*Ex officio Member of Committee; representative of Editorial Board of the Biochemical Journal.

Executive Secretary
A. I. P. Henton (7 Warwick Court, London WC1R 5DP)

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Several meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

Second-class postage paid at New York, N.Y., U.S.A.

(ii)
The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, alternate issues being devoted to Molecular Aspects and to Cellular Aspects of biochemistry. It is planned that in 1975 eight volumes, each volume being made up of three issues, will be published according to the following schedule:

<table>
<thead>
<tr>
<th>Molecular Aspects</th>
<th>Cellular Aspects</th>

* Completes volume, and includes Indexes.

Biochemical Society Transactions. This is now a separate publication (see below). Volume 3 will be published in 1975, in six parts.

Subscription Rates to the Biochemical Journal. For non-members of the Biochemical Society the subscription in 1975 is £105.00. Subject to exchange variation the rate for U.S.A., Canada and Mexico is $265.00 (despatch by air freight to these countries).

Subscribers to the Biochemical Journal can subscribe to Biochemical Society Transactions on a joint subscription, saving £10 ($25.00). The joint subscription is £113.00 ($280.00 to addressees in U.S.A., Canada and Mexico; both publications despatched by air freight).

Terms are cash with order or against proforma invoice. Orders and subscriptions should be sent to the Biochemical Society (Publications), P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex, or through your normal agent.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address given in the preceding paragraph. Claims cannot be entertained if they are received later than three months after the date of posting.

Back Numbers. Enquiries for volumes 1–19 of the Journal should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts of the Journal, and also of Transactions, may be obtained on application to The Biochemical Society (Publications), P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex.

Microforms. The following versions are available.

(a) Microfilm (35mm): Volumes 1–100.
(b) Microfiche (98-image): Volumes 101–144.

Details and prices are available on request from the Biochemical Society's Colchester office.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

NOTES FOR CONTRIBUTORS

It is the policy of the *Biochemical Journal* to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not generally be described.

Two types of paper are accepted by the editors. Full-length papers. Papers submitted for publication should be sent, together with an extra copy of the synopsis, to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP. Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent. Papers submitted should be written concisely. Special attention is directed to the sections below concerning the preparation of the typescript. Typescripts that are not concise or do not conform to the conventions of the *Biochemical Journal* will be returned to the authors for revision. If a paper that has been returned to an author for revision is not resubmitted within one month, it will, on resubmission, be deemed a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

Submission of a paper to the Editorial Board implies that it has been approved by all the named authors, that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the *Biochemical Journal* it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Papers should be headed by a concise but informative full title, by the names of the authors (preferably with one forename in full for each author) and by the name and address of the establishment where the work was performed. Details of financial support appear in the acknowledgements at the end of the paper.

Before preparing papers authors should consult a current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, lay-out of tables and citation of references. Papers should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size and wide margins. The top copy should be submitted. It cannot be overemphasized that the need for revision of badly prepared typescripts inevitably leads to delays in publication.

Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the Journal. Sufficient information must be included to permit repetition of the experimental work.

Short Communications. Typescripts should be submitted in duplicate, written in English, and conform strictly to the form of the Journal as far as spelling and abbreviations are concerned. Each Short Communication should be provided with a short synopsis (normally not exceeding 50 words). Such communications should not exceed 2400 words in length inclusive of the title, references etc. Authors may include up to two insertions such as tables, figures or schemes; in these cases authors must assess what proportion of a page these insertions will occupy and reduce the number of text words accordingly at the rate of 700 words per full page of the Journal. Authors are advised that the preparation of tables and especially figures is liable to cause a slight increase in publication time. Under no circumstances whatsoever can a complete Short Communication occupy more than four pages of the Journal. Papers should be complete in themselves; (1) the methods used in experimental work must be adequately described or sufficient reference given to allow repetition of the work; (2) sufficient indication of the results of experimental work must be included to justify the claims made. Communications should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP.

Adenosine triphosphate, concentrations of oxidized and reduced nicotinamide–adenine dinucleotide, adenosine diphosphate and, mitochondrial energy status during controlled respiration and the control of tricarboxylic acid-cycle oxidations in blowfly flight muscle and isolated mitochondria (Hansford, R. G.) 537–547

Adenosine triphosphate, decrease in the concentration of, in rat submaxillary gland in vitro caused by the addition of adrenaline (Thompson, M. P. & Williamson, D. H.) 635–644

Adenylate cyclase, activities of, and other enzymes in subfractions of plasma membranes from the blood-sinusoidal, bile-canalicular and contiguous surfaces of rat hepatocytes (Wisher, M. H. & Evans, W. H.) 375–388

Adenylate cyclase, erythrocyte, pigeon, activation of, by subunit A of cholera toxin (van Heyningen, S. & King, C. A.) 269–271

Adenylate kinase, significance of the final cell division in the changes in the activities of, and other enzymes during the differentiation of rabbit erythrocytes (Denton, M. J., Spencer, N. & Arnstein, H. R. V.) 205–211

Adipocytes, epididymlial, rat, properties and extracellular location of 5′-nucleotidase of the plasma membrane of (Newby, A. C., Luzio, J. P. & Hales, C. N.) 625–633

Adrenal-gland medulla, ox, characterization of a mannosyl-carrier lipids of rat parotid gland and (White, D. A. & Waechter, C. J.) 645–651

Adrenaline, metabolic interactions of glucose, acetocatate and, in rat submaxillary gland in vitro (Thompson, M. P. & Williamson, D. H.) 635–644

Agglutinins, relationship between enhanced turnover of phosphorylsinol and activation of pig lymphocyte by (Maino, V. C., Hayman, M. J. & Crumpton, M. J.) 247–252

Albumin, biosynthesis of fibrinogen, transferrin and, in suspensions of isolated rat hepatocytes as a model for the study of the biosynthesis of plasma proteins (Jeejeebhoy, K. N., Ho, J., Greenberg, G. R., Phillips, M. J., Bruce-Robertson, A. & Sodtke, U.) 141–155

Albumin, serum, rat, isolation and probable structure of proalbumin from rat liver as a precursor of (Quinn, P. S., Gamble, M. & Judah, J. D.) 389–393

Albumins, serum, ox, human and rat, binding of L-tryptophan to, in the presence of non-esterified fatty acids (Cunningham, V. J., Hay, L. & Stoner, H. B.) 653–658

Allantoic acid, formation of, and other products during the metabolism of xanthine and hypoxanthine by excised tea shoot tips (Suzuki, T. & Takahashi, E.) 79–85

Allantoin, formation of, and other products during the metabolism of xanthine and hypoxanthine by excised tea shoot tips (Suzuki, T. & Takahashi, E.) 79–85
Amaranthus sp. seedlings, evidence against an involvement of cyclic nucleotides in the induction by cytokinins of the biosynthesis of betacyanin in (Elliott, D. C. & Murray, A. W.) 333–337

5-Aminolaevulinate, studies on the incorporation of, into chlorophyllide by isolated barley-seedling etioplasts (Griffiths, W. T.) 17–24

Aminophylline, effects of, on phosphodiesterase activity, adenosine 3'-5' cyclic monophosphate content and 6-benzyladenine metabolism in Amaranthus sp. seedlings (Elliott, D. C. & Murray, A. W.) 333–337

Aminopyrine demethylase, dependence on vitamin E and selenium of the activity of, of rat liver microsomal fractions (Giasuddin, A. S. M., Caygill, C. P. J., Diplock, A. T. & Jeffery, E. H.) 339–350

Asterias rubens, see Starfish

Avocado (Persea americana) mesocarp, biosynthesis of fatty acids in (Weaire, P. J. & Kekwick, R. G. O.) 425–437

Avocado (Persea americana) mesocarp, fractionation of the fatty acid synthetase activities of plastids from (Weaire, P. J. & Kekwick, R. G. O.) 439–445

Bacillus licheniformis 94, inhibition of cross-linking by benzylpenicillin and cephaloridine in vivo accompanied by the formation of soluble peptidoglycan in (Tyneca, Z. & Ward, J. B.) 253–267

Bacillus sp., metabolic pathways for the degradation of pyridine by a Nocardia sp. and, isolated from soil (Watson, G. K. & Cain, R. B.) 157–172

Barley (Hordeum vulgare) seedlings, studies on the biosynthesis of chlorophyllide by etioplasts isolated from (Griffiths, W. T.) 17–24

cis-Benzene glycol (cis-1,2-dihydroxycyclohexa-3,5-diene), purification and properties of a soluble enzyme system catalysing the oxidation of benzene to, from a strain of Pseudomonas putida isolated from soil (Axcell, B. C. & Geary, P. J.) 173–183

Benzene, purification and properties of a soluble enzyme system catalysing the oxidation of, to cis-1,2-dihydroxycyclohexa-3,5-diene (cis-benzene glycol) from a strain of Pseudomonas putida isolated from soil (Axcell, B. C. & Geary, P. J.) 173–183

Benzylpenicillin, inhibition of cross-linking by, in vivo accompanied by the formation of soluble peptidoglycan in Bacillus licheniformis 94 (Tyneca, Z. & Ward, J. B.) 253–267

Betacyanin, evidence against an involvement of cyclic nucleotides in the induction by cytokinins of the biosynthesis of, in Amaranthus sp. seedlings (Elliott, D. C. & Murray, A. W.) 333–337

N1N3-Bis-(2,3-dihydroxybenzoyl) spermidine, identification and biosynthesis of, and other siderochromes formed by Micrococcus denitrificans N.C.I.B. 8944 (Tait, G. H.) 191–204

Blowfly (Calliphora vicina) larvae, induction by edcsone of the biosynthesis of dopa (3,4-dihydroxyphenylalanine) decarboxylase de novo in the integument of (Fragoulis, E. G. & Sekeres, C. E.) 121–126

Blowfly (Lucilia cuprina), activity of a calcium-ion-transport system in isolated flight-muscle mitochondria from, during post-emergent development (Bygrave, F. L., Dady, A. A. & Doy, F. A.) 601–608

Blowfly (Phormia regina), concentrations of oxidized and reduced nicotinamide-adene dinucleotide, adenosine triphosphate and adenosine diphosphate, mitochondrial energy status during controlled respiration and the control of tricarboxylic acid-cycle oxidations in flight muscle and isolated mitochondria from (Hansford, R. G.) 537–547

Blowfly (Phormia regina), steady-state concentrations of citrate, isocitrate, 2-oxoglutarate and malate and the control of tricarboxylic acid-cycle oxidations in flight muscle and isolated mitochondria from (Johnson, R. N. & Hansford, R. G.) 527–535

Brain, rat, multiple activities of cyclic nucleotide phosphodiesterases and the occurrence of a calcium-plus-magnesium ion-dependent phosphodiesterase and its protein activator in, and other tissues (Kakuchi, S., Yamasaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Brassica oleracea, see Cauliflower

Bud tissue, cauliflower, biosynthesis of fatty acids in (Weaire, P. J. & Kekwick, R. G. O.) 425–437

Caffeine, enzymic formation of theobromine and, from 7-methylxanthine by extracts of tea leaves (Suzuki, T. & Takahashi, E.) 87–96

