

Cellular Aspects

Contents of Volume 146, No. 1, 1975

	PAGE		PAGE
Biosynthesis and Degradation		Purification and some properties of a soluble benzene-oxidizing system from a strain of <i>Pseudomonas</i> .	
Sterol biosynthesis in the echinoderm <i>Asterias rubens</i> .		By B. C. Axcell & P. J. Geary	173
By A. G. Smith & L. J. Goad	25	Incorporation of isotopic carbon into cerebral glycogen from non-glucose substrates.	
The conversion of cholest-5-en-3 β -ol into cholest-7-en-3 β -ol by the echinoderms <i>Asterias rubens</i> and <i>Solaster papposus</i> .		By M. E. Phillips & R. V. Coxon	185
By A. G. Smith & L. J. Goad	35	The identification and biosynthesis of siderochromes formed by <i>Micrococcus denitrificans</i> .	
Effects of γ -irradiation on biosynthesis of different types of ribonucleic acids in normal and regenerating rat liver.		By G. H. Tait	191
By G. G. Markov, G. N. Dessev, G. C. Russev & R. G. Tsanev	41	Role of glycerol 3-phosphate dehydrogenase in glyceride metabolism. Effect of diet on enzyme activities in chicken liver.	
The properties of hydrogen peroxide production under hyperoxic and hypoxic conditions of perfused rat liver.		By J. W. Harding, Jr., E. A. Pyeritz, E. S. Copeland & H. B. White, III	223
By N. Oshino, D. Jamieson & B. Chance	53	Peptidoglycan synthesis in <i>Bacillus licheniformis</i> . The inhibition of cross-linking by benzylpenicillin and cephaloridine <i>in vivo</i> accompanied by the formation of soluble peptidoglycan.	
Optical measurement of the catalase-hydrogen peroxide intermediate (Compound I) in the liver of anaesthetized rats and its implication to hydrogen peroxide production <i>in situ</i> .		By Z. Tynecka & J. B. Ward	253
By N. Oshino, D. Jamieson, T. Sugano & B. Chance	67	Aerobic lactate production by mammary tissue (<i>Short Communication</i>).	
Metabolism of xanthine and hypoxanthine in the tea plant (<i>Thea sinensis</i> L.).		By A. R. Elkin & N. J. Kuhn	273
By T. Suzuki & E. Takahashi	79	Hydroxypyruvate as a gluconeogenic substrate in rat hepatocytes (<i>Short Communication</i>).	
Biosynthesis of caffeine by tea leaf extracts. Enzymic formation of theobromine from 7-methylxanthine and of caffeine from theobromine.		By D. H. Williamson & E. V. Ellington	277
By T. Suzuki & E. Takahashi	87	Bioenergetics	
Inhibition by ricin of protein synthesis <i>in vitro</i> . Inhibition of the binding of elongation factor 2 and of adenosine diphosphate-ribosylated elongation factor 2 to ribosomes.		Electron-paramagnetic-resonance spectroscopy studies of iron-sulphur centres of submitochondrial particles from iron- and sulphur-deficient <i>Candida utilis</i> .	
By L. Montanaro, S. Sperti, A. Mattioli, G. Testoni & F. Stirpe	127	By T. A. Gray, P. B. Garland, D. J. Lowe & R. C. Bray	239
Albumin, fibrinogen and transferrin synthesis in isolated rat hepatocyte suspensions. A model for the study of plasma protein synthesis.		Subcellular Structures	
By K. N. Jeejeebhoy, J. Ho, G. R. Greenberg, M. J. Phillips, A. Bruce-Robertson & U. Sodtke	141	Some observations on chlorophyll(ide) synthesis by isolated etioplasts.	
Microbial metabolism of the pyridine ring. Metabolic pathways of pyridine biodegradation by soil bacteria.		By W. T. Griffiths	17
By G. K. Watson & R. B. Cain	157	Structural equivalents of latency for lysosome hydrolases.	
		By F. M. Baccino & M. F. Zuretti	97
		Cellular Interactions and Control Processes	
		The effect of phenobarbitone on protein synthesis by liver polyribosomes in fed and starved rats.	
		By G. Ragnotti & M. G. Aletti	1

