OFFICERS AND COMMITTEE, 1977–78

Chairman of the Committee
R. R. Porter, F.R.S.

Committee
G. B. Ansell
J. R. Bronk

Treasurer
D. F. Elliott
K. Burton, F.R.S.
N. G. Carr
P. H. Clarke, F.R.S.

General Secretary
J. B. Lloyd
J. T. Dingle*
P. F. Fottrell
C. Green

Publications Secretary
R. M. C. Dawson
J. N. Hawthorne
H. K. King

Meetings Secretary
H. F. Bradford
R. J. B. King
J. C. Metcalfe

J. W. Porteous, F.R.S.E.
B. E. Ryman

*Ex officio Member of Committee;
Representative of Editorial Board
of the Biochemical Journal.

Executive Secretary
A. I. P. Henton (7 Warwick Court, London WC1R 5DP)

The Biochemical Society exists to advance the
science of biochemistry through meetings and pub-
llications. Several meetings a year are held, each at
a different place; original papers are presented
and special topics are discussed at symposia and
colloquia.

Persons interested in biochemistry are eligible for
election as Members. Details of further facilities
accorded to Members, and forms of application for
membership, are available from the Executive
Secretary, The Biochemical Society, 7 Warwick
Court, London WC1R 5DP [01-242 1076 (4 lines)].
NOTICE FOR CONTRIBUTORS

The *Biochemical Journal* places emphasis on the prompt publication of both full-length papers (on average about 6 months after receipt) and rapid papers (on average 10–12 weeks after receipt).

For detailed instructions on the preparation of papers contributors (who need not be members of the Biochemical Society) should refer to *Policy of the Journal and Instructions to Authors* [*Biochem. J.* (1976) 153, 1–21] and amendments [*Biochem. J.* (1977) 161, 1–2] (obtainable free on request, in booklet form, from the Executive Secretary, Biochemical Society, 7 Warwick Court, London WC1R 5DP).

Papers submitted for publication should be addressed to the Editorial Secretary, Biochemical Journal, 7 Warwick Court, London WC1R 5DP.

Contributors should note that the *Biochemical Journal* makes no manuscript handling charges, no page charges and no charges for plates. Reprints are available at modest cost at about the same time as publication, and, if an author is a member of the Biochemical Society, 50 reprints are provided free of charge.
NOTICE FOR SUBSCRIBERS

The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, alternate issues being devoted to Molecular Aspects and to Cellular Aspects of biochemistry. It is planned that in 1977 eight volumes, each volume being made up of three issues, will be published according to the following schedule:

<table>
<thead>
<tr>
<th>Molecular Aspects</th>
<th>Cellular Aspects</th>
</tr>
</thead>
<tbody>
<tr>
<td>1977</td>
<td>1977</td>
</tr>
<tr>
<td>1 Jan. 161 1</td>
<td>15 Jan. 162 1</td>

</tbody>
</table>

* Completes volume, and includes Indexes.

Biochemical Society Transactions. This is now a separate publication (see below). Volume 5 will be published in 1977, in six parts.

Subscription Rates to the Biochemical Journal. For non-members of the Biochemical Society the subscription rates for 1977 are as follows.

Zone A: U.S.A., Canada and Mexico, U.S. $320.00 (despatch by air freight) or sterling equivalent.

Zone B: Japan, £154.00 (despatch by accelerated surface post).

Zone C: U.K. and all remaining destinations, £140.00 (despatch by surface post).

Subscribers to the Biochemical Journal can subscribe to Biochemical Society Transactions on a joint subscription, saving £10.00 (U.S. $25.00). The joint subscription rates are: Zone A, U.S. $355.00; Zone B, £175.00; Zone C, £158.00. The methods of despatch of both publications are as shown above.

Terms are cash with order or against proforma invoice. Orders and subscriptions should be sent to the Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex, or through your normal agent.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address given in the preceding paragraph. Claims cannot be entertained if they are received later than three months after the date of posting, plus such time as would be expected for transit by post.

Back Numbers. Enquiries for volumes 1–19 of the Journal should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts of the Journal, and also of Transactions, may be obtained on application to the Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex.

Microforms. The following versions are available.

(b) Microfiche (98-image): Volumes 102–160.

Details and prices are available on request from the Biochemical Society's Colchester office.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

Index of Subjects

Acetyl-coenzyme A, effects of coenzyme A and, and their analogues on the activity of rat brain choline acetyl-
transferase (Rossier, J.) 321–326

β-D-N-Acetlyhexosaminidases A and B, kidney-cortex, hu-
man, purification and properties of (Wiktowicz, J. E., Awasthi, Y. C., Kurosky, A. & Srivastava, S. K.) 49–53

Acid β-D-galactosidase, see β-D-Galactosidase, acid

Actin, modification of the kinetic parameters of fructose bisphosphate aldolase on binding to ox skeletal-muscle filaments containing (Walsh, T. P., Clarke, F. M. & Masters, C. J.) 165–167

Adenosine, binding of, by ox adrenal-gland-cortex adenosine 3':5'-cyclic monophosphate-binding proteins (Dekseland, S. O. & Ueland, P. M.) 561–573

Adenosine 3':5'-cyclic monophosphate-binding proteins, ad-
renal-gland-cortex, ox, characterization of (Deks-land, S. O. & Ueland, P. M.) 561–573

Adenosine 3':5'-cyclic monophosphate, isolation and characteriza-
tion of, from Kalanchee daigremontiana and Agave americana (Ashton, A. R. & Polya, G. M.) 27–32