Caffeine, formation of, and other products during the metabolism of xanthine and hypoxanthine by excised tea shoot tips (Suzuki, T. & Takahashi, E.) 79–85

Calcium ions, activity of a system for the transport of, in isolated blowfly flight-muscle mitochondria during post-emergent development (Bygrave, F. L., Dady, A. A. & Doy, F. A.) 601–608

Calliphora vicina, see Blowfly

Canavanine, increased rates of degradation of aberrant proteins biosynthesized in Reuber H35 hepatoma cells in the presence of, or other amino acid analogues (Knowles, S. E., Gunn, J. M., Hanson, R. W. & Ballard, F. J.) 595–600

Canavanine, properties of phosphoenolpyruvate carboxykinase (guanosine triphosphate) biosynthesized in Reuber H35 hepatoma cells in the presence of, or other amino acid analogues (Knowles, S. E., Gunn, J. M., Reshef, L., Hanson, R. W. & Ballard, F. J.) 585–593

Carbonic anhydrase, significance of the final cell division in the changes in the activities of, and other enzymes during the differentiation of rabbit erythrocytes (Denton, M. J., Spencer, N. & Arnstein, H. R. V.) 205–211

INDEX OF SUBJECTS

1975
Carcinosarcoma, Walker 256, rat, electrophoretic and centrifugation behaviour of mitochondrial ribonucleic acids from (González-Cadavid, N. F. & Pérez, J. L.) 361–373

Catalase, significance of the final cell division in the changes in the activities of, and other enzymes during the differentiation of rabbit erythrocytes (Denton, M. J., Spencer, N. & Armstrong, H. R. V.) 205–211

Cauliflower (Brassica oleracea) bud tissue, biosynthesis of fatty acids in (Weaire, P. J. & Kekwick, R. G. O.) 425–437

Cells, hepatoma, Reuber H35, increased rates of degradation of aberrant proteins biosynthesized in, in the presence of amino acid analogues (Knowles, S. E., Gunn, J. M., Hanson, R. W. & Ballard, F. J.) 595–600

Cells, hepatoma, Reuber, H35, properties of phosphoenolpyruvate carboxykinase (guanosine triphosphate) biosynthesized in, in the presence of amino acid analogues (Knowles, S. E., Gunn, J. M., Reshef, L., Hanson, R. W. & Ballard, F. J.) 585–593

Cells, Kurlof, guinea-pig, separation from, of proteoglycan fraction stimulating the biosynthesis of protein in peritoneal macrophages (Dean, M. F. & Muir, H.) 557–563

Cells, liver, rat, isolated, effects of L-leucine on the biosynthesis of urea, glutamate and glutamine by (Mendes-Mourão, J., McGivan, J. D. & Chappell, P. J.) 457–464

Cells, spleen, mouse, activity of thymidine kinase of, in vivo and in vitro (Olsen, I. & Harris, G.) 489–496

Cephaloridine, inhibition of cross-linking by, in vivo accompanied by the formation of soluble peptidoglycan in Bacillus licheniformis 94 (Tynecke, Z. & Ward, J. B.) 253–267

Cerebellum, rat, multiple activities of cyclic nucleotide phosphodiesterases and the occurrence of a calcium-plus-magnesium ion-dependent phosphodiesterase and its protein activator in, and other tissues (Kakiuchi, S., Yamazaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Cerebral cortex, rat, multiple activities of cyclic nucleotide phosphodiesterases and the occurrence of a calcium-plus-magnesium ion-dependent phosphodiesterase and its protein activator in, and other tissues (Kakiuchi, S., Yamazaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Chick embryo, transfer of serine from chromatographically distinguishable species of seryl-transfer ribonucleic acid from skeletal muscle of, into polyptides and myosin (Nwagwu, M.) 395–400

Chicken, effect of diet on the activities of glycerol 3-phosphate dehydrogenase and other enzymes involved in the metabolism of glyceraldehyde in liver of (Harding, J. W., Jr., Pyeritz, E. A., Copeland, E. S. & White, H. B., III) 223–229

Chlorophyllide, studies on the biosynthesis of, by isolated barley-seedling etioplasts (Griffiths, W. T.) 17–24

Chloroplasts, pea-leaf, developing, isolated, biosynthesis of proteins in (Siddell, S. G. & Ellis, R. J.) 675–685

Cholera toxin, activation of adenylate cyclase in pigeon erythrocytes by subunit A of (van Heyningen, S. & King, C. A.) 269–271

5α-Cholestan-3β-ol, conversion of, into 5α-cholest-7-en-3β-ol in the starfish Asterias rubens (Smith, A. G. & Goad, L. J.) 35–40

5α-Cholest-7-en-3β-ol, biosynthesis of, and other sterols in the starfish Asterias rubens (Smith, A. G. & Goad, L. J.) 25–33

5α-Cholest-7-en-3β-ol, conversion of cholest-5-en-3β-ol into, in the starfish Asterias rubens and Solaster papposus (Smith, A. G. & Goad, L. J.) 35–40

Cholest-5-en-3β-ol, conversion of, into 5α-cholest-7-en-3β-ol in the starfish Asterias rubens and Solaster papposus (Smith, A. G. & Goad, L. J.) 35–40

Choline, biosynthesis of phosphatidylcholine from, in rat liver (Sundler, R. & Åkesson, B.) 309–315

Chromatin, lack of relationship between the activity of protease in bound to, and cell growth rates in rat liver and hepatomas (Chae, C.-B., Smith, M. C. & Morris, H. P.) 281–283

Chromatin, liver, rat, effect of spermine on the transcription of, by deoxyribonucleic acid-dependent ribonucleic acid polymerase (Moruzzi, G., Barbiroli, B., Moruzzi, M. S. & Tedolini, B.) 697–703

Chromatin, liver, rat, modification of the template capacity of, for ribonucleic acid polymerase form B by food intake in animals under controlled feeding schedules (Barbiroli, B., Tedolini, B., Moruzzi, M. S. & Monti, M. G.) 687–696

Citrate, steady-state concentrations of isocitrate, 2-oxoglutarate, malate and, and the control of tricarboxylic acid-cycle oxidations in blowfly flight muscle and isolated mitochondria (Johnson, R. N. & Hansford, R. G.) 527–535

Citric acid cycle, see Tricarboxylic acid cycle

Clearing-factor lipase, see Lipase, clearing-factor

Concanavalin A, role of cell-membrane galactosyltransferase in the agglutination of rabbit erythrocytes by (Podolsky, D. K. & Weiser, M. M.) 213–221

Cyclic adenosine 3':5'-monophosphate, see Adenosine 3':5'-cyclic monophosphate

Cyclic guanosine 3':5'-monophosphate, see Guanosine 3':5'-cyclic monophosphate

Cyclic nucleotide phosphodiesterases, multiple activities of, and the occurrence of a calcium-plus-magnesium ion-dependent phosphodiesterase and its protein activator in various rat tissues (Kakiuchi, S., Yamazaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Cyclic nucleotides, see Nucleotides, cyclic

Cytochrome c, Pseudomonas AM1, properties of, and other cytochromes (Anthony, C.) 289–298

Cytokinins, evidence against an involvement of cyclic nucleotides in the induction by, of the biosynthesis of betacyanin in Amaranthus sp. seedlings (Elliott, D. C. & Murray, A. W.) 333–337
Cytosol, uterus, rat, immature, dynamics of the distribution of oestrogen receptors between, and nuclei after the administration of oestradiol-17β (Mešter, J. & Baulieu, E. E.) 617–623

Diabetes, streptozotocin-, metabolic interactions of dihydroacetate and insulin in ketoacidosis due to, in the rat (Blackshear, P. J., Holloway, P. A. H. & Alberti, K. G. M. M.) 447–456

Dipeptides, (dopa) 2,3-Dihydroxybenzoate, identification of cis-benzene cis-1,2-Dihydroxycyclohexa-3,5-diene post-emergent, 3,5-Diethoxycarbonyl-1,4-dihydrocollidine, uterus, carrier, Diet, integument E.) C.

duction H.

Stoner, A. in nucleotide phosphate L-leucine into supernatant by, in shear, ecdysone, 223-229

nucleotide phosphatidylethanolamine, biosynthesis of, in the stimulation of ketoacidosis in blowfly flight muscle and isolated mitochondria (Hansford, R. G.) 537–547

Entodinium caudatum, biosynthesis of phospholipids in (Broad, T. E. & Dawson, R. M. C.) 317–328

Erythrocytes, pig, activation of adenylate cyclase in, by subunit A of cholera toxin (van Heyningen, S. & King, C. A.) 269–271

Erythrocytes, rabbit, role of cell-membrane galactosyltransferase in the agglutination of, by concanavalin A (Podolsky, D. K. & Weiser, M. M.) 213–221

Erythrocytes, rabbit, significance of the final cell division in the biochemical and enzymic changes occurring during the differentiation of (Denton, M. J., Spencer, N. & Reston, H. R. V.) 205–211

Escherichia coli K12, transport of metabolites in mutant strains of, deficient in electron transport and coupled phosphorylation (Rosenberg, H., Cox, G. B., Butlin, J. D. & Gutowski, S. J.) 417–423

Estradiol, see Oestradiol

Estragons, see Oestrogens

Ethanol, involvement of cytochrome c in the metabolism of, by Pseudomonas AM1 (Anthony, C.) 289–298

Ethanol, production of hydrogen peroxide by perfused rat liver during hyperoxia and hypoxia and its relevance to the metabolism of (Oshino, N., Jamieson, D. & Chance, B.) 53–65

Ethanolamine, biosynthesis of phosphatidylethanolamine from, in rat liver (Sundler, R. & Åkesson, B.) 309–315

Etioplasts, barley-seedling, isolated, studies on the biosynthesis of chlorophyllide by (Griffiths, W. T.) 17–24

Etioplasts, pea-leaf, isolated, biosynthesis of proteins in vitro in, and developing chloroplasts (Siddell, S. G. & Ellis, R. J.) 675–685

Exercise, muscular, isometric, interaction of insulin and, on the uptake of glucose by perfused rat skeletal muscle (Berger, M., Hagg, S. & Ruderman, N. B.) 231–238

INDEX OF SUBJECTS

Fat-cells, epididymal, rat, properties and extracellular location of 5′-nucleotidase of the plasma membrane of (Newby, A. C., Luzio, J. P. & Hales, C. N.) 625-633

Fat, changes in the body reserves of, and related metabolic parameters during the development of thiamin deficiency in the rat (Liang, C. C.) 739-740

Fatty acid synthetases, plastid, avocado-mesocarp, fractionation of the activities of (Weaire, P. J. & Keckwic, R. G. O.) 439-445

Fatty acids, biosynthesis of, in avocado mesocarp and cauliflower bud tissue (Weaire, P. J. & Keckwic, R. G. O.) 425-437

Fatty acids, metabolism of, and other lipids in the cow during starvation-induced ketosis (Brumby, P. E., Anderson, M., Tuckley, B., Storry, J. E. & Hibbitt, K. G.) 609-615

