PROGRESS IN DRUG METABOLISM Vol. II

edited by J. W. Bridges, Department of Biochemistry, University of Surrey, Guildford, and L. F. Chasseaud, Department of Metabolism and Pharmacokinetics, Huntingdon Research Centre, Huntingdon.

"PROGRESS IN DRUG METABOLISM" is a review series intended to provide comprehensive, authoritative, readable, up-to-date and critical accounts by experts on the biological fate of a drug or xenobiotic in terms of absorption, distribution, transformation and excretion. The reviews are concerned with newer developments or progress in established areas or they may retrieve and review the widely disseminated literature on a particular subject with the aim of keeping the reader more easily informed on the many and varied developments in drug metabolism studies.

0471 99442 1 approx. 368 pages In Press approx. £14.00/\$30.00

ADVANCES IN MASS SPECTROMETRY IN BIOCHEMISTRY AND MEDICINE Vol. 2

edited by A. Frigerio, Mario Negri Institute, Italy.

This volume presents the proceedings of the 3rd International Symposium of Mass Spectrometry in Biochemistry and Medicine held at the Mario Negri Institute for Pharmacological Research in June 1974.

0470 99039 2 632 pages April 1977 £35.00/\$60.00

Published by Spectrum Publications Inc., and distributed by John Wiley & Sons Ltd.

THE TOOLS OF BIOCHEMISTRY

by T. G. Cooper, University of Pittsburgh.

Deals with ten basic techniques in contemporary biochemical and molecular biological studies. Examines the theoretical aspect of each technique and provides a section for its use in a carefully controlled experiment. Experiments, written in a computer program format, conclude with the data that should be obtained if experiments are performed properly.

0471 17116 6 approx. 448 pages In Press approx. £12.40/\$21.25

BIOCHEMICAL METHODS IN CELL CULTURE AND VIROLOGY

by R. J. Kuchler, Rutgers University.

Presents the latest methods, including underlying theory, of biochemical research procedures in cell culture and virology laboratories. Encompasses methods for growing, handling, and studying animal cells and viruses and discusses the theory and background for the development of each procedure.

0470 99043 0 approx. 352 pages In Press approx. £21.00/\$35.60

Published by Dowden, Hutchinson & Ross Inc., and distributed by John Wiley & Sons Ltd.

VENOMS: Chemistry and Molecular Biology

by A. T. Tu, Colorado State University.

Analyzes the venom actions of snakes, scorpions, spiders, bees, wasps, hornets, ants, and Gila monsters to better understand their chemistry and pharmacology. Describes the enzyme and protein content of venoms, giving extensive treatment to the molecular basis of venom actions. Discusses the effects of snake venoms on cell membranes and blood coagulation as well as snake neurotoxins and nerve growth factors.

0471 89229 7 approx. 688 pages In Press approx. £20.60/\$34.90

MEMBRANOUS ELEMENTS AND MOVEMENT OF MOLECULES

edited by E. Reid, Director, Wolfson Bioanalytical Centre, University of Surrey.

Deals with the investigation of the movement of molecules, unified by the theme of isolating membranous elements from muscle, brain and various other tissues. It discusses sarco-reticular ATPase and the "calcium pump". The diverse types of molecule, which are considered from the viewpoint of cellular processing and of dispatch to their destination, include membrane precursors, "export" proteins, hormones, and drugs. Topics related to this "growth area" in cell biochemistry include study of where enzymes are located in membranes, isolation of hormone storage organelles, and new centrifugal approaches making a first appearance in print. (Series: Methodological Surveys in Biochemistry Vol. 6).

NOW IT'S SO EASY TO MEASURE CYCLIC GMP

Now you can measure cyclic GMP simply and accurately with our new RIA kit.

The kit is based on a highly specific and stable antibody. This, combined with the high specific activity of the tritium label, makes the assay extremely sensitive—with a detection limit 0.04 pmol. In addition it can be used over a wide range of cyclic GMP levels, with a linear calibration curve in the range 0 to 8 pmol.

Add to this simple pipetting steps and a short incubation time of 1½ hours, and you can see why our new cyclic GMP kit will join our well-established cyclic AMP kit as an invaluable aid to your research.

ESSAYS IN MEDICAL BIOCHEMISTRY

Edited by V. MARKS and C. N. HALES

187 pp. £4.00 (US \$8.00) by surface mail to overseas addresses

Volume 2 of *Essays in Medical Biochemistry* continues the practice established in the first of providing, in readable form, highly authoritative but personal reviews of topics that are of general interest to medical biochemists. The subjects chosen for review are those that have undergone growth as a result of major conceptual and technological advances, and include essays by acknowledged world experts on complement, trace metals, acquired disorders of haem synthesis and chronobiochemistry.

