A. N. Davison

Meetings Secretary
H. M. Keir

International Secretary
A. P. Mathias

Executive Secretary
A. I. P. Henton (7 Warwick Court, London WC1R 5DP)

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

Application to mail at second-class postage rates is pending at Long Island City, N.Y., U.S.A.
The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, alternate issues being devoted to Molecular Aspects and to Cellular Aspects of biochemistry. It is planned that in 1973 six volumes, each volume being made up of four issues, will be published according to the following schedule:

**Molecular Aspects**  
1 Jan. 131 1 15 Jan. 132 1  
1 Feb. 131 2 15 Feb. 132 2  
1 Mar. 131 3 15 Mar. 132 3  
1 Apr. 131 4 15 Apr. 132 4  
1 May 133 1 15 May 134 1  
1 June 133 2 15 June 134 2  
1 July 133 3 15 July 134 3  
1 Aug. 133 4 15 Aug. 134 4  
1 Sept. 135 1 15 Sept. 136 1  
1 Oct. 135 2 15 Oct. 136 2  
1 Nov. 135 3 15 Nov. 136 3  
1 Dec. 135 4 15 Dec. 136 4

**Cellular Aspects**

Biochemical Society Transactions is a new publication commencing January 1973. It includes extended abstracts of communications (including reports on colloquia and the text of Special Lectures) presented at meetings of the Biochemical Society, book reviews etc. (Note: the Proceedings of the Biochemical Society ceased publication in the Biochemical Journal at the end of 1972.) In 1973 it is planned that one volume, composed of six issues, will be published.

**Biochemical Society Transactions** is issued free to all subscribers of the Biochemical Journal only: it is not available on a separate subscription.

Subscriptions to the Biochemical Journal and Biochemical Society Transactions. For non-members of the Biochemical Society the subscription in 1973 for the Journal (plus Transactions) is £70 per year. For non-members in the U.S.A. the subscription is $180 per year (subject to exchange variation). Terms are cash with order or against proforma invoice. Orders and subscriptions should be sent to the Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex, or through your normal agent.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address given in the preceding paragraph. Claims cannot be entertained if they are received later than three months after the date of posting.

**Back Numbers.** Enquiries for volumes 1–19 of the Journal should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts of the Journal, and also of Transactions, may be obtained on application to The Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

**Microfilms.** Volumes 1–89 (1906–1963) of the Journal have been recorded on microfilm by the EP Group, Microfilm Division, Bradford Road, East Ardsley, Wakefield, Yorks. Details are available from them or the Biochemical Society.

Papers Accepted for Publication

Subunit interactions in horse spleen apoferritin. Dissociation by extremes of pH.
   By R. R. Crichton & C. F. A. Bryce

The catalytic activity of horse spleen apoferritin. Preliminary kinetic studies and the effect of chemical modification.
   By C. F. A. Bryce & R. R. Crichton

Problems associated with the assay of arylsulphatases A and B of rat tissues.

Relative distribution of arylsulphatases A and B in rat liver parenchymal and other cells.
   By G. E. R. Hook, K. S. Dodgson, F. A. Rose & M. Worwood

The formation of a $\beta$-(1→4)-D-galactan chain catalysed by a Phaseolus aureus enzyme.
   By N. Panayotatos & C. L. Villemez

The role of malonyl-coenzyme A in isoprenoid biosynthesis.
   By M. J. P. Higgins & R. G. O. Kekwick

The regulation of poly-$\beta$-hydroxybutyrate metabolism in Azotobacter beijerinckii.
   By P. J. Senior & E. A. Dawes

$\beta$-Ketothiolase from Hydrogenomonas eutropha H16 and its significance in the regulation of poly-$\beta$-hydroxybutyrate metabolism.
   By V. Oeding & H. G. Schlegel

The amino acid sequence of cytochrome c from Nigella damascena L. (love-in-a-mist).
   By R. H. Brown & D. Boulter

Mevalonate kinase in green leaves and etiolated cotyledons of the French bean Phaseolus vulgaris.
   By J. C. Gray & R. G. O. Kekwick

   By H. G. Britton

Light-scattering studies on supercoil unwinding.
   By A. M. Campbell & D. J. Jolly

Adenosine 3':5'-cyclic monophosphate concentrations and phosphodiesterase activities during axenic growth and differentiation of cells of the cellular slime mould Dictyostelium discoideum.
   By A. M. Malkinson & J. M. Ashworth

A collagenase in extracts of the invertebrate Bipalium kewense.
   By J. Phillips & M. H. Dresden

A comparative study of the effects of chemical modification on the immunochemical and optical properties of human plasma low-density lipoprotein(s) and apoproteins.
   By A. M. Gotto, Jr., R. I. Levy, S. E. Lux, M. E. Birnbaum & D. S. Fredrickson

Lethal effect of rifampicin in Bacillus subtilis as a complicating factor in the assessment of the lifetime of messenger ribonucleic acid.
   By J. G. Coote, D. A. Wood & J. Mandelstam

Amino acid production in isolated rat liver mitochondria.
   By W. Ferdinand, W. Bartley & V. Broomhead
NOTES FOR CONTRIBUTORS

It is the policy of the Biochemical Journal to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not generally be described.

Two types of paper are accepted by the editors: Full-length papers. Papers submitted for publication should be sent together with an extra copy of the synopsis (see below) to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Special attention is directed to the sections below concerning the preparation of the typescript. Typescripts that are not concise or do not conform to the conventions of the Biochemical Journal will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the Biochemical Journal it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative full title, by the names of the authors (preferably with one forename in full for each author) and by the name and address of the establishment where the work was performed. Details of financial support appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size and wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted in duplicate, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Each Short Communication should be provided with a short synopsis (normally not exceeding 50 words). Such communications should not exceed 2400 words in length inclusive of the title, references etc. Authors may include up to two insertions such as tables, figures or schemes; in these cases authors must assess what proportion of a page these insertions will occupy and reduce the number of text words accordingly at the rate of 700 words per full page of the Journal. Authors are advised that the preparation of tables and especially figures is liable to cause a slight increase in publication time. Under no circumstances whatsoever can a complete Short Communication occupy more than four pages of the Journal. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.

MAYER, R. J. see JONES, G. M. 125–128, 657–661
MAYNARD, P. V. & CAMERON, E. H. D. Adrenal micro-

somal C_{19}-steroid 5α-reductase activity in the Snell

transplantable rat adrenocortical tumour 494 and the

effect of oestradiol, testosterone propionate and adreno-
corticotropic in intact and gonadectomized rats

293–300

MAYNARD, P. V. & CAMERON, E. H. D. Metabolism of

androst-4-ene-3,17-dione by subcellular fractions of

rat adrenal tissue with particular reference to micro-

somal C_{19}-steroid 5α-reductase 282–291

McCANN, L. M. see COX, G. B. 689–695

McDONALD-GIBSON, R. G., FLACK, J. D. & RAMWELL,

P. W. Inhibition of prostaglandin biosynthesis by 7-oxa-

and 5-oxa-prostaglandin analogues 117–120

McGIVAN, J. D. see CROMPTON, M. 27–34

MEINERS, B. see POSSMAYER, F. 381–394

MERRY, A. H., DOLPHIN, P. J., MUNDAY, K. A. & AKHTAR,

M. Studies on the assembly and secretion of a multi-

component protein. The biosynthesis of vitellogenin,

an oestrogen-induced glycolipidophosphoprotein 459–

463

MIDDLETON, B. The acetoacetyl-coenzyme A thiolases of

rat brain and their relative activities during postnatal

development 731–737

MIDDLETON, B. The oxoacetyl-coenzyme A thiolases of

animal tissues 717–730

MIDGLEY, M. & DAWES, E. A. The regulation of transport of

glucose and methyl α-glucoside in Pseudomonas

aeruginosa 141–154

MILCH, P. O. see SMITH, J. E. 821–827

MILSON, J. P. & WYNN, C. H. The heterogeneous distri-

bution of acid hydrolyses within a homogeneous popula-

tion of cultured mammalian cells 493–500

MILTHORPE, P. & FORDSYKE, D. R. Serum factors affecting

the incorporation of [3H]uridine by lymphocytes stimu-
lated by concanavalin A 803–812

MITCHELL, P. see MOYLE, J. 571–585; WEST, I. C.

587–592

MITROPoulos, K. A. see Gibbons, G. F. 439–448

MOORE, J. H. see HARFOOT, C. G. 829–832

MORTON, L. F. see BARNES, M. J. 113–115

MOUAT, B. see LONG, C. 559–570

MOYLE, J. & MITCHELL, P. The proton-translocating

nicotinamide-adenine dinucleotide (phosphate) trans-

hydrogenase of rat liver mitochondria 571–585

MUDD, J. B. see POSSMAYER, F. 381–394

Vol. 132
Acetate, comparison of ethanol, glucose and, as precursors of glutamate in rat testes (Mushahwar, I. K. & Koepppe, R. E.) 353–359

Acetate, role of, as an intermediate during growth of Pseudomonas AM1 on C\textsubscript{3} compounds, ethanol and 3-hydroxybutyrate (Dunstan, P. M. & Anthony, C.) 797–801

Acetoacetate, effects on the biosynthesis of phosphoenolpyruvate in guinea-pig liver mitochondria (Wilson, M. B.) 553–557

Acetoacetyl-coenzyme A synthetase, developmental changes in the activity of, in the cytosol of rat brain (Buckley, B. M. & Williamson, D. H.) 653–656

Acetoacetyl-coenzyme A thiolases, activities, substrate specificities and subcellular distributions of, in various animal tissues (Middleton, B.) 717–730

Acetoacetyl-coenzyme A thiolases, changes in the activities of, in rat brain during development (Middleton, B.) 731–737

Acetylcarnitine, effects of acute and prolonged treatment with ethanol on the concentrations of coenzyme A, carnitine and their derivatives including, in rat liver (Kondrup, J. & Grunnet, N.) 373–379

Acetycholine, biosynthesis of, in nettle (Barlow, R. B. & Dixon, R. O. D.) 15–18

[14C]Acetycholine, effects of neurotropic drugs on the biosynthesis and release of, in rat cerebral-cortex slices (Grewal, D. S. & Quastel, J. H.) 1–14

Acetyl-coenzyme A carboxylase, effect of treatment with insulin on the activity of, in rat epididymal adipose tissue in vitro (Halestrap, A. P. & Denton, R. M.) 509–517

Acetyl-coenzyme A, effects of acute and prolonged treatment with ethanol on the concentrations of carnitine, coenzyme A and their derivatives including, in rat liver (Kondrup, J. & Grunnet, N.) 373–379

Acetyl-coenzyme A, occurrence of intermediates in the oxidative degradation of octanoate to, in ox liver and pig kidney mitochondrial extracts (Stewart, H. B., Tubbs, P. K. & Stanley, K. K.) 61–76

β-N-Acetylglucosaminidase, heterogeneous distribution of, and other acid hydrolases in subgroups of lysosomes from a homogeneous population of cultured Chinese-hamster ovary fibroblasts (Milsom, J. P. & Wynn, C. H.) 493–500

N-Acetylneuraminic acid, attachment of sugar sequences containing, to rat kidney nascent lysosomal acid hydrolases during transport from the rough endoplasmic reticulum through the Golgi apparatus (Goldstone, A. & Koenig, H.) 267–282

N-Acetyltransferases, tissue distribution, characterization and significance of, in the rabbit (Hearse, D. J. & Weber, W. W.) 519–526

Acid α-Glucosidase, see α-Glucosidase, acid

Acid hydrolases, see Hydrolases, acid

Acid phosphatase, see Phosphatase, acid

Acid ribonuclease, see Ribonuclease, acid

Acinetobacter lwoffi, regulation of a nicotinamide–adenine dinucleotide phosphate-linked isoenzyme of isocitrate dehydrogenase from (Self, C. H., Parker, M. G. & Weitzman, P. D. J.) 215–221

Acyl (long-chain)-carnitine, effects of acute and prolonged treatment with ethanol on the concentrations of coenzyme A, carnitine and their derivatives including, in rat liver (Kondrup, J. & Grunnet, N.) 373–379

Acyl (long-chain)-coenzyme A, effects of acute and prolonged treatment with ethanol on the concentrations of carnitine, coenzyme A and their derivatives including, in rat liver (Kondrup, J. & Grunnet, N.) 373–379

Acyl (long-chain)-coenzyme A, possible role of, in the regulation by insulin of the activity of acetyl-coenzyme A carboxylase in rat epididymal adipose tissue (Halestrap, A. P. & Denton, R. M.) 509–517

Adenine nucleotides, effects of glycerol and dihydroxyacetone on the concentrations of, in perfused rat liver (Woods, H. F. & Krebs, H. A.) 55–60

Adenine nucleotides, role of, in the regulation of a nicotinamide–adenine dinucleotide phosphate-linked isoenzyme of isocitrate dehydrogenase from Acinetobacter lwoffi (Self, C. H., Parker, M. G. & Weitzman, P. D. J.) 215–221

Adenine nucleotides, role of, in the regulation of pyruvate metabolism via pyruvate carboxylase in rat brain mitochondria (Patel, M. S. & Tilghman, S. M.) 185–192

