The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

Application to mail at second-class postage rates is pending at Long Island City, N.Y.
The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, alternate issues being devoted to Molecular Aspects and to Cellular Aspects of biochemistry. It is planned that in 1973 six volumes, each volume being made up of four issues, will be published according to the following schedule:

<table>
<thead>
<tr>
<th>Molecular Aspects</th>
<th>Cellular Aspects</th>

Biochemical Society Transactions is a new publication commencing January 1973. It includes extended abstracts of communications (including reports on colloquia and the text of Special Lectures) presented at meetings of the Biochemical Society, book reviews etc. (Note: the Proceedings of the Biochemical Society ceased publication in the Biochemical Journal at the end of 1972.) In 1973 it is planned that one volume, composed of six issues, will be published.

Biochemical Society Transactions is issued free to all subscribers of the Biochemical Journal only: it is not available on a separate subscription.

Subscriptions to the Biochemical Journal and Biochemical Society Transactions. For non-members of the Biochemical Society the subscription in 1973 for the Journal (plus Transactions) is £70 per year. For non-members in the U.S.A. the subscription is $180 per year (subject to exchange variation). Terms are cash with order or against proforma invoice. Orders and subscriptions should be sent to the Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex, or through your normal agent.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address given in the preceding paragraph. Claims cannot be entertained if they are received later than three months after the date of posting.

Back Numbers. Enquiries for volumes 1–19 of the Journal should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts of the Journal, and also of Transactions, may be obtained on application to The Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1–89 (1906–1963) of the Journal have been recorded on microfilm by the EP Group, Microfilm Division, Bradford Road, East Ardsley, Wakefield, Yorks. Details are available from them or the Biochemical Society.

Papers Accepted for Publication

A reappraisal of the effects of adenosine 3′:5′-cyclic monophosphate on the function and morphology of the rat prostate gland.
   By F. R. Mangan, A. E. Pegg & W. I. P. Mainwaring

The use of deoxyribonucleic acid–cellulose chromatography and isoelectric focusing for the characterization and partial purification of steroid-receptor complexes.
   By W. I. P. Mainwaring & R. Irving

The purification and properties of Factor X from pig serum and its role in hypercoagulability in vivo.
   By R. J. Dupe & R. M. Howell

Induction and suppression of the key enzymes of glycolysis and gluconeogenesis in isolated perfused rat liver in response to glucose, fructose and lactate.
   By J. Wimhurst & K. L. Manchester

The site at which 4-iodoacetamidosalicylate reacts with glutamate dehydrogenase.
   By J. J. Holbrook, P. A. Roberts & R. B. Wallis

The effect of modifying lysine-126 on the physical, catalytic and regulatory properties of bovine liver glutamate dehydrogenase.
   By R. B. Wallis & J. J. Holbrook

The reaction of a histidine residue in glutamate dehydrogenase with diethyl pyrocarbonate.
   By R. B. Wallis & J. J. Holbrook

Activities of hexokinase, phosphofructokinase, 3-oxo acid coenzyme A-transferase and acetoacetyl-coenzyme A thiolase in nervous tissue from vertebrates and invertebrates.
   By P. H. Sugden & E. A. Newsholme

The association between phosphatidylinositol phosphodiesterase activity and a specific subunit of microtubular protein in rat brain.
   By P. J. Quinn

Regulation of renal gluconeogenesis by calcium ions, hormones and adenosine 3′:5′-cyclic monophosphate.
   By A. Roobol & G. A. O. Alleyne

Microbial metabolism of amino alcohols. 1-Amino-propan-2-ol and ethanolamine metabolism via propionaldehyde and acetaldehyde in a species of Pseudomonas.
   By A. Jones & J. M. Turner

Ribonucleic acid synthesis in chloroplasts.
   By M. R. Hartley & R. J. Ellis

Biosynthesis of ergotamine by Claviceps purpurea (Fr.) Tul.
   By R. A. Bassett, E. B. Chain & K. Corbett

Effects of infection with Diplococcus pneumoniae on synthesis of ribonucleic acids in rat liver
   By W. L. Thompson & R. W. Wannemacher, Jr.

Effect of L-leucine on the nitrogen metabolism of isolated rat liver mitochondria.
   By J. D. McGivan, N. M. Bradford, M. Crompton & J. B. Chappell

Fluorocitrate inhibition of aconitate hydratase and the tricarboxylic acid carrier of rat liver mitochondria
   By M. D. Brand, S. M. Evans, J. Mendes-Mourão & J. B. Chappell
NOTES FOR CONTRIBUTORS

It is the policy of the Biochemical Journal to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not generally be described.

Two types of paper are accepted by the editors: Full-length papers. Papers submitted for publication should be sent together with an extra copy of the synopsis (see below) to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Special attention is directed to the sections below concerning the preparation of the typescript. Typescripts that are not concise or do not conform to the conventions of the Biochemical Journal will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the Biochemical Journal it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative title, by the names of the authors (preferably with one forename in full for each author) and by the name and address of the establishment where the work was performed. Details of financial support appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size and wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted in duplicate, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Each Short Communication should be provided with a short synopsis (normally not exceeding 50 words). Such communications should not exceed 2400 words in length inclusive of the title, references etc. Authors may include up to two insertions such as tables, figures or schemes; in these cases authors must assess what proportion of a page these insertions will occupy and reduce the number of text words accordingly at the rate of 700 words per full page of the Journal. Authors are advised that the preparation of tables and especially figures is liable to cause a slight increase in publication time. Under no circumstances whatsoever can a complete Short Communication occupy more than four pages of the Journal. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.

Acetaldehyde, inhibition by, of the pyruvate dehydrogenase complex from ox cerebral cortex and ox kidney (Blass, J. P. & Lewis, C. A.) 415–416
Acetaldehyde, kinetics and mechanism of the reaction catalyzed by baker's-yeast alcohol dehydrogenase with, and a variety of other substrates (Dickinson, F. M. & Monger, G. P.) 261–270
Acetylcholinesterase, erythrocyte, human, modification of the activity of, by 5,5'-dithiobis-(2-nitrobenzoate) included in the coupled spectrophotometric assay (Brownson, C. & Watts, D. C.) 369–374
Acetyl-coenzyme A, lack of effect of, on partially purified ox cerebral-cortex pyruvate dehydrogenase complex (Blass, J. P. & Lewis, C. A.) 31–37
Acetylene, kinetics of the reduction of nitrogen and, by the nitrogenase complex from soybean-root-nodule bacteroids (Bergersen, F. J. & Turner, G. L.) 61–75
N-Acetylglucosamine, inhibition by, of wheat-germ agglutinin (Allen, A. K., Neuberger, A. & Sharon, N.) 155–162
N-Acetyl-β-D-glucosaminidase, liver, immunological properties of, from normal humans and from patients with GM2-gangliosidosis (Carroll, M. & Robinson, D.) 91–96
β-N-Acetylglucosaminidase, partial purification and properties of, from Sclerotinia fructigena (Reyes, F. & Byrde, R. J. W.) 381–388
Acid β-glucosidase, see β-Glucosidase, acid
Adenine nucleotides, effects of, on the activity of maize-seeding phospho(enol)pyruvate carboxylase (Wong, K. F. & Davies, D. D.) 451–458
Adenosine diphosphate, kinetics of the reaction between phospho(enol)pyruvate and, catalysed by rabbit skeletal-muscle pyruvate kinase (Ainsworth, S. & Macfarlane, N.) 223–236
Adenosine, inhibition by, of pig kidney alkaline phosphatase (Ramasamy, I. & Butterworth, P. J.) 359–367
Adenosine triphosphatase, activity of, of subfragment 1 preparations obtained by proteolysis with papain from the heavy chain of rabbit skeletal-muscle myosin (Stone, D. & Perry, S. V.) 127–137
Adenosine triphosphate, inhibition by, of the activity of rabbit liver pyruvate kinase (Irving, M. G. & Williams, J. F.) 287–301
Agglutinin, wheat-germ, purification, composition and specificity of (Allen, A. K., Neuberger, A. & Sharon, N.) 155–162
Agkistrodon rhodostoma, see Malay pit viper
Alanine, inhibition by, of the activity of rabbit liver pyruvate kinase (Irving, M. G. & Williams, J. F.) 287–301
Albumin, plasma, ox, interaction of quinacrine mustard with, and other proteins (Selandor, R.-K. & de la Chapelle, A.) 757–764
Alcian Blue 8GX, quantitative determination of glycosaminoglycans in urine with (Whiteman, P.) 351–357
Alcian Blue 8GX, quantitative measurement of complexes of glycosaminoglycans with (Whiteman, P.) 343–350
Alcohol dehydrogenase, baker's-yeast, kinetics and mechanism of the reaction catalysed by, with a variety of substrates (Dickinson, F. M. & Monger, G. P.) 261–270
Alcohol dehydrogenase, yeast, protein kinase activity in commercially available crystalline preparations of (Kemp, E. F., Frosio, M. & Murray, A. W.) 271–274
Alcohols, effect of neutral salt and, on the thermal stability of soluble and precipitated acid-soluble calf skin collagen (Russell, A. E.) 335–342
Aldolase, see Fructose diphosphate aldolase
Alkaline phosphatase, see Phosphatase, alkaline
Allantoin, effects of, on the activities of rat and mouse liver and brain guanine deaminase isoenzymes (Sree Kumar, K., Sitaramayya, A. & Krishnan, P. S.) 683–687
Allium porrum, see Leek
Aminoglucosides, purification and partial characterization of, from developing ox dental enamel (Eggert, F. M., Allen, G. A. & Burgess, R. C.) 471–484
Amino acid compositions of amelogenins purified from developing ox dental enamel (Eggert, F. M., Allen, G. A. & Burgess, R. C.) 471–484
Amino acid residues, stereoconfiguration of, in peptides isolated from a mycobacillin-synthesizing cell-free system prepared from Bacillus subtilis B4 (Sengupta, S. & Bose, S. K.) 623–624
Amino acid sequence, complete, evidence for, of pig pancreas elastase (Shotton, D. M. & Hartley, B. S.) 643–675
Amino acid sequence of cytochrome c from leek (Brown, R. H. & Boulter, D.) 247–251
Amino acid sequence of cytochrome c from spinach (Brown, R. H., Richardson, M., Scogin, R. & Boulter, D.) 253–256
Amino compounds, specificity of Streptomyces dde-carboxypeptidases acting as peptidyltransferases for, as carboxyl acceptors (Perkins, H. R., Nieto, M., Frère, J.-M., Leyh-Bouille, M. & Ghuysen, J.-M.) 707–718
Amino groups, protein, reaction of methyl iodopicolinimide with, and its possible use as a general method for preparing isomorphous heavy-atom derivatives of proteins (Riley, M. & Perham, R. N.) 625–635
5-Aminolaevulinate synthetase, purification and properties of, from Micrococcus denitrificans (Tait, G. H.) 389–403
3-Amino-L-tyrosine, reaction of methyl iodopicolinimide with (Riley, M. & Perham, R. N.) 625–635
Apolipoprotein, spleen, horse, molecular weight of the oligomer of, and its stability to dissociation by dilution (Crichton, R. R., Eason, R., Barclay, A. & Bruce, C. F. A.) 855–857
INDEX OF SUBJECTS

