

THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1972-73

Chairman of the Committee

T. W. Goodwin, F.R.S.

Treasurer

D. F. Elliott

Committee Secretary

A. N. Davison

Meetings Secretary

H. M. Keir

International Secretary

A. P. Mathias

Committee

R. B. Beechey

E. A. Dawes

R. M. C. Dawson

D. T. Elmore

K. Griffiths

R. Hoffenberg*‡

G. D. Hunter

V. H. T. James

C. F. Mills

C. A. Pasternak†

P. J. Randle

D. S. Robinsont

T. A. Scott

T. F. Slater

Ruth E. van Heyningen

D. G. Walker*†

A. M. White

T. S. Work

**Ex officio* Member of Committee.

†Representative of Editorial Board of the *Biochemical Journal*.

‡Representative of Editorial Board of *Clinical Science*.

Symposium Organizer

R. M. S. Smellie

The **Biochemical Society** exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

The *Biochemical Journal* is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1972. The index for each volume is published separately.

Subscriptions to the *Biochemical Journal*. For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the subscription is \$112 per year (subject to exchange variation) (\$22.50 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims can be entertained if they are received later than three months after the date of posting of the Journal.

Back Numbers. Enquiries for volumes 1-9 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., 24/28 Oval Road, London NW1 7DX, or to The Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1-89 (1906-1963) have been recorded on microfilm by the EP Group, Microfilm Division, Bradford Road, East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

Papers Accepted for Publication

Binding of rat liver and hepatoma polyribosomes to stripped rough endoplasmic reticulum *in vitro*. Biological or an artifact?

By A. A. Hochberg, F. W. Stratman, R. N. Zahlten, H. P. Morris & H. A. Lardy

The isolation, properties and amino acid sequence of erabutoxin c, a minor neurotoxic component of the venom of the sea snake *Laticauda semifasciata*.

By N. Tamiya & H. Abe

Proteoglycans of the knee-joint cartilage of young normal and lame pigs.

By Z. Šimůnek & H. Muir

The type-specific substance from *Pneumococcus* type 13.

By M. J. Watson, J. M. Tyler, J. G. Buchanan & J. Baddiley

The transfer of mannose from guanosine diphosphate mannose to dolichol phosphate and protein by pig liver endoplasmic reticulum.

By J. B. Richards & F. W. Hemming

Metabolic studies in experimental liver disease resulting from D(+)-galactosamine administration.

By C. O. Record, K. G. M. M. Alberti & D. H. Williamson

Interaction of prostaglandins with blood plasma proteins. Comparative binding of prostaglandins A₂, F_{2α} and E₂ to human plasma proteins.

By A. Raz

Epoxy derivatives of aromatic polycyclic hydrocarbons. The synthesis of dibenz[*a,c*]anthracene 10,11-oxide and its metabolism by rat liver preparations.

By P. Sims

Preparation of gram quantities of a purified R-factor-mediated penicillinase from *Escherichia coli* strain W3310.

By J. Melling & G. K. Scott

The bacterial degradation of flavonoids. Hydroxylation of the A-ring of taxifolin by a soil pseudomonad.

By A. M. Jeffrey, M. Knight & W. C. Evans

The bacterial degradation of flavonoids. Oxidative fission of the A-ring of dihydrogossypetin by a *Pseudomonas* sp.

By A. M. Jeffrey, D. M. Jerina, R. Self & W. C. Evans

The role of zinc ions in the R transformation of lymphocytes by phytohaemagglutinin.

By J. K. Chesters

Activation of brain hexokinase by magnesium ions and by magnesium ion-adenosine triphosphate complex.

By D. L. Purich & H. J. Fromm

Ribitol and flavinogenesis in *Eremothecium ashbyii*.

By S. U. Mehta, A. K. Mattoo & V. V. Modi

Synthesis of ribonucleic acid in the venom gland of *Crotalus durissus terrificus* (Ophidia, Reptilia) after manual extraction of the venom.

By F. L. De Lucca & M. T. Imaizumi

Increase in hepatic catalase and glycerol phosphate dehydrogenase activities on administration of clofibrate and clofenapate to the rat.

By T. P. Krishnakantha & C. K. R. Kurup

Metabolism of myricetin and related compounds in the rat. Metabolite formation *in vivo* and by the intestinal microflora *in vitro*.

By L. A. Griffiths & G. E. Smith

Partial purification and properties of rat liver mitochondrial polynucleotide phosphorylase.

By Y. P. See & P. S. Fitt

A study of the localization of polynucleotide phosphorylase within rat liver cells and of its distribution among rat tissues and diverse animal species.

By Y. P. See & P. S. Fitt

NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Theoretical contributions will be considered equally with papers dealing with experimental work. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1972), 126, 1–19] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 15p. post free). The *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Pure Appl. Chem.* (1970), 21, 1–44; *Quantities, Units and Symbols* (1971), The Royal Society, London]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC–IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1972), 126, 9]. For chemical nomenclature the IUPAC Rules should be followed [see *Biochem. J.* (1972), 126, 12]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Oxford: Clarendon Press).

Two types of paper are accepted by the editors:

Full-length papers. Papers submitted for publication should be sent together with an extra copy of the synopsis (see below) to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Special attention is directed to the sections below concerning the preparation of the typescript. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board

implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative full title, by the names of the authors (preferably with one forename in full for each author) and by the name and address of the establishment where the work was performed. Details of financial support appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size and wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted in duplicate, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications should not exceed 2400 words in length inclusive of the title, references etc. Authors may include up to two insertions such as tables, figures or schemes; in these cases authors must assess what proportion of a page these insertions will occupy and reduce the number of text words accordingly at the rate of 700 words per full page of the Journal. Authors are advised that the preparation of tables and especially figures is liable to cause a slight increase in publication time. Under no circumstances whatsoever can a complete Short Communication occupy more than four pages of the Journal. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.

Proceedings of the Biochemical Society

THE FIVE HUNDRED AND TWENTY-EIGHTH MEETING
held at Glasgow
