On the flavoenzyme hydroxynitril lyase (d-oxygenase)  E. GERSTNER and E. PFEIL 
Nuclear membranes from mammalian liver, V. On the question of DNA polymerase activities associated with the nuclear envelope  B. DEUMLING and W. W. FRANK 
Cyagenic bromide cleavage of Proteus mirabilis flagellin. Maleylation of cyagenic bromide peptides  H. GLOSSMANN and W. BODE 
Diurnal rhythm of 3-hydroxy-3-hydroxy-methylglutaryl-CoA reductase in rat liver, I: Change of the rhythm by shift of the light-dark phase  J. HUBER, B. HAMPECHT, O.-A. MÜLLER and W. GUDE 
Diurnal rhythm of hydroxymethylglutaryl-CoA reductase in rat liver, II: Rhythm of adrenalectomized animals  J. HUBER and B. HAMPECHT 
Substrate specificities of the neuraminidases of Newcastle disease and fowl plague viruses  R. T. C. HUANG and M. ORLICH 
Isolation and characterization of glycoproteins possessing inhibitory activity against various phytomagglutinins from human group A erythrocytes  Y. AKIYAMA and T. OSAWA 
Isolation and crystallization of glycerol-3-phosphate dehydrogenase from rabbit liver  J. OTTO, A. RAGGI, W. MACLIEEDT and T. BÜCHER 
Rule of antibody structure. The primary structure of a monoclonal immunoglobulin L-chain of the κ-type, subgroup I (Bence-Jones protein AD)  H. SCHEICH and N. HILSCHMANN 
Sex-specific allogeneic patterns of testosterone metabolism in rat liver and their alteration following interference with the sex determination  H. SCHRIEFERS, R. GHRAF and E. R. LAX 
Hydrogenation of ring A of hydroxy derivatives of testosterone and androstenedione by rat liver preparations  H. SCHRIEFERS, R. GHRAF and H. SCHMIDT 
Structural elements of anaphylatoxin obtained by contact activation of hog serum  M. LIEPLÄNDER, D. DIELENBURG, G. SCHMIDT and W. VOOGT 
Some structural requirements for the antibiotic action of distamycins, III: Possible interaction of the formyl group of distamycin side chain with adenine  P. CHANDRA, A. GÖTZ, A. WACKER, F. ZUNINO, A. DI MARCO, M. A. VERINI, A. M. CASAZZA, A. FIORETTI, F. ARCAMONE and M. GHONE 
Metabolic alterations in perfused rat liver following pretreatment with the antipolytic agent 3,5-dimethylisoxazole  W. POER, U. FANTEN and A. HASSELBLATT 

Sphingolipids in blood platelets of the pig  H. HECKERS and W. STOFFEL 
Biological activity of 1-phenyl-2-ethanol and its derivatives, VI: Influence on amino acid incorporation into reticulocytes and into a reticulocyte cell-free system  R. E. FERNANDEZ DE SCHUTTENBURG, W. E. G. MÜLLER and R. K. ZAHN 
Incorporation of ethylmopantothenic acid into a biologically active homologue of coenzyme A (pantoethylo-CoA) by lactic acid bacteria  TH. WIELAND, E. DRAEGER and E. F. MÜLLER 
Purification and crystallization of yeast pyruvate kinase  P. RÖSCHLAU and B. HESS 
Affinity chromatography of yeast pyruvate kinase with cibacronblau bound to sephadex G-200  P. RÖSCHLAU and B. HESS 
Isolation and partial structural analysis of insulin from mouse (Mus musculus) and spiny mouse (Acromys cahirinus)  H. F. BÜNZLI and R. E. HUMBEL 
Amino acid sequence of the two insulins from mouse (Mus musculus)  H. F. BÜNZLI, B. GLATTHAAR, P. KUNZ, E. MÜLHAUPT and R. E. HUMBEL 
Light-scattering studies on the polymeric form of chicken liver acetyl-CoA carboxylase  G. HENNIGER and S. NUMA 
Catechol-O-methyltransferase, II: Influence of effectors on the initial velocity pattern  L. FLOTÉ and K.-P. SCHWABE 
Catechol-O-methyltransferase III: Relationship between the structure of flavonoids and their ability to inhibit catechol-O-methyltransferase  K.-P. SCHWABE and L. FLOTÉ 

SHORT COMMUNICATIONS 
New polyvalent protease inhibitors for trypsin, chymotrypsin, plasmin and kallikreins from snails (Helix pomatia)  H. TSCHESCHE, T. DIETL, R. MARX and H. FRIEDT 
The primary structure of a monoclonal κ-type immunoglobulin L-chain (Bence Jones protein Scw): A further sub-subgroup of κ?  M. EULITZ, D. GÖTZ and N. HILSCHMANN 
The uropygial gland fat from the ring dove (Columba palumbus)  J. JACOB and A. ZEMAN 
Semihydroxy-δ-ascorbic acid as a substrate of microsomal NADH-semidehydroascorbate oxidoreductase (EC 1.6.5.4)  G. OEHLER, W. WEIS and HJ. STAUDINGER
The Journal of General Microbiology

Volume 69, Part 3. December 1971

Now put an end to mouth pipetting!

The Oxford Laboratories sampler has allowed a tremendous improvement in the ACCURACY, PRECISION AND SAFETY of pipetting in thousands of laboratories throughout the world. With the addition of the DUAL and TRIPLE range instruments it is now economically possible for every laboratory to put an end to mouth pipetting.

DUAL RANGE SAMPLER
2 different volumes can be selected

TRIPLE RANGE SAMPLER
3 different volumes can be selected.

Like the Mono-Sampler the Dual and Triple range will pick up and dispense serum or aqueous solution with a precision of ± 1%. Meniscus readings and the errors they cause are eliminated.

The sample material is drawn into a disposable polypropylene tip. It never enters the instrument, and as a fresh tip is used for each sample there is no possibility of cross-contamination.

The disposable tips are non-wetting. This eliminates the need to rinse the tip of any residual sample, and provides the advantage of a rapid “to deliver” technique with the precision of a “to contain” method.

Many different sizes are available up to 1.0ml please write for details.

The Boehringer Corporation (London) Ltd., Bilton House, Uxbridge Road, London W5 2TZ
Now greater than 40Ci/mmol—and no increase in prices!

**Thymidine** [methyl-\(^3\text{H}\)]

& **Uridine** [5,6-\(^3\text{H}\)]

As an extension to the widest range of thymidines and uridines commercially available, The Radiochemical Centre announce the availability (from stock) of thymidine and uridine at specific activities of greater than 40 Curies/mmol—twice the specific activity previously available.

In The Radiochemical Centre catalogue you will now find a total of three thymidines [\(^3\text{H}\)] in 10 specific activities, and a total of 4 uridines [\(^3\text{H}\)] in 5 different specific activities—all available from stock.

There are altogether 15 choices—and the highest specific activities cost no more than the lowest.

Full information is available on request.