Adenosine diphosphate, effects of the complexes of mag-
nesium ions with adenosine triphosphate and, on the kinetics of the reaction catalysed by Klebsiella pneu-
omiae nitrogenase (Thorneley, R. N. F. & Cornish-Bowden, A.) 255–262

Adenosine diphosphate sulphurylase, see Sulphate adenylyltransferase (adenosine diphosphate)

Adenosine triphosphatase, magnesium-and-calcium ion-

Adenosine triphosphate, effects of alanine, fructose 1,6-
bisphosphate and, on the activity of crab hepatopan-
creas pyruvate kinase (Giles, I. G., Poat, P. C. & Munday, K. A.) 97–105

Adenosine triphosphate, effects of substrates and effectors on the reversible inactivation by, of pig spleen phospho-
fructokinase (Weidemann, M. J., Kolbuch-Braddon, M. E. & Hickman, P. E.) 525–537

Adenosine triphosphate, effects of the complexes of mag-
nesium ions with adenosine diphosphate and, on the kinetics of the reaction catalysed by Klebsiella pneu-
omiae nitrogenase (Thorneley, R. N. F. & Cornish-Bowden, A.) 255–262

Adrenal-gland cortex, ox, characterization of adenosine 3':5'-cyclic monophosphate-binding proteins of (Dekseland, S. O. & Ueland, P. M.) 561–573

Adrenocorticotropin, see Corticotropin

Agave americana, isolation and characterization of adenosine 3':5'-cyclic monophosphate from Kalanchee daigremontiana and (Ashton, A. R. & Polya, G. M.) 27–32

Alanine, effects of adenosine triphosphate, fructose 1,6-
bisphosphate and, on the activity of crab hepatopan-
creas pyruvate kinase (Giles, I. G., Poat, P. C. & Munday, K. A.) 97–105

Aldolase, see Fructose bisphosphate aldolase

n-Alkanes, ability of Methyloccus capsulatus methane mono-oxygenase to catalyse the oxygenation of, and a range of n-alkenes, ethers and alicyclic, aromatic and heterocyclic compounds (Colby, J., Stirling, D. I. & Dalton, H.) 395–402

n-Alkanes, ability of Methyloccus capsulatus methane mono-oxygenase to catalyse the oxygenation of, and a range of n-alkenes, ethers and alicyclic, aromatic and heterocyclic compounds (Colby, J., Stirling, D. I. & Dalton, H.) 395–402

Amino acid sequence, variability of, of the N-terminal extra piece of precursors of immunoglobulin λ-type light chains produced by mouse plasma-cell tumour MOPC 104E, RPC 20 and MOPC 315 cells (Burstein, B. & Schechter, J.) 347–354

Amino acid sequences, N-terminal, determination of, of the α-, β- and γ-chains of component C4 of human complement (Gigli, I., von Zabern, I. & Porter, R. R.) 439–446

Aminopeptidase, small-intestinal, human, apparent molecular weights of, and enterokinase and maltase in duodenal fluid (Magee, A. I., Grant, D. A. W. & Hermon-Taylor, J.) 583–585

Angiotensin II, [5-isoleucine]-, effect of lipophilic char-

Artemisia salina, see Brine shrimp

Arylsulphatases A and B, kidney-cortex, rabbit, puri-

Aspartylglucosaminidase, liver, human, purification and properties of (Dugal, B. & Strømme, J.) 497–502

Aspergillus niger, purification and properties of a cellu-
lase from (Hurst, P. L., Nielsen, J., Sullivan, P. A. & Shepherd, M. G.) 33–41

Bacillus caldolyticus, purification and properties of his
tidinol dehydrogenases from, and other Bacillus spp. (Lindsay, J. A. & Creaser, E. H.) 247–253

Bacillus cereus, evidence for the formation of an imine between enzyme and substrate during the reaction catalysed by phosphonoacetalddehyde hydratase from (La Nauze, J. M., Coggins, J. R. & Dixon, H. B. F.) 409–411

Bacillus cereus, study of the conformational motility of β-lactamase I from, by measurement of the exchange of hydrogen atoms with substrates (Kiener, P. A. & Waley, S. G.) 279–285

Bacillus psychrophilus, purification and properties of his
tidinol dehydrogenases from, and other Bacillus spp. (Lindsay, J. A. & Creaser, E. H.) 247–253
Bacillus stearothermophilus, kinetic model for the reaction catalysed by manganese-containing superoxide dismutase from (McAdam, M. E., Fox, R. A., Lavelle, F. & Fielden, E. M.) 71–79

Bacillus stearothermophilus, properties of manganese-containing superoxide dismutase from (McAdam, M. E., Lavelle, F., Fox, R. A. & Fielden, E. M.) 81–87

Bacillus stearothermophilus, purification and properties of histidinol dehydrogenases from, and other Bacillus spp. (Lindsay, J. A. & Creaser, E. H.) 247–253

Bacillus subtilis, purification and properties of histidinol dehydrogenases from, and other Bacillus spp. (Lindsay, J. A. & Creaser, E. H.) 247–253

Benzonitrile, purification and properties of Nocardia sp. N.C.I.B. 11216 nitratele that catalyses cleavage of the carbon–nitrogen bond of, and other aromatic nitriles (Harper, D. B.) 309–319

Bile acid-binding proteins, cytosol, liver, rat, two, partial purification of (Strange, R. C., Cramb, R., Hayes, J. D. & Percy-Robb, I. W.) 425–429

Brain, human, purification and properties of the protein component of thromboplastin from (Bjerkid, E. & Storm, E.) 89–96

Brain, ox, use of extraction with non-aqueous chloroform/methanol for the delipidation of, with minimal loss of enzyme activities (Kurihara, T., Nishizawa, Y. & Takahashi, Y.) 135–140