Arginine esterase, correlation of the coagulant activity of Arvin from the venom of the Malayan pit viper with activity of (Hatton, M. W. C.) 799–807
Arvin, isolation and properties of, from the venom of the Malayan pit viper (Hatton, M. W. C.) 799–807
L-Ascorbate, stimulation by, of the activity of rat liver phenylalanine hydroxylase (Stone, K. J. & Townsley, B. H.) 611–613
Aspartate carbamoyltransferase, wheat-germ, effects of ligands on the inactivation of, by trypsin and denaturing agents (Yon, R. J.) 699–706
Aspartate, inhibition by, of maize-seeding phospholipid pyruvate carboxylase (Wong, K. F. & Davies, D. D.) 451–458

Bacillus licheniformis N.C.T.C. 6346, selective extraction of teichuronic acids from the cell walls of, and other Gram-positive bacteria (Pavlik, J. G. & Rogers, H. J.) 619–621

Bacillus subtilis B3, stereoconfiguration of the amino acid residues in peptides isolated from a mycobacillin-synthesizing cell-free system prepared from (Sengupta, S. & Bose, S. K.) 623–624

Bacillus subtilis 168, selective extraction of teichuronic acids from the cell walls of, and other Gram-positive bacteria (Pavlik, J. G. & Rogers, H. J.) 619–621

Bacteriophage T4, improved preparation of Escherichia coli infected with, for the isolation of polynucleotide kinase (Hughes, S. G. & Brown, P. R.) 583

Bacteriophage λ, use of polynucleotide kinase and nucleotide ‘mapping’ methods for the determination of the 5'-hydroxy-terminal nucleotide sequences of deoxyribonucleic acid from (Murray, K.) 569–582

Bacteriophage 424, use of polynucleotide kinase and nucleotide ‘mapping’ methods for the determination of the 5'-hydroxy-terminal nucleotide sequences of deoxyribonucleic acid from (Murray, K.) 569–582

Bacteroids, root-nodule, soya-bean, kinetic properties of the nitrogenase complex from (Bergersen, F. J. & Turner, G. L.) 61–75

trans-Benzylideneacetone, distribution of enzymes that catalyse reactions of reduced glutathione with, and other α,β-unaturated compounds in the livers of various vertebrate species (Chasseaud, L. F.) 765–769

Blood, human, modification of the activities of acetylcholinesterase and cholinesterase from, by 5,5'-dithiobis-(2-nitrobenzoate) included in the coupled spectrophotometric assay (Brownworth, C. & Watts, D. C.) 369–374

Blood platelets, human, activity of phospholipase A1 in (Smith, J. B., Silver, M. J. & Webster, G. R.) 615–618

Brain cortex, human, activity of cathepsin A in (Bowen, D. M. & Davison, A. N.) 417–419

Brain cortex, ox, inhibition by acetaldehyde of the pyruvate dehydrogenase complex from (Blass, J. P. & Lewis, C. A.) 415–416

Brain cortex, ox, kinetic properties of the partially purified pyruvate dehydrogenase complex from (Blass, J. P. & Lewis, C. A.) 31–37

Brain cortex, rat, properties and subcellular distribution of a membrane-bound enzyme activity catalysing the breakdown of phosphatidylinositol to 1,2-diacyl-glycerol, d-myoinositol 1:2-cyclic phosphate and d-myoinositol 1-phosphate in (Lapetina, E. G. & Michell, R. H.) 433–442

Brain, rat and mouse, regulation of the activities of guanine deaminase isoenzymes in rat and mouse liver and Bree Kumar, K., Sitaramayya, A. & Krishnan, K. J.) 683–687

3-Bromopropionic acid, use of, for the determination of protein thiol groups (Bradbury, A. F. & Smyth, D. G.) 637–642

Butan-1-ol, kinetics and mechanism of the reaction catalysed by baker’s-yeast alcohol dehydrogenase with, and a variety of other substrates (Dickinson, F. M. & Monger, G. P.) 261–270

Butyraldehyde, kinetics and mechanism of the reaction catalysed by baker’s-yeast alcohol dehydrogenase with, and a variety of other substrates (Dickinson, F. M. & Monger, G. P.) 261–270

Calcium ions, effect of, on anaerobic growth and 5-amino-levulinic acid synthetase activity of Micrococcus denitrificans (Tait, G. H.) 389–403

Carbamoyl phosphate, antagonization by, of the protecting effect of uridine monophosphate against inactivation of wheat-germ aspartate carbamoyltransferase and denaturing agents (Yon, R. J.) 699–706

Carbohydrate compositions of three types of glycopeptides isolated from the Cuvierian tubules of the sea-cucumber Holothuria forskali (Isemura, M., Zahn, R. K. & Schmid, K.) 509–521

Carbon monoxide, effect of steady illumination on the binding of, by carboxymethylated horse heart cytochrome c (Wilson, M. T., Brunori, M., Bonaventura, J. & Bonaventura, C.) 863–865

S- Carboxyethylcysteine, formation of, in the reaction of 3-bromopropionic acid with cysteine residues in proteins (Bradbury, A. F. & Smyth, D. G.) 637–642

Cartilage, articular, ox, age-related changes in the reducible cross-links of intact collagen fibres from (Robins, S. P., Shimokomaki, M. & Bailey, A. J.) 771–780

Cartilage, nasal, ox, composition of proteoglycans extracted from, with solutions of high and of low ionic strengths (Mayes, R. W., Mason, R. M. & Griffin, D. C.) 541–553

Cartilage, nasal, ox, extraction of proteoglycans from, with inorganic salt solutions of various ionic strengths (Mason, R. M. & Mayes, R. W.) 535–546

Catalase–hydrogen peroxide intermediate, kinetic analysis of, in coupled oxidations (Chance, B. & Oshino, N.) 564–567

Catalase, liver, rat, characteristics of the 'peroxidatic' reaction of, in the oxidation of ethanol (Oshino, N., Oshino, R. & Chance, B.) 555–563

1973
INDEX OF SUBJECTS 873

Catecholamines, stimulation by ascorbate of the activity of rat liver phenylalanine hydroxylase and its possible role in the regulation of the biosynthesis of (Stone, K. J. & Townsley, B. H.) 611–613

Cathepsin A, activity of, in human cerebral cortex and spleen (Bowen, D. M. & Davison, A. N.) 417–419

Chromatin, cortex, ox, Chlorobenzylidenemalonitrile, L929, Cathepsin A, Cerebral Cholinesterase, Potassium, Chloride, Bi, (Jameson, V., Willson, J. & Jameson, V.) 765–769

Cholesterolase, plasma, human, modification of the activity of, by 5,5'-dithiobis-(2-nitrobenzoate) included in the coupled spectrophotometric assay (Brownson, C. & Watts, D. C.) 369–374

Chondroitin sulphate proteoglycan, extraction of, from ox nasal cartilage with solutions of low ionic strength (Mayes, R. W., Mason, R. M. & Griffin, D. C.) 541–553

Chromatin, properties of polynucleotides associated with preparations of histones obtained from, from various sources (Greenaway, P. J. & Murray, K.) 585–591

Cinnamonic acid, distribution of enzymes that catalyse reactions of reduced glutathione with, and other αβ-unsaturated compounds in the livers of various vertebrate species (Chasseaud, L. F.) 765–769

Clotting Factor X, method for the simultaneous isolation of prothrombin and, from ox plasma (Esnouf, M. P., Lloyd, P. H. & Jesty, J.) 781–789

Clotting Factor X, plasma, ox, preparation of Factor Xa from, and its action on prothrombin (Jesty, J. & Esnouf, M. P.) 791–797

Clotting Factor Xa, preparation of, from ox plasma Factor X and its action on prothrombin (Jesty, J. & Esnouf, M. P.) 791–797

Coagulant enzyme (Arvin), isolation and properties of, from the venom of the Malayan pit viper (Hatton, M. W. C.) 799–807

Coat protein, reactivity towards methyl picolinimidate of additional lysine residues in, of mutants of tobacco-mosaic virus and the reagent's usefulness as a probe for investigating the topography of the virus (Perham, R. N.) 119–126

Coccoid, characterization of C-phycocyanin from (Kao, O. H. W., Berns, D. S. & Town, W. R.) 39–50

Coli phage R17, nucleotide sequence containing seventy-three residues from the genome of (Rensing, U. F. E.) 593–604

Coli phage R17, nucleotide sequences of similar size from the genome of (Rensing, U. F. E., Coulson, A. & Thompson, E. O. P.) 605–610

