

# JOHN WILEY & SONS LTD

LONDON · NEW YORK · SYDNEY · TORONTO

## OUTLINES OF BIOCHEMISTRY 4th Ed.

by E. E. Conn and P. K. Stumpf, both of the University of California, Davis.

A basic outline of modern biochemistry, emphasizing the chemistry and metabolism of biochemically important compounds.

Approx. 624 pages In Press Approx. £8.45 (\$16.90).

## THIAMINE

edited by C. J. Gubler, M.D., Brigham University; M. Fugiwara, M.D., Kyoto University, Japan, and P. M. Dreyfus, M.D., University of California, Davis.

Includes the most recent information on keto acids, energy production, and the transport, metabolism, deficiency and nutritional status of thiamine.

406 pages June 1976 £16.75 (\$30.00).

## GLUCONEOGENESIS: Its Regulation in Mammalian Species

edited by R. W. Hanson, Temple University, Medical School, and M. A. Mehلمان, National Institute of Health.

Concentrates on the current state of glucose studies in relation to such human problems as the metabolic regulation of a basic biochemical process which has extensive clinical implications.

Approx. 624 pages In Press Approx. £15.90 (\$31.80).

## DICTIONARY OF BIOCHEMISTRY

by J. Stenesh, Western Michigan University.

Contains approximately 12,000 entries drawn from more than 200 text and reference books and biochemical journals published since 1962.

352 pages February 1976 £13.85 (\$27.70)

## BIOCHEMICAL CALCULATIONS: How to Solve Mathematical Problems in General Biochemistry, 2nd Ed.

by I. H. Segal, University of California, Davis.

With increase scope and new graduation of problems, this edition provides a balanced picture of modern biochemistry by illustrating the use of elementary mathematics in understanding the properties and behaviour of biological molecules.

458 pages March 1976 £4.75 (\$9.50).

## MICROBIAL INTERACTION WITH THE PHYSICAL ENVIRONMENT

edited by D. W. Thayer, Texas Tech. University.

Thirty-one classic papers on the interaction of the micro organism with its physical environment. Includes two original translations and an extensive bibliography. (Benchmark papers in Microbiology).

448 pages January 1976 £15.00 (\$30.00).

Published by Dowden Hutchinson and Ross Inc., and distributed by John Wiley and Sons Ltd.

## MASS SPECTROMETRY OF STEROIDS

by Z. Zaretskii, Weizman Institute of Science, Jerusalem.

The book deals with the applications of mass spectrometry to the solutions of both structural and stereochemical problems of steroid chemistry.

194 pages February 1976 £9.90 (\$19.80).

Published by Israel Universities Press, and distributed by John Wiley and Sons Ltd.

## CATALYSIS BY ELECTRON DONOR ACCEPTOR COMPLEXES: Their General Behaviour and Biological Roles

by K. Tamaru, University of Tokyo, and M. Ichikawa, Sagami Chemical Research Center, Japan.

A review of EDA complexes, including discussions on homogenous and heterogenous catalysis by EDA complexes, and the biological and biochemical significance of EDA complexes that correlate their effects with the physicochemical properties of the complexes and with their pharmaceutical effectiveness.

216 pages March 1976 £11.70 (\$23.40).

Published by Kodansha Scientific Ltd., and distributed by John Wiley and Sons Ltd.

CONTENTS

JUNE 1976

- The renal handling of insulin and thyroid hormones in normal man. By A. FINE, R. M. THOMSON, J. V. JONES, R. G. MURRAY, A. TWEDDLE and C. E. GRAY
- The effect of anaesthesia of the airway in dog and man: a study of respiratory reflexes, sensations and lung mechanics. By BRENDA A. CROSS, A. GUZ, S. K. JAIN, SIETSKIE ARCHER, J. STEVENS and FELICITY REYNOLDS
- The relation between potassium in body fluids and total body potassium in healthy and diabetic subjects. By K. BODDY, R. HUME, C. WHITE, A. PACK, P. C. KING, E. WEYERS, T. ROWAN and E. MILLS
- The encephalopathic action of five-carbon-atom fatty acids in the rabbit. By P. F. TEYCHENNE, I. WALTERS, L. E. CLAVERIA, D. B. CALNE, JANE PRICE, B. B. MACGILLIVRAY and D. GOMPERTZ
- Effect of diphosphonates on adenosine 3':5'-cyclic monophosphate in mouse calvaria after stimulation by parathyroid hormone *in vitro*. By U. GEBAUER, R. G. G. RUSSELL, M. TOUABI and H. FLEISCH
- Some properties of human platelet monoamine oxidase in iron-deficiency anaemia. By M. B. H. YODIM, D. G. GRAHAME-SMITH and H. F. WOODS
- The effect of insulin on adenosine 3':5'-monophosphate and guanosine 3':5'-monophosphate concentrations in human plasma. By K. SIDDLE, C. J. DAVIES, K. J. SHETTY and R. S. ELKELES
- Effect of inhibition of gluconeogenesis on ammonia production in the perfused rat kidney. By B. D. ROSS
- Absorption of galactose by the rat small intestine *in vivo*: proximal-distal kinetic gradients and a new method to express absorption per enterocyte. By R. M. BATT and T. J. PETERS
- Effects of prednisolone on the small intestinal mucosa of the rat. By R. M. BATT and T. J. PETERS
- Studies of amino acid and protein metabolism in normal man with L-[U-<sup>14</sup>C]-tyrosine. By W. P. T. JAMES, P. J. GARLICK, P. M. SENDER and J. C. WATERLOW
- Haemodynamic studies in dogs with chronic bile-duct ligation. By S. M. SHASHA, O. S. BETTER, C. CHAIMOVITZ, J. DOMAN and Y. KISHON
- Release of colony-stimulating activity from the isolated perfused rat liver. By A. HOWELL, W. G. E. COOKSLEY and C. J. DANPURE
- The effect of active immunization against aldosterone on the colonic potential response and sodium excretion in rabbits. By R. J. LENNANE, J. STOCKIGT and W. S. PEART
- SHORT COMMUNICATION**
- Plasma growth hormone concentrations in Huntington's chorea. By O. T. PHILLIPSON and E. D. BIRD

