SYMPOSIA No. 41

BIOCHEMICAL ADAPTATION TO ENVIRONMENTAL CHANGE

Edited by **R. M. S. Smellie** and **J. F. Pennock**

240 pp. (ISBN 0 904498 01 8) £10.00 (U.S. \$20.00)

As biochemists have become more interested in the pathways of metabolism and mechanisms of control in a wider range of living systems, it has become apparent that, although there are many features in common to organisms inhabiting different environments, a variety of adaptations or refinements has been necessary so as to enable particular species to perform efficiently under the widely differing and often rapidly changing conditions to which they are exposed. Some of the more fully documented examples of these adaptations, including modifications in enzyme structure, function and activity, alteration in membrane lipids and performance and the substitution of one class of carrier molecule by another, are discussed in this volume.

List of contents and authors:

Chairman's Introduction by **C. J. Duncan**.

Design of Metabolic and Enzymic Machinery to Fit Lifestyle and Environment by **P. W. Hochachka**.

Temperature: A 'Shaping Force' in Protein Evolution by **G. N. Somero** and **P. S. Low**.

Temperature Adaptation in Fish by **M. W. Smith**.

Substrate Cycles in Metabolic Regulation and in Heat Generation by **E. A. Newsholme** and **B. Crabtree**.

Biochemical Adaptations for Flight in the Insect by **B. Sacktor**.

Facultative Anaerobiosis in Molluscs by **A. de Zwaan**, **J. H. F. M. Kluytmans** and **D. I. Zandee**.

Metabolic Consequences of Submersion Asphyxia in Mammals and Birds by **A. S. Blix**.

Adaptations with Respect to Salinity by **E. Schoffeniels**.

Adaptations of Enzymes for Regulation of Catalytic Function by **D. E. Atkinson**.

VOLUME 2

ESSAYS IN MEDICAL BIOCHEMISTRY

Edited by V. MARKS and C. N. HALES

187 pp. £4.00 (US \$8.00) by surface mail to overseas addresses

Volume 2 of *Essays in Medical Biochemistry* continues the practice established in the first of providing, in readable form, highly authoritative but personal reviews of topics that are of general interest to medical biochemists. The subjects chosen for review are those that have undergone growth as a result of major conceptual and technological advances, and include essays by acknowledged world experts on complement, trace metals, acquired disorders of haem synthesis and chronobiochemistry.

List of Contents and Authors:

The Human Complement System: Biochemistry, Biology and Pathobiology

By D. T. Fearon and K. F. Austen

The Clinical Value of Trace-Metal Measurements

By H. T. Delves

Acquired Disorders of Haem Synthesis

By G. H. Elder

A New Perspective: Chronobiochemistry

By H. W. Simpson

Still Available:

ESSAYS IN MEDICAL BIOCHEMISTRY VOLUME 1

131 pp. £2.00 (US \$5.00)

BUYING ENZYMES? —the natural choice

The 'Enzyme People' are your natural choice
for guaranteed top-quality stable enzymes of high activity.
The following example of Creatine Kinase Cat. No. 126969 shows how
much more you get by choosing Boehringer Mannheim Enzymes.

**from results of recent quality control analyses*

*Remember . . . when your buying enzymes . . .Boehringer Mannheim
for quality and value.*

For further details please contact:
The Boehringer Corporation (London) Ltd.,
Bell Lane, Lewes, East Sussex BN7 1LG.
Telephone: Lewes (07916) 71611

If in the Republic of Ireland please contact our Dublin Office at:
Valentine House, Temple Road, Blackrock, Co. Dublin. Tel: Dublin 882613/882726