Collagen, age-related changes in the reducible cross-links of intact fibres of, from ox skin, tendon and articular cartilage (Robins, S. P., Shimokomaki, M. & Bailey, A. J.) 771–780

Collagen, skin, calf, acid-soluble, soluble and precipitated, effect of alcohols and neutral salt on the thermal stability of (Russell, A. E.) 335–342

Copur ionic effects, of, on anaerobic growth and 5-aminolevulinic synthetase activity of Micrococcus denitrificans (Tait, G. H.) 389–403

Cuivierian tubules, sea-cucumber (Holothuria forskali), isolation of a new neuraminic acid derivative and three types of glycopeptides from (Isemura, M., Zahn, R. K. & Schmid, K.) 509–521

Cysteine residues, reaction of 3-bromopropionic acid with, in proteins (Bradbury, A. F. & Smyth, D. G.) 637–642

Cytocrome c, heart, horse, accurate determination of the molecular weight of, with a sensitive polyacrylamide-gel osmometer (Ogston, A. G. & Preston, B. N.) 843–850

Cytocrome c, heart, horse, carboxymethylated, effect of steady illumination on the binding of carbon monoxide by (Wilson, M. T., Brunori, M., Bonaventura, J. & Bonaventura, C.) 863–865

Vol. 131
Cytochrome c, leek, amino acid sequence of (Brown, R. H. & Boulter, D.) 247–251
Cytochrome c, spinach, amino acid sequence of (Brown, R. H., Richardson, M., Scogin, R. & Boulter, D.) 253–256
Cytosol, multiple forms of nuclear deoxyribonucleic acid polymerases and their relationship with the enzyme from, of cultured mouse L929 cells (Adams, R. L. P., Henderson, M. A. L., Wood, W. & Lindsay, J. G.) 237–246

Dental enamel, see Enamel, dental
Deoxyfluoro-d-glucose 6-phosphates, activity of yeast and rat liver glucose 6-phosphate dehydrogenase towards (Bessell, E. M. & Thomas, P.) 83–89
Deoxyfluoro-d-glucose 6-phosphates, activity of yeast glucose phosphate isomerase towards (Bessell, E. M. & Thomas, P.) 77–82
Deoxyribonucleic acid, biosynthesis of, in baby-hamster kidney (BHK-21/C13) cells (Hayton, G. J., Pearson, C. K., Scaife, J. R. & Keil, H. M.) 499–508
Deoxyribonucleic acid polymerases, nuclear, multiple forms of, and their relationship with the cytosol enzyme from cultured mouse L929 cells (Adams, R. L. P., Henderson, M. A. L., Wood, W. & Lindsay, J. G.) 237–246
Deoxyribonucleic acids, interaction of quinacrine mustard with (Selander, R.-K.) 749–755
Deoxyribonucleic acids, use of polynucleotide kinase and nucleotide 'mapping' methods for the determination of the 5'-hydroxyl-terminal nucleotide sequences of, from bacteriophages λ and 424 (Murray, K.) 569–582
Deoxyribonucleoproteins, properties of polynucleotides associated with preparations of histones obtained from, various sources (Greenaway, P. J. & Murray, K.) 585–591
Deuterium isotope (2H), effect of the presence of, on the kinetics of the oxidation of p-dimethylanilino-methyl[ae-3H]benzylamine by pig kidney diamine oxidase (Bardsley, W. G., Crabbe, M. J. C. & Shindler, J. S.) 459–469
Development, changes in the reducible cross-links of intact collagen fibres from ox skin, tendon and articular cartilage during (Robins, S. P., Shimokomaki, M. & Bailey, A. J.) 771–780

NAD-Diacylchitobiase, hydrolysis of, by β-N-acetylglucosaminidase from Sclerotinia fructigena (Reyes, F. & Byrde, R. J. W.) 381–388
1,2-Diacetylglycerol, properties and subcellular distribution of a membrane-bound enzyme activity catalysing the breakdown of phosphatidylinositol to d-myoinositol 1:2-cyclic phosphate, d-myoinositol 1-phosphate and, in rat cerebral cortex (Lapetina, E. G. & Michell, R. H.) 433–442
Diamine oxidase, kidney, pig, kinetics of the reaction catalysed by (Bardsley, W. G., Crabbe, M. J. C. & Shindler, J. S.) 459–469

Diet, lipid-rich, effect of, on the properties and composition of lipoprotein particles from the Golgi apparatus of guinea-pig liver (Chapman, M. J., Mills, G. L. & Taylaur, C. E.) 177–185
Diethyl pyrocatechol, reaction of, with an essential histidine residue in pig heart muscle lactate dehydrogenase (Holbrook, J. J. & Ingram, V. A.) 729–738
p-Dimethylaminomethylbenzylamine, kinetics of the oxidation of, by pig kidney diamine oxidase (Bardsley, W. G., Crabbe, M. J. C. & Shindler, J. S.) 459–469
7,12-Dimethylbenzo[a]anthracene 5,6-epoxide, chemical synthesis of, and its metabolism by rat liver preparations (Sims, P.) 405–413

Diamine oxidases, in sponges (Thunbergia atropurpurea), inactivation by (Wynn, M.) 459–469

Duodenum, mouse, characterization of alternative molecular forms of xanthine oxidase from mouse liver and (Duke, E. J., Joyce, P. & Ryan, J. P.) 187–190

Elastase, pancreas, pig, evidence for the amino acid sequence of (Shotton, D. M. & Hartley, B. S.) 643–675

Embryos, yoe-grain, loss of activity of protein-synthesizing systems in vitro from, associated with loss of viability of the grains (Robert, B. E., Payne, P. I. & Osborne, D. J.) 275–286
Enamel, dental, ox, developing, purification and partial characterization of amelogenins from (Eggert, F. M., Allen, G. A. & Burgess, R. C.) 471–484
Endoplasmic reticulum, see Reticulum, endoplasmic
Enzymes, shapes of curves of the pH-dependence of the rates of reactions catalysed by (Dixon, H. B. F.) 149–154
Enzymes, significance of abrupt transitions in Lineaweaver–Burk plots of the activity of, with particular reference to ox liver glutamate dehydrogenase (Engel, P. C. & Ferdinand, W.) 97–105
Erythrocytes, chicken, turkey and frog, properties of polynucleotides associated with preparations of histones from, and various other sources (Greenaway, P. J. & Murray, K.) 585–591
Erythrocytes, human, modification of the activity of acetylcholinesterase from, by 5,5'-dithiobis-(2-nitrobenzoate) included in the coupled spectrophotometric assay (Brownson, C. E., Wynn, M.) 459–469
Erythrocytes, human, structural requirements for binding to the sugar-transport system of (Barnett, J. E. G., Holman, G. D. & Munday, K. A.) 211–221
INDEX OF SUBJECTS

Escherichia coli, bacteriophage T4-infected, improved preparation of, for the isolation of polynucleotide kinase (Hughes, S. G. & Brown, P. R.) 583

Escherichia coli (Crookes' strain), purification and characterization of two fructose diphosphate aldolases from (Stirling, D. & Perham, R. N.) 833–841

Escherichia coli K12, competitive inhibition and substrate activity of uridine diphosphate 6-deoxygalactose for uridine diphosphate galactose 4-epimerase from (Spencer, M., Blackburn, P., Ferdinand, W. & Blackburn, G. M.) 421–423

Estradiol, see Oestradiol

Estragen, see Oestrogen

Ethanol, characteristics of the 'peroxidatic' reaction of rat liver catalase in the oxidation of (Oshino, N., Oshino, R. & Chance, B.) 555–563

Ethanol, kinetics and mechanism of the reaction catalysed by baker's-yeast alcohol dehydrogenase with, and a variety of other substrates (Dickinson, F. M. & Monger, G. P.) 261–270

Ethylene glycol, effect of neutral salt and, and other alcohols on the thermal stability of soluble and precipitated acid-soluble calf skin collagen (Russell, A. E.) 335–342

Factor X, coagulation, method for the simultaneous isolation of prothrombin and, from ox plasma (Esnouf, M. P., Lloyd, P. H. & Jesly, J.) 781–789

Factor X, coagulation, plasma, ox, preparation of Factor Xa from, and its action on prothrombin (Jesty, J. & Esnouf, M. P.) 791–797

Factor Xa, coagulation, preparation of, from ox plasma Factor X and its action on prothrombin (Jesty, J. & Esnouf, M. P.) 791–797

Fatty acids, long-chain, mechanism of the activation of, catalysed by rat liver microsomal palmitoylcoenzyme A synthetase (Bar-Tana, J., Rose, G., Brandes, R. & Shapiro, B.) 199–209

Fatty acyl (long-chain)-coenzyme A synthetase, microsomal, liver, rat, structural properties of (Bar-Tana, J. & Rose, G.) 443–449

Ferritin, apo-, spleen, horse, molecular weight of the oligomer of, and its stability to dissociation by dilution (Crichton, R. R., Eason, R., Barclay, A. & Bryce, C. F. A.) 855–857

Fibroblast cells, L929, mouse, cultured, multiple forms of nuclear deoxyribonucleic acid polymerases and their relationship with the cytosol enzyme from (Adams, R. L. P., Henderson, M. A. L., Wood, W. & Lindsay, J. G.) 237–246

Fluorescence, use of, in monitoring the binding of reduced nicotinamide-adenine dinucleotide to lactate dehydrogenases from various muscles (Stinson, R. A. & Holbrook, J. J.) 719–728

Fluorescence, use of, in monitoring the interaction of quinacrine mustard with calf thymus-gland histones (Selander, R.-K. & de la Chapelle, A.) 757–764

Fluorescence, use of, in monitoring the interaction of quinacrine mustard with mononucleotides and polynucleotides (Selander, R.-K.) 749–755

