ANTISERA TO HUMAN ENZYMES

Because of the significance of applying antibodies to human enzymes in clinical research, Miles Research Products is pleased to announce the availability of antisera to human carbonic anhydrase B, catalase, chymotrypsin and trypsin. Although enzymatic assays are universally accepted, there are occasions when they are not completely quantitative. Proenzyme systems, a mixture of isoenzymes, the inhibition of enzymes by physiological or pharmacological interaction or the presence of certain mutants all interfere with accurate results when the enzymatic assay is the only assay used. With the offering of these new antisera, researchers are now able to employ easy-to-use immunoassay techniques for measuring the total activity of the appropriate enzymes.

Lyophilized IgG Fraction of Antiserum to:	Produced in	Code. No.	Pkg. Size	Price
Human Trypsin	Goat	64-300-1	2 ml	\$25
Human Chymotrypsin	Rabbit	64-301-1	2 ml	\$25
Human Carbonic Anhydrase	Rabbit	64-302-1	2 ml	\$25
Human Catalase	Rabbit	64-303-1	2 ml	\$25

This volume records the proceedings of a symposium held in University College London in April 1974. Each of the ten papers is by an international authority and presents a survey of recent progress in certain aspects of the study of glycoproteins. Topics include methods of analysis, the nature of the carbohydrate-peptide linkage, heterogeneity of glycoproteins, sites of glycosylation, assembly of the carbohydrate moieties, immunoglobulin synthesis, sialic acid modifications, the role of sialic acid and the structure of blood-group-specific glycoproteins in normal and transformed cells.
