THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1972–73

Chairman of the Committee
T. W. Goodwin, F.R.S.

Committee
R. B. Beechey
E. A. Dawes
R. M. C. Dawson
D. T. Elmore
K. Griffiths
R. Hoffenberg†
G. D. Hunter
V. H. T. James
C. F. Mills
C. A. Pasternak†
P. J. Randle
D. S. Robinson†

T. A. Scott
T. F. Slater
Ruth E. van Heyningen
D. G. Walker*†
A. M. White
T. S. Work

*Ex officio Member of Committee.
†Representative of Editorial Board of the Biochemical Journal.
‡Representative of Editorial Board of Clinical Science.

Symposium Organizer
R. M. S. Smellie

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, in four or more volumes per year. It is planned that five volumes will appear in 1972. The index for each volume is published separately.

Subscriptions to the Biochemical Journal. For non-members of the Biochemical Society the subscription to the Journal at the present rate of publication is £45 per year (£9 per volume). For non-members in the U.S.A. the subscription is $112 per year (subject to exchange variation) ($22.50 per volume). All subscriptions are payable in advance at the time of ordering. Orders and subscriptions should be sent to the Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address in the preceding paragraph. No claims can be entertained if they are received later than three months after the date of posting of the Journal.

Back Numbers. Enquiries for volumes 1–9 should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts may be obtained on application to Walter J. Johnson Ltd., 24/28 Oval Road, London NW1 7DX, or to The Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1–89 (1906–1963) have been recorded on microfilm by the EP Group, Microfilm Division, Bradford Road, East Ardsley, Wakefield, Yorks. Details are available from the firm or the Biochemical Society.

## CONTENTS

The effect of local anaesthetics on lipolysis in fat-cells.  
*By K. Siddle & C. N. Hales*  
34P

The purification and some properties of wheat-germ agglutinin.  
*By A. K. Allen & A. Neuberger*  
35P

Intermediates in the reversible dissociation of apoferritin.  
*By R. R. Crichton*  
35P

The catalytic activity of apoferritin.  
*By R. R. Crichton & C. F. A. Bryce*  
36P

A proposed structure for *Streptomyces griseus* protease A.  
*By P. Johnson & L. B. Smillie*  
36P

Influence of a 17β-sulphate group on reduction of a steroid 3-oxo group by cortisone reductase.  
*By W. Gibb & J. Jeffery*  
37P

A major influence of a 1α,2α-methylene group on reduction of a steroid 3-oxo group by two nicotinamide–adenine dinucleotide-linked 3-hydroxy steroid oxidoreductases.  
*By W. Gibb & J. Jeffery*  
37P

The effects of thiols on oestriadiol binding by components of human malignant breast tumours.  
*By H. Braunsberg, E. Killen & S. G. Richardson*  
38P

Functional groups in the catalysis and regulation of *Escherichia coli* citrate synthase.  
*By M. J. Danson & P. D. J. Weitzman*  
38P

The regulation of *Acinetobacter* sp. α-oxoglutarate dehydrogenase complex.  
*By M. G. Parker & P. D. J. Weitzman*  
39P

A simple method for the determination of the endo or exo nature of carbohydrates acting on polymeric substrates.  
*By P. M. Dey, I. R. Rached & K. Wallenfels*  
39P

The presence of sulphated polysaccharide in the cell envelopes of *Halobacterium halobium*.  
*By M. Konewicz*  
40P

Peptidoglycan lytic system associated with mesosomal membranes from *Micrococcus lysodeikticus*.  
*By D. J. Ellar & J. A. Postgate*  
41P

Endotoxins in a lipopolysaccharide preparation and cell envelope of *Escherichia coli*.  
*By J. Janda*  
41P

The interpretation of abrupt transitions in Lineweaver–Burk plots.  
*By P. C. Engel*  
42P

The acylation of endogenous lysosphospholipids in isolated rat liver microsomal fraction: influence of glutathione and ethylenediaminetetra-acetate on this process.  
*By L. Gosselin*  
43P

Membrane fluidity and membrane fusion.  
44P

The fusion of hen erythrocytes by non-ionic surface-active adjuvants.  
44P

Analysis of enzyme mechanisms and metabolic pathways.  
*By J. A. Illingworth*  
45P