	PAGE		PAGE
Lack of influence of the membranes of the endoplasmic reticulum on the capacity for protein synthesis of the rat liver polyribosomes. By G. Ragnotti, M. G. Aletti & T. L. Cipollini	13	Glucose metabolism in perfused skeletal muscle. Interaction of insulin and exercise on glucose uptake. By M. Berger, S. Hagg & N. B. Ruderman	231
Multiple cyclic nucleotide phosphodiesterase activities from rat tissues and occurrence of a calcium - plus - magnesium - ion - dependent phosphodiesterase and its protein activator. By S. Kakiuchi, R. Yamazaki, Y. Teshima, K. Uenishi & E. Miyamoto	109	Relationship between enhanced turnover of phosphatidylinositol and lymphocyte activation by mitogens. By V. C. Maino, M. J. Hayman & M. J. Crumpton	247
Induction of dopa (3,4-dihydroxyphenylalanine) decarboxylase in blowfly integument by ecdysone. A demonstration of synthesis of the enzyme <i>de novo</i> . By E. G. Fragoulis & C. E. Sekeris	121	Subunit A from cholera toxin is an activator of adenylate cyclase in pigeon erythrocytes (<i>Short Communication</i>). By S. van Heyningen & C. A. King	269
Studies on a wide-spectrum intestinal dipeptide uptake system in the monkey and in the human. By M. Das & A. N. Radhakrishnan	133	Lack of relationship between activity of chromatin-bound proteinase and cell growth rates (<i>Short Communication</i>). By C.-B. Chae, M. C. Smith & H. P. Morris	281
Biochemical and enzymic changes during erythrocyte differentiation. The significance of final cell division. By M. J. Denton, N. Spencer & H. R. V. Arnstein	205	Stimulation of the pathway of porphyrin synthesis in the liver of rats and mice by griseofulvin, 3,5 - diethoxycarbonyl - 1,4 - dihydrocollidine and related drugs: evidence for two basically different mechanisms (<i>Short Communication</i>). By F. De Matteis & A. H. Gibbs	285
Role of cell membrane galactosyltransferase in concanavalin A agglutination of erythrocytes. By D. K. Podolsky & M. M. Weiser	213		

The following papers appeared in the last issue of the Biochemical Journal

Molecular Aspects
Contents of Volume 145, No. 1, 1975

	PAGE		PAGE
Policy of the Journal and instructions to authors	1	Lipids	
Recommendations for the nomenclature of human immunoglobins	21	Radio-enzymic assay of oxo steroids by their reduction with the tritiated form of reduced nicotinamide-adenine dinucleotide. By J. K. Norymberski, N. Stoddart & J. B. Wolstenholme	47
Proteins		Carbohydrates	
A radio-ligand receptor assay for the long-acting thyroid stimulator. Inhibition by the long-acting thyroid stimulator of the binding of radioiodinated thyroid-stimulating hormone to human thyroid membranes. By S. Q. Mehdi & S. S. Nussey	105	Macromolecular properties and end-group analysis of heparin isolated from bovine liver capsule. By L. Jansson, S. Ögren & U. Lindahl	53
The nature of the collagen cross-links in bone in the chronic uraemic state (<i>Short Communication</i>). By J. E. Russell, L. V. Avioli & G. Mechanic	119	Enzymology	
<i>Equisetum</i> (horsetail) ferredoxin: characterization of the active centre and position of the four cysteines in this 2Fe-2S protein (<i>Short Communication</i>). By H. Kagamiyama, K. K. Rao, D. O. Hall, R. Cammack & H. Matsubara	121	Purification and properties of rat brain pyruvate carboxylase. By D. E. Mahan, I. K. Mushahwar & R. E. Koeppe	25
Nucleic Acids		Preparation of the lactate oxidase apoenzyme and studies on the binding of flavin mononucleotide to the apoenzyme. By Y. S. Choong, M. G. Shepherd & P. A. Sullivan	37
Isolation and identification of products from alkylation of nucleic acids: ethyl- and isopropyl-purines. By P. D. Lawley, D. J. Orr & M. Jarman	73	Activation and inhibition of rabbit muscle pyruvate kinase by transition-metal ions. By S. Ainsworth & N. Macfarlane	63
Molecular mechanisms in alkylation mutagenesis. Induced reversion of bacteriophage T4rII AP72 by ethyl methanesulphonate in relation to extent and mode of ethylation of purines in bacteriophage deoxyribonucleic acid. By P. D. Lawley & C. N. Martin	85	The steady-state kinetics of peroxidase with 2,2'-azino-di-(3-ethyl-benzthiazoline-6-sulphonic acid) as chromogen. By R. E. Childs & W. G. Bardsley	93
		Purification of normal human urinary <i>N</i> -acetyl- β -hexosaminidase A by affinity chromatography. By D. K. Banerjee & D. Basu	113
		The binding of 8-anilino-naphthalene-1-sulphonate to cytoplasmic aspartate aminotransferase from pig heart (<i>Short Communication</i>). By H. E. Harris & P. M. Bayley	125
