THE BIOCHEMICAL SOCIETY

OFFICERS AND COMMITTEE, 1977–78

Chairman of the Committee  
R. R. Porter, F.R.S.

Committee  
G. B. Ansell  
J. R. Bronk

Treasurer  
D. F. Elliott  
K. Burton, F.R.S.

General Secretary  
J. B. Lloyd  
N. G. Carr

Publications Secretary  
R. M. C. Dawson  
P. H. Clarke, F.R.S.

Meetings Secretary  
H. F. Bradford  
J. T. Dingle*

J. W. Porteous, F.R.S.E.
B. E. Ryman

P. F. Fottrell
C. Green

J. N. Hawthorne
H. K. King

*Ex Officio Member of Committee; Representative of Editorial Board of the Biochemical Journal.

Executive Secretary  
A. I. P. Henton (7 Warwick Court, London WC1R 5DP)

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Several meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

Second-class postage paid at New York, NY, U.S.A.
NOTICE FOR CONTRIBUTORS

The Biochemical Journal places emphasis on the prompt publication of both full-length papers (on average about 6 months after receipt) and rapid papers (on average 10–12 weeks after receipt).

For detailed instructions on the preparation of papers contributors (who need not be members of the Biochemical Society) should refer to Policy of the Journal and Instructions to Authors [Biochem. J. (1976) 153, 1–21] and amendments [Biochem. J. (1977) 161, 1–2] (obtainable free on request, in booklet form, from the Executive Secretary, Biochemical Society, 7 Warwick Court, London WC1R 5DP).

Papers submitted for publication should be addressed to the Editorial Secretary, Biochemical Journal, 7 Warwick Court, London WC1R 5DP.

Contributors should note that the Biochemical Journal makes no manuscript handling charges, no page charges and no charges for plates. Reprints are available at modest cost at about the same time as publication, and, if an author is a member of the Biochemical Society, 50 reprints are provided free of charge.
### NOTICE FOR SUBSCRIBERS

The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, alternate issues being devoted to Molecular Aspects and to Cellular Aspects of biochemistry. It is planned that in 1977 eight volumes, each volume being made up of three issues, will be published according to the following schedule:

<table>
<thead>
<tr>
<th>Molecular Aspects</th>
<th>Cellular Aspects</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Jan.</td>
<td>161</td>
</tr>
<tr>
<td>1 Feb.</td>
<td>161</td>
</tr>
<tr>
<td>1 Mar.</td>
<td>161</td>
</tr>
<tr>
<td>1 Apr.</td>
<td>163</td>
</tr>
<tr>
<td>1 May</td>
<td>163</td>
</tr>
<tr>
<td>1 June</td>
<td>163</td>
</tr>
<tr>
<td>1 July</td>
<td>165</td>
</tr>
<tr>
<td>1 Aug.</td>
<td>165</td>
</tr>
<tr>
<td>1 Sept.</td>
<td>165</td>
</tr>
<tr>
<td>1 Oct.</td>
<td>167</td>
</tr>
<tr>
<td>1 Nov.</td>
<td>167</td>
</tr>
<tr>
<td>1 Dec.</td>
<td>167</td>
</tr>
</tbody>
</table>

* Completes volume, and includes Indexes.

**Biochemical Society Transactions.** This is now a separate publication (see below). Volume 5 will be published in 1977, in six parts.

**Subscription Rates to the Biochemical Journal.** For non-members of the Biochemical Society the subscription rates for 1977 are as follows.

- **Zone A:** U.S.A., Canada and Mexico, U.S. $320.00 (despatch by air freight) or sterling equivalent.
- **Zone B:** Japan, £154.00 (despatch by accelerated surface post).
- **Zone C:** U.K. and all remaining destinations, £140.00 (despatch by surface post).

Subscribers to the Biochemical Journal can subscribe to Biochemical Society Transactions on a joint subscription, saving £10.00 (U.S. $25.00). The joint subscription rates are: Zone A, U.S. $355.00; Zone B, £175.00; Zone C, £158.00. The methods of despatch of both publications are as shown above.

Terms are cash with order or against proforma invoice. Orders and subscriptions should be sent to the Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex, or through your normal agent.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address given in the preceding paragraph. Claims cannot be entertained if they are received later than three months after the date of posting, plus such time as would be expected for transit by post.

**Back Numbers.** Enquiries for volumes 1–19 of the Journal should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts of the Journal, and also of Transactions, may be obtained on application to The Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex.

**Microforms.** The following versions are available.

Details and prices are available on request from the Biochemical Society's Colchester office.

