</table>
Kinetic studies on pantothenase from *Pseudomonas fluorescens*. Effect of pH on substrate and inhibitor binding.
By R. K. Airas

A purification procedure for the soluble cytochrome oxidase and some other respiratory proteins from *Pseudomonas aeruginosa*.
By S. R. Parr, D. Barber, C. Greenwood, B. W. Phillips & J. Melling

Some spectral and steady-state kinetic properties of *Pseudomonas* cytochrome oxidase.
By D. Barber, S. R. Parr & C. Greenwood

Nitrogenases from *Klebsiella pneumoniae* and *Clostridium pasteurianum*. Kinetic investigations of cross-reactions as a probe of the enzyme mechanism.
By B. E. Smith, R. N. F. Thorneley, R. R. Eady & L. E. Mortenson

Subcellular localization of a rat liver enzyme converting thyroxine into tri-iodothyronine and possible involvement of essential thiol groups.
By T. J. Visser, I. van der Does-Tobé, R. Docter & G. Hennemann

**RAPID PAPERS**

**Proteins**

Interaction of pepstatin with pig pepsinogen.
By J. Kay & C. W. Dykes

Instability of rat liver chromatin and other nuclear non-histone proteins in alkaline solution.
By M. Gronow, T. M. Thackrah & F. A. Lewis

Isolation of (copper, zinc)-thioneins from the livers of copper-injected rats.
By I. Bremner & B. W. Young

Radioimmunological identification of tropoelastin.
By P. Christner, M. Dixon, A. Cywinski & J. Rosenbloom

**Carbohydrates**

The formation of a stable complex between dissociated proteoglycan and hyaluronic acid in the absence of a link protein.
By D. A. Swann, S. Powell, J. Broadhurst, E. Sordillo & S. Sotman

**Small Molecules**

The identification of 2,8-dihydroxyadenine, a new component of urinary stones.
By H. A. Simmonds, K. J. Van Acker, J. S. Cameron & W. Snedden

The \(^3\)H-labelling of bilirubin.
By F. E. Hancock, D. W. Hutchinson & A. J. Knell

**Enzymology**

Methods for fitting equations with two or more non-linear parameters.
By I. A. Nimmo & G. L. Atkins

Two methods for fitting a rectangular hyperbola to data from several animals.
By I. A. Nimmo

Some properties of a soluble methane monooxygenase from *Methylococcus capsulatus* strain Bath.
By J. Colby & H. Dalton

Mitochondrial glycerol kinase activity in rat brain.
By J. T. Tildon, J. H. Stevenson, Jr. & P. T. Ozand

Absence of binding of pancreatic and urinary kallikreins to \(\alpha_2\)-macroglobulin.
By E. Vahtera & U. Hamberg
The following papers appeared in the last issue of the Biochemical Journal

Cellular Aspects
Contents of Volume 158, No. 1, 1976

FULL PAPERS

Biosynthesis and Degradation
Species differences in the conjugation of 4-hydroxy-3-methoxyphenylethanol with glucuronic acid and sulphuric acid.
By K. P. Wong 33

Oxidation of cholesterol analogues by mitochondrial preparations of steroid-hormone-producing tissue.

Studies on the response of cholesterol biosynthesis to feeding in rats. Evidence against the existence of diurnal rhythms.
By R. Fears & B. Morgan 53

The metabolism of steroids in the fatty liver induced by orotic acid feeding.
By M. Carrella, I. Björkhem, J.-Å. Gustafsson, K. Einarsson & K. Hellström 89

Bioenergetics
The properties of the primary electron acceptor in the photosystem I reaction centre of spinach chloroplasts and its interaction with P700 and the bound ferrodoxin in various oxidation-reduction states.
By M. C. W. Evans, C. K. Sihra & R. Cammack 71

Subcellular Structures
Studies on amino acid-incorporating activity of native rat liver rough membrane and that reconstituted in vitro.

Differences between newly formed and recycled free small ribosome subunits in liver cytoplasm.
By R. H. Hinton & B. M. Mullock 97

The metabolism and binding of catecholamines by the hepatic microsomal mixed-function oxidase of the rat.
By D. McKillop & G. Powis 135

Cellular Interactions and Control Processes
Regulation of phosphoenolpyruvate carboxykinase (GTP) in adipose tissue in vivo by glucocorticoids and insulin.
By O. Meyuhas, L. Reshef, J. M. Gunn, R. W. Hanson & F. J. Ballard 1

The effect of insulin and glucocorticoids on the synthesis and degradation of phosphoenolpyruvate carboxylase (GTP) in rat adipose tissue cultured in vitro.
By O. Meyuhas, L. Reshef, F. J. Ballard & R. W. Hanson 9

Haemolysis induced by tyrosine crystals. Modifiers and inhibitors.
By L. A. Goldsmith 17

Characterization of the binding of human growth hormone to microsomal membranes from rat liver.
By A. C. Herington, N. Veith & H. G. Burger 61

Animal liver tryptophan pyrrolases. Absence of apoenzyme and of hormonal induction mechanism from species sensitive to tryptophan toxicity.
By A. A.-B. Badawy & M. Evans 79

The effect of cobalt on the uptake of plasma iron by the liver.
By V. J. Cunningham, F. De Matteis & M. D. Stonard 105

Induction of benzo[a]pyrene mono-oxygenase in liver cell culture by the photochemical generation of active oxygen species. Evidence for the involvement of singlet oxygen and the formation of a stable inducing intermediate.
By A. J. Paine 109

Basal and thyroliberin-stimulated prolactin synthesis in single-cell cultures and in populations of rat pituitary cells.
By K. M. Gautvik & S. Fossum 119

Anti-ketogenic effect of glucose in the lactating cow deprived of food.
By R. J. Treacher, G. D. Baird & J. L. Young 127

Effects of calcium ions and the bivalent cation ionophore A23187 on the agglutination and fusion of chicken erythrocytes by Sendai virus.
By C. A. Hart, D. Fisher, T. Hallinan & J. A. Lucy 141

Metabolism in Whole Organisms
The metabolic fate of intravenously injected peptide-bound chondroitin sulphate in the rat.

(continued overleaf)
Biosynthesis and Degradation

Serum glycoprotein synthesis after partial hepatectomy in the rat.
By F. Serafini-Cessi

Non-human primate platelets and arterial tissue cannot convert preformed \([^{14}C]\)lanosterol into \([^{14}C]\)cholesterol in vivo.
By A. Derksen, M. M. Meguid & P. Cohen

Bioenergetics

The interaction of reduced nicotinamide–adenine dinucleotide phosphate with reduced nicotinamide–adenine dinucleotide–ubiquinone reductase from bovine heart mitochondria.
By C. I. Ragan