Adenosine 3′:5′-cyclic monophosphate, 6-N2′-O-isobutyryl-β, effect of testosterone plus, on the phosphorylation of high-molecular-weight membrane proteins in cultured Chinese-hamster ovary cells (Rieber, M., & Bacalao, J.) 641–644

Adenosine 3′:5′-cyclic monophosphate, effects of glutagon and insulin on the concentration of, in an organ culture of rat liver (Siddle, K., Kane-Maguire, B. & Campbell, A. K.) 765–773

Adenosine 3′:5′-cyclic monophosphate, effects of glucose, insulin and noradrenaline on lipolysis and on the concentrations of adenosine triphosphate and, in rat epididymal adipose tissue (Knight, B. L. & Lilje, J.) 77–82

Adenosine 3′:5′-cyclic monophosphate, role of, in the control of cholesterol ester biosynthesis in rabbit ovary interstitial tissue (Flint, A. P. F., Grinwich, D. L. & Armstrong, D. T.) 313–321

Adenosine 3′:5′-cyclic monophosphate, stimulation by, of the intrinsic protein kinase activity in membrane preparations from ox cerebral cortex (Weller, M. & Rodnight, R.) 483–492

[14C]Adenosine, incorporation of [3H]uridine, [14C]-orotate and, into ribonucleic acid, in vivo, in rat brain nuclei subsequently fractionated by zonal centrifugation (Austoker, J., Cox, D. & Mathias, A. P.) 813–819

Vol. 132
Adenosine, inhibition by, of the acetyltransfer of protein kinase in membrane preparations from ox cerebral cortex (Weller, M. & Rodnight, R.) 483-492

Adenosine triphosphatase, changes in the activities and subcellular distribution of, and other enzymes during glucose de-repression and respiratory adaptation of Sacharomyces carlsbergensis (Cartledge, T. G. & Lloyd, D.) 609-621

Adenosine triphosphatase, magnesium ion- or calcium ion-stimulated, reconstitution of the energy-linked nicotinamide-adenine dinucleotide (phosphate) transhydrogenase activity in membranes from a mutant strain of Escherichia coli K12 lacking (Cox, G. B., Gibson, F., McCann, L. M., Butlin, J. D. & Crane, F. L.) 689-695

Adenosine triphosphate, effect of, on the biosynthesis of phosphoenolpyruvate in guinea-pig liver mitochondria (Wilson, M. B.) 553-557

Adenosine triphosphate, effects of glucose, insulin and noradrenaline on lipolysis and on the concentrations of adenosine 3':5'-cyclic monophosphate and, in rat epididymal adipose tissue (Knight, B. L. & Illife, J.) 77-82

Adenosine triphosphate, interrelationships between metabolism, insulin release and the concentration of, in isolated mouse pancreas islets of Langerhans (Ashcroft, S. J. H., Weerasinge, L. C. C. & Randle, P. J.) 223-231

Adipocytes, relationship between the activity of clearing-factor lipase and the surface area of, in the perirenal and perigenital adipose tissue of the genetically obese Zucker rat (de Gasquet, P., Pécuignon, E., Lemonnier, D. & Alexiu, A.) 633-635

Adipose tissue, epididymal, rat, effect of cycloheximide on the activity of clearing-factor lipase in, in vitro (Cryer, A., Foster, B., Wing, D. R. & Robinson, D. S.) 833-836

Adipose tissue, epididymal, rat, effect of treatment with insulin on the activity of acetyl-coenzyme A carboxylase in, in vitro (Halestrap, A. P. & Denton, R. M.) 509-517

Adipose tissue, epididymal, rat, effects of glucose, insulin and noradrenaline on lipolysis and on the concentrations of adenosine 3':5'-cyclic monophosphate and adenosine triphosphate in (Knight, B. L. & Illife, J.) 77-82

Adipose tissue, perirenal and perigenital, relationship between the activity of clearing-factor lipase and cellularity in, of the genetically obese Zucker rat (de Gasquet, P., Pécuignon, E., Lemonnier, D. & Alexiu, A.) 633-635

Adrenal gland, rat, effects of various hormonal treatments on the activity of microsomal C19 steroid 5α-reductase in (Maynard, P. V. & Cameron, E. H. D.) 293-300

Adrenal gland, rat, metabolism of androst-4-ene-3,17-dione by subcellular fractions of, with particular reference to microsomal C19 steroid 5α-reductase (Maynard, P. V. & Cameron, E. H. D.) 283-291

Adrenaline, stimulation by, of glycercide lipases in nerve endings of guinea-pig brain (Vyvoda, O. S. & Row, C. E.) 233-248

Adrenocortical tumour, Snell 494, rat, activity of microsomal C19 steroid 5α-reductase in (Maynard, P. V. & Cameron, E. H. D.) 293-300

Adrenocorticotropic, see Corticotropicthrin

Albumin, serum, rat, transport of retinoate bound to, in the plasma (Smith, J. E., Milch, P. O., Muto, Y. & Goodman, DeW. S.) 821-827

Aldolase, see Fructose diphosphate aldolase

Alkaline phosphodiesterase, see Phosphodiesterase, alkaline

Alkaline ribonuclease, see Ribonuclease, alkaline

Amino acids, free, concentrations of, in the testes of various species (Mushahwar, I. K. & Koepp, R. E.) 353-359

Amino acids, metabolism of, in slices of experimentally induced rat granulation tissue (Aalto, M., Lampiaho, K., Pikkarainen, J. & Kulonen, E.) 663-671

p-Aminobenzoate, acetylation of, by N-acetyltransferases of various tissues of the rabbit (Hearse, D. J. & Weber, W. F.) 519-526

Ammonium acetate, effect of treatment with, on the concentrations of free amino acids in rat testes (Mushahwar, I. K. & Koepp, R. E.) 353-359

Androgens, effects of cyproterone and cyproterone acetate on the dynamics of the uptake and metabolism of, by human prostate gland in vitro (Giorgi, E. P., Shirley, I. M., Grant, J. K. & Stewart, J. C.) 465-474

Androst-4-ene-3,17-dione, effects of cyproterone and cyproterone acetate on the dynamics of the uptake and metabolism of, and other androgens by human prostate gland in vitro (Giorgi, E. P., Shirley, I. M., Grant, J. K. & Stewart, J. C.) 465-474

Androst-4-ene-3,17-dione, metabolism of, by subcellular fractions of rat adrenal gland with particular reference to microsomal C19 steroid 5α-reductase (Maynard, P. V. & Cameron, E. H. D.) 283-291

Arachidonate, inhibition by 7-oxa- and 5-oxa-prostaglandins analogues of the biosynthesis of prostaglandins E2 and F2α from arachidonate by an ox seminal-vesicle microsomal preparation (McDonald-Gibson, R. G., Flack, J. D. & Ramwell, P. W.) 117-120

Arylsulphatases A and B, heterogeneous distribution of, and other acid hydrolases in subgroups of lysosomes from a homogeneous population of cultured Chinese hamster ovary fibroblasts (Milsom, J. P. &wynn, C. H.) 493-500

Asparaginase, effect of treatment with, on the concentrations of asparagine in tissues of weanling rats (Frankel, D. L., Wells, H. & Fillios, L. C.) 645-648

Asparagine, concentrations of, in tissue of weanling rats after enzymic or dietary depletion of asparagine (Frankel, D. L., Wells, H. & Fillios, L. C.) 645-648

Aspartate, concentrations of asparagine and, in tissues of weanling rats after enzymic or dietary depletion of asparagine (Frankel, D. L., Wells, H. & Fillios, L. C.) 645-648

Bacillus licheniformis A.T.C.C. 9945, function of cell-wall and membrane teichoic acids in maintaining the correct ionic environment for cation-dependent enzyme systems of the membrane of (Hughes, A. H., Hancock, I. C. & Baddiley, J.) 83-93

1973
INDEX OF SUBJECTS

Bacteria, methylotrophic, obligate and facultative, metabolism of trimethylamine in (Colby, J. & Zatman, L. J.) 101–112

Barbiturate drugs, effects of, on the biosynthesis and release of [14C]acetylcholine in rat cerebral-cortex slices (Grewaal, D. S. & Quastel, J. H.) 1–14

Bone, hydroxylation of lysine residues of biologically synthesized in, of rachitic rats and chicks (Barnes, M. J., Constable, B. J., Morton, L. F. & Kodick, E.) 113–115

Brain cortex, guinea-pig, effects of putative neurotransmitters, tetrodotoxin and other agents on the turnover of protein-bound serine phosphatase in respiring slices of (Reddington, M., Rodnight, R. & Williams, M.) 475–482

Brain cortex, ox, stimulation by adenosine 3':5'-cyclic monophosphate of the intrinsic protein kinase activity in membrane preparations from (Weller, M. & Rodnight, R.) 483–492

Brain cortex, rat, effects of neurotropic drugs on the biosynthesis and release of [14C]acetylcholine in slices of (Grewaal, D. S. & Quastel, J. H.) 1–14

Brain, determination of phenylethanolamine and related compounds in the liver and, of rats with phenylketonuria-like characteristics induced in the injection of p-chlorophenylalanine (Edwards, D. J. & Blau, K.) 95–100

Brain, guinea-pig, activities of glycercide lipases in nerve endings of, and their stimulation by noradrenaline, 5-hydroxytryptamine and adrenaline (Vyvoda, O. S. & Rowe, C. E.) 233–248

Brain, locust, 3,4-dihydroxyphenylalanine (dopa) decarboxylase activity in, and in that of other arthropods (Murdock, L. L., Wirtz, R. A. & Köhler, G.) 681–688

Brain, rat, biosynthesis of ribonucleic acid in vivo in nuclei of, subsequently fractionated by zonal centrifugation (Austoker, J., Cox, D. & Mathias, A. P.) 813–819

Brain, rat, changes in the activities of 3-oxoacyl-coenzyme A thiolases in, during development (Middleton, B.) 731–737

Brain, rat, developmental changes in the activity of acetoacetyl-CoA synthetase in the cytosol of (Buckley, B. M. & Williamson, D. H.) 653–656

Brain, rat, regional and subcellular distribution of the enzymes responsible for the biosynthesis of phosphatidate de novo in (Possmayer, F., Meiners, B. & Mudd, J. B.) 381–394

Brain, rat, regulation of pyruvate metabolism via pyruvate carboxylase in mitochondria from (Patel, M. S. & Tilghman, S. M.) 185–192

Brush borders, kidney-cortex, rabbit, turnover of protein and glycoprotein in, in vivo (Quirk, S. J., Byrne, J. & Robinson, G. B.) 501–508

Caffeine, utilization of methylamine for the biosynthesis of, in excised shoot tips of the tea plant (Suzuki, T.) 753–763

Calcium ions, effects of, on the activities of glycolytic enzymes in various vertebrate and invertebrate muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Calcium ions, influx of, into human erythrocytes during storage in the cold (Long, C. & Mouat, B.) 559–570

Caprate, see Decanoate

Caprylate, see Octanoate

Carbon monoxide, effect of, on the nature of the accumulated 4,4-dimethyl sterol precursors of cholesterol during its biosynthesis from mevalonate by a rat liver preparation (Gibbons, G. F. & Mitropoulos, K. A.) 439–448

Carnitine, effects of acute and prolonged treatment with ethanol on the concentrations of coenzyme A and, and their derivatives in rat liver (Kondrup, J. & Grunnet, N.) 373–379

Castration, effects of various hormonal treatments and, on the activity of microsomal C19, steroid 5α-reductase in rat adrenal gland (Maynard, P. V. & Cameron, E. H. D.) 293–300

Cathepsin D, heterogeneous distribution of, and other acid hydrolases in subgroups of lysosomes from a homogeneous population of cultured Chinese-hamster ovary fibroblasts (Milsom, J. P. & Wynn, C. H.) 493–500

Cations, function of cell-wall and membrane teichoic acids in maintaining the correct ionic environment for enzyme systems of the membrane of Bacillus licheniformis A.T.C.C. 9945 that are dependent on (Hughes, A. H., Hancock, I. C. & Baddiley, J.) 83–93

Cations, univalent, depletion of, and the influx of calcium ions into human erythrocytes during storage in the cold (Long, C. & Mouat, B.) 559–570

Cell wall, function of the teichoic acids of the membrane and, in maintaining the correct ionic environment for cation-dependent enzyme systems of the membrane of Bacillus licheniformis A.T.C.C. 9945 (Hughes, A. H., Hancock, I. C. & Baddiley, J.) 83–93

Cells, ovary, Chinese-hamster, cultured, effect of 6-N,2'-O-dibutyryladenosine 3':5'-cyclic monophosphate plus testosterone on the phosphorylation of high-molecular-weight membrane proteins in (Rieber, M. & Bacalao, J.) 641–644

Central nervous system, see Nervous system, central

Cerebral cortex, guinea-pig, effects of putative neurotransmitters, tetrodotoxin and other agents on the turnover of protein-bound serine phosphatase in respiring slices of (Reddington, M., Rodnight, R. & Williams, M.) 475–482

Cerebral cortex, ox, stimulation by adenosine 3':5'-cyclic monophosphate of the intrinsic protein kinase activity in membrane preparations from (Weller, M. & Rodnight, R.) 483–492