**Advertisements.** Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

Zapolski, E. J. & Princiotto, J. V. Preferential utilization in vitro of iron bound to diferric transferrin by rabbit reticulocytes 175-179
Index of Subjects

Acer pseudoplatanus, see Sycamore

Acetate, investigation of the origins of, in rat blood (Buckley, B. M. & Williamson, D. H.) 539–545

Acetylcholine, biosynthesis of acetyl-coenzyme A in Torpedo marmorata electric organ in relation to the metabolism of (Diebler, M.-F. & Morot-Gaudry, Y.) 447–453

Acetyl-coenzyme A, biosynthesis of, in Torpedo marmorata electric organ in relation to the metabolism of acetylcholine (Diebler, M.-F. & Morot-Gaudry, Y.) 447–453

Acetyl-coenzyme A carboxylase, evidence that the biosynthesis of fatty acids in the intercapular brown adipose tissue of cold-adapted rats is increased in vivo by insulin by mechanisms involving parallel activation of pyruvate dehydrogenase and acetyl-coenzyme A carboxylase of cold-adapted animals (McCormack, J. G. & Denton, R. M.) 627–630

Acid lipase, see Lipase, acid

Adenine nucleotides, changes in the concentrations of nicotinamide nucleotides and, during mixed-function oxidation of p-nitroanisole in perfused liver from normal and phenobarbital-treated rats (Kauffman, F. C., Evans, R. K. & Thurman, R. G.) 583–592

Adenosine 3'-phosphate 5'-sulphatophosphate, formation of sulpholipids from, in rat submandibular salivary gland (Pritchard, E. T.) 141–144

Adenosine triphosphatase, calcium-plus-magnesium ion-stimulated, activity of, in slowly glycolysing and rapidly glycolysing pig skeletal muscle post mortem (McIntosh, D. B., Berman, M. C. & Kench, J. E.) 387–398

Adenosine triphosphatase, oligomycin-sensitive, mitochondrial, Saccharomyces cerevisiae, inhibition by dibutylichloromethyl chloride of the activity of (Cain, K., Partis, M. D. & Griffiths, D. E.) 593–602

Adenosine triphosphate synthesis complex, mitochondrial, Saccharomyces cerevisiae, inhibition by dibutylichloromethyl chloride of the activity of (Cain, K., Partis, M. D. & Griffiths, D. E.) 593–602

S-Adenosylhomocysteine, effects of age, sex and the administration of methionine on the metabolism of S-adenosylmethionine and, of polyanines in various rat tissues (Eloranta, T. O.) 521–529

S-Adenosylmethionine, effects of age, sex and the administration of methionine on the metabolism of S-adenosylhomocysteine and, of polyanines in various rat tissues (Eloranta, T. O.) 521–529

S-Adenosylmethionine decarboxylase, lack of effect of pyridoxal phosphate on the activity of, involved in the biosynthesis of polyanines in various rat tissues (Pegg, A. E.) 81–88

Adenovirus-receptor proteins, plasma-membrane, KB-cell, human, characterization of (Hennache, B. & Boulanger, P.) 237–247

Adenylate cyclase, effects of noradrenaline on the activation and stability of, of rat brain cerebral cortex and corpus striatum (Brydon-Golz, S., Ohanian, H. & Bennun, A.) 473–483

Adipose tissue, brown, interscapular, rat, evidence that the biosynthesis of fatty acids in, is increased in vivo by insulin by mechanisms involving parallel activation of pyruvate dehydrogenase and acetyl-coenzyme A carboxylase of cold-adapted animals (McCormack, J. G. & Denton, R. M.) 627–630

Adipose tissue, rat, effects of acute administration of ethanol and of chronic administration of benfluorex on the activities of some enzymes involved in the biosynthesis of glycerolipids in, and liver (Pritchard, P. H., Bowley, M., Burditt, S. L., Cooling, J., Glenny, H. P., Lawson, N., Sturton, R. G. & Brindley, D. N.) 639–642

Age, effects of the administration of methionine, sex and, on the metabolism of S-adenosylmethionine, S-adenosylhomocysteine and polyanines in various rat tissues (Eloranta, T. O.) 521–529

Aminoacyl-transfer ribonucleic acids, increased binding of, to ribosomes accompanying the regeneration of rat liver after partial hepatectomy (Nicholls, D. McE., Carey, J. & Sendecki, W.) 463–471

5-Aminolaevulinate, biosynthesis of haem and the prothetid group of cytochrome c from, by rat liver cytosol (Sáez de Córdova, C., Cobén, R. & González-Cadavid, N. F.) 305–313

5-Aminolaevulinate synthase, effects of the administration of endotoxin on the activities of tryptophan pyrrolase and, and evidence for an endogenous regulatory fraction of haem in rat liver (Bissell, D. M. & Hammaker, L. E.) 301–304

Amino acids, concentrations of, in maternal and foetal rat plasma (Palou, A., Arola, L. & Alemany, M.) 49–55