Papers Accepted for Publication

Metabolism of glutamine and glutamic acid by the isolated perfused kidney of normal and acidotic rats.
   By D. A. Hems

A polymer of N-acetylglucosamine 1-phosphate in the wall of Staphylococcus lactis 2102.
   By A. R. Archibald & G. H. Stafford

Isolation and characterization of C1q, a subcomponent of the first component of complement, from human and rabbit sera.
   By K. B. M. Reid, D. M. Lowe & R. R. Porter

The effect of aflatoxin B1 on normal and cortisol-stimulated rat liver ribonucleic acid synthesis.
   By G. E. Neal

Mode of degradation of the chondroitin sulphate proteoglycan in rat costal cartilage.
   By Å. Wasteson, U. Lindahl & A. Hallen

The dissociation of avidin–biotin complexes by guanidinium chloride.
   By N. M. Green & E. J. Toms

Choline metabolism in the cerebral cortex of guinea pigs. Stable bound acetylcholine.
   By L. A. Barker, M. J. Dowdall & V. P. Whittaker

Choline metabolism in the cerebral cortex of guinea pigs. Phosphorylcholine and lipid-choline.
   By M. J. Dowdall, L. A. Barker & V. P. Whittaker

Anthranilate synthase/anthranilate 5'-phosphoribosyl 1-pyrophosphate phosphoribosyltransferase from Aerobacter aerogenes.
   By A. F. Egan & F. Gibson

A possible ribosomal-directed regulatory system in Euglena gracilis. Chlorophyll synthesis.
   By M. Perl

A possible ribosomal-directed regulatory system in Euglena gracilis. Carbon dioxide fixation.
   By R. Wolfvitch & M. Perl

X-ray crystallography and the amino acid sequence of lysozyme.
   By A. R. Rees & R. E. Offord

Partial purification and properties of the two common inherited forms of human erythrocyte adenylate kinase.
   By C. Brownson & N. Spencer

Kinetic studies on the two common inherited forms of human erythrocyte adenylate kinase.
   By C. Brownson & N. Spencer

Evidence for modification of protein phosphorylation by cytokinins.
   By R. K. Ralph, P. J. A. McCombs, G. Tener & S. J. Wojcik

The ionogenic nature of the secretory granule membrane. Electrokinetic properties of isolated chromaffin granules.
   By E. K. Mathews, R. J. Evans & P. M. Dean

Early effects of oestradiol-17β on the chromatin and activity of the deoxyribonucleic acid-dependent ribonucleic acid polymerases (I and II) of the rat uterus.
   By S. R. Glasser, F. Chytil & T. C. Spelsberg

Adenine derivatives as neurohumoral agents in the brain. The quantities liberated on excitation of superfused cerebral tissues.
   By I. Pull & H. McIlwain

Some examples of the use of computer-produced contour plots in the fitting of enzyme rate equations to reaction velocity measurements.
   By J. H. Ottaway & D. K. Apps
NOTES FOR CONTRIBUTORS

It is the policy of the Biochemical Journal to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Theoretical contributions will be considered equally with papers dealing with experimental work. Preliminary or inconclusive experiments should not generally be described.

Two types of paper are accepted by the editors: Full-length papers. Papers submitted for publication should be sent together with an extra copy of the synopsis (see below) to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Special attention is directed to the sections below concerning the preparation of the typescript. Typescripts that are not concise or do not conform to the conventions of the Biochemical Journal will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on re-submission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the Biochemical Journal it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative full title, by the names of the authors (preferably with one forename in full for each author) and by the name and address of the establishment where the work was performed. Details of financial support appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size and wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted in duplicate, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Such communications should not exceed 2400 words in length inclusive of the title, references etc. Authors may include up to two insertions such as tables, figures or schemes; in these cases authors must assess what proportion of a page these insertions will occupy and reduce the number of text words accordingly at the rate of 700 words per full page of the Journal. Authors are advised that the preparation of tables and especially figures is liable to cause a slight increase in publication time. Under no circumstances whatsoever can a complete Short Communication occupy more than four pages of the Journal. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.
Proceedings of the Biochemical Society

THE FIVE HUNDRED AND TWENTY-NINTH MEETING held at Cambridge

The Editors of The Biochemical Journal accept no responsibility for the Reports of the Proceedings of the Biochemical Society
