**Ex officio Member of Committee.*

*†Representative of Editorial Board
of the *Biochemical Journal*.*

Executive Secretary

A. I. P. Henton (7 Warwick Court, London WC1R 5DP)

The **Biochemical Society** exists to advance the science of biochemistry through meetings and publications. Eleven meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

The **Biochemical Journal** is published and distributed by the Biochemical Society. It is published twice monthly, alternate issues being devoted to **Molecular Aspects** and to **Cellular Aspects** of biochemistry. It is planned that in 1973 six volumes, each volume being made up of four issues, will be published according to the following schedule:

Molecular Aspects			Cellular Aspects		
1973	Vol.	Part	1973	Vol.	Part
1 Jan.	131	1	15 Jan.	132	1
1 Feb.	131	2	15 Feb.	132	2
1 Mar.	131	3	15 Mar.	132	3
1 Apr.	131	4	15 Apr.	132	4
1 May	133	1	15 May	134	1
1 June	133	2	15 June	134	2
1 July	133	3	15 July	134	3
1 Aug.	133	4	15 Aug.	134	4
1 Sept.	135	1	15 Sept.	136	1
1 Oct.	135	2	15 Oct.	136	2
1 Nov.	135	3	15 Nov.	136	3
1 Dec.	135	4	15 Dec.	136	4

Biochemical Society Transactions is a new publication commencing January 1973. It includes extended abstracts of communications (including reports on colloquia and the text of Special Lectures) presented at meetings of the Biochemical Society, book reviews etc. (Note: the *Proceedings of the Biochemical Society* ceased publication in the *Biochemical Journal* at the end of 1972.) In 1973 it is planned that one volume, composed of six issues, will be published.

Biochemical Society Transactions is issued free to all subscribers of the *Biochemical Journal* only: it is not available on a separate subscription.

Subscriptions to the Biochemical Journal and Biochemical Society Transactions. For non-members of the Biochemical Society the subscription in 1973 for

the Journal (plus Transactions) is £70 per year. For non-members in the U.S.A. the subscription is \$180 per year (subject to exchange variation). Terms are cash with order or against proforma invoice. Orders and subscriptions should be sent to the Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex, or through your normal agent.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address given in the preceding paragraph. Claims cannot be entertained if they are received later than three months after the date of posting.

Back Numbers. Enquiries for volumes 1–19 of the Journal should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts of the Journal, and also of Transactions, may be obtained on application to The Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP, Essex.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

Microfilms. Volumes 1–89 (1906–1963) of the Journal have been recorded on microfilm by the EP Group, Microfilm Division, Bradford Road, East Ardsley, Wakefield, Yorks. Details are available from them or the Biochemical Society.

Papers Accepted for Publication

Oscillations of enzyme activities during the cell-cycle of a glucose-repressed fission-yeast *Schizosaccharomyces pombe* 972h.

By R. K. Poole & D. Lloyd

Induction of orientation of bacterial cellulose microfibrils by a novel terpenoid from *Acetobacter xylinum*.

By W. G. Haigh, H. J. Forster, K. Biemann, N. H. Tattrie & J. R. Colvin

The structure of novel C₃₅ pentacyclic terpenes from *Acetobacter xylinum*.

By H. J. Forster, K. Biemann, W. G. Haigh, N. H. Tattrie & J. R. Colvin

Cholesterol feeding alters the metabolism of thoracic-duct lymph lipoprotein cholesterol in rabbits but not in rats.

By T. G. Redgrave

Ribonucleic acid synthesis in porphyric rat liver induced by 3,5-dicarbethoxy-1,4-dihydrocollidine.

By H. Nawata & K. Kato

Uptake and release of bilirubin by skin.

By C. L. Kapoor, C. R. Krishna Murti & P. C. Bajpai

The nature of the electrophoretically separable multiple forms of rat liver monoamine oxidase.

By M. D. Houslay & K. Tipton

Structural studies on individual components of bovine transferrin.

By N. E. Richardson, N. Buttress, A. Feinstein, A. Stratil & R. L. Spooner

Effects of dichloroacetate on the metabolism of glucose, pyruvate, acetate, 3-hydroxybutyrate and palmitate in rat diaphragm and heart muscle *in vitro* and on extraction of glucose, lactate, pyruvate and free fatty acids by dog heart *in vivo*.