Fluoro-D-glucose 6-phosphates, see Deoxyfluoro-D-glucose 6-phosphates

Fructose diphosphate aldolases, two, purification and characterization of, from Escherichia coli (Crookes' strain) (Stirling, D. & Perham, R. N.) 833–841

Fructose 1,6-diphosphate, interaction between rabbit liver pyruvate kinase and (Irving, M. G. & Williams, J. F.) 303–313

Gangliosidosis, GM2-, immunological properties of liver N-acetylglucosaminidase from normal humans and from patients with (Carroll, M. & Robinson, D.) 91–96

Genome, coliphage R17, nucleotide sequence containing seventy-three residues from (Rensing, U. F. E.) 593–604

Genome, coliphage R17, nucleotide sequences of similar size from (Rensing, U. F. E., Coulson, A. & Thompson, E. O. P.) 605–610

Globin, 3'-hydroxyl-terminal nucleotide sequence of the messenger ribonucleic acid for, from rabbit reticulocytes (Hunt, J. A.) 315–325

Globin, interaction between polyuridylicate and the messenger ribonucleic acid for, from rabbit reticulocytes (Hunt, J. A.) 327–333

Glucocerebrosidase, reconstitution of the activity of, from two macromolecular components from human spleen (Ho, M. W., O'Brien, J. S., Radin, N. S. & Erickson, J. S.) 173–176

Glucose 6-phosphate, activation by, of maize-seedling phosphoenolpyruvate carboxylase (Wong, K. F. & Davies, D. D.) 451–458

D-Glucose 6-phosphate, activity of yeast and rat liver glucose 6-phosphate dehydrogenase towards C-2-substituted derivatives of (Bessell, E. M. & Thomas, P.) 83–89

Glucose 6-phosphate dehydrogenase, liver, rat, activity of, towards C-2-substituted derivatives of D-glucose 6-phosphate (Bessell, E. M. & Thomas, P.) 83–89

Glucose 6-phosphate dehydrogenase, yeast, activity of, towards C-2-substituted derivatives of D-glucose 6-phosphate (Bessell, E. M. & Thomas, P.) 83–89

D-Glucose 6-phosphate, effects of C-2-substituted derivatives of, on the activity of yeast glucose phosphate isomerase (Bessell, E. M. & Thomas, P.) 77–82

D-Glucose 6-phosphate-1L-myoinositol 1-phosphate cyclase, see Inositol cyclase

Glucose phosphate isomerase, yeast, activity of, towards deoxyfluoro-D-glucose 6-phosphates (Bessell, E. M. & Thomas, P.) 77–82

D-Glucose, structural requirements for the binding of, to the sugar-transport system of human erythrocytes (Barnett, J. E. G., Holman, G. D. & Munday, K. A.) 211–221

Vol. 131
β-Glucosidase, acid, reconstitution of the activities of glucocerebrosidase and, from two macromolecular components from human spleen (Ho, M. W., O’Brien, J. S., Radin, N. S. & Erickson, J. S.) 173–176

O-Glucuronides, comparison of the properties of the uridine diphasate glucuronolactonase activities synthesizing thio-β-D-glucuronides and, in preparations from various animal sources (Illing, H. P. A. & Dutton, G. J.) 139–147

Glutathione reduced, effect of glycerol, glycoproteins, glycosaminoglycans, quantitative apparatus, Guanine

Guanosine glucocerebrosidase J. from various animal thio-P-D-glucuronides synthesizing abscisic acid, reference to carboxylase (Wong, K. F. & Davies, D. D.) 451–458

Glutathione (reduced) S-alkenotransferases, distribution of, in the livers of various vertebrate species (Chasseaud, L. F.) 765–769

Glutathione, reduced, distribution of enzymes that catalyse reactions of, with α,β-unsaturated compounds in the livers of various vertebrate species (Chasseaud, L. F.) 765–769

Glycerol, effect of neutral salt and, and other alcohols on the thermal stability of soluble and precipitated acid-soluble calf skin collagen (Russell, A. E.) 335–342

Glycine max, see Soya bean

Glycopeptides, isolation of a new neuraminic acid derivative and three types of, from the Cuvierian tubes of the sea-cucumber Holothuria forskali (Isemura, M., Zahn, R. K. & Schmid, K.) 509–521

Glycosaminoglycans, differences in, of proteoglycans extracted from ox nasal cartilage with solutions of high and of low ionic strengths (Mayes, R. W., Mason, R. M. & Griffin, D. C.) 541–553

Glycosaminoglycans, quantitative determination of, in urine with Alcian Blue 8GX (Whiteman, P.) 351–357

Glycosaminoglycans, quantitative measurement of complexes of Alcian Blue 8GX with (Whiteman, P.) 343–350

Golgi apparatus, liver, guinea-pig, effect of a lipid-rich diet on the properties and composition of lipoprotein particles from (Chapman, M. J., Mills, G. L. & Taylaur, C. E.) 177–185

Guanine deaminase, liver and brain, rat and mouse, regulation of the activities of the isoenzymes of (Sree Kumar, K., Sitaramayya, A. & Krishnan, P. S.) 683–687

Guanosine triphosphate, effects of, on the activities of rat and mouse liver and brain guanine deaminase activities (Sree Kumar, K., Sitaramayya, A. & Krishnan, P. S.) 683–687

Haemoglobin, interaction between polyuridylate and the messenger ribonucleic acid for, from rabbit reticulocytes (Hunt, J. A.) 315–325

Haemoglobin, interaction between polyuridylate and the messenger ribonucleic acid for, from rabbit reticulocytes (Hunt, J. A.) 327–333

Haptoglobin, human, lack of effect of, on the activity of human liver cathepsin B1 (Starkey, P. M. & Barrett, A. J.) 823–831

Heart, horse, accurate determination of the molecular weight of cytochrome c from, with a sensitive polyacrylamide-gel osmometer (Ogston, A. G. & Preston, B. N.) 843–850

Heart, horse, effect of steady illumination on the binding of carbon monoxide by carboxymethylated cytochrome c from (Wilson, M. T., Brunori, M., Bonaventura, J. & Bonaventura, C.) 863–865

Heart muscle, pig, equilibrium binding of nicotinamide adenine dinucleotide to lactate dehydrogenases from, and various other muscles (Stinson, R. A. & Holbrook, J. J.) 719–728

Heart muscle, pig, ionic properties of an essential histidine residue in lactate dehydrogenase from (Holbrook, J. J. & Ingram, V. A.) 729–738

Heart muscle, pig, use of ternary complexes to study ionizations and isomerizations during catalysis by lactate dehydrogenase from (Holbrook, J. J. & Stinson, R. A.) 739–748

Heavy meromyosin, see Meromyosin, heavy

Hepatoma cell, asites, rat, characterization of a non-histone protein isolated from histone F1 preparations from, and other sources (Smith, J. A. & Stocken, L. A.) 859–861

Hexosaminidase, see N-Acetyl-β-D-glucosaminidase

D-xylo-5-Hexosulose 6-phosphate, evidence for the formation of, as an enzyme-bound intermediate in the conversion of D-glucose 6-phosphate into 1L-myoinositol 1-phosphate by rat testis inositol cyclase (Barnett, J. E. G., Rasheed, A. & Corina, D. L.) 21–30

Histidine residue, essential, ionic properties of, in pig heart muscle lactate dehydrogenase (Holbrook, J. J. & Ingram, V. A.) 729–738

Histone F1, characterization of a non-histone protein isolated from preparations of, from rat liver, thymus gland and ascites hepatoma cells (Smith, J. A. & Stocken, L. A.) 859–861

Histones, properties of polynucleotides associated with preparations of, from various sources (Greenaway, P. J. & Murray, K.) 585–591

Histones, thymus-gland, calf, interaction of quinacrine mustard with (Selander, R.-K. & de la Chapelle, A.) 757–764

Holothuria forskali, see Sea-cucumber

Hurler’s syndrome, quantitative determination with Alcian Blue 8GX of glycosaminoglycans in the urine of human patients with (Whiteman, P.) 351–357

Hydrogen ions, uptake of, during the reaction catalysed by pig heart-muscle and skeletal-muscle lactate dehydrogenases (Holbrook, J. J. & Stinson, R. A.) 739–748

Hydrogen isotope (2H), effect of the presence of, on the kinetics of the oxidation of p-dimethylaminomethyl[2,3-2H]benzylamine by pig kidney diamine oxidase (Bardsley, W. G., Crabbe, M. J. C. & Shindler, J. S.) 459–469
Hydroperoxide, generation of, during the oxidation of ethanol by the 'peroxidatic' activity of rat liver catalase (Oshino, N., Oshino, R. & Chance, B.) 555–563

Hydroxylsine residues, identification of, as the site of attachment of carbohydrate residues in glycopeptides isolated from the Cuvierian tubules of the sea-cucumber Holothuria forskali (Isemura, M., Zahn, R. K. & Schmid, K.) 509–521

7-Hydroxymethyl-12-methylbenz[a]anthracene 5,6-epoxide, chemical synthesis of, and its metabolism by rat liver preparations (Sims, P.) 405–413

Immunoglobulin G, human, inhibition by, of the activity of human liver cathepsin B1 (Starkey, P. M. & Barrett, A. J.) 823–831

Immunoglobulin M, human, investigations of the structural function of the J chain in (Ricardo, M. J., Jr. & Inman, F. P.) 677–682

d-myo-Inositol 1,2-cyclic phosphate, properties and subcellular distribution of a membrane-bound enzyme activity catalysing the breakdown of phosphatidyl-inositol to 1,2-diacylglycerol, d-myo-inositol 1-phosphate and, in rat cerebral cortex (Lapetina, E. G. & Michell, R. H.) 433–442

d-myo-Inositol 1-phosphate, properties and subcellular distribution of a membrane-bound enzyme activity catalysing the breakdown of phosphatidylinositol to 1,2-diacylglycerol, d-myo-inositol 1-phosphate and, in rat cerebral cortex (Lapetina, E. G. & Michell, R. H.) 433–442

