

Contents of Volume 129, No. 3, 1972

	PAGE		PAGE
Bases methylated <i>in vitro</i> by cell-free extracts of adenovirus-18-induced tumours. By E. S. McFarlane	513	Structures of bilirubin conjugates synthesized <i>in vitro</i> from bilirubin and uridine diphosphate glucuronic acid, uridine diphosphate glucose or uridine diphosphate xylose by preparations from rat liver. By J. Fevery, P. Leroy, M. Van de Vijver & K. P. M. Heirwegh	635
Differences in the patterns of methylation in rat liver ribosomal ribonucleic acid after reaction <i>in vivo</i> with methyl methanesulphonate and <i>NN</i> -dimethylnitrosamine. By P. J. O'Connor, M. J. Capps, A. W. Craig, P. D. Lawley & S. A. Shah	519	Interaction of soluble glucosyl- and mannosyl-transferase enzyme activities in the synthesis of a glucomannan. By J. S. Heller & C. L. Villemez	645
Glycogen synthesis in the perfused liver of the starved rat. By D. A. Hems, P. D. Whitton & E. A. Taylor	529	Studies on the biosynthesis <i>in vivo</i> and excretion of 16-unsaturated C ₁₉ steroids in the boar. By Y. A. Saat, D. B. Gower, F. A. Harrison & R. B. Heap	657
Mechanism of biosynthesis of thio- β -D-glucuronides and thio- β -D-glucosides. By G. J. Dutton & H. P. A. Illing	539	Studies of the denaturation and partial re-naturation of ovalbumin. By J. C. Holt & J. M. Creeth	665
The mode of action of adenosine 3':5'-cyclic monophosphate in mammalian islets of Langerhans. Preparation and properties of islet-cell protein phosphokinase. By W. Montague & S. L. Howell	551	Pepsin treatment of avian skin collagen. Effects on solubility, subunit composition and aggregation properties. By D. W. Bannister & A. B. Burns	677
The primary structure of cytochrome <i>c</i> from the rust fungus <i>Ustilago sphaerogena</i> . By K. G. Bitar, S. N. Vinogradov, C. Nolan, L. J. Weiss & E. Margoliash	561	The acid and enzymic hydrolysis of <i>O</i> -acetylated sialic acid residues from rabbit Tamm-Horsfall glycoprotein. By A. Neuberger & W. A. Ratcliffe	683
Aspartate transcarbamoylase from <i>Phaseolus aureus</i> . Partial purification and properties. By B. L. Ong & J. F. Jackson	571	Complete amino acid analysis of peptides and proteins after hydrolysis by a mixture of Sepharose-bound peptidases. By H. P. J. Bennett, D. F. Elliott, B. E. Evans, P. J. Lowry & C. McMartin	695
Pyrimidine nucleotide biosynthesis in <i>Phaseolus aureus</i> . Enzymic aspects of the control of carbamoyl phosphate synthesis and utilization. By B. L. Ong & J. F. Jackson	583	<i>S</i> -Adenosylmethionine decarboxylase from human prostate. Activation by putrescine. By V. Zappia, M. Carteni-Farina and G. Della Pietra	703
The metabolism of cyclopentanol by <i>Pseudomonas</i> N.C.I.B. 9872. By M. Griffin & P. W. Trudgill	595	A study of the phosphate linkages in phosphomannan in cell walls of <i>Saccharomyces cerevisiae</i> . By T. N. Cawley, M. G. Harrington & R. Letters	711
Assay and properties of digitonin-activated bilirubin uridine diphosphate glucuronyltransferase from rat liver. By K. P. M. Heirwegh, M. Van de Vijver & J. Fevery	605	The binding of ribosomal subunits to endoplasmic reticulum membranes. By F. S. Rolleston	721
Enzymic transfer of glucose and xylose from uridine diphosphate glucose and uridine diphosphate xylose to bilirubin by untreated and digitonin-activated preparations from rat liver. By J. Fevery, P. Leroy & K. P. M. Heirwegh	619	Phospholipid of the rat glomerular basement membrane in experimental nephrosis. By K. K. Fung & N. Kalant	733