By A. McAllister, S. P. Allison & P. J. Randle

Biosynthesis of serum albumin in rat liver. Evidence for the existence of 'pro-albumin'.

By J. D. Judah, M. Gamble & J. H. Steadman

Reaction products from *N*-methyl-*N*-nitrosourea and deoxyribonucleic acid containing thymidine residues. Synthesis and identification of a new methylation product, O⁴-methylthymidine.

By P. D. Lawley, D. J. Orr, S. A. Shah, P. B. Farmer & M. Jarman

The alkylation of 2'-deoxyguanosine and of thymidine with diazoalkanes. Some observations on *O*-alkylation.

By P. B. Farmer, A. B. Foster, M. Jarman & M. J. Tisdale

High total histone/deoxyribonucleic acid ratios for rat liver nuclei.

By S. K. Chanda, R. Ickowicz & A. L. Dounce

Steady-state enzyme kinetics with high-affinity substrates or inhibitors. A statistical treatment of dose-response curves.

By P. J. F. Henderson

The purification and regulatory properties of α -oxoglutarate dehydrogenase from *Acinetobacter lwoffii*.

By M. G. Parker & P. D. J. Weitzman

Biosynthesis of mercapturic acids from allyl alcohol, allyl esters and acrolein.

By C. M. Kaye

The interaction between ribonuclease A and surfactants.

By M. N. Jones, H. A. Skinner, E. Tipping & A. Wilkinson

Studies on the sulphation of 3,4-dihydroxyphenethylamine (dopamine) and related compounds by rat tissues.

By W. N. Jenner & F. A. Rose

The uptake and efflux of L-phenylalanine and L-tyrosine from rat cerebral-cortex slices.

By P. Joanny, J.-P. Natali, H. Hillman & J. Corriol

A phosphorylated light-chain component of myosin from skeletal muscle.

By W. T. Perrie, L. B. Smillie & S. V. Perry

Cleavage of malyl-coenzyme A into acetyl-coenzyme A and glyoxylate by *Pseudomonas* AM1 and other C₁-unit-utilizing bacteria.

By A. R. Salem, A. J. Hacking & J. R. Quayle

Calcium-dependent *p*-nitrophenyl phosphate phosphatase activity and calcium-dependent adenosine triphosphatase activity from human erythrocyte membranes.

By A. F. Rega, D. E. Richards & P. J. Garrahan

NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not generally be described.

For detailed instructions on the preparation of papers contributors should refer to *Policy of the Journal and Instructions to Authors* [*Biochem J.* (1973), 131, 1–20] (obtainable from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP, price 20p. post free). The *Biochemical Journal* uses the recommended SI (Système Internationale) symbols [see *Pure Appl. Chem.* (1970), 21, 1–44; *Quantities, Units and Symbols* (1971), The Royal Society, London]. For biochemical nomenclature authors should as far as possible follow the Tentative Rules and Proposals of the IUPAC–IUB Commission on Biochemical Nomenclature [see *Biochem. J.* (1973), 131, 9]. For chemical nomenclature the IUPAC Rules should be followed [see *Biochem. J.* (1973), 131, 12]. The *Biochemical Journal* uses as a standard of spelling the *Concise Oxford Dictionary of Current English* (Clarendon Press, Oxford).

Two types of paper are accepted by the editors:

Full-length papers. Papers submitted for publication should be sent together with an extra copy of the synopsis (see below) to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent.

Papers submitted should be written concisely. Special attention is directed to the sections below concerning the preparation of the typescript. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it reports unpublished work, that it is not

under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative full title, by the names of the authors (preferably with one forename in full for each author) and by the name and address of the establishment where the work was performed. Details of financial support appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size and wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted *in duplicate*, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Each Short Communication should be provided with a short synopsis (normally not exceeding 50 words). Such communications should not exceed 2400 words in length inclusive of the title, references etc. Authors may include up to two insertions such as tables, figures or schemes; in these cases authors must assess what proportion of a page these insertions will occupy and reduce the number of text words accordingly at the rate of 700 words per full page of the Journal. Authors are advised that the preparation of tables and especially figures is liable to cause a slight increase in publication time. Under no circumstances whatsoever can a complete Short Communication occupy more than four pages of the Journal. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient references given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made.