List of Contents and Authors:

The Human Complement System: Biochemistry, Biology and Pathobiology

By D. T. Fearon and K. F. Austen

The Clinical Value of Trace-Metal Measurements

By H. T. Delves

Acquired Disorders of Haem Synthesis

By G. H. Elder

A New Perspective: Chronobiochemistry

By H. W. Simpson

Still Available:

SYMPOSIA No. 41

BIOCHEMICAL ADAPTATION TO ENVIRONMENTAL CHANGE

Edited by **R. M. S. Smellie** and **J. F. Pennock**

240 pp. (ISBN 0 904498 01 8) £10.00 (U.S. \$20.00)

As biochemists have become more interested in the pathways of metabolism and mechanisms of control in a wider range of living systems, it has become apparent that, although there are many features in common to organisms inhabiting different environments, a variety of adaptations or refinements has been necessary so as to enable particular species to perform efficiently under the widely differing and often rapidly changing conditions to which they are exposed. Some of the more fully documented examples of these adaptations, including modifications in enzyme structure, function and activity, alteration in membrane lipids and performance and the substitution of one class of carrier molecule by another, are discussed in this volume.

List of contents and authors:

Chairman's Introduction by **C. J. Duncan.**

Design of Metabolic and Enzymic Machinery to Fit Lifestyle and Environment by **P. W. Hochachka.**

Temperature: A 'Shaping Force' in Protein Evolution by **G. N. Somero** and **P. S. Low.**

Temperature Adaptation in Fish by **M. W. Smith.**

Substrate Cycles in Metabolic Regulation and in Heat Generation by **E. A. Newsholme** and **B. Crabtree.**

Biochemical Adaptations for Flight in the Insect by **B. Sacktor.**

Facultative Anaerobiosis in Molluscs by **A. de Zwaan, J. H. F. M. Kluytmans** and **D. I. Zandee.**

Metabolic Consequences of Submersion Asphyxia in Mammals and Birds by **A. S. Blix.**

Adaptations with Respect to Salinity by **E. Schoffeniels.**

Adaptations of Enzymes for Regulation of Catalytic Function by **D. E. Atkinson.**

VOL. 52, No. 6

JUNE 1977

CONTENTS

- Editorial Review: The chemical control of the cerebral circulation. By I. R. CAMERON
- Studies on the kinetics of unconjugated [¹⁴C]bilirubin metabolism in normal subjects and patients with compensated cirrhosis. By D. OWENS, E. A. JONES and E. R. CARSON
- The effect of dietary sodium intake on the blood pressure and cardiac output responses to angiotensin II in unanaesthetized rats. By BARBARA L. SLACK and J. M. LEDINGHAM
- Plasma calcitonin in chronic renal failure: relation to other factors of importance in bivalent ion metabolism. By R. SHAIKIN-KESTENBAUM, R. LERMAN, A. REUBEN and G. M. BERLYNE
- Enzyme activities of cells of different types isolated from livers of normal and cholestatic rats. By A. M. WOOTTON, G. NEALE and D. W. MOSS
- Plasma renin levels and systemic haemodynamics in essential hypertension. By R. FAGARD, A. AMERY, T. REYBROUCK, P. LIJNEN, L. BILLIET and J. V. JOOSSENS
- Mitochondrial functions and content of microsomal and mitochondrial cytochromes in human cirrhosis. By J. DÍAZ GIL, I. ROSSI, P. ESCARTÍN, J. M. SEGOVIA and M. GOSÁLVEZ
- Intestinal absorption of glycine and glycyl-L-proline in the rat. By R. C. HEADING, H. P. SCHEDL, L. D. STEGINK and D. L. MILLER
- Prostaglandin activity in sustained inflammation of human skin before and after aspirin. By N. A. PLUMMER, C. N. HENSBY, A. KOBZA BLACK and M. W. GREAVES
- Effect of warfarin on the metabolism of phylloquinone (vitamin K₁): dose-response relationships in man. By M. J. SHEARER, A. MCBURNEY, A. M. BRECKENRIDGE and P. BARKHAN

SHORT COMMUNICATION

- The effect of chronic frusemide administration on intracellular potassium, sodium and pH of cardiac and skeletal muscle. By R. J. C. HALL and I. R. CAMERON

CORRESPONDENCE SECTION

- A competitive protein-binding assay for 25-hydroxy vitamin D. By G. N. HENDY, E. DOLEV, J. M. PETTIFOR, F. P. ROSS and J. WANG

The subscription price is £35.00 (U.K.) £35.00 (Overseas) \$120.00 (North America) per annum, post free.