	PAGE		PAGE
The enzymic conversion of linoleic acid into 9-(nona-1',3'-dienoxy)non-8-enoic acid, a novel unsaturated ether derivative isolated from homogenates of <i>Solanum tuberosum</i> tubers. By T. Galliard & D. R. Phillips	743	A comparative study of the molecular structures of the plasma membranes and the smooth and the rough endoplasmic-reticulum membranes from rat liver. By F. Morin, S. Tay & H. Simpkins	781
The oxidation of nicotinic acid by <i>Pseudomonas ovalis</i> Chester. The terminal oxidase. By M. V. Jones & D. E. Hughes	755	Short Communications	
Mechanisms regulating adipose tissue pyruvate dehydrogenase. By B. R. Martin, R. M. Denton, H. T. Pask & P. J. Randle	763	The distribution of glucose phosphate isomerase isoenzymes in sweet potato and its tissue culture. By T. Sasaki, K. Tadokora & S. Suzuki	789
Potassium ion-stimulated and sodium ion-independent adenosine diphosphate-adenosine triphosphate exchange activity in a kidney microsomal fraction. By S. P. Banerjee & S. M. E. Wong	775	Effect of a low-protein diet on the incorporation of amino acids into rat serum lipoproteins. By A. Seakins & J. C. Waterlow	793
Proceedings of the Biochemical Society		The ready isomerization of bilirubin IX- α in aqueous solution. By A. F. McDonagh & F. Assisi	797
	PAGE		PAGE
Ribosomal proteins and the assembly of ribosomes in eukaryotes. By J. R. Warner, A. Kumar, S. A. Udem & R. S. Wu	29 P	Mitochondrial ribosomes of the yeast <i>Saccharomyces cerevisiae</i> : electron microscopy. By K. Watson & A. Green	36 P
Chemical studies on ribosomal ribonucleic acid and ribosome formation in HeLa cells. By B. E. H. Maden, M. Salim, R. Williamson & J. Shepherd	30 P	Isolation and characterization of mitochondrial ribosomes from higher plants. By C. J. Leaver & M. A. Harmey	37 P
Structure and function of 70S ribosomal proteins. By H. G. Wittmann	30 P	The distinction between various functional states of hepatic ribosomes, and different distributions of ribosomes between these states in fed and in starved mice. By M. R. Norman & S. Gamulin	38 P
80S ribosomal proteins. By H. J. Gould, O. H. W. Martini & H. S. W. King	31 P	The effects of trimethoprim on ribonucleic acid synthesis in <i>Escherichia coli</i> . By R. J. Smith	38 P
The genes for ribosomal ribonucleic acid. By P. J. Ford	32 P	The formation of MS nucleotides in <i>Escherichia coli</i> inhibited by trimethoprim. By J. E. M. Midgley	39 P
Ribosome formation in yeast. By T. H. Rozijn	33 P	Effect of pseudorabies virus on the metabolism of low-molecular-weight ribonucleic acid in BHK-C13 cells. By J. C. Abrahams & J. Hay	39 P
Ribosomal ribonucleic acid in evolution. By U. E. Loening	35 P	Specificity of transfer ribonucleic acid methylases from normal mouse colon and 1,2-dimethylhydrazine-induced colon tumours. By A. E. Pegg	40 P
Regulation of ribosome synthesis. By R. P. Perry	35 P	Reactions of 'K'-region epoxides of polycyclic hydrocarbons with nucleic acids and polyribonucleotides. By P. L. Grover & P. Sims	41 P
Mitochondrial ribosomes of the yeast <i>Saccharomyces cerevisiae</i> : isolation. By A. Green & K. Watson	36 P		

	PAGE		PAGE
The formation of an epoxide in the microsomal metabolism of 7,12-dimethylbenz[<i>a</i>]anthracene. By G. R. Keysell, J. Booth, P. Sims, P. L. Grover & A. Hewer	41 P	A mutant of <i>Candida utilis</i> with a novel terminal oxidase. By J. A. Downie & P. B. Garland	47 P
Tertiary-structure transitions of supercoiled deoxyribonucleic acid. By D. J. Jolly & A. M. Campbell	42 P	Proton translocation by rat liver mitochondria with quinones as terminal acceptors. By H. G. Lawford & P. B. Garland	47 P
The perinatal development of haem biosynthesis in rats, guinea pigs and humans. By M. R. Moore, G. G. Thompson, R. A. L. Low & R. L. C. Cumming	43 P	Ornithine decarboxylase activity during kidney growth. By W. T. Melvin & R. Y. Thomson	48 P
Lead, ethanol and δ -aminolaevulinic acid dehydratase. By M. R. Moore	43 P	Changes in the pyrimidine deoxynucleoside triphosphate pools of L5178Y cells after their exposure to methotrexate and 5-fluorouracil. By M. H. N. Tattersall, M. E. Furness, S. Jackson & K. R. Harrap	48 P
The increased anti-tumour activity of chlorambucil after pretreatment with phenobarbitone. By B. T. Hill	44 P	A factor responsible for thymineless death in <i>Bacillus subtilis</i> . By R. N. Buick & W. J. Harris	49 P
Lysosomal enzymes and degradation of the proteoglycans of the human vertebral disc. By C. H. Pearson, F. Happey, A. Naylor, J. M. Osborn & R. L. Turner	44 P	A comparison of the utilization of thymine and thymidine as precursors for deoxyribonucleic acid synthesis in <i>Bacillus subtilis</i> , and their specific inhibition by 6-(<i>p</i> -hydroxyphenylazo)-uracil and caffeine. By L. Fraser, A. I. Mitchell & W. J. Harris	49 P
Cation-dependence of phosphatase activity in bull spermatozoa. By J. M. O'Donnell & J. C. Ellory	45 P	The heterogeneity of chromatin non-histone proteins. By A. J. MacGillivray, D. Rickwood & J. Paul	50 P
An electron-microscope technique for measuring ribosomal profiles from cardiac muscle. By K. Hearn, K. Gibson & P. Harris	46 P	Studies on the phosphorylation of chromatin non-histone proteins and their effect on deoxyribonucleic acid transcription. By D. Rickwood, G. Threlfall, A. J. MacGillivray, J. Paul & P. Riches	50 P
Giant mitochondria in iron- or copper-deficient <i>Candida utilis</i> . By M. J. Davison, J. A. Downie & P. B. Garland	46 P	Homopolymer sequences in mammalian deoxyribonucleic acid. By A. Shenkin & R. H. Burdon	51 P