Insulin, ox, reaction of methyl iodopicolinimidate with the amino groups of (Riley, M. & Perham, R. N.) 625–635

Intestine, small, mouse, characterization of alternative molecular forms of xanthine oxidase from mouse liver and (Duke, E. J., Joyce, P. & Ryan, J. P.) 187–190

Intestine, small, rat, partial purification and properties of tryptophan 5-hydroxylase from (Noguchi, T., Nishino, M. & Kidó, R.) 375–380

Ionic strength, effects of dielectric constant and, on the kinetics of the oxidation of p-dimethylamino-methyl[α-1H2]benzylamine by pig kidney diamine oxidase (Bardsley, W. G., Crabbe, M. J. C. & Shindler, J. S.) 459–469

Ionic strengths, high and low, composition of proteoglycans extracted from ox nasal cartilage with solutions of (Mayes, R. W., Mason, R. M. & Griffin, D. C.) 541–553

 Ionic strengths, various, extraction of proteoglycans from ox nasal cartilage with inorganic salt solutions of (Mason, R. M. & Mayes, R. W.) 535–540

Isocopropryophyrin, determination of the structure of, with the aid of nuclear-magnetic-resonance- and mass-spectral methods (Stoll, M. S., Elder, G. H., Games, D. E., O’Hanlon, P., Millington, D. S. & Jackson, A. H.) 429–432

'Joining' chain (J chain), investigations of the structural function of, in human immunoglobulin M (Ricardo, M. J., Jr. & Inman, F. P.) 677–682

Keratan sulphate, extraction of proteoglycan enriched in, from ox nasal cartilage with solutions of high ionic strength (Mayes, R. W., Mason, R. M. & Griffin, D. C.) 541–553

5-Keto-d-glucose 6-phosphate, see d-xilo-5-Hexosulose 6-phosphate

Kidney cells, baby-hamster (BHK-21/C13), biosynthesis of deoxynribonucleic acid in (Hayton, G. J., Pearson, C. K., Scaife, J. R. & Keir, H. M.) 499–508

Kidney, mouse, properties of the uridine diphosphate glucuronyltransferase activity synthesizing thio-β-d-glucuronides in preparations of (Iling, H. P. A. & Dutton, G. J.) 139–147

Kidney, ox, comparison of the kinetic properties of partially purified pyruvate dehydrogenase complex from ox cerebral cortex and (Blass, J. P. & Lewis, C. A.) 31–37

Kidney, ox, inhibition by acetaldehyde of the pyruvate dehydrogenase complex from (Blass, J. P. & Lewis C. A.) 415–416

Kidney, pig, inhibition by oxidized or reduced nicotinamide–adenine dinucleotide and related compounds of alkaline phosphatase from (Ramasamy, I. & Butterworth, P. J.) 359–367

Kidney, pig, kinetics of the reaction catalysed by diamine oxidase from (Bardsley, W. G., Crabbe, M. J. C. & Shindler, J. S.) 459–469

Lactate dehydrogenase, muscle, heart, pig, ionic properties of an essential histidine residue in (Holbrook, J. J. & Ingrain, V. A.) 729–738

Lactate dehydrogenases, muscle, heart and skeletal, pig, use of ternary complexes to study ionizations and isomerizations during catalysis by (Holbrook, J. J. & Stinson, R. A.) 739–748

Lactate dehydrogenases, muscle, various, equilibrium binding of nicotinamide–adenine dinucleotide to (Stinson, R. A. & Holbrook, J. J.) 719–728

Lactate, purification and characterization of two fructose diphosphate aldolases from Escherichia coli (Crookes' strain) grown on pyruvate or (Stribling, D. & Perham, R. N.) 833–841

Lanthanum chloride, extraction of proteoglycans from ox nasal cartilage with solutions containing (Mason, R. M. & Mayes, R. W.) 535–540

Lectins, wheat-germ, purification, composition and specificities of agglutinins from (Allen, A. K., Neuberger, A. & Sharon, N.) 155–162

Leek (Allium porrum), amino acid sequence of cytochrome c from (Brown, R. H. & Boulter, D.) 247–251

Lipid, effect of a diet rich in, on the properties and composition of lipoprotein particles from the Golgi apparatus of guinea-pig liver (Chapman, M. J., Mills, G. L. & Taylaur, C. E.) 177–185

Lipoprotein particles, effect of a lipid-rich diet on the properties and composition of, from the Golgi apparatus of guinea-pig liver (Chapman, M. J., Mills, G. L. & Taylaur, C. E.) 177–185

Lipoproteins, very-low-density, serum, guinea-pig, evidence that lipoprotein particles of the Golgi apparatus of the liver are precursors of (Chapman, M. J., Mills, G. L. & Taylaur, C. E.) 177–185
Liver, distribution of enzymes that catalyse reactions of reduced glutathione with \( \alpha \beta \)-unsaturated compounds in, of various vertebrate species (Chasseaud, L. F.) 765–769

Liver, guinea-pig, effect of a lipid-rich diet on the properties and composition of lipoprotein particles from the Golgi apparatus of (Chapman, M. J., Mills, G. L. & Taylaur, C. E.) 177–185

Liver, human, immunological properties of \( N \)-acetyl-\( \beta \)-D-glucosaminidase from, of normal subjects and of patients with GM2-gangliosidosis (Carroll, M. & Robinson, D.) 91–96

Liver, human, inhibition by \( \alpha \beta \)-macroglobulin and other human serum proteins of the activity of cathepsin B1 from (Starkey, P. M. & Barrett, A. J.) 823–831

Liver, human, purification and properties of cathepsin B1 from (Barrett, A. J.) 809–822

Liver, mouse, characterization of alternative molecular forms of xanthine oxidase from mouse duodenum and (Duke, E. J., Joyce, P. & Ryan, J. P.) 187–190

Liver, mouse, rat and chick-embryo, properties of the uridine diphosphatase glucuronyltransferase activity synthesizing thio-\( \beta \)-D-glucuronides in preparations of (Illing, H. P. A. & Dutton, G. J.) 139–147

Liver, ox, significance of abrupt transitions in Line-weaver-Burk plots with particular reference to glutamate dehydrogenase from (Engel, P. C. & Ferdinand, W.) 97–105

Liver, rabbit, interaction between pyruvate kinase from, and its allosteric effector fructose 1,6-diphosphate (Irving, M. G. & Williams, J. F.) 303–313

Liver, rabbit, kinetic studies on the regulation of pyruvate kinase from (Irving, M. G. & Williams, J. F.) 287–301

Liver, rat, activity of glucose 6-phosphate dehydrogenase from, towards C-2-substituted derivatives of D-glucose 6-phosphate (Bessell, E. M. & Thomas, P.) 83–89

Liver, rat and mouse, regulation of the activities of guanine deaminase isoenzymes in rat and mouse brain and (Sree Kumar, K., Sitaramayya, A. & Krishnan, P. S.) 683–687

Liver, rat, binding of polyribosomes to smooth and rough endoplasmic-reticulum membranes from (Rolleston, F. S. & Mak, D.) 851–853

Liver, rat, characteristics of the 'peroxidatic' reaction of catalase from, in the oxidation of ethanol (Oshino, N., Oshino, R. & Chance, B.) 555–563

Liver, rat, characterization of a non-histone protein isolated from histone F1 preparations from, and other sources (Smith, J. A. & Stocken, L. A.) 859–861

Liver, rat, mechanism of the activation of long-chain fatty acids catalysed by microsomal palmitoyl-coenzyme A synthetase from (Bar-Tana, J., Rose, G., Brandes, R. & Shapiro, B.) 199–209

Liver, rat, metabolism of epoxides related to 7,12-dimethylbenz(a)anthracene by preparations of (Sims, P.) 405–413

Liver, rat, stimulation by ascorbate of the activity of phenylalanine hydroxylase from (Stone, K. J. & Townsley, B. H.) 611–613

Liver, rat, structural properties of microsomal palmitoyl-coenzyme A synthetase from (Bar-Tana, J. & Rose, G.) 443–449

Lysine residues, additional, reactivity towards methyl picolinimidate of, in the coat protein of mutants of tobacco-mosaic virus and the reagent's usefulness as a probe for investigating the topography of the virus (Perham, R. N.) 119–126

Lysosomes, blood-platelet, human, localization of phospholipase A1 in (Smith, J. B., Silver, M. J. & Webster, G. R.) 615–618

Macroglobulin, see Immunoglobulin M

\( \alpha \beta \)-Macroglobulin, serum, human, inhibition by, of the activity of human liver cathepsin B1 (Starkey, P. M. & Barrett, A. J.) 823–831

Magnesium ions, effects of, on the activities of rat and mouse liver and brain guanine deaminase isoenzymes (Sree Kumar, K., Sitaramayya, A. & Krishnan, P. S.) 683–687

Maize (Zea mays) seedlings, regulation by metabolites of the activity of phosphoenolpyruvate carboxylase from (Wong, K. F. & Davies, D. D.) 451–458

Malayan pit viper (Aegkistrodon rhodostoma), isolation and properties of the coagulant enzyme Arvin from the venom of (Hatton, M. W. C.) 799–807

Membranes, endoplasmic-reticulum, liver, rat, smooth and rough, binding of polyribosomes to (Rolleston, F. S. & Mak, D.) 851–853

Membranes, plasma, properties of an enzyme activity bound to, catalysing the breakdown of phosphatidylinositol to 1,2-diacylglycerol, D-myoinositol 1,2-cyclic phosphate and D-myoinositol 1-phosphate in rat cerebral cortex (Lapetina, E. G. & Michell, R. H.) 433–442

2-Mercaptoprothamine, dissociation of human immunoglobulin M by treatment with (Ricardo, M. J., Jr. & Inman, F. P.) 677–682

Meromysin, heavy, skeletal-muscle, rabbit, isolation and properties of subfragment 1 preparations obtained by proteolysis with papain from (Stone, D. & Perry, S. V.) 127–137