Cerebral cortex, rat, effects of neurotropic drugs on the biosynthesis and release of [14C]acetylcholine in slices of (Grewaal, D. S. & Quastel, J. H.) 1–14

p-Chlorophenylalanine, determination of phenylethanolamine and related compounds in the brain and liver of rats with phenylketonuria-like characteristics induced by the injection of (Edwards, D. J. & Blau, K.) 95–100

Cholesterol, effect of carbon monoxide on the nature of the accumulated 4,4-dimethyl sterol precursors of, during its biosynthesis from mevalonate by a rat liver preparation (Gibbons, G. F. & Mitropoulos, K. A.) 439–448

Cholesterol esterase, activities of, and other enzymes involved in steroid biosynthesis and cholesteryl ester metabolism in rabbit ovary interstitial tissue and corpora lutea (Flint, A. P. F. & Armstrong, D. T.) 301–311
Cholesterol side-chain cleavage enzyme, activities of, and other enzymes involved in steroid biosynthesis and cholesteryl ester metabolism in rabbit ovary interstitial tissue and corpora lutea (Flint, A. P. F. & Armstrong, D. T.) 301–311

Cholesteryl ester synthetase, activities of, and other enzymes involved in steroid biosynthesis and cholesteryl ester metabolism in rabbit ovary interstitial tissue and corpora lutea (Flint, A. P. F. & Armstrong, D. T.) 301–311

Cholesteryl esters, activities of enzymes involved in steroid biosynthesis and the metabolism of, in rabbit ovary interstitial tissue and corpora lutea (Flint, A. P. F. & Armstrong, D. T.) 301–311

Choline acetyltransferase, activity of, in neltte (Barlow, R. B. & Dixon, R. O. D.) 15–18

Citrate, chemostat studies on the regulation by, of glucose metabolism in *Pseudomonas aeruginosa* 2F32 (Ng, F. M.-W. & Dawes, E. A.) 129–140

Citric acid cycle, see Tricarboxylic acid cycle

Clearing-factor lipase, see Lipase, clearing-factor

Cobalt ions, interrelationships in trace-element metabolism in toxicities of metal ions towards a strain of *Neurospora crassa* resistant to (Venkateswarlu, G. & Sivarama Sastry, K.) 673–680

Coenzyme A, effects of acute and prolonged treatment with ethanol on the concentrations of carnitine and, and their derivatives in rat liver (Kondrup, J. & Grunnet, N.) 373–379

Collagen, biosynthesis of, in slices of experimentally induced rat granulation tissue (Aalto, M., Lampiaho, K., Pikkarainen, J. & Kulonen, E.) 663–671

Collagen, hydroxylation of lysine residues of, biosynthesized in bone of rachitic rats and chicks (Barnes, M. J., Constable, B. J., Morton, L. F. & Kodicek, E.) 113–115

Complement, inhibition by, of the concanavalin A-stimulated incorporation of [3H]uridine into ribonucleic acid of rat lymphocytes (Milthorpe, P. & Forsdyke, D. R.) 803–812

Concanavalin A, inhibition by complement of stimulation by, of the incorporation of [3H]uridine into ribonucleic acid of rat lymphocytes (Milthorpe, P. & Forsdyke, D. R.) 803–812

Copper ions, interrelationships in trace-element metabolism in toxicities of, and other metal ions towards a cobalt ion-resistant strain of *Neurospora crassa* (Venkateswarlu, G. & Sivarama Sastry, K.) 673–680

Corpora lutea, ovary, rabbit activities of enzymes involved in steroid biosynthesis and cholesteryl ester metabolism in, and interstitial tissue (Flint, A. P. F. & Armstrong, D. T.) 301–311

Corticotrophin, effects of treatment with oestradiol, testosterone and, on the activity of microsom al C, s steroid 5α-reductase in the adrenal glands of intact and castrated rats (Maynard, P. V. & Cameron, E. H. D.) 293–300

Cortisone, activation by, of rat liver lysosomal α-glucosi dase (Bourne, E. J., Clarke, K., Pridham, J. B. & Rowe, J. J. M.) 435–438

Crotonate, effects of the injection of, on the redox state and on gluconogenesis from lactate in rat liver *in vivo* (Hawkins, R. A., Houghton, C. R. S. & Williamson, D. H.) 19–25

Cyclic adenosine 3′:5′-monophosphate, see Adenosine 3′:5′-cyclic monophosphate

Cycloheximide, effect of, on the activity of clearing-factor lipase in rat epididymal adipose tissue *in vitro* (Cryer, A., Foster, B., Wing, D. R. & Robinson, D. S.) 833–836

Cyproterone acetate, effects of cyproterone and, on the dynamics of the uptake and metabolism of androgens by human prostate gland *in vitro* (Giorgi, E. P., Shirley, I. M., Grant, J. K. & Stewart, J. C.) 465–474

Cyproterone, effects of cyproterone acetate and, on the dynamics of the uptake and metabolism of androgens by human prostate gland *in vitro* (Giorgi, E. P., Shirley, I. M., Grant, J. K. & Stewart, J. C.) 465–474

Cystine, interrelationship between the enzymic reduction of oxidized glutathi one and, in developing rat small intestine (States, B. & Segal, S.) 623–631

Cytidine nucleotides, regulation by, of the biosynthesis of phosphatidate from sn-glycerol 3-phosphate in rat central nervous system (Pfossmayer, F., Meiners, B. & Mudd, J. B.) 381–394

Cyclochrome c oxidase, changes in the activities and subcellular distribution of, and other enzymes during glucose de-repression and respiratory adaptation of *Saccharomyces carlsbergensis* (Cartledge, T. G. & Lloyd, D.) 609–621

Cytosol, activities and substrate specificities of 3-oxoacyl-coenzyme A thiolases in mitochondria and, of various animal tissues (Middleton, B.) 717–730

Cytosol, biosynthesis of medium-chain fatty acids by the combined microsomal fraction and, from lactating rabbit mammary gland (Strong, C. R., Carey, E. M. & Dils, R.) 121–123

Cytosol, brain, rat, changes in the activities of 3-oxoacyl-coenzyme A thiolases in, and mitochondria during development (Middleton, B.) 731–737

Cytosol, brain, rat, developmental changes in the activity of acetocacyl-coenzyme A synthetase in (Buckley, B. M. & Williamson, D. H.) 653–656

Cytosol, kidney-cortex, rat, exchange of malate between, and mitochondria (Rognstad, R. & Katz, J.) 349–352

Decanoate, biosynthesis of octanoate and, by the microsomal plus cytosol fraction from lactating rabbit mammary gland (Strong, C. R., Carey, E. M. & Dils, R.) 121–123

Deoxyribonucleic acid, studies on the biosynthesis of protein, ribonucleic acid and, in nuclei separated by zonal centrifugation from liver of rats treated with thiocetamide (Gonzalez-Mujica, F. & Mathias, A. P.) 163–183
INDEX OF SUBJECTS

Development, changes in the activities of 3-oxoacyl-coenzyme A thiolases in rat brain during (Middleton, B.) 731–737

Development, changes in the activity of acetoacetyl-coenzyme A synthetase in the cytosol of rat brain during (Buckley, B. M. & Williamson, D. H.) 653–656

Development, changes in the microheterogeneity of foetal mouse plasma glycoproteins during (Gustine, D. L. & Zimmerman, E. F.) 541–551

Development, interrelationship between glutathione (reduced)-cystine transhydrogenase and glutathione (oxidized) reductase in rat small intestine during (States, B. & Segal, S.) 623–631

Diet, asparagine-deficient, effect of, on the concentrations of asparagine in tissues of weanling rats (Frankel, D. L., Wells, H. & Fillios, L. C.) 645–648

Diglyceride lipase, activities of, and other gliceride lipases in nerve endings of guinea-pig brain and their stimulation by noradrenaline, 5-hydroxytryptamine and adrenaline (Vyvoda, O. S. & Rowe, C. E.) 233–248

5α-Dihydrotestosterone (17β-hydroxy-5α-androstane-3-one), effects of cyproterone and cyproterone acetate on the dynamics of the uptake and metabolism of, and other androgens by human prostate gland in vitro (Giorgi, E. P., Shirley, I. M., Grant, J. K. & Stewart, J. C.) 465–474

Dihydroxyacetone, effects of glycerol and, on the concentrations of adenosine nucleotides in perfused rat liver (Woods, H. F. & Krebs, H. A.) 55–60

3,4-Dihydroxyphenylalanine (dopa) decarboxylase, activity of, in the nervous system of the locust and other arthropods (Murdoch, L. L., Wirtz, R. A. & Köhler, G.) 681–688

4,4-Dimethyl sterols, effect of carbon monoxide on the nature of, accumulated during the biosynthesis of cholesterol from mevalonate by a rat liver preparation (Gibbons, G. F. & Mitropoulos, K. A.) 439–448

Dopa (3,4-dihydroxyphenylalanine) decarboxylase, activity of, in the nervous system of the locust and other arthropods (Murdoch, L. L., Wirtz, R. A. & Köhler, G.) 681–688

Drug metabolism, tissue distribution, characterization and significance in, of N-acetyltransferases in the rabbit (Hearse, D. J. & Weber, W. W.) 519–526

Epithelial cells, small-intestinal, rat, effects of glucose and glucose analogues on the subcellular distribution of hexokinase in (Jones, G. M. & Mayer, R. J.) 125–128

Erythrocytes, human, influx of calcium ions into, during storage in the cold (Long, C. & Mouat, B.) 559–570

Escherichia coli K12, properties of a mutant of, deficient in fructose 1-phosphate kinase activity (Ferenci, T. & Kornberg, H. L.) 341–347

Escherichia coli K12, reconstitution of the energy-linked nicotinamide–adenine dinucleotide (phosphate) transhydrogenase activity in membranes from a mutant strain of, lacking magnesium ion- or calcium ion-stimulated adenosine triphosphatase (Cox, G. B., Gibson, F., McCann, L. M., Butlin, J. D. & Crane, F. L.) 689–695

Escherichia coli, stoichiometry of the symport of lactose and protons across the plasma membrane of (West, I. C. & Mitchell, P.) 587–592

Estradiol, see Oestradiol

Estragen, see Oestrogen

Ethanol, comparison of acetate, glucose and, as precursors of glutamate in rat testes (Mushahwar, I. K. & Koepppe, R. E.) 353–359

Ethanol, effects of acute and prolonged treatment with, on the concentrations of coenzyme A, carnitine and their derivatives in rat liver (Kondrup, J. & Grunnet, N.) 373–379

Ethanol, role of acetate as an intermediate during growth of Pseudomonas AM1 on C; compounds, 3-hydroxybutyrate and (Dunstan, P. M. & Anthony, C.) 797–801

Fat-cells, relationship between the activity of clearing-factor lipase and the surface area of, in the perirenal and perigenital adipose tissue of the genetically obese Zucker rat (de Gasquet, P., Pégouignet, E., Lemonnier, D. & Alexiu A.) 633–635

Fatty acids, medium-chain, biosynthesis of, by the microsomal plus cytosol fraction from lactating rabbit mammary gland (Strong, C. R., Carey, E. M. & Dils, R.) 121–123

Fatty acids, occurrence of intermediates in the oxidative degradation of, in ox liver and pig kidney mitochondrial extracts (Stewart, H. B., Tubbs, P. K. & Stanley, K. K.) 61–76

Fatty acids, unsaturated, role of food particles as a site for the hydrogenation of, in sheep rumen (Harfoot, C. G., Noble, R. C. & Moore, J. H.) 829–832

Fatty acyl (long-chain)-coenzyme A, effects of acute and prolonged treatment with ethanol on the concentrations of coenzyme A, carnitine and their derivatives including, in rat liver (Kondrup, J. & Grunnet, N.) 373–379

Fatty acyl (long-chain)-coenzyme A, effects of acute and prolonged treatment with ethanol on the concentrations of carnitine, coenzyme A and their derivatives including, in rat liver (Kondrup, K. & Grunnet, N.) 373–379

Fatty acyl (long-chain)-coenzyme A, possible role of, in the regulation by insulin of the activity of acetyl-coenzyme A carboxylase in rat epididymal adipose tissue (Halestrap, A. P. & Denton, R. M.) 509–517

Fibroblasts, ovary, Chinese-hamster, cultured, heterogeneous distribution of acid hydrolases in subgroups of lysosomes from a homogeneous population of (Milsom, J. P. & Wynn, C. H.) 493–500

Vol. 132
INDEX OF SUBJECTS

Fibroblasts, skin, human, cultured, disorder in the metabolism of hyaluronate in, from a patient with Hurler's syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 403-408

Fibroblasts, skin, human, cultured, metabolism of sulphated glycosaminoglycans in, from a patient with Hurler's syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 395-402

Flight muscle, see Muscle, flight

α-Fetoproteins, developmental changes in the microheterogeneity of, and other glycoproteins in foetal mouse plasma (Gustine, D. L. & Zimmerman, E. F.) 541-551

Food particles, role of, as a site for the hydrogenation of unsaturated fatty acids in sheep rumen (Harfoot, C. G., Noble, R. C. & Moore, J. H.) 829-832

Fructose diphosphatase, effects of calcium ions on the activities of, and other glycolytic enzymes in various vertebrate and invertebrate muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527-535