Fatty acids, non-esterified, binding of L-tryptophan to ox, human and rat serum albumins in the presence of (Cunningham, V. J., Hay, L. & Stoner, H. B.) 653-658

Fatty acids, non-esterified, plasma, rat, changes in the concentration of, and other metabolic parameters related to the mobilization of fat reserves during the development of thiamin deficiency (Liang, C. C.) 739-740

Fatty acids, non-esterified, relationship between the concentration of, in plasma and the distribution of L-tryptophan in the plasma and the body generally in the rat (Stoner, H. B., Cunningham, V. J., Elson, P. M. & Hunt, A.) 659-666

Fatty acids, relationship between degree of unsaturation of, in membrane lipids and mitochondrial function in Saccharomyces cerevisiae (Watson, K., Houghton, R. L., Bertoli, E. & Griffiths, D. E.) 409-416

Fibrinogen, biosynthesis of albumin, transferrin and, in suspensions of isolated rat hepatocytes as a model for the study of the biosynthesis of plasma proteins (Jeejeebhoy, K. N., Ho, J., Greenberg, G. R., Phillips, M. J., Bruce-Robertson, A. & Sodite, U.) 141-155

Flight muscle, see Muscle, flight

6-Fluorotryptophan, increased rates of degradation of aberrant proteins biosynthesized in Reuber H35 hepatoma cells in the presence of, or other amino acid analogues (Knowles, S. E., Gunn, J. M., Hanson, R. W. & Ballard, F. J.) 595-600

6-Fluorotryptophan, properties of phosphoenolpyruvate carboxykinase (glutamine triphosphate) biosynthesized in Reuber H35 hepatoma cells in the presence of, or other amino acid analogues (Knowles, S. E., Gunn, J. M., Reshef, L., Hanson, R. W. & Ballard, F. J.) 585-593

Food, modification of the template capacity of rat liver chromatin for ribonucleic acid polymerase from B by the intake of, in animals under controlled feeding schedules (Barbirioli, B., Tadolini, B., Moruzi, M. S. & Monti, M. G.) 687-696

β-Galactosidase, lysosomal, liver, rat, structural equivalents of latency for the activities of, and other hydrolyses (Baccino, F. M. & Zuretti, M. F.) 97-108

Galactosyltransferase, cell-membrane, role of, in the agglutination of rabbit erythrocytes by concanavalin A (Podolsky, D. K. & Weiser, M. M.) 213-221

Galactosyltransferase, micro method for the simultaneous determination of the activities of 5′-nucleotidase and, in cell fractions (Freilich, L. S., Richmond, M. E., Reppucci, A. C. Jr. & Silbert, J. E.) 741-743

Gamma radiation, see γ-Radiation

Gamma rays, see γ-Radiation

Glucagon, activities and intracellular distribution of enzymes involved in, in rat, guinea-pig and rabbit tissues (Saggerson, E. D. & Evans, C. J.) 329-332

Glucagon synthesis from hydroxypropyruvate in isolated rat hepatocytes (Williamson, D. H. & Ellington, E. V.) 277-279

Glucose, aerobic production of lactate from, by rat mammary-gland tissue during late pregnancy and lactation (Elkin, A. R. & Kuhn, N. J.) 273-275

Glucose, blood, rat, changes in the concentration of, and other metabolic parameters related to the mobilization of fat reserves during the development of thiamin deficiency (Liang, C. C.) 739-740

Glucose, formation of, from hydroxypropyruvate in isolated rat hepatocytes (Williamson, D. H. & Ellington, E. V.) 277-279

Glucose, interaction of insulin and isomeric exercise on the uptake of, by perfused rat skeletal muscle (Berger, M., Hagg, S. & Ruderman, N. B.) 231-238

Glucose, interactions in the effects of dichloroacetic acid and insulin on the metabolism of ketone bodies and, in experimental diabetic ketoacidosis in the rat (Blackshear, P. J., Holloway, P. A. H. & Alberti, K. G. M. M.) 447-456

Glucose, metabolic interactions of adrenaline, acetocetate and, in rat submaxillary gland in vitro (Thompson, M. P. & Williamson, D. H.) 635-644

Glucose 6-phosphate dehydrogenase, significance of the final cell division in the changes in the activities of, and other enzymes during the differentiation of rabbit erythrocytes (Denton, M. J., Spencer, N. & Arnstein, H. R. V.) 205-211

β-Glucuronidase, lysosomal, liver, rat, structural equivalents of latency for the activities of, and other hydrolyses (Baccino, F. M. & Zuretti, M. F.) 97-108

Glutamate dehydrogenase, stimulation by L-leucine of the activity of, in isolated rat liver cells (Mendes-Mourão, J., McGivan, J. D. & Chappell, J. B.) 457-464

Glutamate, effects of L-leucine on the biosynthesis of urea, glutamine and, by isolated rat liver cells (Mendes-Mourão, J., McGivan, J. D. & Chappell, J. B.) 457-464

1-L-Glutamate, stoichiometry of the absorption of protons with phosphate and, by yeasts of the genus Saccharomyces (Cockburn, M., Earnshaw, P. & Eddy, A. A.) 705-712

Glutamine, effects of L-leucine on the biosynthesis of urea, glutamate and, by isolated rat liver cells (Mendes-Mourão, J., McGivan, J. D. & Chappell, J. B.) 457-464

Glutamate, identification of, as an intermediate during the degradation of pyridine by a Nocardia sp. isolated from soil (Watson, G. K. & Cain, R. B.) 157-172

Vol. 146
INDEX OF SUBJECTS

Glutathione S-transferases, liver, rat, induction by drugs of the activities of, in male and female animals (Kaplowitz, N., Kuhlenkamp, J. & Clifton, G.) 351–356

Glyceride, effect of diet on the activities of glycerol 3-phosphate dehydrogenase and other enzymes involved in the metabolism of, in chicken liver (Harding, J. W., Jr., Pyeritz, E. A., Copeland, E. S. & White, H. B., III) 223–229

Glycerol kinase, effect of diet on the activities of, and other enzymes involved in the metabolism of glyceride in chicken liver (Harding, J. W., Jr., Pyeritz, E. A., Copeland, E. S. & White, H. B., III) 223–229

Glycerol 3-phosphate dehydrogenase, effect of diet on the activities of, and other enzymes involved in the metabolism of glyceride in chicken liver (Harding, J. W., Jr., Pyeritz, E. A., Copeland, E. S. & White, H. B., III) 223–229

Glycoproteins, characterization of proteins and, of subfractions of plasma membranes from the blood-sinusoidal, bile-canaliculur and contiguous surfaces of rat hepatocytes (Wisher, M. H. & Evans, W. H.) 375–388

Glycolyl-3-leucine, studies on a wide-spectrum uptake system for, and other dipeptides in monkey and human small intestine (Das, M. & Radhakrishnan, A. N.) 133–139

Golgi fractions, liver, rat, micro method for the simultaneous determination of the activities of galactosyltransferase and 5′-nucleotidase in, and other subcellular fractions (Freilich, L. S., Richmond, M. E., Reppucci, A. C., Jr. & Silbert, J. E.) 741–743

Granulation tissue, rat, experimentally induced, preparation and properties of plasma membranes from (Lehtinen, P., Vuorio, E. & Kulonen, E.) 565–573

Granuloma, rat, experimentally induced, preparation and properties of plasma membranes from (Lehtinen, P., Vuorio, E. & Kulonen, E.) 565–573

Griseofulvin, evidence for two basically different mechanisms in the stimulation by 3,5-diethoxycarbonyl-1,4-dihydrocollidine and, of the pathway for the biosynthesis of porphyrin in rat and mouse liver (De Matteis, F. & Gibbs, A. H.) 285–287

Guanosine 3′:5′-cyclic monophosphate, multiple activities of cyclic nucleotide phosphodiesterases hydrolyzing adenosine 3′:5′-cyclic monophosphate and, in various rat tissues (Kakiuchi, S., Yamazaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Heart, rat, multiple activities of cyclic nucleotide phosphodiesterases and the occurrence of a calcium-plussodium ion-dependent phosphodiesterase and its protein activator in, and other tissues (Kakiuchi, S., Yamazaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Hen, see Chicken

Hepatocytoma, partial, effects of depletion of vitamin A followed by supplementation with retinyl acetate or retinoic acid on the regeneration of rat liver after (Jayaram, M., Sarada, K. & Ganguly, J.) 501–504

Hepatocytoma, partial, effects of γ-irradiation on the biosynthesis of different types of ribonucleic acid in regenerating rat liver after (Markow, G. G., Dessev, G. N., Russev, G. C. & Tsanev, R. G.) 41–51

Hepatocytoma, partial, increased biosynthesis of low-molecular-weight nuclear ribonucleic acids of rat liver after exposure of the animals to γ-irradiation and (Fönagy, A. & Hidvégi, E. J.) 357–360

Hepatocytes, rat, isolated, biosynthesis of albumin, fibrinogen and transferrin in suspensions of, as a model for the study of the biosynthesis of plasma proteins (Jeejeebhoy, K. N., Ho, J., Greenberg, G. R., Phillips, M. J., Bruce-Robertson, A. & Sodtke, U.) 141–155

Hepatocytes, rat, isolated, effects of L-leucine on the biosynthesis of urea, glutamate and glutamine by (Mendes-Mourão, J., McGivan, J. D. & Chappell, J. B.) 457–464

Hepatocytes, rat, isolated, gluconeogenesis from hydroxypyruvate in (Williamson, D. H. & Ellington, E. V.) 277–279

Hepatocytes, rat, isolation and characterization of subfractions of plasma membranes from the blood-sinusoidal, bile-canaliculur and contiguous surfaces of (Wisher, M. H. & Evans, W. H.) 375–388

Hepatoma cells, Reuber H35, increased rates of degradation of aberrant proteins biosynthesized in, in the presence of amino acid analogues (Knowles, S. E., Gunn, J. M., Hanson, R. W. & Ballard, F. J.) 595–600

Hepatoma cells, Reuber H35, properties of phosphoenolpyruvate carboxykinase (guanosine triphosphate) biosynthesized in, in the presence of amino acid analogues (Knowles, S. E., Gunn, J. M., Reshef, L., Hanson, R. W. & Ballard, F. J.) 585–593

Hepatomas, rat, lack of relationship between the activity of chromatin-bound proteinase and cell growth rates in, and liver (Chae, C.-B., Smith, M. C. & Morris, H. P.) 281–283

Hordeum vulgare, see barley

Hydrocarbons, polycyclic, induction by, of the activities of glutathione S-transferases in liver of male and female rats (Kaplowitz, N., Kuhlenkamp, J. & Clifton, G.) 351–356

Hydrogen ions, stoichiometry of the absorption of, with phosphate and l-glutamate by yeasts of the genus Saccharomyces (Cockburn, M., Earnshaw, P. & Eddy, A. A.) 705–712

Hydrogen peroxide, production of, by perfused rat liver during hyperoxia and hypoxia (Oshino, N., Jamieson, D. & Chance, B.) 53–65