Messenger ribonucleic acid, see Ribonucleic acid, messenger

Methyl iodopicolinimidate, reaction of, with protein amino groups and its possible use as a general method for preparing isomorphous heavy-atom derivatives of proteins (Riley, M. & Perham, R. N.) 625–635

Methyl 5-iodopyridine-2-carboximidate, reaction of, with protein amino groups and its possible use as a general method for preparing isomorphous heavy-atom derivatives of proteins (Riley, M. & Perham, R. N.) 625–635

Methyl picolinimidate, reactivity towards, of additional lysine residues in the coat protein of mutants of tobacco-mosaic virus and its usefulness as a probe for investigating the topography of the virus (Perham, R. N.) 119–126

Methyl vinyl sulphone, distribution of enzymes that catalyse reactions of reduced glutathione with, and other \( \alpha \beta \)-unsaturated compounds in the livers of various vertebrate species (Chasseaud, L. F.) 765–769
INDEX OF SUBJECTS

2'-O - Methyladenylyl - 2'-O - methyluridylyguanylate, preparation of an alkali-stable trinucleotide from yeast ribonuclease acid and its identification as (Trim, A. R. & Parker, J. E.) 257–259

Micrococcus denitrificans, purification and properties of 5-aminolaevulinate synthetase from (Tait, G. H.) 389–403

Micrococcus lysodeikticus N.C.T.C. 2665, selective extraction of teichoic acids from the cell walls of, and other Gram-positive bacteria (Pavlík, J. G. & Rogers, H. J.) 619–621

Microsomal fraction, liver, rat, mechanism of the activation of long-chain fatty acids catalysed by palmitoyl-coenzyme A synthetase of (Bar-Tana, J., Rose, G., Brandes, R. & Shapiro, B.) 199–209

Microsomal fraction, liver, rat, metabolism of epoxides related to 7,12-dimethylbenz[a]anthracene by (Sims, P.) 405–413

Microsomal fraction, liver, rat, structural properties of palmitoyl-coenzyme A synthetase from (Bar-Tana, J. & Rose, G.) 443–449

Microsomal preparations, properties of the uridine diphosphate glucuronyltransferase activity synthesizing thio-β-D-glucuronides in, from various animal sources (Illing, H. P. A. & Dutton, G. J.) 139–147

Milk, cow, purification, interconversion and properties of the type D (dehydrogenase) and type O (oxidase) forms of xanthine oxidase from (Battelli, M. G., Lorenzoni, E. & Stirpe, F.) 191–198

Mucopolysaccharidoses, quantitative determination with Alcian Blue 8GX of glycosaminoglycans in the urine of human patients with (Whiteman, P.) 351–357

Muscle, heart, pig, equilibrium binding of nicotinamide–adenine dinucleotide to lactate dehydrogenases from, and various other muscles (Stinson, R. A. & Holbrook, J. J.) 719–728

Muscle, heart, pig, ionic properties of an essential histidine residue in lactate dehydrogenase from (Holbrook, J. J. & Ingram, V. A.) 729–738

Muscle, heart, pig, use of ternary complexes to study ionizations and isomerizations during catalysis by lactate dehydrogenase from (Holbrook, J. J. & Stinson, R. A.) 739–748

Muscle, skeletal, pig, use of ternary complexes to study ionizations and isomerizations during catalysis by lactate dehydrogenase from (Holbrook, J. J. & Stinson, R. A.) 739–748

Muscle, skeletal, rabbit, isolation and properties of subfragment 1 preparations obtained by proteolysis with papain from the heavy chain of myosin from (Stone, D. & Perry, S. V.) 127–137

Muscle, skeletal, rabbit, kinetics of the reaction catalysed by pyruvate kinase from (Ainsworth, S. & Macfarlane, N.) 223–236

Muscle, skeletal, rabbit, phosphorylation of the '37000 component' (troponin-T) of the troponin complex from (Perry, S. V. & Cole, H. A.) 425–428

Muscle, skeletal, vertebrate, equilibrium binding of nicotinamide–adenine dinucleotide to lactate dehydrogenases from, and various other muscles (Stinson, R. A. & Holbrook, J. J.) 719–728

Muscle, tail, lobster, equilibrium binding of nicotinamide–adenine dinucleotide to lactate dehydrogenases from, and various other muscles (Stinson, R. A. & Holbrook, J. J.) 719–728

Mycobacillus, stereoconfiguration of the amino acid residues in peptides isolated from a Bacillus subtilis B1 cell-free system synthesizing (Sengupta, S. & Bose, S. K.) 623–624

Myosin, skeletal-muscle, rabbit, isolation and properties of subfragment 1 preparations obtained by proteolysis with papain from the heavy chain of (Stone, D. & Perry, S. V.) 127–137

Neuraminic acid, isolation of three types of glycopeptides and a new derivative of, from the Cuvierian tubules of the sea-cucumber Holothuria forskali (Isemura, M., Zahn, R. K. & Schmid, K.) 509–521

Nicotinamide, inhibition by, of pig kidney alkaline phophatase (Ramasamy, I. & Butterworth, P. J.) 359–367

Nicotinamide–adenine dinucleotide, oxidized and reduced, inhibition by, of pig kidney alkaline phosphatase (Ramasamy, I. & Butterworth, P. J.) 359–367

Nicotinamide–adenine dinucleotide, reduced and oxidized, equilibrium binding of, to lactate dehydrogenases from various muscles (Stinson, R. A. & Holbrook, J. J.) 719–728

Nitrogen, kinetics of the reduction of acetylene and, by the nitrogense complex from soya-bean root-nodule bacteroids (Bergersen, F. J. & Turner, G. L.) 61–75

Nitrogense complex, kinetic properties of, from soya-bean root-nodule bacteroids (Bergersen, F. J. & Turner, G. L.) 61–75

δ-Nitrophenylpyruvate, ionizations and isomerizations during the reduction of, catalysed by pig heart-muscle and skeletal-muscle lactate dehydrogenases (Holbrook, J. J. & Stinson, R. A.) 739–748

3-(β-Nitrovinyl)indole, distribution of enzymes that catalyse reactions of reduced glutathione with, and other αβ-unsaturated compounds in the livers of various vertebrate species (Chaseaud, L. F.) 765–769

Nuclear ribonucleic acid, see Ribonucleic acid, nuclear

Nuclei, multiple forms of deoxyribonucleic acid polymerses from, and their relationship with the cytosol enzyme from cultured mouse L929 cells (Adams, R. L. P., Henderson, M. A. L., Wood, W. & Lindsay, J. G.) 237–246

Nucleotide sequence containing seventy-three residues from the coliphage R17 genome (Rensing, U. F. E.) 593–604

Nucleotide sequence, 3'-hydroxyl-terminal, of globin messenger ribonucleic acid from rabbit reticulocytes (Hunt, J. A.) 315–325

Nucleotide sequences, 5'-hydroxyl-terminal, use of polynucleotide kinase and nucleotide 'mapping' methods for the determination of, of deoxyribonucleic acids from bacteriophages λ and 424 (Murray, K.) 569–582

Vol. 131
Nucleotide sequences of similar size from the coliphage R17 genome (Rensing, U. F. E., Coulson, A. & Thompson, E. O. P.) 605–610

Nucleotides, interaction of quinacrine mustard with (Selander, R.-K.) 749–755

Oestradiol-17β, stimulation by, of the biosynthesis of heterogeneous nuclear ribonucleic acid in immature rat uterus (Knowler, J. T. & Smellie, R. M. S.) 689–697

Oestrogen, stimulation by, of the biosynthesis of heterogeneous nuclear ribonucleic acid in immature rat uterus (Knowler, J. T. & Smellie, R. M. S.) 689–697

Osmometer, polyacrylamide-gel, sensitive, accurate determination of the molecular weights of proteins and other macromolecules with (Ogston, A. G. & Preston, B. N.) 843–850

α-Oxo acids, effects of, on partially purified ox cerebral-cortex pyruvate dehydrogenase complex (Blass, J. P. & Lewis, C. A.) 31–37

2-Oxoglutarate, inhibition by, of maize-seedling phosphoenolpyruvate carboxylase (Wong, K. F. & Davies, D. D.) 451–458

Palmitoyl-coenzyme A synthetase, microsomal, liver, rat, mechanism of the activation of long-chain fatty acids catalysed by (Bar-Tana, J., Rose, G., Brandes, R. & Shapiro, B.) 199–209

Palmitoyl-coenzyme A synthetase, microsomal, liver, rat, structural properties of (Bar-Tana, J. & Rose, G.) 443–449

Pancreas, pig, evidence for the amino acid sequence of elastase from (Shotton, D. M. & Hartley, B. S.) 643–675

Pea (Pisum sativum) seedlings, nature of the polydisperse ribonucleic acid obtained from (Jackson, M. & Ingle, J.) 523–533

Peptides, stereoconfiguration of the amino acid residues in, isolated from a mycobacillin-synthesizing cell-free system prepared from Bacillus subtilis B2 (Sengupta, S. & Bose, S. K.) 623–624

‘Peroxidatic’ reaction, characteristics of, of rat liver catalase in the oxidation of ethanol (Oshino, N., Oshino, R. & Chance, B.) 555–563

pH, shapes of curves of the dependence of reaction rates on (Dixon, H. B. F.) 149–154

Phage, see Bacteriophage; see also Colipage

Phenylalanine hydroxylase, liver, rat, stimulation by ascorbate of the activity of (Stone, K. J. & Townsley, B. F.) 611–613

Phosphatase, –alkaline, kidney, pig, inhibition of, by oxidized and reduced nicotinamide-adenine dinucleotide and related compounds (Ramamasamy, I. & Butterworth, P. J.) 359–367