Brain, rat, effects of acetyl-coenzyme A and coenzyme A and their analogues on the activity of choline acetyltransferase from (Rossier, J.) 321–326

Brine shrimp (Artemia salina), characterization of the extracellular haemoglobin of (Moens, L. & Kondo, M.) 111–119

Calcium ions, fluorimetric study of the role of, in the stability of thermolysin (Fontana, A., Vita, C., Boccul', E. & Veronese, F. M.) 539–545

Carbohydrate, covalent linkage of protein to, in Porphyridium cruentum extracellular proteoglycan (Heaney-Kieras, J., Rodén, L. & Chapman, D. J.) 1–9

Carcinus maenas, see Crab

Casein kinase, ribosomal, reticulocyte, rabbit, purification and properties of (Issinger, O.-G.) 511–518

Cations, inorganic, effects of amphiphilic cationic drugs and, on the activity of rat liver phosphatidate phosphaetase (Bowley, M., Cooling, J., Burditt, S. L. & Brandley, D. N.) 447–454

Cells, myeloma, X5563, mouse, estimation of reiteration of genes in, from kinetics of hybridization of deoxyribonucleic acid and ribonucleic acid in the presence of a moderate excess of deoxyribonucleic acid (Muto, M.) 19–25

Cellulase, Aspergillus niger, purification and properties of (Hurst, P. L., Nielsen, J., Sullivan, P. A. & Shepherd, M. G.) 33–41

Choline acetyltransferase, brain, rat, effects of acetyl-coenzyme A and coenzyme A and their analogues on the activity of (Rossier, J.) 321–326

Chondroitin sulphates, specificity of Flavobacterium heparinum glycuronidases acting on disaccharides derived from, and other glycosaminoglycans (Hovingh, P. & Linker, A.) 287–293

Chromatina, liver, rat, characterization of the nucleotide sequences of double-stranded segments of ribonucleic acid present in the initial transcription products of (Pays, E.) 237–245

Chromolysin (Fontana, A., Vita, 539–545)

Chromium ions, reduction by, of mammalian cytochrome c oxidase and some of its derivatives (Greenwood, C., Brittain, T., Brunori, M. & Wilson, M. T.) 413–416

Clotting Factor III (thromboplastin), brain, human, purification and properties of (Bjerkid, E. & Storm, E.) 89–96

Coagulation Factor, see Clotting Factor

Comamonas terrigena, inversion of configuration and carbon–oxygen bond cleavage catalysed by secondary alkylysulphatases from Pseudomonas C12B and (Bartholomew, B., Dodgson, K. S., Matcham, G. W. J., Shaw, D. J. & White, G. F.) 575–580

Complement, human, isolation and structure of component C4 of (Giili, I., von Zabern, I. & Porter, R. R.) 439–446

Component C4, complement, human, isolation and structure of (Giili, I., von Zabern, I. & Porter, R. R.) 439–446

Computer program, use of, in an automatic method for the derivation of steady-state rate equations for reactions catalysed by enzymes (Cornish-Bowden, A.) 55–59

Copper ions, mechanism of the oxidation by, of the haem groups of human haemoglobin and suggested role of the thiol group of cysteine residue β-93 (Winterbourn, C. C. & Carrell, R. W.) 141–148

Corticotropin, anterior-pituitary-gland, ostrich, isolation and characterization of (Naudé, R. J. & Oelofsen, W.) 519–523

Corticotropin, human, tritium-labelled, synthesis of, of high specific radioactivity (Brandish, D. E. & Wade, R.) 169–171

Crab (Carcinus maenas), interactions of allosteric modifiers with hepatopancreas pyruvate kinase from (Giles, I. G., Poat, P. C. & Munday, K. A.) 97–105

Cyclic adenosine 3′:5′-monophosphate, see Adenosine 3′:5′-cyclic monophosphate

Cyclic nucleotide 3′-phosphodiesterase, see Cyclic adenosine 3′:5′-cyclic monophosphate

Cysteine residue β-93, haemoglobin, human, suggested role of the thiol group of, in the oxidation by copper ions of the haem groups of the protein (Winterbourn, C. C. & Carrell, R. W.) 141–148

1977
**Flavobacterium heparinum**, specificity of glycuronidases from, acting on disaccharides derived from glycosaminoglycans (Hovingh, P. & Linker, A.) 287–293

Fructose bisphosphate aldolase, skeletal-muscle, ox, modification of the kinetic parameters of, on binding to the actin-containing filaments of skeletal muscle (Walsh, T. P., Clarke, F. M. & Masters, C. J.) 165–167

Fructose 1,6-bisphosphate, effects of alanine, adenosine triphosphate and, on the activity of crab hepatopancreas pyruvate kinase (Giles, I. G., Poat, P. C. & Munday, K. A.) 97–105

Fructose 6-phosphate, effects of, and other substrates and effectors on the inactivation by adenosine triphosphate of pig spleen phosphofructokinase (Weidemann, M. J., Kolbuc-Braddon, M. E. & Hickman, P. E.) 525–537

β-Galactosidase, restoration of, to *Escherichia coli* mutant M15 by complementation (Marinkovic, D. V. & Marinkovic, J. N.) 417–423

Genes, estimation of reiteration of, in mouse X5563 myeloma cells, from kinetics of the hybridization of deoxyribonucleic acid and ribonucleic acid in the presence of a moderate excess of deoxyribonucleic acid (Muto, M.) 19–25

Glucokinase, liver, rat, kinetic evidence for a ‘mnemonical’ mechanism for the reaction catalysed by (Storer, A. C. & Cornish-Bowden, A.) 61–69