Hydrolases, lysosomal, liver, rat, structural equivalents of latency for the activities of (Baccino, F. M. & Zuretti, M. F.) 97–108
INDEX OF SUBJECTS

2-Hydroxybenzoyl-N-L-threonyl-N4-[N1 18-bis-(2,3-di- hydroxybenzoyl)] spermidine, identification and biosynthesis of, and other siderochromes formed by Micrococcus denitrificans N.C.I.B. 8944 (Tait, G. H.) 191–204

15-Hydroxyprostaglandin dehydrogenase, lung, guinea-pig, inhibition of the activity of, by exposure of the animals to 100% oxygen at atmospheric pressure (Parkes, D. G. & Eling, T. E.) 549–556

Hydroxypropruvate, gluconeogenesis from, in isolated rat hepatocytes (Williamson, D. H. & Ellington, E. V.) 277–279

Hyperoxia, production of hydrogen peroxide by perfused rat liver during hyperoxia and (Oshino, N., Jamieson, D. & Chance, B.) 53–65

Hypoxanthine, gluconeogenesis from, in isolated rat hepatocytes (Williamson, D. H. & Ellington, E. V.) 277–279

Ketone bodies, interactions in the effects of dichloroacetate and insulin on the metabolism of glucose and, in experimental diabetic ketoacidosis in the rat (Blackshear, P. J., Holloway, P. A. H. & Alberti, K. G. M. M.) 447–456

Kidney cortex, rat, guinea-pig and rabbit, activities and intracellular distribution of nicotinamide-adenine dinucleotide phosphate-dependent malate dehydrogenase, phosphoenolpyruvate carboxykinase and pyruvate carboxylase in, and other tissues (Saggerson, E. D. & Evans, C. J.) 329–332

Kidney, rabbit, differential effects of the depletion of lipids on the activities of sodium-plus-potassium ion-dependent adenosine triphosphatase and potassium ion-dependent phosphatase of membranes from (Wheeler, K. P. & Walker, J. A.) 723–727

Kidney, rabbit, role of phospholipids in the intermediate steps of the reaction catalysed by the sodium-plus-potassium ion-dependent adenosine triphosphatase system of membranes from (Wheeler, K. P.) 729–738

Kidney, rat, multiple activities of cyclic nucleotide phosphodiesterases and the occurrence of a calcium-plus-magnesium ion-dependent phosphodiesterase and its protein activator in, and other tissues (Kakiuchi, S., Yamazaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Kininase II, see Angiotensin-converting enzyme

Kurloff cells, guinea-pig, separation from, of a proteoglycan fraction stimulating the biosynthesis of protein in peritoneal macrophages (Dean, M. F. & Muir, H.) 557–563

β-Lactamase, inhibition of cross-linking by benzylpenicillin and cephaloridine in vivo accompanied by the formation of soluble peptidoglycan in a Bacillus licheniformis mutant strain deficient in (Tynecka, Z. & Ward, J. B.) 253–267

Lactate, aerobic production of, by rat mammary-gland tissue during late pregnancy and lactation (Elkin, A. R. & Kuhn, N. J.) 273–275

Lactate dehydrogenase, significance of the final cell division in the changes in the activities of, and other enzymes during the differentiation of rabbit erythrocytes (Denton, M. J., Spencer, N. & Arnstein, H. R. V.) 205–211

Lactation, aerobic production of lactate by rat mammary-gland tissue during late pregnancy and (Elkin, A. R. & Kuhn, N. J.) 273–275

Lactation, differences in the ribonucleic acids of guinea-pig mammary gland before and during (Ashby, P. & Campbell, P. N.) 575–583

Lanosterol, biosynthesis of, and other sterols in the starfish Asterias rubens (Smith, A. G. & Goad, L. J.) 25–33

Laurate, see Dodecanooate

Leaves, pea, biosynthesis of proteins in vitro in etioplasts and developing chloroplasts isolated from (Siddell, S. G. & Ellis, R. J.) 675–683

Vol. 146

Ketoacidosis, diabetic, experimental, metabolic interactions of dichloroacetate and insulin in, in the rat (Blackshear, P. J., Holloway, P. A. H. & Alberti, K. G. M. M.) 447–456
Leaves, tea, enzymic formation of theobromine and caffeine from 7-methylxanthine by extracts of (Suzuki, T. & Takahashi, E.) 87–96
Lectins, relationship between enhanced turnover of phosphatidylinositol and activation of pig lymphocytes by (Maino, V. C., Hayman, M. J. & Crumpton, M. J.) 247–252
Leucine, effect of treatment with phenobarbital on the incorporation of, into protein by liver polyribosomes from fed and starved rats (Ragnotti, G. & Aletti, M. G.) 1–12
L-Leucine, effects of, on the biosynthesis of urea, glutamate and glutamine by isolated rat liver cells (Mendes-Mourão, J., McGivan, J. D. & Chappell, J. B.) 457–464
Leucine, lack of influence of the endoplasmic-reticulum membranes on the capacity of polyribosomes for the incorporation of, into protein (Ragnotti, G., Aletti, M. G. & Cipollini, T. L.) 13–15
L-Leucine, opposing effects of preincubated oxidized nicotinamide adenine dinucleotide phosphate and 4-dimethylamino-3'-methylazobenzene on the incorporation of, into protein by rat liver postmitochondrial supernatant fraction (Madsen, N. P. & Labuc, J. E.) 505–507
Leucine, separation from guinea-pig Kurloff cells of a proteoglycan fraction stimulating the incorporation of, into protein by peritoneal macrophages (Dean, M. F. & Muir, H.) 557–563
Lipid, mannosyl-carrier, characterization of, of ox adrenal-gland medulla and rat parotid gland (White, D. A. & Waechter, C. J.) 645–651
Lipids, differential effects of the depletion of, on the activities of rabbit kidney membrane sodium-plus-potassium ion-dependent adenosine triphosphatase and potassium ion-dependent phosphatase (Wheeler, K. P. & Walker, J. A.) 723–727
Lipids, membrane, relationship between the mobility of, and the specific binding of thyrotrophin by human thyroid-gland membranes (Bashford, C. L., Harrison, S. J., Radda, G. K. & Mehdi, Q.) 473–479
Lipids, metabolism of, in the cow during starvation-induced ketosis (Brumby, P. E., Anderson, M., Tuckley, B., Storry, J. E. & Hibbitt, K. G.) 609–615
Lipids, role of, in the intermediate steps of the reaction catalysed by the rabbit kidney membrane sodium-plus-potassium ion-dependent adenosine triphosphatase system (Wheeler, K. P.) 729–738
Lipolytic agents, effects of diet, limb ischaemia and, on the distribution of L-tryptophan in the plasma and the body generally in the rat (Stoner, H. B., Cunningham, V. J., Elson, P. M. & Hunt, A.) 659–666
Lipoprotein lipase, see Lipase, clearing-factor
Lipoproteins, serum, cow, changes in the concentrations and compositions of, during starvation-induced ketosis (Brumby, P. E., Anderson, M., Tuckley, B., Storry, J. E. & Hibbitt, K. G.) 609–615
Liver cells, rat, isolated, effects of L-leucine on the biosynthesis of urea, glutamate and glutamine by (Mendes-Mourão, J., McGivan, J. D. & Chappell, J. B.) 457–464
Liver, chicken, effect of diet on the activities of glycerol 3-phosphate dehydrogenase and other enzymes involved in the metabolism of glyceride in (Harding, J. W., Jr., Pyeritz, E. A., Copeland, E. S. & White, H. B., III) 223–229
Liver, cow, changes in the concentrations and compositions of lipids in, serum and milk during starvation-induced ketosis (Brumby, P. E., Anderson, M., Tuckley, B., Storry, J. E. & Hibbitt, K. G.) 609–615
Liver, rabbit, glycosylation of ox pancreatic ribonuclease A by extracts of (Khalkhalil, Z. & Marshall, R. D.) 299–307
Liver, rat and mouse, evidence for two basically different mechanisms in the stimulation by griseofulvin, 3,5-diethoxycarbonyl-1,4-dihydrocollidine and related drugs of the pathway for the biosynthesis of porphyrin in (De Matteis, F. & Gibbs, A. H.) 285–287
Liver, rat, biosynthesis of albumin, fibrinogen and transferrin in suspensions of hepatocytes isolated from, as a model for the study of the biosynthesis of plasma proteins (Jeejeebhoj, K. N., Ho, J., Greenberg, G. R., Phillips, M. J., Bruce-Robertson, A. & Sodtke, U.) 141–155
Liver, rat, biosynthesis of phosphatidylethanolamines and phosphatidycholines from ethanolamine and choline in (Sundler, R. & Åkesson, B.) 309–315
Liver, rat, clearance of adenosine 3':5'-cyclic monophosphate from plasma by (Strange, R. C. & Percy-Robb, I. W.) 509–512
Liver, rat, decrease in the uptake of substrates by mitochondria from, caused by trialkyltin and trialkyl-lead compounds and its relevance to the inhibition of oxidative phosphorylation (Skilletter, D. N.) 465–471
Liver, rat, dependence on vitamin E and selenium of the demethylation of drugs by microsomal fractions from (Giasuddin, A. S. M., Cagill, C. P. J., Diplock, A. T. & Jeffery, E. H.) 339–350
Liver, rat, effect of spermine on the transcription of chromatin from, by deoxyribonucleic acid-dependent ribonucleic acid polymerase (Moruzzi, G., Barbrioli, B., Moruzzi, M. S. & Tadolini, B.) 697–703
Liver, rat, effect of treatment with phenobarbital on the biosynthesis of protein by polyribosomes from, of fed and starved animals (Ragnotti, G. & Aletti, M. G.) 1–12
Liver, rat, effects of depletion of vitamin A followed by supplementation with retinyl acetate or retinoic acid on the regeneration of, after partial hepatectomy (Jayaram, M., Sarada, K. & Ganguly, J.) 501–504
Liver, rat, gluconeogenesis from hydroxyproprate in hepatocytes isolated from (Williamson, D. H. & Ellington, E. V.) 277–279
Liver, rat, guinea-pig and rabbit, activities and intracellular distribution of nicotinamide–adenine dinucleotide phosphate-dependent malate dehydrogenase, phosphoenolpyruvate carboxykinase and pyruvate carboxylase in, and other tissues (Saggerson, E. D. & Evans, C. J.) 329–332

Liver, rat, increased biosynthesis of low-molecular-weight nuclear ribonucleic acids of, after exposure of the animals to γ-radiation and partial hepatectomy (Fónagy, A. & Hidvégi, E. J.) 357–360

Liver, rat, inhibition by ricin of the binding of elongation factor 2 and of adenosine diphosphate ribosylated elongation factor 2 to ribosomes from (Montanaro, L., Sperti, S., Mattioli, A., Testoni, G. & Stirpe, F.) 127–131

Liver, rat, isolation and characterization of subfractions of plasma membranes from the blood-sinusoidal, bilecanalicular and contiguous surfaces of hepatocytes from (Wisher, M. H. & Evans, W. H.) 375–388