Fructose diphosphate aldolase, degradation of, and other glycolytic enzymes in rat small intestine during starvation (Jones, G. M. & Mayer, R. J.) 657-661

Fructose, 1-phosphate, activities of, in mouse plasma (Ng, J., Byrne, M. & Dawes, E. A.) 541-551

Glucagon, heterogeneity of, and other glycoproteins in foetal epithelial cells (Jones, G. M. & Mayer, R. J.) 125-128

Glucagon, effects of, and of glucagon analogues on the subcellular distribution of hexokinase in rat small-intestinal epithelial cells (Jones, G. M. & Mayer, R. J.) 77-82

Glucose, comparison of acetate, ethanol and, as precursors of glutamate in rat testes (Mushahwar, I. K. & Koepepe, R. E.) 353-359

Glucose, degradation of enzymes involved in the metabolism of, in rat small intestine during starvation (Jones, G. M. & Mayer, R. J.) 657-661

Glucose dehydrogenase, role of, in the transport of glucose in Pseudomonas aeruginosa 2F32 (Midgley, M. & Dawes, E. A.) 141-154

Glucose, effects of, and of glucose analogues on the biosynthesis of protein by perfused hearts from normal and insulin-deficient rats after depletion of glucose 6-phosphate, glycogen and (Chain, E. B. & Sender, P. M.) 593-601

Glucose, effects of insulin on the biosynthesis of protein by perfused hearts from normal and insulin-deficient rats in the presence of, (Chain, E. B. P. Sender, P. M.) 593-601

Glucose, effects of iodoacetamide on the stimulation by, of the release of insulin by isolated mouse pancreas islets of Langerhans (Hellman, B., Idahl, L.-Å., Lernmark, Å., Sehlin, J. & Taljedal, I.-B.) 775-789

Glucose, exchanger of, between cytosol and mitochondrial and the formation of, in rat kidney cortex (Rognstad, R. & Katz, J.) 349-352

[3H]Glucose, incorporation of, into hyaluronate in cultured skin fibroblasts from a human patient with Hurler’s syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 403-408

[3H]Glucose, incorporation of [35S]sulphate and, into sulphated glycosaminoglycans in cultured skin fibroblasts from a human patient with Hurler’s syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 395-402

Glucose 6-phosphate dehydrogenase, degradation of, and other glycolytic enzymes in rat small intestine during starvation (Jones, G. M. & Mayer, R. J.) 657-661

Glucose 6-phosphate, effects of insulin on the biosynthesis of protein by perfused hearts from normal and insulin-deficient rats after depletion of glucose, glycogen and (Chain, E. B. & Sender, P. M.) 593-601

Glucose, regulation of the transport of methyl α-glucoside and, in Pseudomonas aeruginosa 2F32 (Midgley, M. & Dawes, E. A.) 141-154

Glutamate, 3′-adenosine monophosphate and, in cultured fibroblasts from a human patient with Hurler’s syndrome (Ng, F. M.-W. & Dawes, E. A.) 129-140

Glucose, changes in the metabolism of, in the newborn rat immediately after birth (Snell, K. & Walker, D. G.) 739-752

Glucose, chemostat studies on the regulation by citrate of the metabolism of, in Pseudomonas aeruginosa 2F32 (Ng, F. M.-W. & Dawes, E. A.) 129-140
INDEX OF SUBJECTS

α-Glucosidase, acid, lysosomal, liver, rat, activation by cortisone of (Bourne, E. J., Clarke, K., Pridham, J. B. & Rowe, J. J. M.) 435–438

Glucoside conjugates, inhibitory effects of steroids on the formation of, by mouse liver microsomal preparation (Gessner, T., Jacknowitz, A. & Vollmer, C. A.) 249–258

Glutamate, comparison of acetate, ethanol and glucose as precursors of, in rat testes (Mushahwar, I. K. & Koepp, R. E.) 353–359

L-Glutamate, effects of, on the biosynthesis and release of \[^{14}\text{C}]\text{Glucerylcholine} in rat cerebral-cortex slices (Grewal, D. S. & Quastel, J. H.) 1–14

L-Glutamate, pathway for the degradation of L-histidine, imidazol-5-yl-l-lactate and imidazol-5-y1-propionate to, in \textit{Pseudomonas testosteroni} (Coote, J. G. & Hassall, H.) 409–422

L-Glutamate, regulation of the activities of the enzymes involved in the pathway for the degradation of L-histidine, imidazol-5-yl-l-lactate and imidazol-5-y1-propionate to, in \textit{Pseudomonas testosteroni} (Coote, J. G. & Hassall, H.) 423–433

Glutamate, transport of glutamine and, in pig kidney mitochondria in relation to the deamination of glutamine (Crompton, M. & Chappell, J. B.) 35–46

Glutaminase, intramitochondrial location of the iso-enzymes of, in pig kidney (Crompton, M., McGivan, J. D. & Chappell, J. B.) 27–34

Glutaminase, phosphate-dependent, transport of glutamine and glutamate in pig kidney mitochondria in relation to the activity of (Crompton, M. & Chappell, J. B.) 35–46

Glutamine, transport of glutamate and, in pig kidney mitochondria in relation to the deamination of glutamine (Crompton, M. & Chappell, J. B.) 35–46

γ-Glutamylmethylamides, \textit{see} N\(^2\)-Methylglutamine

Glutathione (oxidized) reductase, interrelationship between, glutathione (reduced)-cystine transhydrogenase and, in developing rat small intestine (States, B. & Segal, S.) 623–631

Glutathione (reduced)-cystine transhydrogenase, interrelationship between glutathione (oxidized) reductase and, in developing rat small intestine (States, B. & Segal, S.) 623–631

Glyceride lipases, activities of, in nerve endings of guinea-pig brain and their stimulation by noradrenaline 5-hydroxytryptamine and adrenaline (Vvyoda, O. S. & Rowe, C. E.) 233–248

Glycerol, effects of dihydroxyacetone and, on the concentrations of adenosine nucleotides in perfused rat liver (Woods, H. F. & Krebs, H. A.) 55–60

Glycerol 3-phosphate, effect of loading with glycerol on the concentration of, in perfused rat liver (Woods, H. F. & Krebs, H. A.) 55–60

sn-Glycerol 3-phosphate, regional and subcellular distribution of the enzymes responsible for the biosynthesis of phosphatidate from, in rat central nervous system (Possmayer, F., Meiners, B. & Mudd, J. B.) 381–394

sn-Glycerol 3-phosphate, relationship between palmitoylcoenzyme A synthetase activity and the esterification of, by guinea-pig small-intestine mucosa microsomal fraction (Brindley, D. N.) 707–715

sn-Glycerol 3-phosphate, relationship between palmitoylcoenzyme A synthetase activity and the esterification of, in rat liver mitochondria (Sánchez, M., Nicholls, D. G. & Brindley, D. N.) 697–706

Glycine, formation of, from acetate during growth of \textit{Pseudomonas AM} 1 on methanol (Dunstan, P. M. & Anthony, C.) 797–801

Glycogen, changes in the concentration of, in liver of the newborn rat immediately after birth (Snell, K. & Walker, D. G.) 739–752

Glycogen, effects of insulin on the biosynthesis of protein by perfused hearts from normal and insulin-deficient rats after depletion of glucose, glucose 6-phosphate and (Chain, E. B. & Sender, P. M.) 593–601

Glycolipophosphoprotein (vitellogenin), biosynthesis and secretion of, by liver slices from oestrogen-treated \textit{Xenopus laevis} (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459–463

Glycolysis, degradation of enzymes involved in, in rat small intestine during starvation (Jones, G. M. & Mayer, R. J.) 657–661

Glycolysis, effects of calcium ions on the activities of enzymes involved in, in various vertebrate and invertebrate muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Glycoprotein, turnover of protein and, in rabbit kidney-cortex brush borders \textit{in vivo} (Quirk, S. J., Byrne, J. & Robinson, G. B.) 501–508

Glycoproteins, lysosomal, isolation and characterization of a rat kidney rough microsomal fraction enriched in glycoproteins considered to be precursors of (Goldstone, A., Koenig, H., Nayyar, R., Hughes, C. & Lu, G. Y.) 259–266

Glycoproteins, lysosomal, nascent, kidney, rat, physicochemical modifications of, during transport from the rough endoplasmic reticulum through the Golgi apparatus (Goldstone, A. & Koenig, H.) 267–282

Glycoproteins, plasma, mouse, foetal, developmental changes in the microheterogeneity of (Gustine, D. L. & Zimmerman, E. F.) 541–551

Glycospaminoglycans, sulphated, metabolism of, in cultured skin fibroblasts from a human patient with Hurler’s syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 395–402

Glyoxylate, role of, in the regulation of a nicotinamide-adenine dinucleotide phosphate-linked isoenzyme of isocitrate dehydrogenase from \textit{Acinetobacter iwoffii} (Self, C. H., Parker, M. G. & Weitzman, P. D. J.) 215–221

Golgi apparatus, kidney, rat, physicochemical modifications of nascent lysosomal acid hydrolases during transport from the rough endoplasmic reticulum through (Goldstone, A. & Koenig, H.) 267–282

Gonadectomy, \textit{see} Castration

Granulation tissue, rat, experimentally induced, amino acid metabolism in slices of (Aalto, M., Lampiaho, K., Pikkaranen, J. & Kulonen, E.) 663–671

Growth, relationship between rate of, and glucose metabolism in \textit{Pseudomonas aeruginosa} 2F32 (Ng, F. M.-W. & Dawes, E. A.) 129–140

Vol. 132
Heart muscle, diminished protein biosynthesis in cell-free systems from skeletal muscle and, from polymyopathic hamsters (Bester, A. J. & Gevers, W.) 193–201

Heart muscle, rat, effects of calcium ions on the activities of glycolytic enzymes in, and various other muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Heart, rat, perfused, effects of insulin on the biosynthesis of protein in in the presence of glucose and after depletion of glucose, glucose 6-phosphate and glycogen, in, from normal and insulin-deficient animals (Chain, E. B. & Sender, P. M.) 593–601

Heart, rat, perfused, Langendorff, effects of insulin on the rate of protein biosynthesis in (Sender, P. M. & Garlick, P. J.) 603–608

Hepatectomy, partial, uptake of orotate and thymidine by regenerating rat liver after (Ord, M. G. & Stocken, L. A.) 47–54

Hexokinase, degradation of, and other glycolytic enzymes in rat small intestine during starvation (Jones, G. M. & Mayer, R. J.) 657–661

Hexokinase, effects of calcium ions on the activities of, and other glycolytic enzymes in various vertebrate and invertebrate muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Hexokinase, effects of glucose and glucose analogues on the subcellular distribution of, in rat small-intestinal epithelial cells (Jones, G. M. & Mayer, R. J.) 125–128

Histamine, effects of, and other agents on the turnover of protein-bound serine phosphate in respiring slices of guinea-pig cerebral cortex (Reddington, M., Rodnight, R. & Williams, M.) 475–482

Histidine ammonia-lyase, regulation of the activities of, and other enzymes involved in the pathway for the degradation of L-histidine to L-glutamate in Pseudomonas testosteroni (Coote, J. G. & Hassall, H.) 423–433

L-Histidine, degradation of imidazol-5-yl-L-lactate, imidazol-5-ylpropionate and, by Pseudomonas testosteroni (Coote, J. G. & Hassall, H.) 409–422

L-Histidine, regulation of the activities of the enzymes degrading imidazol-5-yl-L-lactate, imidazol-5-ylpropionate and, in Pseudomonas testosteroni (Coote, J. G. & Hassall, H.) 423–433

Hurler's syndrome, disorder in the metabolism of hyaluronate in cultured skin fibroblasts from a human patient with (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 403–408

Hurler's syndrome, metabolism of sulphated glycosaminoglycans in cultured skin fibroblasts from a human patient with (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 395–402

Hyaluronate, disorder in the metabolism of, in cultured skin fibroblasts from a human patient with Hurler's syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 403–408

Hydrogen ions, stoichiometry of the symport of lactose and, across the plasma membrane of Escherichia coli (West, I. C. & Mitchell, P.) 587–592

Hydrogen ions, stoichiometry of the translocation of, by the nicotinamide-adenine dinucleotide (phosphate) transhydrogenase of rat liver mitochondria (Moyle, K. & Mitchell, P.) 571–585

Hydrolases, acid, lysosomal, isolation and characterization of a rat kidney rough microsomal fraction that is enriched in (Goldstone, A., Koenig, H., Nayyar, R., Hughes, C. & Lu, C. Y.) 259–266

Hydrolases, acid, lysosomal, nascent, kidney, rat, physicochemical modifications of, during transport from the rough endoplasmic reticulum through the Golgi apparatus (Goldstone, A. & Koenig, H.) 267–282

3β-Hydroxy steroid dehydrogenase, activities of, and other enzymes involved in steroid biosynthesis and cholesteryl ester metabolism in rabbit ovary interstitial tissue and corpora lutea (Flint, A. P. F. & Armstrong, D. T.) 301–311