Glucuronidation, use of 2,6-dichloro-4-nitrophenol as selective inhibitor of sulphation by phenol sulphotransferase but not of, by uridine diphosphate glucuronosyltransferase of rat liver in vivo and in vitro (Mulder, G. J. & Scholtens, E.) 553–559

Glutamine residue, N-terminal, identification of, before its conversion into 5-oxopyrrolidine-2-carboxylic acid residue in precursors of immunoglobulin J-type light chains produced by mouse plasma-cell tumour MOPC 104E, RPC 20 and MOPC 315 cells (Burstein, Y. & Schechter, I) 347–354

Glutathione, reduced, effect of, on the properties of pig erythrocyte glyoxalase I (Aronsson, A.-C. & Mannervik, B.) 503–509

Glutathione S-transferase, activity of, exhibited by two partially purified rat liver cytosol lipoxygenase-binding proteins (Strange, R. C., Cramb, R., Hayes, J. D. & Percy-Robb, I. W.) 425–429

Glycoprotein, carbohydrate-deficient, characterization of, of the membrane of human erythrocytes of phenotype S—s— (Tanner, M. J. A., Anstee, D. J. & Judson, P. A.) 157–161

Glycosaminoglycans, specificity of *Flavobacterium heparinum* glycuronidases on disaccharides derived from (Hovingh, P. & Linker, A.) 287–293

Glycuronidases, *Flavobacterium heparinum*, specificity of, acting on disaccharides derived from glycosaminoglycans (Hovingh, P. & Linker, A.) 287–293

Glyoxalase I, erythrocyte, pig, purification and properties of (Aronsson, A.-C. & Mannervik, B.) 503–509

Haem groups, haemoglobin, human, mechanism of the oxidation by copper ions of, and suggested role of the thiol group of cysteine residue β-93 (Winterbourn, C. C. & Carrell, R. W.) 141–148

Haemoglobin, human, mechanism of the oxidation by copper ions of the haem groups of, and suggested role of the thiol group of cysteine residue β-93 (Winterbourn, C. C. & Carrell, R. W.) 141–148

Haemoglobin, extracellular, brine shrimp, characterization of (Moens, L. & Kondo, M.) 111–119

Heart, ox, effects of chymotryptic digestion on the structure and catalytic properties of mitochondrial reduced nicotinamide-adenine dinucleotide-ubiquinone oxidoreductase from (Crowder, S. E. & Ragan, C. I.) 295–301

Heart, ox, variable-temperature magnetic-circular-dichroism spectra of cytochrome c oxidase from, and its derivatives (Thomson, A. J., Brittain, T., Greenwood, C. & Springall, J. P.) 327–336

*Helix pomatia*, see Snail, Roman

Heparan sulphate, specificity of *Flavobacterium heparinum* glycuronidases acting on disaccharides derived from, and other glycosaminoglycans (Hovingh, P. & Linker, A.) 287–293

Heparin, specificity of *Flavobacterium heparinum* glycuronidases acting on disaccharides derived from, and other glycosaminoglycans (Hovingh, P. & Linker, A.) 287–293

Hepatopancreas, crab, interactions of allosteric modifiers with pyruvate kinase from (Giles, I. G., Poat, P. C. & Munday, K. A.) 97–105

Hexosaminidase, see β-D-N-Acetylhexosaminidase

Histidine residue, active-site, evidence for, in *Myco- bacterium smegmatis* 1-lactate oxidase obtained by modification of the enzyme with diethyl pyrocarbonate (Choong, Y. S., Shepherd, M. G. & Sullivan, P. A.) 385–393

Histidinol dehydrogenases, purification and properties of, from psychrophilic, mesophilic and thermophilic *Bacillus* spp. (Lindsay, J. A. & Creaser, E. H.) 247–253

Hydrogen isotope (1H), synthesis of human corticotropin labelled with, to high specific radioactivity (Brundish, D. E. & Wade, R.) 169–171
Imine, evidence for the formation of, between enzyme and substrate during the reaction catalysed by *Bacillus cereus* phosphonoacetalddehyde hydrase (La Nauze, J. M., Coggins, J. R. & Dixon, H. B. F.) 409–411

Immunoglobulin G, human fragments produced by peptic digestion of, of different subclasses in the presence of urea (Parr, D. M.) 303–308

Immunoglobulins, identification of N-terminal glutamine residue before its conversion into 5-oxopyrrolidine-2-carboxylic acid residue in precursors of A-type light chains of, produced by mouse plasma-cell tumour MOPC 104E, RPC 20 and MOPC 315 cells (Burstein, Y. & Schechter, I.) 347–354

Insulin, use of N-substituted derivatives of methionine as acid-stable protecting groups during the semi-synthesis of analogues of (Saunders, D. J. & Offord, R.) 479–486

Intestine, small, human, apparent molecular weights of aminopeptidase, enterokinase and maltase of, in duodenal fluid (Magee, A. I., Grant, D. A. W., & Hermon-Taylor, J.) 583–585

Intestine, small, rat, properties of somatostatin-binding protein from the cytosol fraction of, and other mammalian tissues (Ogawa, N., Thompson, T., Friesen, H. G., Martin, J. B. & Brazeau, P.) 269–277

Kidney, rat, accumulation of O"-methylguanyle residues in deoxyribonucleic acids of, and other tissues during chronic administration of dimethylnitrosamine (Margison, G. P., Margison, J. M. & Montesano, R.) 463–468

*Klebsiella pneumoniae*, effects of magnesium-adenosine dinucleotide and magnesium-adenosine triphosphate complex ions on the kinetics of the reaction catalysed by nitrogenase from (Thorneley, R. N. F. & Cornish-Bowden, A.) 255–262