Anacystis nidulans, identification by Mössbauer spectroscopy of a non-magnetic iron centre and an iron-storage/transport material in membranes of Chlorogloea frischi (and Evans, E. H., Carr, N. G., Rush, J. D. & Johnson, C. E.) 547–551

Androgens, regulation by, of the initiation and elongation of polyribonucleotide chains on rat ventral-prostate-gland chromatin transcribed by ribonucleic acid polymerase B (Thomas, P., Davies, P. & Griffiths, K.) 189–198

Arginine, activities of enzymes involved in the metabolism of, in lactating rat mammary gland (Mezv, V. A. & Knox, W. E.) 105–113
Artery, pulmonary, biosynthesis of protein during hyper-trophy of the right ventricle of the dog heart after stenosis of (Everett, A. W., Taylor, R. R. & Sparrow, M. P.) 315-321
Artery cells, chick-embryo, matrix-free, biosynthesis of procollagen by (Schofield, J. D., Harwood, R. & Jackson, D. S.) 437-446

*Arum maculatum*, see Cuckoo pint

Arylsulphatases, *Aspergillus oryzae*, three, rapid direct assay method for determination of the separate activities of (Burns, G. R. J. & Wynn, C. H.) 411-413
Arylsulphatases, differential repression of the biosynthesis of, in *Aspergillus oryzae* (Burns, G. R. J. & Wynn, C. H.) 415-420
Asbestos dust, chrysotile, changes in the content of pulmonary surfactant and the metabolism of phosphatidylcholine in the lungs of rats exposed to (Tetley, T. D., Richards, R. J. & Harwood, J. L.) 323-329
Ascites-tumour cells, Ehrlich, modification by diamines of the relative concentrations of polyamines and of the activities of their biosynthetic enzymes in (Kallio, A., Pöösö, H., Guha, S. K. & Jänne, J.) 89-94
Ascorbate, depletion of, associated with the induction by lutropin of peroxidase in corpora lutea of rat ovary (Agrawal, P. & Laloraya, M. M.) 205-208

*Aspergillus nidulans*, effect of 1,4-diaminobutanone on the stability of ornithine decarboxylase of, *in vivo* and *in vitro* (Stevens, L. & McKinnon, I. M.) 635-637

*Aspergillus oryzae*, differential repression of the biosynthesis of arylsulphatases in (Burns, G. R. J. & Wynn, C. H.) 415-420

*Aspergillus oryzae*, rapid direct assay method for determination of the separate activities of the three arylsulphatases of (Burns, G. R. J. & Wynn, C. H.) 411-413

Benfluorex {1-(3-trifluoromethylphenyl)-2-[N-(2-benzoyloxyethyl)amino]propane}, effects of acute administration of ethanol and of chronic administration of, on the activities of some enzymes involved in the biosynthesis of glycerolipids in rat liver and adipose tissue (Pritchard, P. H., Bowley, M., Burditt, S. L., Cooling, J., Glenny, H. P., Lawson, N., Sturton, R. G. & Brindley, D. N.) 639-642

Benzoate, submicrobial localization and kinetics of the biosynthesis of hippurate from glycine and, by rat liver mitochondria (Gatley, S. J. & Sherratt, H. S. A.) 39-47

Bicarbonate ions, permeability to, of rat liver mitochondrial membrane (Selwyn, M. J. & Walker, H. A.) 137-139

Bile, comparison of the metabolism of oestrones and oestrone sulphate by isolated perfused rat liver and its relevance to the excretion of oestrogens in (Höller, M., Grochtmann, W., Napp, M. & Breuer, H.) 363-371

Bile acids, role of tubular reabsorption in rat kidney in the excretion of, in the urine (Barnes, S., Gollan, J. L. & Billin, B. H.) 65-73

Blood, rat, investigation of the origins of acetate in (Buckley, B. M. & Williamson, D. H.) 539-545

Blood, rat, effects of inhibition by the administration of pent-4-enoate of the oxidation of fatty acids on gluco-neogenesis and the concentrations of glucose and ketone bodies in, of suckling newborn animals (Pégourié, J-P., Ferré, P. & Girard, J.) 631-634

Blood plasma, rat, maternal and foetal, concentrations of amino acids in (Palou, A., Arola, L. & Alemany, M.) 49-55

Bone, mouse, activation by cathepsin B, plasmin and kallikrein of procollagenase from, to collagenase (Eeckhout, Y. & Vaes, G.) 21-31

Brain, rat, association of sulphogalactosylglycerolipid with myelination in, during postnatal development (Pieringer, J., Subba Rao, G., Mandel, P. & Pieringer, R. A.) 421-428