Contents

April 1976

Regulation of enzymes in eucaryotes under the influence of steroid hormones

*21. Konferenz der Gesellschaft für Biologische Chemie*

Interactions of glycosaminoglycans with DNA and RNA synthesizing enzymes in vitro

*D. Schaffrath, H. W. Stuhlsatz and H. Greiling*

Isolation and characterization of seryl- and phenylalanyl-tRNA synthetase from yeast

*R. Hirsch and H. G. Zachau*

Poly(adenosine diphosphate ribose) is covalently linked to nuclear proteins by two types of bonds

*P. Adamietz and H. Hilz*

On the mechanism and some properties of vinyl-acetyl-CoA- $\Delta$ -isomerase of *Clostridium kluyveri*

*E. Schleicher and H. Simon*

Multiple forms of lysyl-tRNA synthetase from *Escherichia coli*

*R. M. Dittgen and R. Leberman*

A kallikrein-specific inhibitor in rat kidney tubules

*R. Geiger and K. Mann*

Demonstration of neuraminidase activity in human blood serum and human milk using a modified, radioactively labelled  $\alpha_1$ -glycoprotein as substrate

*R. Schauer, R. W. Veh, M. Wember and H.-P. Buscher*

Metabolic transformation of colchicine, IV. On the interaction of colchicine and colchicine with sulphhydryl compounds

*E. Schnell, M. Schönharth and G. Siebert*

Uptake of cortisol by isolated rat liver cells—A phenomenon indicative of carrier-mediation and simple diffusion

*M. L. Rao, G. S. Rao, M. Höller, H. Breuer, P. J. Schattenberg and W. D. Stein*

The complete amino acid sequences of both subunits of the sweet protein Monellin

*G. Frank and H. Zuber*

Quantitative determination of taurine and glycine in the picomole range using [ $^{14}$ C]dansyl chloride

*E. Schulze and V. Neuhoff*

## Short Communications

Isolation of a procollagen peptide from amniotic fluid

*H. Nowack, H. Rohde and R. Timpl*

Amino acid sequence of human fibrin. Preliminary note on the order of peptides obtained by cleaving the  $\gamma$ -chain at the methionyl and arginyl bonds

*A. Henschen, F. Lottspeich, T. Sekita and R. Warbinek*

# 3-Isobutyl-1-methylxanthine: a potent phosphodiesterase inhibitor

**3-Isobutyl-1-methylxanthine (IBMX)** is a potent inhibitor of cyclic AMP phosphodiesterase, about ten times as potent as theophylline.<sup>1,2</sup> The inhibitory action of **IBMX** is of great importance in studying and evaluating the role of the phosphodiesterase system in regulating cyclic AMP levels.<sup>1-4</sup> Thus, **IBMX** inhibits the hydrolysis of cyclic AMP to 5'-AMP, resulting in an accumulation of cyclic AMP. **IBMX** also has great significance in the problem of control of insulin release through inhibition of cyclic AMP phosphodiesterase. **IBMX** reportedly stimulates insulin release by pancreatic islets when initiators of release, such as glucose, are present at an appropriate concentration.<sup>2,5,6</sup> The effect of **IBMX** on insulin release in pregnancy has also been studied.<sup>7</sup> **IBMX** also possesses po-

tent lipolytic activity, believed to result from its inhibition of cyclic AMP.<sup>3</sup>