Lactate dehydrogenase, sheep, simplified electrophoretic system for determination of the molecular weights of isoenzymes of, and other proteins (Manwell, C.) 487–495

L-Lactate oxidase, *Mycobacterium smegmatis*, evidence for an active-site histidine residue in, obtained by modification of the enzyme with diethyl pyrocarbonate (Choong, Y. S., Shepherd, M. G. & Sullivan, P. A.) 385–393

Ligand, evaluation of ways of using equilibrium dialysis to quantify the binding of, to macromolecule (Nimmo, I. A., Atkins, G. L., Strange, R. C. & Percy-Robb, I. W.) 107–110

Light chains, L-type, immunoglobulin, identification of N-terminal glutamine residue before its conversion into 5-oxopyrrolidine-2-carboxylic acid residue in precursors of, produced by mouse plasma-cell tumour MOPC 104E, RPC 20 and MOPC 315 cells (Burstein, Y. & Schechter, I.) 347–354

Lipids, use of extraction with non-aqueous chloroform/methanol for the removal of, from ox brain with minimal loss of enzyme activities (Kurihara, T., Nishizawa, Y. & Takahashi, Y.) 135–140

Lithocholate-binding proteins, cytosol, liver, rat, two, partial purification of (Strange, R. C., Crabb, R., Hayes, J. D. & Percy-Robb, I. W.) 425–429

Liver, human, purification and properties of aspartyl-glucoamylase from (Dugal, B. & Strømme, J.) 497–502

Liver, pig, use of high-performance liquid chromatography for the analysis of dolichol from, and other polyols (Keenan, R. W., Rice, N. & Quock, R.) 405–408
Liver, rat, accumulation of O\(^6\)-methylguanylate residues in deoxyribonucleic acids of, and other tissues during chronic administration of dimethylnitrosamine (Margison, G. P., Margison, J. M. & Montesano, R.) 463–468

Liver, rat and human, properties of somatostatin-binding protein from the cytosol fraction of, and other mammalian tissues (Ogawa, N., Thompson, T., Friesien, H. G., Martin, J. B. & Brazeau, P.) 269–277

Liver, rat, characterization of the nucleotide sequences of double-stranded segments of ribonucleic acid present in the initial transcription products of chromatin from (Pays, E.) 237–245

Liver, rat, effects of amphiphilic cationic drugs and inorganic cations on the activity of phosphatidate phosphatase from (Bowley, M., Cooling, J., Burditt, S. L. & Brindley, D. N.) 447–454

Liver, rat, kinetic evidence for a 'mnemonical' mechanism for the reaction catalysed by glucokinase from (Storer, A. C. & Cornish-Bowden, A.) 61–69

Liver, rat, partial purification of two lithocholate-binding proteins from cytosol of (Strange, R. C., Cramb, R., Hayes, J. D. & Percy-Robb, I. W.) 425–429

Liver, rat, use of 2,6-dichloro-4-nitrophenol as selective inhibitor of sulphation by phenol sulphotransferase but not of glucuronidation by uridine diphosphogluconosyltransferase of, in vitro and in vivo (Mulder, G. J. & Scholtens, E.) 553–559

Liver, sheep, evidence for two-step binding of reduced nicotinamide-adenine dinucleotide to aldehyde dehydrogenase from (MacGibbon, A. K. H., Buckley, P. D. & Blackwell, L. F.) 455–462

Lung, rat, accumulation of O\(^6\)-methylguanylate residues in deoxyribonucleic acids of, and other tissues during chronic administration of dimethylnitrosamine (Margison, G. P., Margison, J. M. & Montesano, R.) 463–468

_Lymnaea stagnalis_, see Snail, freshwater

Lymphocytes, mouse, isolation and characterization of plasma-membrane pokeweed-mitogen-receptor proteins from (Yokoyama, K., Terao, T. & Osawa, T.) 431–437

[\(\beta\)-Lysine]oxytocin, suitability of, as a ligand for the preparation of immobilized forms of oxytocin (Snell, C. R. & Smyth, D. G.) 43–47

Macromolecule, evaluation of ways of using equilibrium dialysis to quantify the binding of ligand to (Nimmo, I. A., Atkins, G. L., Strange, R. C. & Percy-Robb, I. W.) 107–110

Magnesium ions, effects of the complexes of, with adenosine diphosphate and adenosine triphosphate on the kinetics of the reaction catalysed by _Klebsiella pneumoniae_ nitorgenase (Thorneley, R. N. F. & Cornish-Bowden, A.) 255–262

Malate, small-intestinal, human, apparent molecular weights of, and aminopeptidase and enterokinase in duodenal fluid (Magee, A. I., Grant, D. A. W. & Hermun-Taylor, J.) 583–585

Mammary gland, rat, purification and properties of a nuclear protein kinase from (Majumder, G. C.) 469–477

Manganese, kinetic model for the reaction catalysed by _Bacillus stearothermophilus_ superoxide dismutase containing (McAdam, M. E., Fox, R. A., Lavelle, F. & Fielden, E. M.) 71–79

Manganese, properties of _Bacillus stearothermophilus_ superoxide dismutase containing (McAdam, M. E. Lavelle, F., Fox, R. A. & Fielden, E. M.) 81–87

Membrane, lymphocyte, mouse, isolation and characterization of pokeweed-mitogen-receptor proteins from (Yokoyama, K., Terao, T. & Osawa, T.) 431–437