17β-Hydroxy-5α-androstan-3-one, effects of cyproterone and cyproterone acetate on the dynamics of the uptake and metabolism of, and other androgens by human prostate gland in vitro (Giorgi, E. P., Shirley, I. M., Grant, J. K. & Stewart, J. C.) 465–474

3-Hydroxybutyrate, role of acetate as an intermediate during growth of Pseudomonas AM1 on C1 compounds, ethanol and (Dunstan, P. M. & Anthony, C.) 797–801

2α-Hydroxyprogren-4-ene-3-one, role of progesterone and, in the control of cholesteryl ester biosynthesis in rabbit ovary interstitial tissue (Flint, A. P. F., Grinwicht, D. L. & Armstrong, D. T.) 313–321

5-Hydroxytryptamine, effects of, and other agents on the turnover of protein-bound serine phosphate in respiring slices of guinea-pig cerebral cortex (Reddington, M., Rodnight, R. & Williams, M.) 475–482

5-Hydroxytryptamine, stimulation by, of glyc eride lipases in nerve endings of guinea-pig brain (Vyvoda, O. S. & Rowe, C. E.) 233–248

Hypophysin, pig, subcellular organization of neurophysins, oxytocin, [8-lysine]-vasopressin and adenosine triphosphate in the posterior lobe of (Pickup, J. C., Johnston, C. I., Nakamura, S., Uttenthal, L. O. & Hope, D. B.) 361–371

α-L-Iduronidase, effect of a crude urine corrective-factor preparation containing, on the metabolism of hyaluronate in cultured skin fibroblasts from a human patient with Hurler's syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 403–408

Imidazol-5-yl-L-lactate, degradation of L-histidine, imidazol-5-ylpropionate and, by Pseudomonas testosteroni (Coote, J. G. & Hassall, H.) 409–422

Imidazol-5-yl-L-lactate, regulation of the activities of the enzymes degrading L-histidine, imidazol-5-ylpropionate and, in Pseudomonas testosteroni (Coote, J. G. & Hassall, H.) 423–433

Imidazol-5-ylpropionate, degradation of L-histidine, imidazol-5-yl-L-lactate and, by Pseudomonas testosteroni (Coote, J. G. & Hassall, H.) 409–422

Imidazol-5-ylpropionate, degradation of L-histidine, imidazol-5-yl-L-lactate and, in Pseudomonas testosteroni (Coote, J. G. & Hassall, H.) 423–433

Insulin, effect of treatment with, on the activity of acetylcoenzyme A carboxylase in rat epididymal tissue in vitro (Halestrap, A. P. & Denton, R. M.) 509–517
INDEX OF SUBJECTS

Insulin, effect of treatment with, on the concentrations of free amino acids in rat testes (Mushahwar, I. K. & Koepepe, R. E.) 353–359

Insulin, effects of glucagon and, on the concentration of adenosine 3':5'-cyclic monophosphate in an organ culture of rat liver (Siddle, K., Kane-Maguire, B. & Campbell, A. K.) 765–773

Insulin, effects of glucose, noradrenaline and, on lipolysis and on the concentrations of adenosine 3':5'-cyclic monophosphate and adenosine triphosphate in rat epididymal adipose tissue (Knight, B. L. & Iliffe, J.) 77–82

Insulin, effects of iodoacetamide on the stimulation by glucose of the release of, by isolated mouse pancreas islets of Langerhans (Hellman, B., Idahl, L.-Å., Lernmark, Å., Sehlin, J. & Täljedal, I.-B.) 775–789

Insulin, effects of, on the biosynthesis of protein by perfused hearts from normal and insulin-deficient rats in the presence of glucose and after depletion of glucose, glucose 6-phosphate and glycogen (Chain, E. B. & Sender, P. M.) 593–601

Insulin, effects of, on the rate of protein biosynthesis in the Langendorff-perfused rat heart (Sender, P. M. & Garlick P. J.) 603–608

Intestinal tissue, ovary, rabbit, activities of enzymes involved in steroid biosynthesis and cholesterol ester metabolism in, and corpora lutea (Flint, A. P. F. & Armstrong, D. T.) 301–311

Intestinal tissue, ovary, rabbit, control of cholesterol ester biosynthesis in (Flint, A. P. F., Grinwich, D. L. & Armstrong, D. T.) 313–321

Intestine, small, guinea-pig, relationship between palmitoyl-coenzyme A synthetase activity and the esterification of sn-glycerol 3-phosphate by the microsomal fraction from the mucosa of (Brindley, D. N.) 707–715

Intestine, small, rat, degradation of enzymes involved in the metabolism of glucose in, during starvation (Jones, G. M. & Mayer, R. J.) 657–661

Intestine, small, rat, developing, interrelationship between glutathione (reduced)-cystine transhydrogenase and glutathione (oxidized) reductase in (States, B. & Segal, S.) 623–631

Intestine, small, rat, effects of glucose and glucose analogues on the subcellular distribution of hexokinase in epithelial cells of (Jones, G. M. & Mayer, R. J.) 125–128

Iodoacetamide, effects of, on the stimulation by glucose of the release of insulin by isolated mouse pancreas islets of Langerhans (Hellman, B., Idahl, L.-Å., Lernmark, Å., Sehlin, J. & Täljedal, I.-B.) 775–789

Iron, lack of effect of cobalt ions on the metabolism of, in a cobalt ion-resistant strain of Neurospora crassa (Venkateswerlu, G. & Sivarama Sastry, K.) 673–680

Islets of Langerhans, pancreas, mouse, isolated, effects of iodoacetamide on the stimulation by glucose of the release of insulin by (Hellman, B., Idahl, L.-Å., Lernmark, Å., Sehlin, J. & Täljedal, I.-B.) 775–789

Isocitrate dehydrogenase, mitochondrial, liver, rat, absolute specificity of, for nicotinamide-adenine dinucleotide phosphate (Moyle, J. & Mitchell, P.) 571–585

Isocitrate dehydrogenase, regulation of a nicotinamide-adenine dinucleotide phosphate-linked isoenzyme of, from Acinetobacter Iwoffi (Self, C. H., Parker, M. G. & Weitzman, P. D. J.) 215–221

Isoniazid, acetylation of, by N-acetyltransferases of various tissues of the rabbit (Hearse, D. J. & Weber, W. W.) 519–526

Kidney cortex, rabbit, turnover of protein and glycoprotein in the brush borders of, in vivo (Quirk, S. J., Byrne, J. & Robinson, G. B.) 501–508

Kidney cortex, rat, exchange of malate between cytosol and mitochondria in (Rognstad, R. & Katz, J.) 349–352

Kidney, pig, intramitochondrial location of the glutaminase isoenzymes in (Crompton, M., McGivan, J. D. & Chappell, J. B.) 27–34

Kidney, pig, occurrence of intermediates in the oxidative degradation of octanoate by mitochondrial extracts from (Stewart, H. B., Tubbs, P. K. & Stanley, K. K.) 61–76

Kidney, pig, transport of glutamine and glutamate in mitochondria from, in relation to the deamidation of glutamine (Crompton, M. & Chappell, J. B.) 35–46

Kidney, rat, inhibition by methylglyoxal bis(guanylhydrazone) of the biosynthesis of spermidine in (Pegg, A. E.) 537–540

Kidney, rat, isolation and characterization of a rough microsomal fraction from, that is enriched in lysosomal enzymes (Goldstone, A., Koenig, H., Nayar, R., Hughes, C. & Lu, C. Y.) 259–266

Kidney, rat, physicochemical modifications of nascent lysosomal acid hydrolases during transport from the rough endoplasmic reticulum through the Golgi apparatus of (Goldstone, A. & Koenig, H.) 267–282

Lactate, changes in the concentrations of glucose and, in plasma of the newborn rat immediately after birth (Snell, K. & Walker, D. G.) 739–752

Lactate, concentrations of free of amino acids and, in the testes of various species (Mushahwar, I. K. & Koepepe, R. E.) 353–359

Lactate/pyruvate concentration ratio, effects of glyceral and dihydroxyacetone, on, in perfused rat liver (Woods, H. F. & Krebs, H. A.) 55–60

Vol. 132

Lactation, biosynthesis of medium-chain fatty acids by the microsomal plus cytosol fraction from rabbit mammary gland during (Strong, C. R., Carey, E. M. & Dils, R.) 121–123

Lactose, stoichiometry of the sympot of protons and across the plasma membrane of Escherichia coli (West, I. C. & Mitchell, P.) 587–592

Leaves, nettle, activity of choline acetyltransferase in (Barlow, R. B. & Dixon, R. O. D.) 15–18

[3H]Leucine, incorporation of inorganic [32P]phosphate and, into vitellinogen by liver slices from oestrogen-treated Xenopus laevis (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459–463

Linoleate, role of food particles as a site for the hydrogenation of, in sheep rumen (Harfoot, C. G., Noble, R. C. & Moore, J. H.) 829–832

Lipids, regional and subcellular distribution of the enzymes responsible for the biosynthesis of de novo of, in rat central nervous system (Possmayer, F., Meiners, B. & Mudd, J. B.) 381–394

Lipolysis, effects of glucose, insulin and noradrenaline on, and on the concentrations of adenosine 3':5'-cyclic monophosphate and adenosine triphosphate in rat epididymal adipose tissue (Knight, B. L. & Iliffe, J.) 77–82

Lipoprotein lipase, see Lipase, clearing-factor

Liver, determination of phenethamine and related compounds in the brain and, of rats with phenylethanolamine like characteristics induced by the injection of p-chlorophenylalanine (Edwards, D. J. & Blau, K.) 95–100

Liver, guinea-pig, control of the biosynthesis of phosphoenolpyruvate in mitochondria from (Wilson, M. B.) 553–557

Liver, mouse, inhibitory effects of steroids on the formation of glucoside conjugates by a microsomal preparation from (Gessner, T., Jacknowitz, A. & Vollmer, C. A.) 249–258

Liver, ox, occurrence of intermediates in the oxidative degradation of octanoate by mitochondrial extracts from (Stewart, H. B., Tubbs, P. K. & Stanley, K. K.) 61–76

Liver, rabbit, characterization and significance of N-acetyltransferases in, and other tissues (Hearse, D. J. & Weber, W. W.) 519–526

Liver, rat, activation by cortisone of acid α-glucosidase in lysosomes of (Bourne, E. J., Clarke, K., Pridham, J. B. & Rowe, J. J. M.) 435–438

Liver, rat, activities, substrate specificities and subcellular distributions of 3-oxyacyl-coenzyme A thiolases in, and other animal tissues (Middleton, B.) 717–730

Liver, rat, changes in the glycogen content of, immediately after birth (Snell, K. & Walker, D. G.) 739–752

Liver, rat, effects of carbon monoxide on the nature of the accumulated 4,4-dimethyl sterol precursors of cholesterol during its biosynthesis from mevalonate by a preparation of (Gibbons, G. F. & Mitropoulos, K. A.) 439–448

Liver, rat, effects of acute and prolonged treatment with ethanol on the concentrations of coenzyme A, carnitine and their derivatives in (Kondrup, J. & Grunnet, N.) 373–379

Liver, rat, effects of glucagon and insulin on the concentration of adenosine 3'-5'-cyclic monophosphate in an organ culture of (Siddle, K., Kane-Maguire, B. & Campbell, A. K.) 765–773

Liver, rat, inhibition by methyglyoxal bis(3-hydroxyaldehyde) of the biosynthesis of spermidine in (Pegg, A. E.) 537–540

Liver, rat, isolation, morphology and composition of lipid droplets from (DiAugustine, R. P., Schafer, J.-M. & Fouts, J. R.) 323–327

Liver, rat, normal and regenerating, uptake of orotate and thymidine by (Ord, M. G. & Stocken, L. A.) 47–54

Liver, rat, perfused, effects of glycerol and dihydroxyacetone on the concentrations of adenine nucleotides in (Woods, H. F. & Krebs, H. A.) 55–60

Liver, rat, relationship between palmitoyl-coenzyme A synthetase activity and the esterification of sn-glycerol 3-phosphate in mitochondria from (Sánchez, M., Nicholls, D. G. & Brindley, D. N.) 697–706

Liver, rat, role of membrane phospholipids in the interaction of ribosomes with the endoplasmic-reticulum membrane of (Jothy, S., Tay, S. & Simpkins, H.) 637–640

Liver, rat, stoichiometry of the translocation of protons by the nicotinamide–adenine dinucleotide (phosphate) transhydrogenase of mitochondria from (Moyle, J. & Mitchell, P.) 571–585

Liver, rat, studies of nuclei separated from, by zonal centrifugation after treatment of the animals with thioacetamide (Gonzalez-Mujica, F. & Mathias, A. P.) 163–183

1973
INDEX OF SUBJECTS

Liver, *Xenopus laevis*, oestrogen-treated, biosynthesis and secretion of vitellogenin by slices of (Merry, A. H., Dolphin, S. J., Munday, K. A. & Akhtar, M.) 459-463

Locust (Locusta migratoria), 3,4-dihydroxYPheNalanine (dopa) decarboxylase activity in the nervous system of, and other arthropods (Murdock, L. L., Wirtz, R. A. & Köhler, G.) 681-688

Locusta migratoria, see Locust

Luteinizing hormone, role of, in the control of cholesteryl ester biosynthesis in rabbit ovary interstitial tissue and in luteinized rat ovary (Flint, A. P. F., Grinwich, D. L. & Armstrong, D. T.) 313-321