Liver, rat, isolation and probable structure of proalbumin from, as a precursor of serum albumin (Quinn, P. S., Gamble, M. & Judah, J. D.) 389–393

Liver, rat, kinetic study of the transport of sulphate in mitochondria from (Crompton, M., Palmieri, F., Capano, M. & Quagliariello, E.) 667–673

Liver, rat, lack of influence of the endoplasmic-reticulum membranes on the capacity of polyribosomes from, for the biosynthesis of protein (Ragnotti, G., Aletti, M. G. & Cipollini, T. L.) 13–15

Liver, rat, lack of relationship between the activity of chromatin-bound proteinase and cell growth rates in, and hepatomas (Chae, C.-B., Smith, M. C. & Morris, H. F.) 281–283

Liver, rat, male and female, induction by drugs of the activities of glutathione S-transferases of (Kaplowitz, N., Kuhlenkamp, J. & Clifton, G.) 351–356

Liver, rat, micro method for the simultaneous determination of the activities of galactosyltransferase and 5'-nucleotidase in subcellular fractions of (Freilich, L. S., Richmond, M. E., Reppucci, A. C., Jr. & Silbert, J. E.) 741–743

Liver, rat, modification of the template capacity of chromatin from, for ribonuclease acid polymerase form B by food intake in animals under controlled feeding schedules (Barbiroli, B., Tadolini, B., Moruzzi, M. S. & Monti, M. G.) 687–696

Liver, rat, multiple activities of cyclic nucleotide phosphodiesterases and the occurrence of a calcium-plussodium ion-dependent phosphodiesterase and its protein activator in, and other tissues (Kakiuchi, S., Yamazaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Liver, rat, normal and regenerating, effects of γ-irradiation on the biosynthesis of different types of ribonucleic acid in (Markov, G. G., Dessev, G. N., Russev, G. C. & Tsanev, R. G.) 41–51

Liver, rat, opposing effects of preincubated oxidized nicotinamide–adenine dinucleotide phosphate and 4-di(methylamino)-3'-methylazobenzene on the incorporation of L-leucine into protein by the postmitochondrial supernatant fraction of (Madsen, N. P. & Labuc, J. E.) 505–507

Liver, rat, perfused, production of hydrogen peroxide by, during hyperoxia and hypoxia (Oshino, N., Jamieson, D. & Chance, B.) 53–65

Liver, rat, selectivity and stoichiometry of the binding sites of microsomal membranes from, for polyribosomes, ribosomes and ribosomal subunits in vitro (Shires, T. K., McLaughlin, C. M. & Pitot, H. C.) 513–526

Liver, rat, structural equivalents of latency for the activities of lysosomal hydrolases of (Baccino, F. M. & Zuretti, M. F.) 97–108

Lucilia cuprina, see Blowfly

Lung, guinea-pig, inhibition of the activity of 15-hydroxyprostaglandin dehydrogenase in, by exposure of the animals to 100% oxygen at atmospheric pressure (Parkes, D. G. & Eling, T. E.) 549–556

Lymphocytes, pig, relationship between enhanced turnover of phosphatidylinositol and activation of, by mitogens (Maino, V. C., Hayman, M. J. & Crumpton, M. J.) 247–252

Lysosomes, liver, rat, structural equivalents of latency for the activities of hydrolases in (Baccino, F. M. & Zuretti, M. F.) 97–108

Macaca radiata, see Monkey

Macrophages, peritoneal, guinea-pig, separation from Kuriloff cells of a proteoglycan fraction stimulating the biosynthesis of protein in (Dean, M. F. & Muir, H.) 557–563

Macrophages, peritoneal, rat, comparison of the properties of plasma membranes from experimentally induced rat granulation tissue and from (Lehtinen, P., Vuorio, E. & Kulonen, E.) 565–573

Malate dehydrogenase, nicotinamide–adenine dinucleotide phosphate-dependent, activities and intracellular distribution of, and other enzymes involved in gluconeogenesis in rat, guinea-pig and rabbit tissues (Saggerson, E. D. & Evans, C. J.) 329–332

Malate, steady-state concentrations of citrate, isocitrate, 2-oxoglutarate and, and the control of tricarboxylic acid-cycle oxidations in blowfly flight muscle and isolated mitochondria (Johnson, R. N. & Hansford, R. G.) 527–535

Malonyl-coenzyme A, incorporation of acetate and, into fatty acids by avocado mesocarp and cauliflower bud tissue (Weaire, P. J. & Kekwick, R. G. O.) 425–437

Mammary gland, guinea-pig, properties of the ribonucleic acids of (Ashby, P. & Campbell, P. N.) 575–583
Mammary gland, rat, aerobic production of lactate by tissue from, during late pregnancy and lactation (Elkin, A. R. & Kuhn, N. J.) 273–275

Mannose residues, role of, of cell-membrane galactosyltransferase in the agglutination of rabbit erythrocytes by concanavalin A (Podolsky, D. K. & Weiser, M. M.) 213–221

Mannosyl-carrier lipid, characterization of, of ox adrenal-gland medulla and rat parotid gland (White, D. A. & Waechter, C. J.) 645–651

Membrane, erythrocyte, pigeon, activation of adenylate cyclase of, by subunit A of cholera toxin (van Heyningen, S. & King, C. A.) 269–271

Membrane, erythrocyte, rabbit, role of galactosyltransferase of, in agglutination by (Podolsky, D. K. & Weiser, M. M.) 213–221

Membrane, plasma, fat-cell, epididymal, rat, properties and extracellular location of 5'-nucleotidase of (Newby, A. C., Luzio, J. P. & Hales, C. N.) 625–633

Membranes, endoplasmic-reticulum, liver, rat, lack of influence of, on the capacity of the polyribosomes for the biosynthesis of protein (Ragnotti, G., Aletti, M. G. & Cipollini, T. L.) 13–15

Membranes, kidney, rabbit, differential effects of the depletion of lipids on the activities of sodium-plus-potassium ion-dependent adenosine triphosphatase and potassium ion-dependent phosphatase from (Wheeler, K. P. & Walker, J. A.) 723–727

Membranes, kidney, rabbit, role of phospholipids in the intermediate steps of the reaction catalysed by the sodium-plus-potassium ion-dependent adenosine triphosphate system of (Wheeler, K. P.) 729–738

Membranes, microsomal, liver, rat, selectivity and stoichiometry of the binding sites of, for polyribosomes, ribosomes and ribosomal subunits in vitro (Shires, T. K., McLaughlin, C. M. & Pitot, H. C.) 513–526

Membranes, plasma, hepatocyte, rat, isolation and characterization of subfractions of, from the blood-sinusoidal, bile-canaliculare and contiguous surfaces (Wisher, M. H. & Evans, W. H.) 375–388

Membranes, plasma, preparation and properties of, from experimentally induced rat granulation tissue (Lehtinen, P., Vuorio, E. & Kulonen, E.) 565–573

Membranes, thyroid-gland, human, relationship between the mobility of lipids and the specific binding of thyrotrophin by (Bashford, C. L., Harrison, S. J., Radda, G. K. & Mehdi, Q.) 473–479

Mesocarp, avocado, biosynthesis of fatty acids in (Weaire, P. J. & Kekwick, R. G. O.) 425–437

Mesocarp, avocado, fractionation of the fatty acid synthetase activities of plastids from (Weaire, P. J. & Kekwick, R. G. O.) 439–445

Messenger ribonucleic acid, see Ribonucleic acid, messenger

Methanol, involvement of cytochrome c in the metabolism of, by Pseudomonas AM1 (Anthony, C.) 289–298

Methionine, incorporation of, into proteins in vitro in etioplasts and developing chloroplasts isolated from pea leaves (Siddell, S. G. & Ellis, R. J.) 675–685

Methylamine, involvement of cytochrome c in the metabolism of, by Pseudomonas AM1 (Anthony, C.) 289–298

7-Methylxanthine, enzymic formation of theobromine and caffeine from, by extracts of tea leaves (Suzuki, T. & Takahashi, E.) 87–96

Mevalonate, incorporation of, into sterols in the starfish Asterias rubens (Smith, A. G. & Goad, L. J.) 25–33

Micrococcus denitrificans N.C.I.B. 8944, identification and biosynthesis of siderochromes formed by (Tait, G. H.) 191–204

Microsomal fraction, kidney, rabbit, differential effects of the depletion of lipids on the activities of sodium-plus-potassium ion-dependent adenosine triphosphatase and potassium ion-dependent phosphatase of membranes from (Wheeler, K. P. & Walker, J. A.) 723–727

Microsomal fraction, kidney, rabbit, role of phospholipids in the intermediate steps of the reaction catalysed by the sodium-plus-potassium ion-dependent adenosine triphosphatase system of membranes of (Wheeler, K. P.) 729–738

Microsomal fraction, liver, rat, selectivity and stoichiometry of the binding sites of membranes of, for polyribosomes, ribosomes and ribosomal subunits in vitro (Shires, T. K., McLaughlin, C. M. & Pitot, H. C.) 513–526

Microsomal fractions, liver, rat, dependence on vitamin E and selenium of the demethylation of drugs by (Giasuddin, A. S. M., Caygill, C. P. J., Diplock, A. T. & Jeffery, E. H.) 339–350

Milk, cow, changes in the concentrations and compositions of lipids in, liver and serum during starvation-induced ketosis (Brumby, P. E., Anderson, M., Tuckley, B., Storry, J. E. & Hibbitt, K. G.) 609–615

Milk proteins, properties of the messenger ribonucleic acids coding for, and of other ribonucleic acids of guinea-pig mammary gland (Ashby, P. & Campbell, P. N.) 575–583

Mitochondria, flight-muscle, bloodly, isolated, activity of a calcium-ion-transport system in, during post-emergent development (Bygrave, F. L., Daday, A. A. & Doy, F. A.) 601–608
Mitochondria, flight-muscle, blowfly, isolated, concentrations of oxidized and reduced nicotinamide-adenine dinucleotide, adenosine triphosphate and adenosine diphosphate, energy status during controlled respiration and the control of tricarboxylic acid-cycle oxidations in (Hansford, R. G.) 537–547

Mitochondria, flight-muscle, blowfly, isolated, steady-state concentrations of citrate, isocitrate, 2-oxoglutarate and malate and the control of tricarboxylic acid-cycle oxidation in (Johnson, R. N. & Hansford, R. G.) 527–535

Mitochondria, liver, rat, decrease in the uptake of substrates by, caused by triaikytin and triaikyl-lead compounds and its relevance to the inhibition of oxidative phosphorylation (Skilleter, D. N.) 465–471

Mitochondria, Saccharomyces cerevisiae N.C.Y.C. 239, effect of temperature on the energies of activation of the respiratory enzymes of membranes of (Watson, K., Bertoli, E. & Griffiths, D. E.) 401–407

Mitochondria, Walker 256 carcinosarcoma, rat, electrophoretic and centrifugation behaviour of ribonucleic acids from (González-Cadavid, N. F. & Pérez, J. L.) 361–373