Methane mono-oxygenase, _Methylococcus capsulatus_, ability of, to catalyse the oxidation of a range of _n_-alkanes, _n_-alkenes, ethers and alicyclic, aromatic and heterocyclic compounds (Colby, J., Stirling, D. I. & Dalton, H.) 395–402

Methanol, ability of _Methylococcus capsulatus_ methane mono-oxygenase to catalyse the oxidation of, and a range of _n_-alkanes, _n_-alkenes, ethers and alicyclic, aromatic and heterocyclic compounds (Colby, J., Stirling, D. I. & Dalton, H.) 395–402

Methionine, recognition of, by Escherichia coli methionyl-transfer ribonucleic acid synthetase (Old, J. M. & Jones, D. S.) 367–373

Methionine, use of _N_-substituted derivatives of, as acid-stable protecting groups during the semi-synthesis of analogues of insulin (Saunders, D. J. & Offord, R.) 479–486

Methionyl-transfer ribonucleic acid synthetase, _Escherichia coli_, recognition of methionine by (Old, J. M. & Jones, D. S.) 367–373

O\(^6\)-Methylguanylate residues, accumulation of, in deoxyribonucleic acids of non-target tissues during chronic administration of dimethylnitrosamine to the rat (Margison, G. P., Margison, J. M. & Montesano, R.) 463–468

_Methylococcus capsulatus_, ability of methane mono-oxygenase to catalyse the oxidation of a range of _n_-alkanes, _n_-alkenes, ethers and alicyclic, aromatic and heterocyclic compounds (Colby, J., Stirling, D. I. & Dalton, H.) 395–402

Microsomal fraction, brain, human, purification and properties of the protein component of thromboxaplin (Bjerklid, E. & Storm, E.) 89–96

Mitochondria, heart, ox, effects of chymotryptic digestion on the structure and catalytic properties of reduced nicotinamide–adenine dinucleotide-ubiquinone oxidoreductase from (Crowder, S. E. & Ragan, C. I.) 295–301

1977
INDEX OF SUBJECTS

Mitogen (pokeweed)-receptor proteins, membrane, lymphocyte, mouse, isolation and characterization of (Yokoyama, K., Terao, T. & Osawa, T.) 431–437

Muscle, skeletal, muscle, skeletal,

Vol.

Myeloma protein, Myeloma proteins, phosphatase from the ion-stimulated E. K. kumar, mouse, K., Terao, the actin-containing F. M. & Masters, P.) 269–277

Mycobacterium smegmatis, evidence for an active-site histidine residue in L-lactate oxidase from, obtained by modification of the enzyme with diethyl pyrocatechate (Choong, Y. S., Shepherd, M. G. & Sullivan, P. A.) 385–393

Myeloma cells, X5563, mouse, estimation of reiteration of genes in, from kinetics of hybridization of deoxyribonucleic acid and ribonucleic acid in the presence of a moderate excess of deoxyribonucleic acid (Muto, M.) 19–25

Myeloma proteins, human, fragments produced by peptic digestion of, of different immunoglobulin G subclasses in the presence of urea (Parr, D. M.) 303–308

Myeloma proteins, identification of N-terminal glutamine residue before its conversion into 5-oxypyrrolidine-2-carboxylic acid residue in precursors of $\lambda$-type light chains of, produced by mouse plasma-cell tumour MOPC 104E, RPC 20 and MOPC 315 cells (Burstein, Y. & Schechter, I.) 347–354

Neurospora crassa, partial purification and characterization of cytochrome c-specific protein methylase III from (Nochumson, S., Durban, E., Kim, S. & Palik, W. K.) 11–18

Nicotinamide--adenine dinucleotide, reduced, evidence for two-step binding of, to sheep liver aldehyde dehydrogenase (MacGibbon, A. K. H., Buckley, P. D. & Blackwell, L. F.) 455–462

Nicotinamide--adenine dinucleotide (reduced)–ubiquinone oxidoreductase, mitochondrial, heart, ox, effects of chymotryptic digestion on the structure and catalytic properties of (Crowder, S. E. & Ragan, C.) 295–301

Nitriles, aromatic, purification and properties of Nocardia sp. N.C.I.B. 11216 nitrilase that catalyses cleavage of the carbon--nitrogen bond of (Harper, D. B.) 309–319

Nitrogenase, Klebsiella pneumoniae, effects of magnesium--adenosine diphosphate and magnesium--adenosine triphosphate complex ions on the kinetics of the reaction catalysed by (Thorne, R. N. F. & Cornish-Bowden, A.) 255–262

Nitrosobenzene, formation of N-phenylglycolhydrxamate from, catalysed by yeast transketolase (Corbett, M. D. & Chipko, B. R.) 263–267

Nocardia sp. N.C.I.B. 11216, purification and properties of nitrilase from, that catalyses cleavage of the carbon--nitrogen bond of aromatic nitriles (Harper, D. B.) 309–319

Nuclei, mammary-gland, rat, purification and properties of a protein kinase from (Majumder, G. C.) 469–477

Ostrich (Struthio camelus), isolation and characterization of corticotropin from the anterior pituitary gland of (Naudé, R. J. & Oelofsen, W.) 519–523

5-Oxyprolendine-2-carboxylic acid residue, identification of N-terminal glutamine residue before its conversion into, in precursors of immunoglobulin $\lambda$-type light chains produced by mouse plasma-cell tumour MOPC 104E, RPC 20 and MOPC 315 cells (Burstein, Y. & Schechter, I.) 347–354

Oxytocin-binding proteins, suitability of [8-lysine]oxytocin as a ligand for the preparation of immobilized forms of oxytocin for affinity chromatography (Snell, C. R. & Smyth, D. G.) 43–47