Lymphocytes, human, phytohaemaggulutinin-stimulated control by putrescine and spermidine of the activity of ornithine decarboxylase in (Kay, J. E. & Lindsay, V. J.) 791-796

Lymphocytes, rat, inhibition by complement of the concanavalin A-stimulated incorporation of [3H]uridine into ribonucleic acid of (Milthorpe, P. & Fordyke, D. R.) 803-812

[3H]lysine, incorporation of, into protein and glycoprotein in rabbit kidney-cortex brush borders in *vivo* (Quirk, S. J., Byrne, J. & Robinson, G. B.) 501-508

Lysine residues, hydroxylation of, of collagen biosynthesized in bone of rachitic rats and chicks (Barnes, M. J., Constable, B. J., Morton, L. F. & Kodicek, E.) 113-115

Lysosomes, heterogeneous distribution of acid hydrolases in subgroups of, from a homogeneous population of cultured Chinese-hamster ovary fibroblasts (Milsom, J. P. & Wynn, C. H.) 493-500

Lysosomes, isolation and characterization of a rat kidney rough microsomal fraction that is enriched in enzymes typical of (Goldstone, A., Koenig, H., Nayyar, R., Hughes, C. & Lu, C. Y.) 259-266

Lysosomes, kidney, rat, physicochemical modifications of nascent acid hydrolases of, during transport from the rough endoplasmic reticulum through the Golgi apparatus (Goldstone, A. & Koenig, H.) 267-282

Lysosomes, liver, rat, activation by cortisone of acid α-glucosidase in (Bourne, E. J., Clarke, K., Pridham, J. B. & Rowe, J. J. M.) 435-438

Magnesium ions, function of cell-wall and membrane teichoic acids in maintaining the correct ionic environment for enzyme systems of the membrane of *Bacillus licheniformis* A.T.C.C. 9945 that are dependent on (Hughes, A. H., Hancock, I. C. & Baddiley, J.) 83-93

Malate, exchange of, between cytosol and mitochondria in rat kidney cortex (Rognstadt, R. & Katz, J.) 349-352

Mammary gland, rabbit, lactating, biosynthesis of medium-chain fatty acids by the microsomal plus cytosol fraction from (Strong, C. R., Carey, E. M. & Dils, R.) 121-123

Membrane, endoplasmic reticulum, liver, rat, role of membrane phospholipids in the interaction of ribosomes with (Jothy, S., Tay, S. & Simpkins, H.) 637-640

Membrane, function of the teichoic acids of the cell wall and, in maintaining the correct ionic environment for cation-dependent enzyme systems of the membrane of *Bacillus licheniformis* A.T.C.C. 9945 (Hughes, A. H., Hancock, I. C. & Baddiley, J.) 83-93

Membrane, inner, mitochondrial, kidney, pig, transport of glutamine and glutamate across, in relation to the deamidation of glutamine (Crompton, M. & Chappell, J. B.) 35-46

Membrane, lysosomal, liver, rat, possible involvement of, in the activation by cortisone of acid α-glucosidase (Bourne, E. J., Clarke, K., Pridham, J. B. & Rowe, J. J. M.) 435-438

Membrane, plasma, stoichiometry of the symport of lactose and protons across, of *Escherichia coli* (West, I. C. & Mitchell, P.) 587-592

Membranes, microsomal and synaptosomal, cerebral cortex, ox, stimulation by adenosine 3':5'-cyclic monophosphate of the intrinsic protein kinase activity in preparations of (Weller, M. & Rodnight, R.) 483-492

Membranes, plasma, effect of 6-N',2'-O-dibutylryladeno sine 3':5'-cyclic monophosphate plus testosterone on the phosphorylation of high-molecular-weight proteins of, in cultured Chinese-hamster ovary cells (Rieber, M. & Bacalao, J.) 641-644

Membranes, reconstitution of the energy-linked nicotinamide–adenine dinucleotide (phosphate) transhydrogenase activity in, from a mutant strain of *Escherichia coli* K12 lacking magnesium ion- or calcium ion-stimulated adenosine triphosphatase (Cox, G. B., Gibson, F., McCann, L. M., Butlin, J. D. & Crane, F. L.) 689-695

Metal ions, interrelationships in trace-element metabolism in toxicities of, towards a cobalt ion-resistant strain of *Neurospora crassa* (Venkateswerlu, G. & Sivarama Sastry, K.) 673-680

Methanol, role of acetate as an intermediate during growth of *Pseudomonas* AM1 on ethanol, 3-hydroxybutyrate and (Dunstan, P. M. & Anthony, C.) 797-801

Methyl α-glucoside, regulation of the transport of glucose and, in *Pseudomonas aeruginosa* 2F32 (Midgley, M. & Dawes, E. A.) 141-154

Methylamine, metabolism of, in excised shoot tips of the tea plant (Suzuki, T.) 753-763

N'-Methylglutamine, formation of, from methylamine in excised shoot tips of the tea plant (Suzuki, T.) 753-763

Methylglyoxal bist[guanylyl]hydrazone), inhibition by, of the biosynthesis of spermidine in rat liver and kidney (Pegg, A. E.) 537-540

Methylothrophic bacteria, obligate and facultative, metabolism of trimethylamine in (Colby, J. & Zatman, L. J.) 101-112

Vol. 132
Mevalonate, effect of carbon monoxide on the nature of the accumulated 4,4-dimethyl sterol precursors of cholesterol during its biosynthesis from, by a rat liver preparation (Gibbons, G. F. & Mitropoulos, K. A.) 439–448

Microsomal fraction, adrenal-gland, rat, effects of various hormonal treatments on the activity of the C19 steroid 5α-reductase of (Maynard, P. V. & Cameron, E. H. D.) 293–300

Microsomal fraction, adrenal-gland, rat, metabolism of androst-4-ene-3,17-dione by the C19 steroid 5α-reductase of (Maynard, P. V. & Cameron, E. H. D.) 283–291

Microsomal fraction, biosynthesis of medium-chain fatty acids by the combined cytosol and, from lactating rabbit mammary gland (Strong, C. R., Carey, E. M. & Dils, R.) 121–123

Microsomal fraction, central-nervous-system, rat, localization of the enzymes responsible for the biosynthesis of phosphatidate de novo in (Possmayer, F., Meiners, N. & Mudd, J. B.) 381–394

Microsomal fraction, cerebral-cortex, ox, stimulation by adenosine 3'5'-cyclic monophosphate of the intrinsic protein kinase activity in (Weller, M. & Rodnight, R.) 483–492

Microsomal fraction, mucosa, small-intestine, guinea-pig, relationship between palmitoyl-coenzyme A synthetase activity and the esterification of sn-glycerol 3-phosphate by (Brindley, D. N.) 707–715

Microsomal fraction, rough, kidney, rat, isolation and characterization of, that is enriched in lysosomal enzymes (Goldstone, A., Koenig, H., Nayyar, R., Hughes, C. & Lu, C. Y.) 259–266

Microsomal fraction, rough, kidney, rat, physicochemical modifications of nascent lysosomal acid hydrolyases during transport from, through the Golgi apparatus (Goldstone, A. & Koenig, H.) 267–282

Microsomal preparation, liver, mouse, inhibitory effects of steroids on the formation of glucoside conjugates by (Gessner, T., Jacknowitz, A. & Vollmer, C. A.) 249–258

Microsomal preparation, seminal-vesicle, ox, inhibition by 7-oxa- and 5-oxa-prostaglandin analogues of the biosynthesis of prostaglandins E2 and F2α from arachidonate by (McDonald-Gibson, R. G., Flack, J. D. & Ramwell, P. W.) 117–120

Mitochondria, activities and substrate specificities of 3-oxoacyl-coenzyme A thiases in cytosol and, of various animal tissues (Middleton, B.) 717–730

Mitochondria, brain, rat, changes in the activities of 3-oxoacyl-coenzyme A thiases in, and cytosol during development (Middleton, B.) 731–737

Mitochondria, brain, rat, regulation of pyruvate metabolism via pyruvate carboxylase in (Patel, M. S. & Tilghman, S. M.) 185–192

Mitochondria, kidney-cortex, rat, exchange of malate between, and cytosol (Rognstad, R. & Katz, J.) 349–352

Mitochondria, kidney, pig, location of the glutaminase isoenzymes in the intramitochondrial compartment of (Crompton, M., McGivan, J. D. & Chappell, J. B.) 27–34

Mitochondria, kidney, pig, occurrence of intermediates in the oxidative degradation of octanoate by extracts of (Stewart, H. B., Tubbs, P. K. & Stanley, K. K.) 61–76

Mitochondria, kidney, pig, transport of glutamine and glutamate in, in relation to the deamination of glutamine (Crompton, M. & Chappell, J. B.) 35–46

Mitochondria, liver, guinea-pig, control of the biosynthesis of phosphoenolpyruvate in (Wilson, M. B.) 553–557

Mitochondria, liver, ox, occurrence of intermediates in the oxidative degradation of octanoate by extracts of (Stewart, H. B., Tubbs, P. K. & Stanley, K. K.) 61–76

Mitochondria, liver, rat, relationship between palmitoyl-coenzyme A synthetase activity and the esterification of sn-glycerol 3-phosphate in (Sánchez, M., Nicholls, D. G. & Brindley, D. N.) 697–706

Mitochondria, liver, rat, stoichiometry of the translocation of protons by the nicotinamide-adenine dinucleotide (phosphate) transhydrogenase of (Moyle, J. & Mitchell, P.) 571–585

Monoglyceride lipase, activities of, and other glyceride lipases in nerve endings of guinea-pig brain and their stimulation by noradrenaline, 5-hydroxytryptamine and adrenaline (Vyvoda, O. S. & Rowe, C. E.) 233–248

Mucosa, small-intestine, guinea-pig, relationship between palmitoyl-coenzyme A synthetase activity and the esterification of sn-glycerol 3-phosphate by the microsomal fraction from (Brindley, D. N.) 707–715

Muscle, flight, insect, effects of calcium ions on the activities of glycolytic enzymes in, and various other muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Muscle, heart, diminished protein biosynthesis in cell-free systems from skeletal muscle and, from polymyopathic hamsters (Bester, A. J. & Gevers, W.) 193–201

Muscle, heart, rat, effects of calcium ions on the activities of glycolytic enzymes in, and various other muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Muscle, skeletal, diminished protein biosynthesis in cell-free systems from heart muscle and, from polymyopathic hamsters (Bester, A. J. & Gevers, W.) 193–201

Muscle, skeletal, evidence for the presence of defective transfer ribonucleic acid and its inhibitory effect on protein biosynthesis in, from polymyopathic hamsters (Bester, A. J. & Gevers, W.) 203–214

Muscle, skeletal, vertebrate, effects of calcium ions on the activities of glycolytic enzymes in, and various other muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Myofibrils, muscle, heart, rat, effect of insulin on the rate of biosynthesis of the proteins of (Sender, P. M. & Garlick, P. J.) 603–608

Nerve endings, brain, guinea-pig, activities of glyceride lipases in, and their stimulation by noradrenaline, 5-hydroxytryptamine and adrenaline (Vyvoda, O. S. & Rowe, C. E.) 233–248

Nerve, peripheral, crab, absence of protein kinase activity from a membrane preparation from (Weller, M. & Rodnight, R.) 483–492
INDEX OF SUBJECTS

Nervous system, central, rat, regional and subcellular distribution of the enzymes responsible for the biosynthesis of phosphatidate de novo in (Possmayer, F., Meiners, B. & Mudd, H. B.) 381-394

Nervous system, locust, 3,4-dihydroxyphenylalanine (dopa) decarboxylase activity in, and in that of other arthropods (Murdock, L. L., Wirtz, R. A. & Köhler, G.) 681-688

Nettle (Urtica dioica), activity of choline acetyltransferase in (Barlow, R. B. & Dixon, R. O. D.) 15-18

Neurosecretory granules, distribution of neurophysins, oxytocin, [8-lysine]-vasopressin and adenosine triphosphatase between two populations of, from pig posterior pituitary gland (Pickup, J. C., Johnston, C. I., Nakamura, S., Utenthal, L. O. & Hope, D. B.) 361-371

Neurospora crassa, interrelationships in trace-element metabolism in toxicities of metal ions towards a cobalt ion-resistant strain of (Venkateswerlu, G. & Sivarama Sastry, K.) 673-680

Neurotropic drugs, effects of, on the biosynthesis and release of [14C]acetycholine in rat cerebral-cortex slices (Grewal, G. & Quastel, J. H.) 1-14

Nickel ions, interrelationships in trace-element metabolism in toxicities of, and other metal ions towards a cobalt ion-resistant strain of Neurospora crassa (Venkateswerlu, G. & Sivarama Sastry, K.) 673-680

Nicotinamide-adenine dinucleotide, effects of the injection of crotonate on the redox state of, and other redox couples and on gluconeogenesis from lactate in rat liver in vivo (Hawkins, R. A., Houghton, C. R. S. & Williamson, D. H.) 19-25

