Dawn of the new Pyrex era

Jobling, Corning and Sovirel have amalgamated to form the world’s largest laboratory glassware manufacturing complex.

Many of the new Corning disposables are Pyrex brand. Yes, disposables in Pyrex borosilicate glass!

Simple, inescapable logic.

Corning disposables simplify your work, increase your accuracy, maximise reliability, cut costs.

The range is available off-the-shelf, tested for accuracy and sterility.

Note: Jobling re-usable remain to be available.

Captions
1. Disposable serological pipettes individually or bulk packed sterile, or non-sterile bulk packs. Range from 0.2 to 10 ml.
3. Westergren pipettes.
4. Micro-samplers. Accuracy of ± 0.5%. The full range is individually colour-coded.
5. Pasteur pipettes (soda lime glass), 152 mm. and 226 mm. (6" and 9") new and improved. Extra strength to meet D.H.S.S. specification.

Look for CORNING® disposables – a name you can rely on in disposable glassware products. Write direct for details or ask your local distributor.

CORNING DISPOSABLES

cut costs and contamination
Every aspect of scanning electron microscopy

STEREOSCAN 180
Front-line Researcher
Most advanced scanning microscope in the world. Complete signal processing capability built into one fully integrated entity. Transmission imaging also available. Unique, automatically compensating imaging system keeps selected magnification constant regardless of beam voltage and working distance variation. Accessory range includes four types of x-ray microanalysis.

STEREOSCAN S4-10
World-renowned Research Worker
Build-up SEM that can grow with your needs. Latest of a series operating in nearly 30 countries. Unparalleled range of add-on accessories including four types of x-ray microanalysis.

STEREOSCAN 600
Budget-price Routine Investigator
General purpose compact SEM for routine industrial or research duty. All the main SEM facilities at half the cost of a research-grade instrument. Accessory range includes transmission imaging and two types of x-ray microanalysis.

MICROSCAN 5
Purpose-built X-ray Microanalyzer

Cumulative Indices

Save Research Time
Busy researchers and authors find that these multi-volume indices are invaluable. Where time is money the cost is recovered quickly. Produced as a service to subscribers and priced accordingly.

Volumes £ p U.S.$
21–30 0.75 2.50
31–40 2.00 5.50
41–65 2.75 7.50
66–90 3.25 9.00
91–115 5.25 13.00
116–130 5.50 15.00

All prices include postage (by surface mail to overseas)

Colchester CO2 8HP Essex
Pharmacia Peristaltic Pump P-3

A cassette pump electronically controlled for constant liquid flows in chromatography and gradient formation

You can

- obtain three different flow rates at the same time through the three individually tensioned pumping channels
- change tubes in seconds with the snap-in cassette
- forget about pulsation thanks to the large driven rollers
- rely on a constant motor speed, electronically compensated for load and temperature
- use any flow rate between 0.6 and 400 ml/h per channel with the same gear box
- reverse the flow instantly
- push for maximum flow and clear pump lines rapidly

CONTENTS
A study of factors influencing relief of discomfort in breath-holding in normal subjects. By J. R. A.
RIGO, A. S. REBUCK and E. J. M. CAMPBELL

The effect of brain extracts on urinary sodium excretion of the rat and the intracellular sodium
concentration of renal tubule fragments. By E. M. CLARKSON, K. G. KOUTSAIMANIS,
M. DAVIDMAN, M. DU BOIS, W. P. PENN and H. E. de WARDENER

Assay using brain homogenate for measuring the antioxidant activity of biological fluids. By
J. STOCKS, J. M. C. GUTTERIDGE, ROSEMARY J. SHARP and T. L. DORMANDY

The inhibition of lipid autoxidation by human serum and its relation to serum proteins and
α-tocopherol. By J. STOCKS, J. M. C. GUTTERIDGE, ROSEMARY J. SHARP and T. L. DORMANDY

The control of aldosterone secretion in nephrectomized man. By T. J. GOODWIN, V. H. T.
JAMES and W. S. PEART

Effects of a sustained muscular contraction on human intraocular pressure. By D. F. MARCUS,
H. F. EDELHAUSER, M. G. MAKSUD and R. L. WILEY

Plasma free fatty acid and triglyceride transport kinetics in man. By A. H. KISSEBAH, P. W.
ADAMS and V. WYNN

Assessment of plasma glutamyl transpeptidase activity and urinary D-glucaric acid excretion
as indices of enzyme induction. By D. C. DAVIDSON, W. B. MCINTOSH and J. A. FORD

SHORT COMMUNICATION
The ventilatory response to carbon dioxide in patients who have recovered from cardiogenic
pulmonary oedema. By M. SPIERER

Orders may be placed with your bookseller, or sent direct to the publishers.

BLACKWELL SCIENTIFIC PUBLICATIONS LTD
5 ALFRED STREET, OXFORD, OX1 4HB, ENGLAND
Success for the competitive yachtsman must in some part depend upon the quality and reliability of the equipment he uses.

Likewise for you, the researcher, these virtues must apply to your reagents for them to contribute to your success.

To broaden your Biochemical Research ‘horizon’ Boehringer Mannheim offer the following new preparations.

**Reverse transcriptase (AMV)  Cat. No. 15644**(RNA-dependent DNA-polymerase)  
Purified by chromatography on DEAE-cellulose, phosphocellulose and Sephadex RG-100.  
Supplied at -20°C in 50% glycerol, 1mM dithiothreitol and 0.3M potassium phosphate;  
PH approx. 8.0. Stabilised with bovine serum albumin (0.5mg/ml).  
With oligo-dT stimulated AMV-RNA the enzyme preparation performs well.

**2'-O-Succinyl-A-3:5-MP  Cat. No. 15663**  
Introduced to satisfy the growing demand for an ultra-sensitive radio-immuno assay for A-3:5MP*.  
Techniques currently being developed make it possible to measure A-3:5-MP in the p-gram range with antibodies produced from Succinyl-A-3:5-MP linked to albumin.  

**Phospholipase C  Cat. No. 15636**  
from Bacillus cereus  E.C. 3.1.4.3.  
When elucidating the type and arrangement of membrane phospholipid structures in erythrocytes the enzyme from B. cereus has the advantage over other sources of being free from proteases, hydrolyases neuraminidase and has negligible haemolytic activity.  
Reference: J.S.HILDECH et al., Biotechnol. and Bioeng. XV, 551 (1973)

**Adenosine-5'-O-(3-thiotriphosphate) (ATP-S)  Cat. No. 15623**  
The latest in a line of nucleotide analogues of particular interest to anybody working on ATP-dependent enzyme systems. Supplied as tetra-lithium salt to facilitate solubilisation combined with stability.  
Typical analysis: ATP·Y·S Li₄ 85%, H₂O 15%.  
Application: Inhibition of phosphatases and ATPases; investigation of muscle myosin; ‘affinity labelling’ of proteins; labelling of ATP·S binding enzymes prior to X-ray structural analysis or electron microscopy (ATP·Y·S has an affinity for mercury compounds).

**Cholesterol oxidase  Cat. No. 15628**  
from Nocardia erythropolis  E.C. 1.1.3.8.  
Specific activity: approx. 20U/mg  
Only 0.1U of enzyme is needed for assay of approx. 5mMoles/litre cholesterol.  
Of particular interest to food analysts, lipid researchers and research clinical chemists.
