

SIGMA is pleased to offer -

## AFFINITY CHROMATOGRAPHY MEDIA

The isolation and purification of biologically active molecules can be greatly facilitated with Affinity Chromatography.<sup>1,2,3</sup> Our new listings only begin to cover the variety of combinations of matrices, ligands & modes of attachment possible. We invite your comments and suggestions.

## Trends in Biochemical Sciences

---

If your work involves you in academic or industrial research, if you are a teacher, graduate student or laboratory worker in the biological sciences or in the biochemically oriented clinical sciences, Trends in Biochemical Sciences is designed for you.

This exciting new magazine will publish "reviews in miniature" of advances in research and methodology, written by leading scientists, to enable you to keep abreast and take advantage of progress in your own and related fields and to follow up in depth through key references. It will assist you to keep the content of your teaching up to date, and to gain a coherent overall view of biochemical progress.

But that's not all. Trends in Biochemical Sciences will also publish book reviews, feature articles, reports on recent meetings, a calendar of future events, news of personal appointments and activities, and informed comment on issues of relevance around the world.

Watch out for Trends in Biochemical Sciences. A magazine with the readability of a newspaper.

Editor-in-Chief: Dr. W.J. Whelan, Biochemistry-UMED, P.O. Box 520875, Miami, Fla, 33152, USA.

Staff Editor: Dr. Joan Morgan, 58 Muswell Hill Road, London N. 10, UK.

Editorial Board: M. Avron (Rehovot), G. Bernardi (Paris), R.A. Bradshaw (St. Louis), K. van Dam (Amsterdam), R.F. Gesteland (Cold Spring Harbor), G.K. Radda (Oxford), E.R. Stadtman (Bethesda), H.G. Wood (Cleveland).

Articles will normally be commissioned, but all submitted material will be considered for publication. Proposals for reviews may be submitted to the Editor-in-Chief or to members of the editorial board. News and information may be sent to the Staff Editor.

### Subscriptions

To be published monthly for the International Union of Biochemistry under the Elsevier imprint, in one volume per year from January 1976. Personal subscriptions only, Dfl. 60.-, US \$24.- per year (including postage and handling).

Librarians should write for information on the quarterly reference edition.

To place your order, or to obtain a free, specimen copy, write to: Trends in Biochemical Sciences, P.O. Box 548, Amsterdam, The Netherlands.

Subscribers in the U.S.A. and Canada should write to: American Elsevier Publishing Co., Inc. (TIBS), 52 Vanderbilt Avenue, New York, N.Y. 10017.

Subscribers in the United Kingdom should write to: Elsevier International Projects Ltd. (TIBS), Mayfield House, 256 Banbury Road, Oxford OX2 7DH, U.K.

# THYROID HORMONE METABOLISM

*Proceedings of an International Conference*

**Edited by W. A. Harland and J. S. Orr**

*Western Infirmary, University of Glasgow, Glasgow, Scotland*

**August/September 1975, xxii + 440pp., £8.80/\$22.75 0.12.325650.X**

This volume consists of papers from an International Conference which was held in Glasgow on 7-9 August 1974. The editors arranged a stimulating programme of contributions which presented a broad picture of current work and important recent developments in the field of thyroid hormone metabolism. The book includes reviews, research

reports, clinical studies and discussions. Papers are divided into two sections, one concerning the specific binding and peripheral action of thyroid hormones, and the other covering thyroid hormone function in clinical investigation. Many of the leading workers in the field have contributed to this book, and it will create a great deal of interest among endocrinologists, clinicians, biochemists, clinical pathologists and research workers in the field of thyroid hormones.

**No. 40 THE METABOLISM AND FUNCTION OF GLYCOPROTEINS**

*Edited by R. M. S. SMELLIE and J. G. BEELEY*

1974 189 pp. £7.00 (\$17.50)

This volume records the proceedings of a symposium held in University College London in April 1974. Each of the ten papers is by an international authority and presents a survey of recent progress in certain aspects of the study of glycoproteins. Topics include methods of analysis, the nature of the carbohydrate-peptide linkage, heterogeneity of glycoproteins, sites of glycosylation, assembly of the carbohydrate moieties, immunoglobulin synthesis, sialic acid modifications, the role of sialic acid and the structure of blood-group-specific glycoproteins in normal and transformed cells.