Nicotinamide-adenine dinucleotide (phosphate) transhydrogenase, energy-linked, reconstitution of the activity of, in membranes from a mutant strain of Escherichia coli K12 lacking magnesium ion- or calcium ion-stimulated adenosine triphosphatase (Cox, G. B., Gibson, F., McCann, L. M., Butlin, J. D. & Crane, F. L.) 689-695

Nicotinamide-adenine dinucleotide (phosphate) transhydrogenase, stoichiometry of the translocation of protons by, of rat liver mitochondria (Moyle, J. & Mitchell, P.) 571-585

Nicotine, inhibitory effect of, on the biosynthesis of spheroioidene and hydroxyxpheroidene in two Rhodo- pseudomonas species (Singh, R. K., Ben-Aziz, A., Britton, G. & Goodwin, T. W.) 649-652

p-Nitrophenyl glucoside, inhibitory effects of steroids on the formation of, by a mouse liver microsomal preparation (Gessner, T., Jacknowitz, A. & Vollmer, C. A.) 249-258

Nordrenaline, effects of, and other agents on the turnover of protein-bound serine phosphate in respiring slices of guinea-pig cerebral cortex (Reddington, M., Rodnight, R. & Williams, M.) 475-482

Nordrenaline, effects of glucose, insulin and, on lipoysis and on the concentrations of adenosine 3':5'-cyclic monophosphate and adenosine triphosphate in rat epididymal adipose tissue (Knight, B. L. & Iliffe, J.) 77-82

Nordrenaline, stimulation by, of glyceride lipases in nerve endings of guinea-pig brain (Vyvoda, O. S. & Rowe, C. E.) 233-248

Nuclei, brain, rat, biosynthesis of ribonucleic acid in vivo in, subsequently fractionated by zonal centrifugation (Austoker, J., Cox, D. & Mathias, A. P.) 813-819

Nuclei, liver, rat, studies of, separated by zonal centrifugation after treatment of the animals with thioacetamide (Gonzalez-Mujica, F. & Mathias, A. P.) 163-183

Octanoate, biosynthesis of decanoate and, by the microsomal plus cytosol fraction from lactating rabbit mammary gland (Strong, C. R., Carey, E. M. & Dils, R.) 121-123

Octanoate, effect of, on the biosynthesis of phosphoenolpyruvate in guinea-pig liver mitochondria (Wilson, M. B.) 553-557

Octanoate, occurrence of intermediates in the oxidative degradation of, in ox liver and pig kidney mitochondrial extracts (Stewart, H. B., Tubbs, P. K. & Stanley, K. K.) 61-76

Oestradiol-17β, biosynthesis and secretion of vitellogenin by liver slices from Xenopus laevis treated with (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459-463

Oestradiol, effects of treatment with corticotrophin, testosterone and, on the activity of microsomal C19 steroid 5α-reductase in the adrenal glands of intact and castrated rats (Maynard, P. V. & Cameron, E. H. D.) 293-300

Oestrogen, biosynthesis and secretion of vitellogenin by liver slices from Xenopus laevis treated with (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459-463

Omnitine decarboxylase, control by putrescine and spermidine of the activity of, in phytohaemagglutinin-stimulated human lymphocytes (Kay, J. E. & Lindsay, V. J.) 791-796

Orotate, uptake of thymidine and, by normal and regenerating rat livers (Ord, M. G. & Stocken, L. A.) 47-54

Ovary cells, Chinese-hamster, cultured, effect of 6-N2'-O-dibutyryladenosine 3':5'-cyclic monophosphate plus testosterone on the phosphorylation of high-molecular-weight membrane proteins in (Rieber, M. & Bacalao, J.) 641-644

Ovary fibroblasts, Chinese-hamster, cultured, heterogeneous distribution of acid hydrolases in subgroups of lysosomes from a homogeneous population of (Milsom, J. P. & Wynn, C. H.) 493-500

Ovary, rabbit, activities of enzymes involved in steroid biosynthesis and choleseryl ester metabolism in interstitial tissue and corpora lutea of (Flint, A. P. F. & Armstrong, D. T.) 301-311

Ovary, rat, luteinized, control of choleseryl ester biosynthesis in (Flint, A. P. F., Grinwich, D. L. & Armstrong, D. T.) 313-321
Phosphatidate, evidence that sn-glycerol 3-phosphate acyltransferase activity is rate-limiting in the biosynthesis of, in rat liver mitochondria (Sánchez, M., Nicholls, D. G. & Brindley, D. N.) 697–706

Phosphatidate, evidence that palmityl-coenzyme A synthetase and sn-glycerol 3-phosphate acyltransferase activities are rate-limiting in the biosynthesis of, in guinea-pig small-intestine mucosa microsomal fraction (Brindley, D. N.) 707–715

Phosphatidate, regional and subcellular distribution of the enzymes responsible for the biosynthesis de novo of, in rat central nervous system (Possmayer, F., Meiners, B. & Mudd, J. B.) 381–394

Phosphonoipyrurate, control of the biosynthesis of, in guinea-pig liver mitochondria (Wilson, M. B.) 553–557

Phosphofructokinase, effects of calcium ions on the activities of, and other glycolytic enzymes in various vertebrate and invertebrate muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

6-Phosphogluconate dehydrogenase, degradation of, and other glycolytic enzymes in rat small intestine during starvation (Jones, G. M. & Mayer, R. J.) 657–661

Phosphoprotein, effects of putative neurotransmitters, tetrodotoxin and other agents on the turnover of serine phosphate residues of, in respiring slices of guinea-pig cerebral cortex (Reddington, M., Rodnight, R. & Williams, M.) 475–482

Phosphoserine, see Serine phosphate

Phytohaemagglutinin, control by putrescine and spermidine of the activity of ornithine decarboxylase in human lymphocytes stimulated by (Kay, J. E. & Lindsay, V. J.) 791–796

Plasma membrane, see Membrane, plasma

Plasma, mouse, foetal, developmental changes in the microheterogeneity of glycoproteins in (Gustine, D. L. & Zimmerman, E. F.) 541–551

Plasma, rat, changes in the concentration of glucose and other metabolites in, immediately after birth (Snell, K. & Walker, D. G.) 739–752

Plasma, rat, transport of retinoate in (Smith, J. E., Milch, P. O., Muto, Y. & Goodman, DeW.S.) 821–827

Polyomaviruses, diminished protein biosynthesis in cell-free systems from heart muscle and skeletal muscle from hamsters with (Bester, A. J. & Gevers, W.) 193–201

Polyomaviruses, evidence for the presence of defective transfer ribonucleic acid and its inhibitory effect on protein biosynthesis in skeletal muscle from hamsters with (Bester, A. J. & Gevers, W.) 203–214

Polyribosamines, diminished protein biosynthesis by, in cell-free systems from heart muscle and skeletal muscle from polyomaviruses hamsters (Bester, A. J. & Gevers, W.) 193–201
INDEX OF SUBJECTS

855

Polysomes, evidence for the presence of defective transfer ribonucleic acid and its inhibitory effect on protein biosynthesis by, in cell-free systems from poly-myopathic hamsters (Bester, A. J. & Gevers, W.) 203–214

Polysomes, see Polysomes

Potassium ions, effects of, on the biosynthesis and release of [14C]Jaclactylcholine in rat cerebral-cortex slices (Grewaal, D. S. & Quastel, J. H.) 1–14

Progestosterone, role of 20α-hydroxypregn-4-en-3-one and, in the control of cholesteryl ester biosynthesis in rabbit ovary interstitial tissue (Flint, A. P. F., Grinwich, D. L. & Armstrong, D. T.) 313–321

Proline, incorporation of, into collagen by slices of experimentally induced rat granulation tissue (Aalto, M., Lambiaho, K., Pikkarainen, J. & Kulonen, E.) 663–671

Promitochondria, changes in the activities of enzymes in, during glucose de-repression and respiratory adaptation of anaerobically grown Saccharomyces carlsbergensis (Cartledge, T. G. & Lloyd, D.) 609–621

Prostaglandins E2 and F2α, inhibition by 7-oxa- and 5-oxa-prostaglandin analogues of the biosynthesis of, from arachidonate by an ox seminal-vesicle microsomal preparation (McDonald-Gibson, R. G., Flack, J. D. & Ramwell, P. W.) 117–120

Prostate gland, human, effects of cyproterone and cyproterone acetate on the dynamics of the uptake and metabolism of androgens by, in vitro (Giorgi, E. P., Shirley, I. M., Grant, J. K. & Stewart, J. C.) 465–474

Protein, biosynthesis of, in slices of experimentally induced rat granulation tissue (Aalto, M., Lambiaho, K., Pikkarainen, J. & Kulonen, E.) 663–671

Protein, diminished biosynthesis of, in cell-free systems from heart muscle and skeletal muscle from poly-myopathic hamsters (Bester, A. J. & Gevers, W.) 193–201

Protein, effects of insulin on the biosynthesis of, by perfused hearts from normal and insulin-deficient rats in the presence of glucose and after depletion of glucose, glucose 6-phosphate and glycogen (Chain, E. B. & Sender, P. M.) 593–601

Protein, effects of putative neurotransmitters, tetrodotoxin and other agents on the turnover of serine phosphate bound to, in respiring slices of guinea-pig cerebral cortex (Reddington, M., Rodnight, R. & Williams, M.) 475–482

Protein, evidence for the presence of defective transfer ribonucleic acid and its inhibitory effect on the biosynthesis of, in skeletal muscle from poly-myopathic hamsters (Bester, A. J. & Gevers, W.) 203–214

Protein kinase, stimulation by adenosine 3':5'-cyclic monophosphate of the intrinsic activity of, in membrane preparations from ox cerebral cortex (Weller, M. & Rodnight, R.) 483–492

Protein, rates of the biosynthesis of, in the Langendorff-perfused rat heart in the presence and in the absence of insulin and in the working perfused rat heart (Sender, P. M. & Garlick, P. J.) 603–608

Protein, retinol-binding, non-participation of, in the plasma transport of retinol in the rat (Smith, J. E., Milch, P. O., Muto, Y. & Goodman, D. E.) 821–827

Protein, studies on the biosynthesis of deoxyribonucleic acid, ribonucleic acid and, in nuclei separated by zonal centrifugation from liver of rats treated with thioacetamide (Gonzalez-Mujica, F. & Mathias, A. P.) 163–183

Protein, turnover of glycoprotein and, in rabbit kidney-cortex brush borders in vivo (Quirk, S. J., Byrne, J. & Robinson, G. B.) 501–508

Proteins, membrane, high-molecular-weight, effect of 6-N,2′-O-dibutryladenosine 3′:5′-cyclic monophosphate plus testosterone on the phosphorylation of, in cultured Chinese-hamster ovary cells (Rieber, M. & Bacalao, J.) 641–644

Protons, stoichiometry of the symport of lactose and, across the plasma membrane of Escherichia coli (West, I. C. & Mitchell, P.) 587–592

Protons, stoichiometry of the translocation of, by the nicotinamide adenine dinucleotide (phosphate) transhydrogenase of rat liver mitochondria (Moyle, J. & Mitchell, P.) 571–585

Protovetratin, effects of, on the biosynthesis and release of [14C]Jaclactylcholine in rat cerebral-cortex slices (Grewaal, D. S. & Quastel, J. H.) 1–14

Pseudomonas aeruginosa C.G.H. 7709, regulation of the transport of glucose and 2-deoxy-D-glucose in (Mukkada, A. J., Long, G. L., & Romano, A. H.) 155–162

Pseudomonas aeruginosa 2F32, chemostat studies on the regulation by citrate of glucose metabolism in (Ng, F. M.-W. & Dawes, E. A.) 129–140

Pseudomonas aeruginosa 2F32, regulation of the transport of glucose and methyl α-glucoside in (Midgley, M. & Dawes, E. A.) 141–154

Pseudomonas AM1, role of acetate as an intermediate during growth of, on C1 compounds, ethanol and 3-hydroxybutyrate (Dunstan, P. M. & Anthony, C.) 797–801

Pseudomonas testosteroni, degradation of L-histidine, imidazol-5-yl-L-lactate and imidazol-5-ylpropionate by (Coote, J. G. & Hassall, H.) 409–422

Pseudomonas testosteroni, regulation of the activities of the enzymes degrading histidine, imidazol-5-yl-L-lactate and imidazol-5-ylpropionate in (Coote, J. G. & Hassall, H.) 423–433

Putrescine, control by, of the activity of ornithine de-carboxylase by phytohaemagglutinin-stimulated human lymphocytes (Kay, J. E. & Lindsay, V. J.) 791–796

Putrescine, inhibition by methyglyoxal bis(guanylhydrazone) of the biosynthesis of spermidine from, in rat liver and kidney (Pegg, A. E.) 537–540

Pyruvate carboxylase, regulation of pyruvate metabolism via, in rat brain mitochondria (Patel, M. S. & Tilghman, S. M.) 185–192

Pyruvate kinase, effects of calcium ions on the activities of, and other glycolytic enzymes in various vertebrate and invertebrate muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Vol. 132
Pyrurate, regulation of the metabolism of, by pyruvate carboxylase in rat brain mitochondria (Patel, M. S. & Tilghman, S. M.) 185–192