Mitogens, relationship between enhanced turnover of phosphatidylinositol and activation of pig lymphocytes by (Maino, V. C., Hayman, M. J. & Crompton, M. J.) 247–252

Monkey (Macaca radiata), studies on a wide-spectrum uptake system for dipeptides in the small intestine of human and (Das, M. & Radhakrishnan, A. N.) 133–139

Muscle, flight, blowfly, activity of a calcium-ion-transport system in mitochondria isolated from, during post-emergent development (Bygrave, F. L., Daday, A. A. & Doy, F. A.) 601–608

Muscle, flight, blowfly, concentrations of oxidized and reduced nicotinamide-adenine dinucleotide, adenosine triphosphate and adenosine diphosphate, mitochondrial energy status during controlled respiration and the control of tricarboxylic acid-cycle oxidations in, and isolated mitochondria (Hansford, R. G.) 537–547

Muscle, flight, blowfly, steady-state concentrations of citrate, isocitrate, 2-oxoglutarate and malate and the control of tricarboxylic acid-cycle oxidations in, and isolated mitochondria (Johnson, R. N. & Hansford, R. G.) 527–535

Muscle, skeletal, chick-embryo, transfer of serine from chromatographically distinguishable species of seryl-transfer ribonucleic acid from, into polypeptides and myosin (Nwagwu, M.) 395–400

Muscle, skeletal, rat, perfused, interaction of insulin and isometric exercise on the uptake of glucose by (Berger, M., Hagg, S. & Ruderman, N. B.) 231–238

Myosin, transfer of serine from chromatographically distinguishable species of chick-embryo skeletal-muscle seryl-transfer ribonucleic acid into polypeptides and (Nwagwu, M.) 395–400

Nitricamide-adenine dinucleotide, oxidized and reduced, concentrations of adenosine triphosphate, adenosine diphosphate and, mitochondrial energy status during controlled respiration and the control of tricarboxylic acid-cycle oxidations in blowfly flight muscle and isolated mitochondria (Hansford, R. G.) 537–547

Nitricamide-adenine dinucleotide phosphate, oxidized, opposing effects of preincubated 4-dimethylamino-3'-methyloazobenzene and, on the incorporation of L-leucine into protein by rat liver postmitochondrial supernatant fraction (Madsen, N. P. & Labuc, J. E.) 505–507

Nocardia sp., metabolic pathways for the degradation of pyridine by a Bacillus sp. and, isolated from soil (Watson, G. K. & Cain, R. B.) 157–172

Nuclear ribonucleic acid, see Ribonucleic acid, nuclear Nuclei, liver, rat, effect of spermine on the transcription of chromatin from, by deoxyribonucleic acid-dependent ribonucleic acid polymerase (Moruzzi, G., Barbiroli, B., Moruzzi, M. S. & Tadolini, B.) 697–703

Nuclei, liver, rat, modification of the template capacity of chromatin from, for ribonucleic acid polymerase form B by food intake in animals under controlled feeding schedules (Barbiroli, B., Tadolini, B., Moruzzi, M. S. & Monti, M. G.) 687–696

Nuclei, uterus, rat, immature, dynamics of the distribution of oestrogen receptors between, and cytosol after the administration of oestradiol-17β (Mešter, J. & Baulieu, E. E.) 617–623

Nucleoside phosphorylase, significance of the final cell division in the changes in the activities of, and other enzymes during the differentiation of rabbit erythrocytes (Denton, M. J., Spencer, N. & Arnstein, H. R. V.) 205–211

5'-Nucleotidase, micro method for the simultaneous determination of the activities of galactosyltransferase and, in cell fractions (Freilich, L. S., Richmond, M. E., Reppucci, A. C., Jr. & Silbert, J. E.) 741–743

5'-Nucleotidase, plasma-membrane, fat-cell, epididyimal, rat, properties and extracellular location of (Newby, A. C., Luzio, J. P. & Hales, C. N.) 625–633

Nucleotides, cyclic, evidence against an involvement of, in the induction by cytokinins of the biosynthesis of betacyanin in Amaranthus sp. seedlings (Elliott, D. C. & Murray, A. W.) 333–337

Oestradiol-17β, dynamics of the distribution of oestrogen receptors between the nuclear and cytosol fractions of immature rat uterus after the administration of (Mešter, J. & Baulieu, E. E.) 617–623

Oestrogen receptors, dynamics of the distribution of, between the nuclear and cytosol fractions of immature rat uterus after the administration of oestradiol-17β (Mešter, J. & Baulieu, E. E.) 617–623

Oleate, binding of L-tryptophan to ox, human and rat serum albumins in the presence of, and other non-esterified fatty acids (Cunningham, V. J., Hay, L. & Stoner, H. B.) 653–658

Orotate, effects of γ-irradiation on the incorporation of, into different types of ribonucleic acid in normal and regenerating rat liver (Markov, G. G., Dessev, G. N., Russev, G. C. & Tsanev, R. G.) 41–51
Orotate, increased incorporation of, into low-molecular-weight nuclear ribonucleic acids of rat liver after exposure of the animals to γ-radiation and partial hepatectomy (Fonagy, A. & Hidvégi, E. J.) 357–360

Oxidative phosphorylation, see Phosphorylation, oxidative

2-Oxoglutarate, steady-state concentrations of citrate, isocitrate, malate and, and the control of tricarboxylic acid-cycle oxidations in blowfly muscle and isolated mitochondria (Johnson, R. N. & Hansford, R. G.) 527–535

Oxygen, 100%, inhibition of the activity of 15-hydroxyprostaglandin dehydrogenase in guinea-pig lung by exposure of the animals to, at atmospheric pressure (Parkes, D. G. & Eling, T. E.) 549–556

Oxygen, production of hydrogen peroxide by perfused rat liver in the presence of high and of low concentrations of (Oshino, N., Jamieson, D. & Chance, B.) 53–65

Palmitate, binding of l-tryptophan to ox, human and rat serum albums in the presence of, and other nonesterified fatty acids (Cunningham, V. J., Hay, L. & Stoner, H. B.) 653–658

Pancreas, ox, glycosylation of ribonuclease A from, by extracts of rabbit liver (Khalkhal, Z. & Marshall, R. D.) 299–307

Parotid gland, rat, characterization of a mannosyl-carrier lipid of ox adrenal-gland medulla and (White, D. A. & Waechter, C. J.) 645–651

Pea (Pisum sativum) leaves, biosynthesis of proteins in vitro in etioplasts and developing chloroplasts isolated from (Siddell, S. G. & Ellis, R. J.) 675–685

Penicillinase, see β-Lactamase

Peptidoglycan, soluble, inhibition of cross-linking by benzylpenicillin and cephaloridine in vivo accompanied by the formation of, in Bacillus licheniformis 94 (Tynecka, Z. & Ward, J. B.) 253–267

Persea americana, see Avocado

Phenobarbital, induction by, of the activities of glutathione S-transferases in liver of male and female rats (Kaplowitz, N., Kuhlenkamp, J. & Clifton, G.) 351–356

Phenobarbitone, effect of treatment with, on the biosynthesis of protein by liver ribosomes from fed and starved rats (Ragnotti, G. & Aletti, M. G.) 1–12

Phormia regina, see Blowfly

Phosphatase, acid, lysosomal, liver, rat, structural equivalents of latency for the activities of, and other hydrolases (Baccino, F. M. & Zuretti, M. F.) 97–108

Phosphate, inorganic, stoichiometry of the absorption of protons with l-glutamate and, by yeasts of the genus Saccharomyces (Cockburn, M., Earnshaw, P. & Eddy, A. A.) 705–712

Phosphate, inorganic, uptake of serine and, by mutant strains of Escherichia coli K12 that are deficient in electron transport and coupled phosphorylation (Rosenberg, H., Cox, G. B., Butlin, J. D. & Gutowski, S. J.) 417–423

Phosphatidylcholine, biosynthesis of, and other phospholipids in Entodinium caudatum (Broad, T. E. & Dawson, R. M. C.) 317–328

Phosphatidylcholine, biosynthesis of, from choline in rat liver (Sundler, R. & Åkesson, B.) 309–315

Phosphatidylethanolamine, biosynthesis of, and other phospholipids in Entodinium caudatum (Broad, T. E. & Dawson, R. M. C.) 317–328

Phosphatidylethanolamine, biosynthesis of, from ethanolamine in rat liver (Sundler, R. & Åkesson, B.) 309–315

Phosphatidylinositol, biosynthesis of, and other phospholipids in Entodinium caudatum (Broad, T. E. & Dawson, R. M. C.) 317–328

Phosphatidylinositol, relationship between enhanced turnover of, and activation of pig lymphocytes by mitogens (Maino, V. C., Hayman, M. J. & Crompton, M. J.) 247–252

Phosphodiesterases, cyclic nucleotide, multiple activities of, and the occurrence of a calcium-plus-magnesium ion-dependent phosphodiesterase and its protein activator in various rat tissues (Kakihuchi, S., Yamazaki, R., Teshima, Y., Uenishi, K. & Miyamoto, E.) 109–120

Phosphoenolpyruvate carboxykinase, activities and intracellular distribution of, and other enzymes involved in gluconeogenesis in rat, guinea-pig and rabbit tissues (Saggerson, E. D. & Evans, C. J.) 329–332

Phosphoenolpyruvate carboxykinase (guanosine triphosphate), properties of, biosynthesized in Reuber H35 hepatoma cells in the presence of amino acid analogues (Knowles, S. E., Gunn, J. M., Reshef, L., Hanson, R. W. & Ballard, F. J.) 585–593

Phosphogluconate dehydrogenase, significance of the final cell division in the changes in the activities of, and other enzymes during the differentiation of rabbit erythrocytes (Denton, M. J., Spencer, N. & Arnstein, H. R. V.) 205–211

Phospholipids, biosynthesis of, in Entodinium caudatum (Broad, T. E. & Dawson, R. M. C.) 317–328

Phospholipids, biosynthesis of, in rat liver (Sundler, R. & Åkesson, B.) 309–315

Phospholipids, differential effects of the depletion of, on the activities of rabbit kidney membrane sodium-plus-potassium ion-dependent adenosine triphosphatase and potassium ion-dependent phosphatase (Wheeler, K. P. & Walker, J. A.) 723–727

Phospholipids, role of, in the intermediate steps of the reaction catalysed by the rabbit kidney membrane sodium-plus-potassium ion-dependent adenosine triphosphatase system (Wheeler, K. P.) 729–738

Phosphorylation, coupled, transport of metabolites in mutant strains of Escherichia coli K12 that are deficient in electron transport and (Rosenberg, H., Cox, G. B., Butlin, J. D. & Gutowski, S. J.) 417–423

Phosphorylation, oxidative, decrease in the uptake of substrates by rat liver mitochondria caused by trialkyltin and trialkyl lead compounds and its relevance to the inhibition of (Skilletter, D. N.) 465–471
Phytohaemagglutinin, relationship between enhanced turnover of phosphatidylinositol and activation of pig lymphocytes by, and other mitogens (Maino, V. C., Hayman, M. J. & Crumpton, M. J.) 247–252