## CONTENTS

- Epitaxial relationships in urolithiasis: the calcium oxalate monohydrate-hydroxyapatite system.  
By J. L. MEYER, J. H. BERGER and L. H. SMITH
- Anaerobic glycolysis in normal human erythrocytes incubated *in vitro* with sodium salicylate. By  
N. WORATHUMRONG and A. J. GRIMES
- The effect of external potassium concentration on leucocyte cation transport *in vitro*. By P. J. HILTON,  
R. P. S. EDMONDSON, R. D. THOMAS and J. PATRICK
- The effects of a diphosphonate and dietary calcium on the metabolism of vitamin D<sub>3</sub> (cholecalciferol)  
in the chick. By CAROL M. TAYLOR, E. BARBARA MAWER and A. REEVE
- A study of relations between the absorption of amino acids, dipeptides, water and electrolytes in the  
normal human jejunum. By D. B. A. SILK, P. D. FAIRCLOUGH, NICOLA J. PARK, ANNETTE E. LANE,  
JOAN P. W. WEBB, M. L. CLARK and A. M. DAWSON
- Effects of pent-4-enoic acid on renal free water, bicarbonate and phosphate excretion in the dog.  
By J. G. KLEINMAN and M. L. LEVIN
- Observations on the passage of apoproteins from plasma lipoproteins into peripheral lymph in two men.  
By D. REICHL, A. POSTIGLIONE, N. B. MYANT, J. J. PFLUG and M. PRESS
- Respiratory responses to simultaneous static and rhythmic exercises in humans. By R. L. WILEY and  
A. R. LIND
- A comparison of natriuresis after oral and intravenous sodium loading in sodium-depleted rabbits:  
evidence for a gastrointestinal or portal monitor of sodium intake. By R. J. LENNANE, W. S. PEART,  
R. M. CAREY and J. SHAW
- A comparison of natriuresis after oral and intravenous sodium loading in sodium-depleted man:  
evidence for a gastrointestinal or portal monitor of sodium intake. By R. J. LENNANE, R. M. CAREY,  
T. J. GOODWIN and W. S. PEART
- Urinary excretion of 17-oxosteroids in hereditary coproporphria. By J. W. PAXTON, M. R. MOORE,  
A. D. BEATTIE and A. GOLDBERG
- Effects of metiamide on the human stomach. By B. THJODLEIFSSON and K. G. WORMSLEY
- The release of renal prostaglandins during saline infusion in normal and hypertensive subjects. By  
N. PAPANICOLAOU, M. SAFAR, A. HORNYCH, F. FONTALIRAN, Y. WEISS, J. BARIETY and P. MILLIEZ
- The role of baroreceptors and chemoreceptors in the regulation of the cerebral circulation. By I. M.  
JAMES and LINDSAY A. MACDONELL
- Disturbances in glucose metabolism in patients with liver damage due to paracetamol overdose.  
By C. O. RECORD, R. A. CHASE, K. G. M. M. ALBERTI and R. WILLIAMS
- The direct effect of calcium on the hyperparathyroidism of chronic renal failure. By M. KAYE
- Urinary noradrenaline excretion and renal function in normal and hypertensive 50-year-old men.  
By G. BERGLUND, G. TIBBLIN and M. AURELL
- Hepatic glutathione depletion and impaired bromosulphthalein clearance early after paracetamol  
overdose in man and the rat. By M. DAVIS, G. IDEO, N. G. HARRISON and R. WILLIAMS
- SHORT COMMUNICATIONS
- Arterial catecholamines in hypoxic exercise in man. By L. J. CLANCY, J. A. J. H. CRITCHLEY, A. G.  
LEITCH, B. J. KIRBY, A. UNGAR and D. C. FLENLEY
- The effect of indomethacin and prostaglandin (PGE<sub>2</sub>) on renal failure due to glycerol in saline-loaded  
rats. By N. PAPANICOLAOU, P. CALLARD, J. BARIETY and P. MILLIEZ
- Plasma catecholamines and renin activity in response to exercise in patients with essential hypertension.  
By J. CHODAKOWSKA, K. NAZAR, B. WOCIAL, M. JARECKI and B. SKÓRKA
- The effect of reduction in blood volume on plasma renin activity in man. By B. HESSE, I. NIELSEN and  
J. F. HANSEN
- The effect of frusemide on water and electrolyte absorption from the human jejunum. By J. F.  
MACKENZIE, K. M. COCHRAN and R. I. RUSSELL
- A study of intraluminal peptide hydrolase activity in the rat. By D. B. A. SILK and Y. S. KIM

*Subscription: £2.00 (\$7.50) per part; £20.00 (\$70.00) per year.*

*Orders may be placed with your bookseller, or sent direct to the publishers.*

5 ALFRED STREET, OXFORD OX1 4HB, ENGLAND

# 5-Thio-D-glucose: a potent inhibitor of D-glucose

**5-Thio-D-glucose**, the analog of D-glucose in which the ring oxygen atom is replaced by sulfur, was first prepared by Feather and Whistler in 1962.<sup>1</sup> It has been shown to interfere effectively with the utilization of D-glucose. When added to the diet, **5-thio-D-glucose** completely counteracted the nutritional benefits of D-glucose in *Drosophila melanogaster*, thus inhibiting development of the insect from the larval to the pupal stage.<sup>2</sup>

**5-Thio-D-glucose** is reportedly a potent, competitive inhibitor of the cellular transport of D-glucose<sup>3-5</sup> and D-glucose-mediated insulin release.<sup>6</sup> Thus, rats treated intraperitoneally with **5-thio-D-glucose** rapidly developed a pseudodiabetic condition with glycosuria and hyperglycemia.<sup>7</sup> This diabetogenic effect was reversed by the administration of insulin.

The fact that an increase in blood D-glucose caused a decrease in appetite suggests the potential use of **5-thio-D-glucose** for weight control.<sup>8</sup>

The LD<sub>50</sub> of the compound in mice is 14g/kg of body weight, with 90-95% being excreted unchanged within 6 hours.<sup>8</sup>

Preliminary experiments with mice show that **5-thio-D-glucose** prevents D-glucose uptake by testicular cells, thus causing inhibition of spermatogenesis.<sup>8</sup> The compound therefore shows promise as a male contraceptive.

It is also interesting that **5-thio-D-glucose** inhibition of D-glucose in tumor cells of mice indicates that the compound is a potential antitumor agent.<sup>8</sup>