Phosphatidylinositol, properties and subcellular distribution of a membrane-bound enzyme activity catalysing the breakdown of, 1,2-diaclyglycerol, d-myoinositol 1:2-cyclic phosphate and d-myoinositol 1-phosphate in rat cerebral cortex (Lapetina, E. G. & Michell, R. H.) 433–442

Phosphoenolpyruvate, kinetics of the reaction between adenosine diphosphate and, catalysed by rabbit skeletal-muscle pyruvate kinase (Ainsworth, S. & Macfarlane, N.) 223–236

Phospholipase A, activity of, in human blood platelets (Smith, J. B., Silver, M. J. & Webster, G. R.) 615–618

Phosphorylase b kinase, phosphorylation of the ‘3700 component’ (troponin-T) from rabbit skeletal-muscle troponin complex by (Perry, S. V. & Cole, H. A.) 425–428

Phycocyanin, C+, characterization of, from the extremely halo-tolerant blue-green alga Coccochloris elabens (Kao, O. H. W., Berns, D. S. & Town, W. R.) 39–50

Pisum sativum, see Pea

Plasma albumin, see Albumin, plasma

Plasma, human, modification of the activity of cholinesterase from, by 5,5'-dithiobis-(2-nitrobenzoate) included in the coupled spectrophotometric assay (Brownson, C. & Watts, D. C.) 369–374

Plasma membrane, see Membrane, plasma

Plasma, ox, method for the simultaneous isolation of Factor X and prothrombin from (Esnouf, M. P., Lloyd, P. H. & Jesty, J.) 781–789

Plasma, ox, preparation of Factor Xa from Factor X and its action on prothrombin from (Jesty, J. & Esnouf, M. P.) 791–797

Platelets, blood, human, activity of phospholipase A₁ in (Smith, J. B., Silver, M. J. & Webster, G. R.) 615–618

Policy of the Journal and instructions to authors 1–20

Polyadenylate sequences, interaction between polyuridylate and, of globin messenger ribonucleic acid from rabbit reticulocytes (Hunt, J. A.) 327–333

Polyadenylate sequences, presence of, at the 3′-hydroxyl terminus of globin messenger ribonucleic acid from rabbit reticulocytes (Hunt, J. A.) 315–325

Polyribonucleotide kinase, improved preparation of bacteriophage T4-infected Escherichia coli for the isolation of (Hughes, S. G. & Brown, P. R.) 583

Polyribonucleotide kinase, use of, and nucleotide ‘mapping’ methods for the determination of the 5′-hydroxyl-terminal nucleotide sequences of deoxyribonucleic acids from bacteriophages λ and 424 (Murray, K.) 569–582

Polyribonucleotides, interaction of quinacrine mustard with (Selander, R.-K.) 749–755

Polyribonucleotides, properties of, associated with preparations of histones from various sources (Greenaway, P. J. & Murray, K.) 585–591

Polyribosomes, binding of, to smooth and rough rat liver endoplasmic-reticulum membranes (Rolleston, F. S. & Mak, D.) 851–853

Polysomes, see Polyribosomes
INDEX OF SUBJECTS

Polyuridylylation, interaction between, and globin messenger ribonucleic acid from rabbit reticulocytes (Hunt, J. A.) 327-333

Potassium chloride, neutral effect of alcohols and, on the thermal stability of soluble and precipitated acid-soluble calf skin collagen (Russell, A. E.) 335-342

Propan-1-ol, kinetics and mechanism of the reaction catalysed by baker’s-yeast alcohol dehydrogenase with, and a variety of other substrates (Dickinson, F. M. & Monger, G. P.) 261-270

Propan-2-ol, kinetics and mechanism of the reaction catalysed by baker’s-yeast alcohol dehydrogenase with, and a variety of other substrates (Dickinson, F. M. & Monger, G. P.) 261-270

Protamine, see Protein

Protein, loss of interaction Protein-polysaccharide, (Stoll, M. S., Elder, G. H., Games, D. E., O’Hanlon, P., Millington, D. S. & Jackson, A. H.) 429-432

Protein, kinetics of, loss of interaction (Dixon, F. M. & Monger, G. P.) 261-270

Protein, protamine, see Protein

Proteins, 881

Proteoglycans, composition of, extracted from ox nasal cartilage with solutions of high and of low ionic strengths (Mayes, R. W., Mason, R. M. & Griffin, D. C.) 541-553

Proteoglycans, extraction of, from ox nasal cartilage with inorganic salt solutions of various ionic strengths (Mason, R. M. & Mayes, R. W.) 535-540

Proteolysis, conversion of the mouse liver form of xanthine oxidase into the duodenal form by (Duke, E. J., Joyce, P. & Ryan, J. P.) 187-190

Proteolysis, irreversible formation of a type O (oxidase) form from cow’s-milk xanthine oxidase by (Battelli, M. G., Lorenzoni, E. & Stripe, F.) 191-198

Prothrombin, method for the simultaneous isolation of Factor X and, from ox plasma (Esnouf, M. P., Lloyd, P. H. & Jesty, J.) 781-789

Prothrombin, plasma, ox, preparation of Factor Xa from Factor X and its action on (Jesty, J. & Esnouf, M. P.) 791-797

Protonation, effect of, of reactants or intermediates on the pH-dependence of reaction rates (Dixon, H. B. F.) 149-154

Protons, uptake of, during the reaction catalysed by pig heart-muscle and skeletal-muscle lactate dehydrogenases (Holbrook, J. J. & Stinson, R. A.) 739-748

Pseudocholinesterase, see Cholinesterase

Pseudomonas fluorescens A.T.C.C. 17400, amino acid sequence of cytochrome c-551 from (Ambler, R. P. & Wynn, M.) 485-498

Pseudomonas mendocina, amino acid sequence of cytochrome c-551 from (Ambler, R. P. & Wynn, M.) 485-498

Pseudomonas stutzeri A.T.C.C. 17588, amino acid sequence of cytochrome c-551 from (Ambler, R. P. & Wynn, M.) 485-498

Pyruvate dehydrogenase complex, cerebral-cortex and kidney, ox, inhibition by acetaldehyde of (Blass, J. P. & Lewis, C. A.) 415-416

Pyruvate dehydrogenase complex, cerebral-cortex, ox, partially purified, kinetic properties of (Blass, J. P. & Lewis, C. A.) 31-37

Pyruvate kinase, liver, rabbit, interaction between, and its allosteric effector fructose 1,6-diphosphate (Irvine, M. G. & Williams, J. F.) 303-313

Pyruvate kinase, liver, rabbit, kinetic studies on the regulation of (Irvine, M. G. & Williams, J. F.) 287-301

Pyruvate kinase, skeletal-muscle, rabbit, kinetics of the reaction catalysed by (Ainsworth, S. & Macfarlane, N.) 223-236

Pyruvate, purification and characterization of two fructose diphosphate aldolases from Escherichia coli (Crookes’ strain) grown on lactate or (Stribling, D. & Perham, R. N.) 833-841

Proteins, interaction of quinacrine mucard with (Selander, R.-K. & de la Chapelle, A.) 757-764

Proteins, interaction of quinacrine mustard with (Selander, R.-K. & de la Chapelle, A.) 757-764

Proteins, possible use of the reaction of methyl picolinimidate with protein amino groups as a general method for preparing isomorphous heavy-atom derivatives of (Riley, M. & Perham, R. N.) 625-635

Proteins, purification and partial characterization of, from developing ox dental enamel (Eggert, F. M., Allen, G. A. & Burgess, R. C.) 471-484

Proteins, serum, human, inhibition by, of the activity of human liver cathepsin B1 (Starkey, P. M. & Barrett, A. J.) 823-831

Proteins, use of 3-bromopropionic acid for the determination of thiol groups of (Bradbury, A. F. & Smyth, D. G.) 637-642

Quinacrine mustard, interaction of, with calf thymus-gland histones (Selander, R.-K. & de la Chapelle, A.) 757-764

Quinacrine mustard, interaction of, with mononucleotides and polynucleotides (Selander, R.-K.) 749-755