Pyrurate, role of, in the regulation of a nicotinamide–adenine dinucleotide phosphate-linked isoenzyme of isocitrate dehydrogenase from Acinetobacter lwoffi (Self, C. H., Parker, M. G. & Weitzman, P. D. J.) 215–221

Red blood cells, see Erythrocytes

Redox state, effects of the injection of crotonate on, and on gluconeogenesis from lactate in rat liver in vivo (Hawks, R. A., Houghton, C. R. S. & Williamson, D. H.) 19–25

Regeneration, uptake of orotate and thymidine by rat liver during (Ord, M. G. & Stocken, L. A.) 47–54

Respiratory chain, assembly of, during respiratory adaptation of anaerobically grown Saccharomyces carlsbergensis (Cartledge, T. G. & Lloyd, D.) 609–621

Retinol-binding protein, respiratory, non-participation of, in the plasma transport of retinoate in the rat (Smith, J. E., Milch, P. O., Muto, Y. & Goodman, DeW.S.) 821–827

Ribonuclease, acid, heterogeneous distribution of, and other acid hydrolases in subgroups of lysosomes from a homogeneous population of cultured Chinese-hamster ovary fibroblasts (Milsom, J. P. & Wynn, C. H.) 493–500

Ribonuclease acid, biosynthesis of, in vivo, in rat brain nuclei subsequently fractionated by zonal centrifugation (Austoker, J., Cox, D. & Mathias, A. P.) 813–819

Ribonuclease acid, inhibition by complement of the concanavalin A-stimulated incorporation of [3H]uridine into, of rat lymphocytes (Milthorpe, P. & Forsdyke, D. R.) 803–812

Ribonucleic acid, studies on the biosynthesis of protein, deoxiribonucleic acid and, in nuclei separated by zonal centrifugation from liver of rats treated with thioacetamide (Gonzalez-Mujica, F. & Mathias, A. P.) 163–183

Ribonucleic acid, transfer, defective, evidence for the presence of, and its inhibitory effect on protein biosynthesis in skeletal muscle from polymyopathic hamsters (Bester, A. J. & Gevers, W.) 203–214

Ribosomes, role of membrane phospholipids in the interaction of, with rat liver endoplasmic-reticulum membrane (Jothy, S., Tay, S. & Simpkins, H.) 637–640

Rickets, hydroxylation of lysine residues of collagen biosynthesized in bone of rats and chicks with (Barnes, M. J., Constable, B. J., Morton, L. F. & Kodicek, E.) 113–115

Rumen, sheep, role of food particles as a site for the hydrogenation of unsaturated fatty acids in (Harfoot, C. G., Noble, R. C. & Moore, J. H.) 829–832

Saccharomyces carlsbergensis N.C.Y.C. 74S, anaerobically grown, changes in the activities and subcellular distribution of enzymes during glucose de-repression and respiratory adaptation of (Cartledge, T. G. & Lloyd, D.) 609–621

Sarcoplasm, muscle, heart, rat, effect of insulin on the rate of biosynthesis of the proteins of (Sender, P. M. & Garlick, P. J.) 603–608

Seminal vesicles, ox, inhibition of 7-oxa- and 5-oxa-prostaglandin analogues of the biosynthesis of prostaglandins E2 and F2α from arachidonate by a microsomal preparation from (McDonald-Gibson, R. G., Flack, J. D. & Ramwell, P. W.) 117–120

Serine phosphate, protein-bound, effects of putative neurotransmitters, tetrodotoxin and other agents on the turnover of, in respiring slices of guinea-pig cerebral cortex (Reddington, M., Rodnight, R. & Williams, M.) 475–482

Serine, utilization of methyamine for the biosynthesis of, in excised shoot tips of the tea plant (Suzuki, T.) 753–763

Serotonin, see 5-Hydroxytryptamine

Serum albumin, see Albumin, serum

Serum factors, rat, inhibition by, the concanavalin A-stimulated incorporation of [3H]uridine into ribonucleic acid of rat lymphocytes (Milthorpe, P. & Forsdyke, D. R.) 803–812

Sialic acid, developmental changes in the content of, in foetal mouse plasma glycoproteins (Gustine, D. L. & Zimmerman, E. F.) 541–551

Skeletal muscle, see Muscle, skeletal

Skin fibroblasts, human, cultured, disorder in the metabolism of hyaluronate in, from a patient with Hurler's syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 403–408

Skin fibroblasts, human, cultured, metabolism of sulphated glycosaminoglycans in, from a patient with Hurler's syndrome (Germinario, R. J., Kahlenberg, A. & Pinsky, L.) 395–402

Small intestine, see Intestine, small

Snell 494 adenocortical tumour, rat, activity of microsomal C19 steroid 5α-reductase in (Maynard, P. V. & Cameron, E. H. D.) 293–300
Spermidine, control by, of the activity of ornithine decarboxylase in phytohaemagglutinin-stimulated human lymphocytes (Kay, J. E. & Lindsay, V. J.) 791–796

Starvation, degradation of enzymes involved in the metabolism of glucose in rat small intestine during (Jones, G. M. & Mayer, R. J.) 657–661

Steroid (C$_19$) 5α-reductase, microsomal, adrenal-gland, rat, effects of various hormonal treatments on the activity of (Maynard, P. V. & Cameron, E. H. D.) 293–300

Steroid (C$_19$) 5α-reductase, microsomal, adrenal-gland, rat, metabolism of androst-4-ene-3,17-dione by (Maynard, P. V. & Cameron, E. H. D.) 283–291

Steroids, activities of enzymes involved in the biosynthesis of, and cholesteryl ester metabolism in rabbit ovary interstitial tissue and corpora lutea (Flint, A. P. F. & Armstrong, D. T.) 301–311

Steroids, inhibitory effects of, on the formation of glucose-side conjugates by a mouse liver microsomal preparation (Gessner, T., Jacknowitz, A. & Vollmer, C. A.) 249–258

Sterols, 4,4-dimethyl, effect of carbon monoxide on the nature of, accumulated during the biosynthesis of cholesterol from mevalonate by a rat liver preparation (Gibbons, G. F. & Mitropoulos, K. A.) 439–448

Sulphadiazine, acetylation of, by N-acetyltransferases of various tissues of the rabbit (Hearse, D. J. & Weber, W. W.) 519–526

Sulphamethazine, acetylation of, by N-acetyltransferases of various tissues of the rabbit (Hearse, D. J. & Weber, W. W.) 519–526

 Sulphhydril groups, see Thiol groups

Supernatant fraction, see Cytosol

Synaptosomes, brain, guinea-pig, activities of glyceride lipases in, and their stimulation by noradrenaline, 5-hydroxytryptamine and adrenaline (Vyvoda, O. S. & Rowe, C. E.) 233–248

Synaptosomes, cerebral-cortex, ox, stimulation by adenosine 3':5'-cyclic monophosphate of the intrinsic protein kinase activity in membrane fragments of (Weller, M. & Rodnight, R.) 483–492

Tea (Thea sinensis) plant, metabolism of methylamine in excised shoot tips of (Suzuki, T.) 753–763

Teichoic acids, cell-wall and membrane, function of, in maintaining the correct ionic environment for cation-dependent enzyme systems of the membrane of Bacillus licheniformis A.T.C.C. 9945 (Hughes, A. H., Hancock, I. C. & Baddiley, J.) 83–93

Temperature, low, influx of calcium ions into human erythrocytes during storage at (Long, C. & Mouat, B.) 559–570

Testes, rat, concentrations of free amino acids and lactate in (Mushahwar, I. K. & Koepppe, R. E.) 353–359

Testosterone, effect of 6-N,2′-O-dibutryladenosine 3′:5′-cyclic monophosphate plus, on the phosphorylation of high-molecular-weight membrane proteins in cultured Chinese-hamster ovary cells (Rieber, M. & Bacalao, J.) 641–644

Testosterone, effects of cyproterone and cyproterone acetate on the dynamics of the uptake and metabolism of, and other androgens by human prostate gland in vitro (Giorgi, E. P., Shirley, I. M., Grant, J. K. & Stewart, J. C.) 465–474

Testosterone, effects of treatment with corticotrophin, oestradiol and, on the activity of microsomal C$_19$ steroid 5α-reductase in the adrenal glands of intact and castrated rats (Maynard, P. V. & Cameron, E. H. D.) 293–300

Testosterone, metabolism of androst-4-ene-3,17-dione and, by subcellular fractions of rat adrenal gland with particular reference to microsomal C$_19$ steroid 5α-reductase (Maynard, P. V. & Cameron, E. H. D.) 283–291

Tetrodotoxin, effects of, and other agents on the turnover of protein-bound serine phosphate in respiring slices of guinea-pig cerebral cortex (Reddington, M., Rodnight, R. & Williams, M.) 475–482

Tetrodotoxin, effects of, on the biosynthesis and release of $[^3]C$Acetylcholine in rat cerebral-cortex slices (Grewaal, D. S. & Quastel, J. H.) 1–14

Thia sinensis, see Tea

Theobromine, utilization of methylamine for the biosynthesis of, in excised shoot tips of the tea plant (Suzuki, T.) 753–763

Thioacetamide, studies of nuclei separated by zonal centrifugation from liver of rats treated with (Gonzalez-Mujica, F. & Mathias, A. P.) 163–183

Thiol groups, iodoacetamide-induced sensitization of β-cells in isolated mouse pancreas islets of Langerhans to stimulation by glucose as evidence for the involvement of, in the release of insulin (Hellman, B., Idahl, L-Å., Lernmark, Å., Sehlin, J. & Täljedal, I-B.) 775–879

Thymidine, uptake of orotate and, by normal and regenerating rat livers (Ord, M. G. & Stocken, L. A.) 47–54

Transfer ribonucleic acid, see Ribonucleic acid, transfer

Transferrins, developmental changes in the microheterogeneity of, and other glycoproteins in foetal mouse plasma (Gustine, D. L. & Zimmerman, E. F.) 541–551

Trehalase, effects of calcium ions on the activities of, and other glycolytic enzymes in various vertebrate and invertebrate muscles (Vaughan, H., Thornton, S. D. & Newsholme, E. A.) 527–535

Tricarboxylic acid cycle, chemostat studies on the regulation of the activity of, in Pseudomonas aeruginosa 2F32 (Ng, F. M.-W. & Dawes, E. A.) 129–140

Tricarboxylic acid cycle, control of the biosynthesis of phosphoenolpyruvate from intermediates of, in guinea-pig liver mitochondria (Wilson, M. B.) 553–557

Vol. 132
Tricarboxylic acid cycle, regulation by intermediates of, of the transport of glucose in *Pseudomonas aeruginosa* C.G.H. 7709 (Mukkada, A. J., Long, G. L. & Romano, A. H.) 155–162

Tricarboxylic acid cycle, role of intermediates of, in the regulation of pyruvate metabolism via pyruvate carboxylase in rat brain mitochondria (Patel, M. S. & Tilghman, S. M.) 185–192

Triglyceride lipase, content of triglycerides, metabolism of

Trimethylamine, diphosphate uridine regulation of

Urocanase, uracil-5-yl-L-lactate and uracil-5-yl-L-propionate of *Pseudomonas testosteroni* (Coote, J. G. & Hassall, H.) 409–422

Uronic acid, biosynthesis of, by liver slices from oestrogen-treated *Xenopus laevis* (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459–463

Uronic acid, biosynthesis and secretion of, by liver slices from oestrogen-treated *Xenopus laevis* (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459–463

Wall, cell, see Cell wall

Xenopus laevis, oestrogen-treated, biosynthesis and secretion of vitellogenin by liver slices from (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459–463

Yeast (Saccharomyces carlsbergensis N.C.Y.C. 74S), anaerobically grown, changes in the activities and subcellular distribution of enzymes during glucose derepression and respiratory adaptation of (Cartledge, T. G. & Lloyd, D.) 609–621

Zinc ions, interrelationships in trace-element metabolism in toxicities of, and other metal ions towards a cobalt ion-resistant strain of *Neurospora crassa* (Venkateswarlu, G. & Sivarama Sastry, K.) 673–680

INDEX OF SUBJECTS

Vitamin A, plasma transport and metabolism of retinol in rats deficient in (Smith, J. E., Milch, P. O., Muto, Y. & Goodman, DeW.S.) 821–827

Vitamin D, hydroxylation of lysine residues of collagen biosynthesized in bone of rats and chicks deficient in (Barnes, M. J., Constable, B. J., Morton, L. F. & Kodicek, E.) 113–115

Vitellogenin, biosynthesis and secretion of, by liver slices from oestrogen-treated *Xenopus laevis* (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459–463

Wall, cell, see Cell wall

Xenopus laevis, oestrogen-treated, biosynthesis and secretion of vitellogenin by liver slices from (Merry, A. H., Dolphin, P. J., Munday, K. A. & Akhtar, M.) 459–463

Yeast (Saccharomyces carlsbergensis N.C.Y.C. 74S), anaerobically grown, changes in the activities and subcellular distribution of enzymes during glucose derepression and respiratory adaptation of (Cartledge, T. G. & Lloyd, D.) 609–621

Zinc ions, interrelationships in trace-element metabolism in toxicities of, and other metal ions towards a cobalt ion-resistant strain of *Neurospora crassa* (Venkateswarlu, G. & Sivarama Sastry, K.) 673–680