Oxytocin, [8-lysine]-, suitability of, as a ligand for the preparation of immobilized forms of oxytocin (Snell, C. R. & Smyth, D. G.) 43–47

Pancreas, ox, modification by limited subtilisin digestion of the monodeamidated derivative of ribonucleic acid A from (Manjula, B. N., Acharya, A. S. & Vithayathil, P. J.) 337–345

Penicillilnase (a-lactamase I), Bacillus cereus, study of the conformational motility of, by measurement of the exchange of hydrogen atoms with substrates (Kiener, P. A. & Waley, S. G.) 279–285

Penicillins, study of the conformational motility of Bacillus cereus $\beta$-lactamase I by measurement of the exchange of hydrogen atoms with, as substrates (Kiener, P. A. & Waley, S. G.) 279–285

Vol. 165
INDEX OF SUBJECTS

Phenol sulphotransferase, use of 2,6-dichloro-4-nitrophenol as selective inhibitor of sulphotation by, but not of glucuronidation by uridine diphosphate glucuronosyltransferase of rat liver in vivo and in vitro (Mulder, G. J. & Scholtens, E.) 553–559

Phenyllalanine, inhibition by derivatives of tyrosine and, of the activity of Escherichia coli K12 chorismate mutase–prephenate dehydrogenase (Smith, G. D., Roberts, D. V. & Daday, A.) 121–126

N-Phenylglycolhydroxamate, formation of, from nitrobenzene catalysed by yeast transketolase (Corbett, M. D. & Chipko, B. R.) 263–267

Phosphatidate phosphatase, liver, rat, effects of amphiphilic cationic drugs and inorganic cations on the activity of (Bowley, M., Cooling, J., Burditt, S. L. & Brindley, D. N.) 447–454

Phosphofructokinase, spleen, pig, effects of substrates and effectors on the reversible inactivation by adenosine triphosphate of (Weidemann, M. J., Kolbuch-Bradding, M. E. & Hickman, P. E.) 525–537

Phosphonoacetaldehyde hydrolase, Bacillus cereus, evidence for the formation of an imine between enzyme and substrate during the reaction catalysed by (La Napule, J. M., Coggins, J. R. & Dixon, H. B. F.) 409–411

Pituitary gland, anterior, ostrich, isolation and characterization of corticotropin from (Naudé, R. J. & Oelofsen, W.) 519–523

Pituitary gland, anterior, rat, human and ox, properties of somatostatin-binding protein from the cytosol fraction of, and other mammalian tissues (Ogawa, N., Thompson, T., Friesen, H. G., Martin, J. B. & Brazeau, P.) 269–277

Plasma-cell tumour MOPC 104E, RPC 20 and MOPC 315 cells, mouse, identification of N-terminal glutamine residue before its conversion into 5-oxopyrroline-2-carboxylic acid residue in precursors of immunoglobulin λ-type light chains produced by (Burstein, Y. & Schechter, I.) 347–354

Pokeweed-mitogen-receptor proteins, membrane, lymphocyte, mouse, isolation and characterization of (Yokoyama, K., Terao, T. & Osawa, T.) 431–437

Polyrenols, use of high-performance liquid chromatography for the analysis of (Keenan, R. W., Rice, N. & Quock, R.) 405–408

Porphyridium cruentum, covalent linkage of protein to carbohydrate in the extracellular proteoglycan from (Heaney-Kieras, J., Rodén, L. & Chapman, D. J.) 1–9

Prephenate dehydrogenase, Escherichia coli K12, affinity chromatography of, and inhibition of its activity by derivatives of phenylalanine and tyrosine (Smith, G. D., Roberts, D. V. & Daday, A.) 121–126

Protein component, purification and properties of, of human brain thromboplastin (Björklid, E. & Storm, E.) 89–96

Protein, covalent linkage of carbohydrate to, in Porphyridium cruentum extracellular proteoglycan (Heaney-Kieras, J., Rodén, L. & Chapman, D. J.) 1–9

Protein kinase, nuclear, mammary-gland, rat, purification and properties of (Majumder, G. C.) 469–477

Protein kinase, ribosomal, reticulocyte, rabbit, purification and properties of (Issinger, O.-G.) 511–518

Protein kinases, adenosine 3':5'-cyclic monophosphate-dependent, adrenal-gland-cortex, ox, characterization of, and other adenosine 3':5'-cyclic monophosphate-binding proteins (Daskerland, S. O. & Ueland, P. M.) 561–573

Protein methylase III, cytochrome c-specific, Neurospora crassa, partial purification and characterization of (Nochumson, S., Durban, E., Kim, S. & Paik, W. K.) 11–18

Protein–polysaccharide, see Proteoglycan

Protein, somatostatin-binding, properties of, from the cytosol fraction of various rat, human and ox tissues (Ogawa, N., Thompson, T., Friesen, H. G., Martin, J. B. & Brazeau, P.) 269–277

Proteins, adenosine 3':5'-cyclic monophosphate-binding, adrenal-gland-cortex, ox, characterization of (Daskerland, S. O. & Ueland, P. M.) 561–573

Proteins, lithocholate-binding, cytosol, liver, rat, two, partial purification of (Strange, R. C., Cramb, R., Hayes, J. D. & Percy-Robb, I. W.) 425–429

1977
Proteins, myeloma, human, fragments produced by peptic digestion of, of different immunoglobulin G subclasses in the presence of urea (Parr, D. M.) 303–308

Proteins, myeloma, identification of N-terminal glutamine residue before its conversion into 5-oxopyrrolidine-2-carboxylic acid residue in precursors of λ-type light chains of, produced by mouse plasma-cell tumour MOPC 104E, RPC 20 and MOPC 315 cells (Burstein, Y. & Schechter, I.) 347–354