Vol. 131
INDEX OF SUBJECTS

Red blood cells, see Erythrocytes
Reticulocytes, rabbit, 3'-hydroxyl-terminal nucleotide sequence of globin messenger ribonucleic acid from (Hunt, J. A.) 315–325
Reticulocytes, rabbit, interaction between polyripyridylate and globin messenger ribonucleic acid from (Hunt, J. A.) 327–333
Reticulum, endoplasmic, liver, rat, smooth and rough, binding of polyribosomes to membranes of (Rolleston F. S. & Mak, D.) 851–853
Ribonucleic acid, genome, coliphage R17, nucleotide sequence containing seventy-three residues from (Rensing, U. F. E., Coulson, A. & Thompson, E. O. P.) 605–610
Ribonucleic acid, messenger, globin, 3'-hydroxyl-terminal nucleotide sequence of, from rabbit reticulocytes (Hunt, J. A.) 315–325
Ribonucleic acid, messenger, globin, interaction between polyripyridylate and, from rabbit reticulocytes (Hunt, J. A.) 327–333
Ribonucleic acid, nuclear, heterogenous, oestrogen-stimulated biosynthesis of, in immature rat uterus (Knowler, J. T. & Smellie, R. M. S.) 689–697
Ribonucleic acid, polydisperse, nature of, obtained from pea seedlings (Jackson, M. & Ingle, J.) 523–533
Ribonucleic acid, ribosomal, pea-seedling, effect of pH on the aggregation of, during chromatography on methylated albumin on kieselguhr (Jackson, M. & Ingle, J.) 523–533
Ribonucleic acid, yeast, preparation of an alkali-stable trinucleotide from, and its identification as 2'-O-methyladenylyl-2'-O-methyluridylylguanoylate (Trim, A. R. & Parker, J. E.) 257–259
Ribosomal ribonucleic acid, see Ribonucleic acid, ribosomal
Ribosomal subunits, 60S, binding of, to smooth and rough rat liver endoplasmic-reticulum membranes (Rolleston, F. S. & Mak, D.) 851–853
Root nodules, soya-bean, kinetic properties of the nitrogenous complex from bacteroids of (Bergersen, F. J. & Turner, G. L.) 61–75
Rye (Secale cereale) grains, loss of activity of protein-synthesizing systems in vitro associated with loss of viability of (Roberts, B. E., Payne, P. I. & Osborne, D. J.) 275–286
Sanfilippo's syndrome, quantitative determination with Alcian Blue 8GX glycosaminoglycans in the urine of human patients with (Whiteman, P.) 351–357
Sclerotinia fructigena, partial purification and properties of β-N-acetylglucosaminidase from (Reyes, F. & Byrne, R. J. W.) 381–388
Sea-cucumber (Holothuria forskalli), isolation of a new neuraminic acid derivative and three types of glycopeptides from the Cuvierian tubules of (Isemura, M., Zahn, R. K. & Schmidt, K.) 509–521
Secale cereale, see Rye
Serum, human, inhibition by α2-macroglobulin and other proteins from, of the activity of human liver cathepsin B1 (Starkey, P. M. & Barrett, A. J.) 823–831
Skeletal muscle, see Muscle, skeletal
Skin, calf, effect of alcohols and neutral salt on the thermal stability of soluble and precipitated acid-soluble collagen from (Russell, A. E.) 335–342
Skin, ox, age-related changes in the reducible cross-links of intact collagen fibres from (Robins, S. P., Shimomokami, M. & Bailey, A. J.) 771–780
Small intestine, see Intestine, small
Sodium sulphite, dissociation of human immunoglobulin M by treatment with (Ricardo, M. J., Jr. & Inman, F. P.) 677–682
L-Sorbose, inhibition by D-glucose and its analogues of the penetration of, into human erythrocytes (Barnett, J. E. G., Holman, G. D. & Munday, K. A.) 211–221
Soya bean ( Glycine max), kinetic properties of the nitrogen-gene complex from root-nodule bacteroids of (Bergersen, F. J. & Turner, G. L.) 61–75
Spinacea oleracea, see Spinach
Spinach (Spinacea oleracea), amino acid sequence of cytochrome c from (Brown, R. H., Richardson, M., Scogin, R. & Boufier, D.) 253–256
Spleen, horse, molecular weight of the oligomer of apoferritin from, and its stability to dissociation by dilution (Crichton, R. R., Eason, R., Barclay, A. & Bryce, C. F. A.) 855–857
Spleen, human, activity of cathepsin A in (Bowen, D. M. & Davison, A. N.) 417–419
Spleen, human, reconstitution of glucocerebrosidase activity from two macromolecular components from (Ho, M. W., O'Brien, J. S., Radin, N. S. & Erickson, J. S.) 173–176
Stomach, mouse, properties of the uridine diphosphate glucononitransferase activity synthesizing thi-o-β-D-glucuronides in preparations of (Illing, H. P. A. & Dutton, G. J.) 139–147
Streptococcus faecium A.C.T.C. 9790, selective extraction of teichuronic acids from the cell walls of, and other Gram-positive bacteria (Pavlik, J. G. & Rogers, H. J.) 619–621
Sucinate, inhibition by, of maize-seedling phosphonol- pyruvate carboxylase (Wong, K. F. & Davies, D. D.) 451–458
Sugars, structural requirements for the binding of, to the sugar-transport system of human erythrocytes (Barnett, J. E. G., Holman, G. D. & Munday, K. A.) 211–221
INDEX OF SUBJECTS

883

Sulphite, sodium, dissociation of human immunoglobulin M by treatment with (Ricardo, M. J., Jr. & Inman, F. P.) 677–682

Sulphydryl, see Thiol

Supernatant fraction, see Cytosol

1-Tartrate, inhibition by, of maize-seedling phosphoenolpyruvate carboxylase (Wong, K. F. & Davies, D. D.) 451–458

Tay–Sachs disease, immunological properties of liver N-acetylgalcosaminidase from normal humans and from patients with (Carroll, M. & Robinson, D.) 91–96

Teeth, ox, developing, purification and partial characterization of amelogenins from the dental enamel of (Eggert, F. M., Allen, G. A. & Burgess, R. C.) 471–486

Teichuronic acids, selective extraction of, from the cell walls of Gram-positive bacteria (Pavlik, J. G. & Rogers, H. J.) 619–621

Tendon, ox, age-related changes in the reducible cross-links of intact collagen fibres from (Robins, S. P., Shimokamik, M. & Bailey, A. J.) 771–780

Thio-β-D-glucuronides, properties of the uridine diphosphate glucuronontransferase activity synthesizing, in preparations from various animal sources (Illick, H. P. A. & Dutton, G. J.) 139–147

Thiol groups, protein, use of 3-bromopropionic acid for the determination of (Bradbury, A. F. & Smyth, D. G.) 637–642

Thiols, conversion of the type O (oxidase) forms of cow’s milk xanthine oxidase into the type D (dehydrogenase) form in the presence of (Battelli, M. G., Lorenzoni, E. & Stirpe, F.) 191–198

Thrombin, conversion of ox plasma prothrombin into, catalysed by Factor Xa (Jesty, J. & Esnouf, M. P.) 791–797

Thrombin, release by, of phospholipase A1 by human blood platelets (Smith, J. B., Silver, M. J. & Webster, G. R.) 615–618

Thymus gland, calf and rabbit, properties of polynucleotides associated with preparations of histones from, and various other sources (Greenaway, P. J. & Murray, K.) 585–591

Thymus gland, calf, interaction of quinacrine mustard with histones from (Selandar, R.-K. & de la Chapelle, A.) 757–764

Thymus gland, rat, characterization of a non-histone preparation isolated from histone F1 preparations from, and other sources (Smith, J. A. & Stocken, L. A.) 859–861

Tobacco-mosaic virus, reactivity towards methyl picolinimidate of additional lysine residues in the coat protein of mutants of, and the reagent’s usefulness as a probe for investigating the topography of the virus (Perham, R. N.) 119–126

Triticum vulgare, see Wheat

Troponin complex, skeletal-muscle, rabbit, phosphorylation of the ‘37000 component’ (troponin-T) from (Perry, S. V. & Cole, H. A.) 425–428

Troponin-T (‘37000 component’) phosphorylation of, from rabbit skeletal-muscle troponin complex (Perry, S. V. & Cole, H. A.) 425–428

Trypsin, effects of ligands on the inactivation of wheat-germ aspartate carbamoyltransferase by (Yon, R. J.) 699–706

Tryptophan 5-hydroxylase, partial purification and properties of, from rat small intestine (Noguchi, T., Nishino, M. & Kido, R.) 375–380

Uridine diphosphate 6-deoxygalactose, competitive inhibition and substrate activity of, for uridine diphosphate galactose 4-epimerase from Escherichia coli K12 (Spencer, M., Blackburn, P., Ferdinand, W. & Blackburn, G. M.) 421–423

Uridine diphosphate fucose, competitive inhibition and substrate activity of, for uridine diphosphate galactose 4-epimerase from Escherichia coli K12 (Spencer, M., Blackburn, P., Ferdinand, W. & Blackburn, G. M.) 421–423

Uridine diphosphate glucuronontransferase, properties of the activity of, synthesizing thio-β-D-glucurononides in preparations from various animal sources (Illick, H. P. A. & Dutton, G. J.) 139–147

Uridine monophosphate, effect of, on the inactivation of wheat-germ aspartate carbamoyltransferase by trypsin and denaturing agents (Yon, R. J.) 699–706

Urine, quantitative determination of glycosaminoglycans in, with Alcian Blue 8GX (Whiteman, P.) 351–357

Uterus, rat, immature, oestrogen-stimulated biosynthesis of heterogeneous nuclear ribonucleic acid in (Knowler, J. T. & Smellie, R. M. S.) 689–697

Vol. 131
Venom, Malayan-pit-viper, isolation and properties of the coagulant enzyme Arvin from (Hatton, M. W. C.) 799–807
Virus, tobacco-mosaic, see Tobacco-mosaic virus
Vitamin C, see Ascorbate

Wall, cell, see Cell wall
Wheat (Triticum vulgare) germ, effects of ligands on the inactivation by trypsin and denaturing agents of aspartate carbamoyltransferase from (Yon, R. J.) 699–706
Wheat (Triticum vulgare) germ, purification, composition and specificity of agglutinin from (Allen, A. K., Neuberger, A. & Sharon, N.) 155–162

Xanthine oxidase, characterization of alternative molecular forms of, from mouse liver and duodenum (Duke, E. J., Joyce, P. & Ryan, J. P.) 187–190
Xanthine oxidase, milk, cow, purification, interconversion and properties of the type D (dehydrogenase) and type O (oxidase) forms of (Battelli, M. G., Lorenzoni, E. & Stirpe, F.) 191–198

Yeast, activity of glucose 6-phosphate dehydrogenase from, towards C-2-substituted derivatives of D-glucose 6-phosphate (Bessell, E. M. & Thomas, P.) 83–89
Yeast, activity of glucose phosphate isomerase from, towards deoxyfluoro-D-glucose 6-phosphates (Bessell, E. M. & Thomas, P.) 77–82
Yeast, baker’s, kinetics and mechanism of the reaction catalysed by alcohol dehydrogenase from, with a variety of substrates (Dickinson, F. M. & Monger, G. P.) 261–270
Yeast, preparation of an alkali-stable trinucleotide from ribonucleic acid from, and its identification as 2'-O-methyladenyl-2'-O-methyluridylylguanylate (Trim, A. R. & Parker, J. E.) 257–259
Yeast, properties of polynucleotides associated with preparations of histones from, and various other sources (Greenaway, P. J. & Murray, K.) 585–591
Yeast, protein kinase activity in commercially available crystalline preparations of alcohol dehydrogenase from (Kemp, B. E., Froscio, M. & Murray, A. W.) 271–274

Zea mays, see Maize