_Pseudomonas_ sartorum, see Pea

Plasma membrane, see Membrane, plasma

Plasma proteins, see Proteins, plasma

Plasma, rat, effects of diet, lipolytic agents and limb ischaemia on the distribution of L-tryptophan in, and the body generally (Stoner, H. B., Cunningham, V. J., Elson, P. M. & Hunt, A.) 659–666

Plasma, rat, hepatic clearance of adenosine 3':5'-cyclic monophosphate from (Strange, R. C. & Percy-Robb, I. W.) 509–512

Plastids, avocado-mesocarp, fractionation of the fatty acid synthetase activities of (Weaire, P. J. & Kekwick, R. G. O.) 439–445

Polyamines, effects of, on the transcription of rat liver chromatin by deoxyribonucleic acid-dependent ribonucleic acid polymerase (Moruzzi, G., Barbiroli, B., Moruzzi, M. S. & Todolini, B.) 697–703

Polycyclic hydrocarbons, see Hydrocarbons, polycyclic

Polypeptide chains, inhibition by ricin of the binding of elongation factor 2 and of adenosine diphosphate ribosylated elongation factor 2 to rat liver ribosomes and its effect on the elongation of, during the biosynthesis of protein (Montanaro, L., Sperti, S., Mattioli, A., Testoni, G. & Stirpe, F.) 127–131

Polypeptides, transfer of serine from chromatographically distinguishable species of chick-embryo skeletal-muscle seryl-transfer ribonucleic acid into myosin and (Nwagwu, M.) 395–400

Polyribosomes, liver, rat, effect of treatment with phenobarbitone on the biosynthesis of protein by, from fed and starved animals (Ragnotti, G. & Aletti, M. G.) 1–12

Polyribosomes, liver, rat, lack of influence of the endoplasmic-reticulum membranes on the capacity of, for the biosynthesis of protein (Ragnotti, G., Aletti, M. G. & Cipollini, T. L.) 13–15

Polyribosomes, mammary-gland, guinea-pig, properties of the ribonucleic acids of, and ribosomal subunits (Ashby, P. & Campbell, P. N.) 575–583

Polyribosomes, selectivity and stoichiometry of the binding sites of rat liver microsomal membranes for ribosomes, ribosomal subunits and, in _in vitro_ (Shires, T. K., McLaughlin, C. M. & Pitot, H. C.) 513–526

Polysomes, see Polyribosomes

Porphyrin, evidence for two basically different mechanisms in the stimulation by griseofulvin, 3,5-diethoxy-carbonyl-1,4-dihydrocollidine and related drugs of the pathway for the biosynthesis of, in rat and mouse liver (De Matteis, F. & Gibbs, A. H.) 285–287

Pregnancy, late, aerobic production

Prolactin, isolation and probable structure of, from rat liver as a precursor of serum albumin (Quinn, P. S., Gamble, M. & Judah, J. D.) 389–393

Prostaglandin F2α, inhibition of the metabolism of, in guinea-pig lung by exposure of the animals to 100% oxygen at atmospheric pressure (Parkes, D. G. & Eling, T. E.) 549–556

Protease, see Proteinase

Protease, effect of treatment with phenobarbitone on the biosynthesis of, by liver ribosomes from fed and starved rats (Ragnotti, G. & Aletti, M. G.) 1–12

Protein, inhibition by ricin of the binding of elongation factor 2 and of adenosine diphosphate ribosylated elongation factor 2 to rat liver ribosomes and its effect on the biosynthesis of (Montanaro, L., Sperti, S., Mattioli, A., Testoni, G. & Stirpe, F.) 127–131

Protein, lack of influence of the endoplasmic-reticulum membranes on the capacity of polyribosomes for the biosynthesis of (Ragnotti, G., Aletti, M. G. & Cipollini, T. L.) 13–15

Protein, opposing effects of preincubated oxidized nicotinamide–adenine dinucleotide phosphate and 4-dimethylamino-3'-methylazobenzene on the incorporation of L-leucine into, by rat liver postmitochondrial supernatant fraction (Madsen, N. P. & Labuc, J. E.) 505–507

Protein, separation from guinea-pig Kurloff cells of a proteoglycan fraction stimulating the biosynthesis of, in peritoneal macrophages (Dean, M. F. & Muir, H.) 557–563

Proteinase, chromatin-bound, lack of relationship between the activity of, and cell growth rates in rat liver and hepatomas (Chae, C.-B., Smith, M. C. & Morris, H. P.) 281–283

Protein–polysaccharide, see Proteoglycan

Proteins, aberrant, increased rates of degradation of, biosynthesized in Reuber H35 hepatoma cells in the presence of amino acid analogues (Knowles, S. E., Gunn, J. M., Hanson, R. W. & Ballard, F. J.) 595–600

Proteins, biosynthesis of, _in vitro_ in etioplasts and developing chloroplasts isolated from pea leaves (Siddell, S. G. & Ellis, R. J.) 675–685

Proteins, characterization of glycoproteins and, of subfractions of plasma membranes from the blood-sinusoidal, bile-canalicular and contiguous surfaces of rat hepatocytes (Wisher, M. H. & Evans, W. H.) 375–388

Proteins, milk, properties of the messenger ribonucleic acids coding for, and of other ribonucleic acids of guinea-pig mammary gland (Ashby, P. & Campbell, P. N.) 575–583

Proteins, plasma, rat, biosynthesis of albumin, fibrinogen and transferrin in suspensions of isolated rat hepatocytes as a model for the study of the biosynthesis of (Jeejeebhoy, K. N., Ho, J., Greenberg, G. R., Phillips, M. J., Bruce–Robertson, A. & Sodtke, U.) 141–155

Proteoglycan, separation from guinea-pig Kurloff cells of, stimulating the biosynthesis of protein in peritoneal macrophages (Dean, M. F. & Muir, H.) 557–563

Protophlorophyllide, studies on the biosynthesis of, by isolated barley-seedling etioplasts (Griffiths, W. T.) 17–24

Protons, stoichiometry of the absorption of, with phosphate and L-glutamate by yeasts of the genus _Saccharomyces_ (Cockburn, M., Earnshaw, P. & Eddy, A. A.) 705–712

_Pseudomonas_ AM1, properties of cytochrome c and other cytochromes of (Anthony, C.) 289–298

_Pseudomonas putida_, purification and properties of a soluble enzyme system catalysing the oxidation of benzene to cis-1,2-dihydrorxydihydroxycyclohexa-3,5-diene (cis-benzene glycol) from a strain of, isolated from soil (Axcell, B. C. & Geary, P. J.) 173–183
Purine nucleotides, formation of, and other products during the metabolism of xanthine and hypoxanthine by excised tea shoot tips (Suzuki, T. & Takahashi, E.) 79–85
Pyridine, metabolic pathways for the degradation of, by a Bacillus sp. and a Nocardia sp. isolated from soil (Watson, G. K. & Cain, R. B.) 157–172
Pyruvate carboxylase, activities and intracellular distribution of, and other enzymes involved in gluconeogenesis in rat, guinea-pig and rabbit tissues (Saggerson, E. D. & Evans, C. J.) 329–332
Pyruvate, decrease in the uptake of, and other substrates by rat liver mitochondria caused by tralkytin and trialkyl-lead compounds and its relevance to the inhibition of oxidative phosphorylation (Skilleter, D. N.) 465–471
γ-Radiation, effects of, on the biosynthesis of different types of ribonucleic acid in normal and regenerating rat liver (Markov, G. G., Dessev, G. N., Russev, G. C. & Tsanev, R. G.) 41–51
γ-Radiation, increased biosynthesis of low-molecular-weight nuclear ribonucleic acids of rat liver after exposure of the animals to, and partial hepatectomy (Főnágy, A. & Hidvégi, E. J.) 357–360
Red blood cells, see Erythrocytes
Respiratory enzymes, membrane, mitochondrial, Saccharomyces cerevisiae N.Y.C. 239, effect of temperature on the energies of activation of (Watson, K., Bertoli, E. & Griffiths, D. E.) 401–407
Respiratory function, relationship between degree of unsaturation of membrane lipids and, of Saccharomyces cerevisiae (Watson, K., Houghton, R. L., Bertoli, E. & Griffiths, D. E.) 409–416
Reticulum, endoplasmic, liver, rat, lack of influence of the membranes of, on the capacity of the polyribosomes for the biosynthesis of protein (Ragnotti, G., Aletti, M. G. & Cipolilli, T. L.) 13–15
Reticulum, endoplasmic, liver, rat, selectivity and stoichiometry of the binding sites of membranes of, for polyribosomes, ribosomes and ribosomal subunits in vitro (Shires, T. K., McLaughlin, C. M. & Pitot, H. C.) 513–526
Retinoic acid, effects of depletion of vitamin A followed by supplementation with retinyl acetate or, on the regeneration of rat liver after partial hepatectomy (Jayaram, S. E., Sarada, K. & Ganguly, J.) 501–504
Retinyl acetate, effects of depletion of vitamin A followed by supplementation with retinoic acid or, on the regeneration of rat liver after partial hepatectomy (Jayaram, M., Sarada, K. & Ganguly, J.) 501–504
Reuber H35 hepatoma cells, increased rates of degradation of aberrant proteins biosynthesized in, in the presence of amino acid analogues (Knowles, S. E., Gunn, J. M., Hanson, R. W. & Ballard, F. J.) 595–600
Reuber H35 hepatoma cells, properties phosphoenolpyruvate carboxykinase (guanosine triphosphate) biosynthesized in, in the presence of amino acid analogues (Knowles, S. E., Gunn, J. M., Reshef, L., Hanson, R. W. & Ballard, F. J.) 585–593
Ricin, inhibition by, of the binding of elongation factor 2 and of adenosine diphosphate ribosylated elongation factor 2 to rat liver ribosomes (Montanaro, L., Sperti, S., Mattioli, A., Testoni, G. & Stirpe, F.) 127–131
Rumen, biosynthesis of phospholipids in Entodinium caudatum isolated from (Broad, T. E. & Dawson, R. M. C.) 317–328

