovine α -chymotrypsin, trypsin, thrombin and Factor Xa by spectrofluorometric titration. By D. V. ROBERTS, R. W. ADAMS, D. T. ELMORE, G. W. JAMESON and W. S. A. KYLE	41P
Observations on rat mast-cell-granule protease. By A. G. LLOYD, T. MORRISON and D. T. ELMORE	42P
Comparative studies on rat mast-cell-granule protease and a bovine liver-capsule protease. By A. G. LLOYD, T. MORRISON and D. T. ELMORE	43P
Effect of a high-ethanol and choline-deficient diet on the metabolism of [³ H]oestradiol <i>in vitro</i> by subcellular fractions of male rat livers. By M. E. BEARY and S. FRENCH	43P
Metabolism <i>in vitro</i> of [4- ¹⁴ C]4-androstene-3,17-dione by livers from normal and carbon tetrachloride-poisoned rats. By F. M. MARTIN and M. E. BEARY	44P
An intact muscle preparation suitable for studies of the metabolic effects of electrical stimulation. By E. B. FERN, V. M. PAIN and K. L. MANCHESTER	45P
The physiological role of taurine. By L. K. KACZMAREK and A. N. DAVISON	45P
Rapid oxidation of chondroitin sulphates and other glycols by periodic acid in organic solvents. By J. E. SCOTT and M. J. TIGWELL	46P

PAPERS ACCEPTED FOR PUBLICATION

- Protein and carbohydrate moieties of a preparation of β -lactamase II. By S. KUWABARA and P. H. LLOYD
- Acylation of carcinogenic hydroxamic acids by carbamoyl phosphate to form reactive esters. By P. D. LOTLIKAR and L. LUHA
- Oxidative phosphorylation in *Escherichia coli* K12. Mutations affecting magnesium ion- or calcium ion-stimulated adenosine triphosphatase. By J. D. BUTLIN, G. B. COX and F. GIBSON
- The cell-free synthesis of cytochrome *c* by a microsomal fraction from rat liver. By N. F. GONZALEZ-CADAVID, J. D. ORTEGA and M. GONZALEZ
- Cellular injury and carcinogenesis. The effect of a protein-free high-carbohydrate diet on the metabolism of dimethylnitrosamine in the rat. By P. F. SWANN and A. E. M. MCLEAN
- Effects of zinc and other metal ions on the stability and activity of *Escherichia coli* alkaline phosphatase. By C. N. A. TROTMAN and C. GREENWOOD
- Amino acid regulation of ribonucleic acid and protein synthesis in the liver of rats. By R. W. WANNEMACHER, JUN., C. F. WANNEMACHER and M. B. YATVIN
- Biochemical study of cardiac valvular tissue. Biosynthesis *in vitro* of hexosamine-containing substances in bovine heart valve. By Y. KANKE, Y. MORI, R. I. BASHEY and A. A. ANGRIST
- The development of gluconeogenesis in rat liver. Controlling factors in the newborn. By F. J. BALLARD
- Allotypically related sequences in the Fd fragment of rabbit immunoglobulin heavy chains. By L. E. MOLE, S. A. JACKSON, R. R. PORTER and J. M. WILKINSON
- Lipid metabolism by rat lung *in vitro*. Effect of starvation and re-feeding on utilization of [U-¹⁴C]glucose by lung slices. By R. W. SCHOLZ and R. A. RHOADES
- α -Crystallin I. The isolation and characterization of distinct macromolecular fractions. By A. SPECTOR, L.-K. LI, R. C. AUGUSTEYN, A. SCHNEIDER and T. FREUND
- α -Crystallin II. Fractionation of subunits and sequence studies on an isolated polypeptide. By R. C. AUGUSTEYN and A. SPECTOR

NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Theoretical contributions will be considered equally with papers dealing with experimental work. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1971), **121**, 1] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 15p. post free). In general the *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society)]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC-IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1971), **121**, 11]. For chemical nomenclature the IUPAC Rules should be followed [see *Biochem. J.* (1971), **121**, 11]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Oxford: Clarendon Press).

Two types of paper are accepted by the editors: **Full-length papers.** Papers submitted for publication should be sent together with an extra copy of the synopsis to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper

containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative title, by the names of the authors and by the name and address of the establishment where the work was performed. Details of financial support may appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including references and legends of tables and figures) on sheets of uniform size with wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted *in duplicate*, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications must not exceed 1200 words of text, but in addition may include either one table, typed on a separate sheet, or one figure, drawn according to the rules of the Journal. If no figure or table is included the text may be expanded to 1400 words. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.