Proteins, oxytocin-binding, suitability of [8-lysine]oxytocin as a ligand for the preparation of immobilized forms of oxytocin for affinity chromatography (Snell, C. R. & Smyth, D. G.) 43–47

Proteins, simplified electrophoretic system for determination of the molecular weights of (Manwell, C.) 487–495

Proteoglycan, extracellular, Porphyridium cruentum, covalent linkage of protein to carbohydrate in (Heaney-Kieras, J., Roden, L. & Chapman, D. J.) 1–9

Pseudomonas C12B, inversion of configuration and carbon–oxygen bond cleavage catalysed by secondary alkylsulphatases from Comamonas terrigena and (Bartholomew, B., Dodson, K. S., Matcham, G. W. J., Shaw, D. J. & White, G. F.) 575–580

Pyroglutamic acid, see 5-Oxopyrrolidine-2-carboxylic acid

Pyroglutid-2-one-5-carboxylic acid, see 5-Oxopyrrolidine-2-carboxylic acid

Pyruvate kinase, hepatopancreas, crab, interactions of allosteric modifiers with (Giles, I. G., Poat, P. C. & Munday, K. A.) 97–105

Ribonucleic acid, estimation of reiteration of genes in mouse X5563 myeloma cells from genetics of the hybridization of deoxyribonucleic acid and, in the presence of a moderate excess of deoxyribonucleic acid (Muto, M.) 19–25

Ribonucleic acid polymerase B, liver, rat, characterization of the nucleotide sequences of double-stranded segments of ribonucleic acid present in the initial transcription products formed by, in the presence of rat liver chromatin (Pays, E.) 237–245

Ribosomes, reticulocyte, rabbit, purification and properties of casein kinase from (Issinger, O.-G.) 511–518

Saccharomyces cerevisiae, purification of sulphate adenylytransferase (adenosine diphosphate) from, and steady-state kinetics of the reaction catalysed by the enzyme (Nicholls, R. G.) 149–155

Skeletal muscle, see Muscle, skeletal

Small intestine, see Intestine, small

Somatostatin-binding protein, properties of, from the cytosol fraction of various rat, human and ox tissues (Ogawa, N., Thompson, T., Friesen, H. G., Martin, J. B. & Breaux, P.) 269–277

Spleen, pig, effects of substrates and effectors on the reversible inactivation by adenosine triphosphate of phosphofructokinase from (Weidemann, M. J., Kolb-Broddon, M. E. & Hickman, P. E.) 525–537

Struthio camelus, see Ostrich

Sulphate adenylytransferase (adenosine diphosphate), baker’s yeast, purification of, and steady-state kinetics of the reaction catalysed by the enzyme (Nicholls, R. G.) 149–155

Sulphation, use of 2,6-dichloro-4-nitrophenol as selective inhibitor of, by phenol sulphotransferase but not of glucoronidation by uridine diphosphate glucuronosyltransferase of rat liver in vivo and in vitro (Mulder, G. J. & Scholtens, E.) 553–559

Supernatant fraction, see Cytosol

Red blood cells, see Erythrocytes

Reticulocytes, rabbit, purification and properties of ribosomal casein kinase from (Issinger, O.-G.) 511–518

Ribonuclease A, pancreatic, ox, modification by limited subtilisin digestion of the monodeamidated derivative of (Manjula, B. N., Acharya, A. S. & Vithayathil, P. J.) 337–345

Ribonuclease acid, characterization of the nucleotide sequences of double-stranded segments of, present in the initial transcription products of rat liver chromatin (Pays, E.) 237–245

Vol. 165

Thermolysin, fluorimetric study of the role of calcium ions in the stability of (Fontana, A., Vita, C., Boccu', E. & Veronese, F. M.) 539–545
Thiol group, suggested role of, of cysteine residue β-93 in the oxidation by copper ions of the haem groups of human haemoglobin (Winterbourn, C. C. & Carrell, R. W.) 141–148
Thromboplastin (clotting Factor III), brain, human, purification and properties of (Björklid, E. & Storm, E.) 89–96
Transketolase, yeast, formation of N-phenylglycolhydroxamate from nitrosobenzene catalysed by (Corbett, M. D. & Chipko, B. R.) 263–267

Tritium isotope (3H), synthesis of human corticotropin labelled with, to high specific radioactivity (Brundish, D. E. & Wade, R.) 169–171
Tyrosine, inhibition by derivatives of phenylalanine and, of the activity of *Escherichia coli* K12 chorismate mutase–prephenate dehydrogenase (Smith, G. D., Roberts, D. V. & Daday, A.) 121–126

Ubiquinone reductase, nicotinamide–adenine dinucleotide-linked, mitochondrial, heart, ox, effects of chymotryptic digestion on the structure and catalytic properties of (Crowder, S. E. & Ragan, C. I.) 295–301
Uridine diphosphate glucuronosyltransferase, use of 2,6-dichloro-4-nitrophenol as selective inhibitor of sulphation by phenol sulphotransferase but not of glucuronidation by, of rat liver in vivo and in vitro (Mulder, G. J. & Scholtens, E.) 553–559

Yeast, baker’s (*Saccharomyces cerevisiae*), purification of sulphate adenylyltransferase (adenosine diphosphate) from, and steady-state kinetics of the reaction catalysed by the enzyme (Nicholls, R. G.) 149–155
Yeast, formation of N-phenylglycolhydroxamate from nitrosobenzene catalysed by transketolase from (Corbett, M. D. & Chipko, B. R.) 263–267