Saccharomyces cerevisiae N.C.Y.C. 239, effect of temperature on the energies of activation of the respiratory enzymes of mitochondrial membranes of (Watson, K., Bertoli, E. & Griffiths, D. E.) 401–407
Saccharomyces cerevisiae, relationship between degree of unsaturation of membrane lipids and mitochondrial function in (Watson, K., Houghton, R. L., Bertoli, E. & Griffiths, D. E.) 409–416
Saccharomyces spp., stoichiometry of the absorption of protons with phosphate and l-glutamate by (Cockburn, M., Earnshaw, P. & Eddy, A. A.) 705–712
Salivary gland, parotid, rat, characterization of a mannosyl-carrier lipid of ox adrenal-gland medulla and (White, D. A. & Waechter, C. J.) 645–651
Salivary gland, submaxillary, rat, metabolic interactions of glucose, acetoacetate and adrenaline in, in vitro (Thompson, M. P. & Williamson, D. H.) 635–644
Seedlings, Amaranthus sp., evidence against an involvement of cyclic nucleotides in the induction by cytokinins of the biosynthesis of betacyanin by (Elliott, D. C. & Murray, A. W.) 333–337
Seedlings, barley, studies on the biosynthesis of chlorophyllide by etioplasts isolated from (Griffiths, W. T.) 17–24
Selenium, dependence on vitamin E and, of the demethylation of drugs by rat liver microsomal fractions (Giasuddin, A. S. M., Caygill, C. P. J., Diplock, A. T. & Jeffery, E. H.) 339–350
Serine, transfer of, from chromatographically distinguishable species of chick-embryo skeletal-muscle seryl-transfer ribonucleic acid into polypeptides and myosin (Nwagwu, M.) 395–400
Serine, uptake of inorganic phosphate and, by mutant strains of Escherichia coli K12 that are deficient in electron transport and coupled phosphorylation (Rosenberg, H., Cox, G. B., Butlin, J. D. & Gutowski, S. J.) 417–423
Serum albumin, see Albumin, serum
Serum, cow, changes in the concentrations and compositions of lipids in, liver and milk during starvation-induced ketosis (Brumby, P. E., Anderson, M., Tuckley, B., Storry, J. E. & Hibbitt, K. G.) 609–615
Serum lipoproteins, see Lipoproteins, serum
Seryl-transfer ribonucleic acid, skeletal-muscle, chick-embryo, transfer of serine from chromatographically distinguishable species of, into polypeptides and myosin (Nwagwu, M.) 395–400
Shoot tips, tea, excised, metabolism of xanthine and hypoxanthine in (Suzuki, T. & Takahashi, E.) 79–85
Siderochromes, identification and biosynthesis of, formed by Micrococcus denitrificans N.C.I.B. 8944 (Tait, G. H.) 191–204
Skeletal muscle, see Muscle, skeletal
Small intestine, see Intestine, small

Soil, metabolic pathways for the degradation of pyridine by a Bacillus sp. and a Nocardia sp. isolated from (Watson, G. K. & Cain, R. B.) 157–172
Soil, purification and properties of a soluble enzyme system catalysing the oxidation of benzene to cis-1,2-dihydroxycyclohexa-3,5-diene (cis-benzene glycol) from a strain of Pseudomonas putida isolated from (Axcell, B. C. & Geary, P. J.) 173–183

Solaster papposus, see Starfish
Spermidine, identification of, as a constituent of siderochromes formed by Micrococcus denitrificans N.C.I.B. 8944 (Tait, G. H.) 191–204
Spermine, effect of, on the transcription of rat liver chymatin by deoxyribonucleic acid-dependent ribonucleic acid polymerase (Moruzzi, G., Barbieri, B., Moruzzi, M. S. & Tadolini, B.) 697–703
Spleen cells, mouse, activity of thymidine kinase of, in vitro and in vitro (Olsen, I. & Harris, G.) 489–496
Squalene, biosynthesis of, and sterols in the starfish Asterias rubens (Smith, A. G. & Goad, L. J.) 25–33
Starfish (Asterias rubens and Solaster papposus), conversion of cholest-5-en-3β-ol into 5α-cholest-7-en-3β-ol in (Smith, A. G. & Goad, L. J.) 35–40
Starfish (Asterias rubens), biosynthesis of sterols in (Smith, A. G. & Goad, L. J.) 25–33
Starvation, effects of treatment with phenobarbitone and, on the biosynthesis of protein by rat liver polyribosomes (Ragnotti, G. & Aletti, M. G.) 1–12
Starvation, metabolism of lipids in the cow during ketosis induced by (Brumby, P. E., Anderson, M., Tuckley, B., Storry, J. E. & Hibbitt, K. G.) 609–615
Sterols, biosynthesis of, in the starfish Asterias rubens (Smith, A. G. & Goad, L. J.) 25–33
Streptozotocin-diabetes, see Diabetes, streptozotocin-
Submaxillary gland, rat, metabolic interactions of glucose, acetoacetate and adrenaline in, in vitro (Thompson, M. P. & Williamson, D. H.) 635–644
Succinate oxidase, membrane, mitochondrial, Saccharomyces cerevisiae N.C.Y.C. 239, effect of temperature on the energies of activation of, and other respiratory enzymes (Watson, K., Bertoli, E. & Griffiths, D. E.) 401–407
Succinate semialdehyde, identification of, as an intermediate during the degradation of pyridine by a Bacillus sp. isolated from soil (Watson, G. K. & Cain, R. B.) 157–172
Sulphate, inorganic, kinetic study of the transport of, in rat liver mitochondria (Crompton, M., Palmieri, F., Capano, M. & Quagliariello, E.) 667–673
Supernatant fraction, see Cytosol

Vol. 146

INDEX OF SUBJECTS

763
Tea (Thea sinensis) leaves, enzymic formation of theobromine and caffeine from 7-methylxanthine by extracts from (Suzuki, T. & Takahashi, E.) 87–96

Tea (Thea sinensis) shoot tips, excised, metabolism of xanthine and hypoxanthine in (Suzuki, T. & Takahashi, E.) 79–85

Temperature, effect of, on the energies of activation of respiratory enzymes of Saccharomyces cerevisiae N.C.Y.C. 239 mitochondrial membranes (Watson, K., Bertoli, E. & Griffiths, D. E.) 401–407

Tendon cells, chick-embryo, comparison of the properties of plasma membranes from experimentally induced rat granulation tissue and (Lehtinen, P., Vuorio, E. & Kulonen, E.) 565–575

Thea sinensis, see Tea

Theobromine, enzymic formation of, and caffeine from 7-methylxanthine by extracts of tea leaves (Suzuki, T. & Takahashi, E.) 87–96

Thiamin, metabolic changes during the development of a deficiency of, in the rat (Liang, C. C.) 739–740

L-Theo-7-methylxanthine, identification of, as a constituent of a siderochrome formed by Micrococcus denitrificans N.C.I.B. 8944 (Tait, G. H.) 191–204

Thymidine kinase, activity of, of mouse spleen cells in vivo and in vitro (Olsen, I. & Harris, G.) 489–496

Thyroid gland, human, relationship between the mobility of lipids and the specific binding of thyrotrophin by membranes from (Bushford, C. L., Harrison, S. J., Radda, G. K. & Mehdi, Q.) 473–479

Thyrotrophin, relationship between the mobility of lipids and the specific binding of, by human thyroid-gland membranes (Bushford, C. L., Harrison, S. J., Radda, G. K. & Mehdi, Q.) 473–479

α-Tocopherol, dependence on selenium and, of the demethylation of drugs by rat liver microsomal fractions (Gisaud, B. S., C. P. J., Diploc, A. T. & Jeffery, E. H.) 339–350

Transcription, effect of spermine on, of rat liver chromatin by deoxyribonucleic acid-dependent ribonucleic acid polymerase (Moruzzi, G., Barbirini, B., Moruzzi, M. S. & Tadolini, B.) 697–703

Transcription, modification of the capacity for, of rat liver chromatin by ribonucleic acid polymerase form B by food intake in animals under controlled feeding schedules (Barbiroli, B., Tadolini, B., Moruzzi, M. S. & Monti, M. G.) 687–696

Transfer ribonucleic acid, see Ribonucleic acid, transfer

Transferrin, biosynthesis of albumin, fibrinogen and, in suspensions of isolated rat hepatocytes as a model for the study of the biosynthesis of plasma proteins (Jeejeebhoy, K. N., Ho, J., Greenberg, G. R., Phillips, M. J., Bruce-Robertson, A. & Sodite, U.) 141–155

Trialkyl-lead compounds, decrease in the uptake of substrates by rat liver mitochondria caused by trialkyltin compounds and, and its relevance to the inhibition of oxidative phosphorylation (Skilleter, D. N.) 465–471

Trialkyltin compounds, decrease in the uptake of substrates by rat liver mitochondria caused by trialkyl-lead compounds and, and its relevance to the inhibition of oxidative phosphorylation (Skilleter, D. N.) 465–471

Tricarboxylic acid cycle, concentrations of oxidized and reduced nicotinamide–adenine dinucleotide, adenosine triphosphate and adenosine diphosphate, mitochondrial energy status during controlled respiration and the control of the oxidation reactions of, in blowfly flight muscle and isolated mitochondria (Hansford, R. G.) 537–547

Tricarboxylic acid cycle, steady-state concentrations of citrate, isocitrate, 2-oxo-glutarate and malate and the control of the oxidation reactions of, in blowfly flight muscle and isolated mitochondria (Johnson, R. N. & Hansford, R. G.) 527–535

Triethyltin, decrease in the uptake of substrates by rat liver mitochondria caused by, and its relevance to the inhibition of oxidative phosphorylation (Skilleter, D. N.) 465–471

L-Tryptophan, binding of, to ox, human and rat serum albumins in the presence of non-esterified fatty acids (Cunningham, V. J., Hay, L. & Stoner, H. B.) 653–658

L-Tryptophan, effects of, diet, lipolytic agents and limb ischaemia on the distribution of, in the plasma and the body generally in the rat (Stoner, H. B., Cunningham, V. J., Elson, P. M. & Hunt, A.) 659–666

Tumour, Walker 256, rat, electrophoretic and centrifugation behaviour of mitochondrial ribonucleic acids from (González-Cadavid, N. F. & Pérez, J. L.) 361–373

Urea, effects of L-leucine on the biosynthesis of glutamate, glutamine and, by isolated rat liver cells (Mendez-Morra, J., McGivan, J. D. & Chappell, J. B.) 457–464

Urea, formation of, and other products during the metabolism of xanthine and hypoxanthine by excised tea shoot tips (Suzuki, T. & Takahashi, E.) 79–85

Uridine diphosphate N-acetylgalactosamine, transfer of N-acetylgalactosamine from, to ox pancreatic ribonuclease A catalysed by extracts of rabbit liver (Khalkhali, Z. & Marshall, R. D.) 299–307

Uterus, rat, immature, dynamics of the distribution of oestrogen receptors between the nuclear and cytosol fractions of, after the administration of oestradiol-17β (Mester, J. & Baulieu, E. E.) 617–623

Vitamin A, effects of depletion of, followed by supplementation with retinyl acetate or retinoic acid on the regeneration of rat liver after partial hepatectomy (Jayaram, M., Sarada, K. & Ganguly, J.) 501–504

Vitamin B₁, see Thiamin

Vitamin E, dependence on selenium and, of the demethylation of drugs by rat liver microsomal fractions (Gisaud, A. S. M., Caygill, C. P. J., Diploc, A. T. & Jeffery, E. H.) 339–350

Walker 256 carcinosarcoma, rat, electrophoretic and centrifugation behaviour of mitochondrial ribonucleic acids from (González-Cadavid, N. F. & Pérez, J. L.) 361–373

Xanthine, metabolism of hypoxanthine and, in excised tea shoot tips (Suzuki, T. & Takahashi, E.) 79–85

Yeasts (*Saccharomyces* spp.), stoichiometry of the absorption of protons with phosphate and L-glutamate by (Cockburn, M., Earnshaw, P. & Eddy, A. A.) 705–712