Brain, rat, effects of age, sex and the administration of methionine on the metabolism of S'-adenosylmethionine, S'-adenosylhomocysteine and polyamines in, and other tissues (Eloranta, T. O.) 521-529

Brain, rat, effects of noradrenaline on the activation and stability of adenylate cyclase of cerebral cortex and corpus striatum of (Brydon-Golz, S., Ohanian, H. & Bennun, A.) 473-483

Brain, rat, role of pyridoxal phosphate in the biosynthesis of polyamines in, and other tissues (Pegg, A. E.) 81-88

Butyrate, induction by inhibitors of the biosynthesis of deoxyribonucleic acid and by, of human chorionad-ropin in culture HeLa cells (Ghosh, N. K., Rukenstein, A. & Cox, R. P.) 265-274

Calcium ions, dietary effects of, on the absorption of lead in the rat (Meredith, P. A., Moore, M. R. & Goldberg, A.) 531-537

Calcium ions, evidence that the accumulation of diacylglycerols dependent on, by erythrocytes from various mammalian and avian species is associated with microvesiculation but not with an efflux of potassium ions (Allan, D. & Michell, R. H.) 495-499

Calcium ions, transport of, in slowly glycolysing and rapidly glycolysing pig skeletal muscle *post mortem* (McIntosh, D. B., Berman, M. C. & Kench, J. E.) 387-398

Carbon dioxide, inhibition by lead acetate of the fixation of, by rat liver mitochondria (Amatrudá, J. M., Staton, A. J. & Kiesow, L. A.) 75-79

Cartilage cells, chick-embryo, effect of the formation of the triple helix of collagen on the hydroxylation of lysine residues and the glycosylation of hydroxylysine residues in, and tendon cells (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 357-362

Castration, effect of, on the initiation and elongation of polyribonucleotide chains on rat ventral-prostate gland transcribed by ribonucleic acid polymerase B (Thomas, P., Davies, P. & Griffiths, K.) 189-198

Castration, effects of, and subsequent administration of androgens on the biosynthesis of cell-specific proteins by isolated guinea-pig seminal-vesicle epithelium (Veneziale, C. M., Burns, J. M., Lewis, J. C. & Büchi, K. A.) 167-173

Cathepsin B, activation by plasmin, kallikrein and, of mouse bone procollagenase to collagenase (Eeckhout, Y. & Vaes, G.) 21-31
INDEX OF SUBJECTS

Cations, influence of, at the plasma membrane in controlling the secretion of polysaccharides by sycamore cells in suspension culture (Morris, M. R. & Northcote, D. H.) 603–618

Cell fusion, effect of the content of cholesterol in the plasma membrane on, of chicken and guinea-pig erythrocytes (Hope, M. J., Bruckdorfer, K. R., Hart, C. A. & Lucy, J. A.) 255–263

Cells, artery, chick-embryo, matrix-free, biosynthesis of procollagen by (Schofield, J. D., Harwood, R. & Jackson, D. S.) 437–446

Cells, ascites-tumour, Ehrlich, modification by diamines of the relative concentrations of polyamines and of the activities of their biosynthetic enzymes in (Kallio, A., Pöösö, H., Guha, S. K. & Jänne, J.) 89–94

Cells, HeLa, cultured, induction by aliphatic monocarboxylates and by inhibitors of the biosynthesis of deoxyribonucleic acid of human choriogonadotropin in (Ghosh, N. K., Rukenstein, A. & Cox, R. P.) 265–274

Cells, KB, human, characterization of the plasma-membrane adenovirus-receptor proteins of (Hennache, D. H., Lucy, A. & Antin, J.) 89–94

Cells, neuroblastoma N2a, degradation and turnover of fucosylated glycoproteins in the plasma membrane of (Hudson, J. E. & Johnson, T. C.) 217–223

Cerebral cortex, rat, effects of noradrenaline on the activation and stability of adenylate cyclase of, and corpus striatum (Brydon-Golz, S., Ohanian, H. & Bennun, A.) 473–483

Chick, immature, modulation by thyroid status of the induction by oestrogens of plasma riboflavin-binding protein in (Murthy, U. S. & Adiga, P. R.) 647–650

Chick embryo, biosynthesis of collagen in skeletal muscle of, during development (Nwagwu, M. & Reid, S. A.) 199–204

Chick-embryo artery cells, matrix-free, biosynthesis of procollagen by (Schofield, J. D., Harwood, R. & Jackson, D. S.) 437–446

Chick-embryo tendon and cartilage cells, effect of the formation of the triple helix of collagen on the hydroxylation of lysine residues and the glycosylation of hydroxylsine residues in (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 357–362

Chicken egg, isolation and properties of lipid–protein globules that are stable in concentrated sodium chloride solution from yolk of, and other avian eggs (Vadehra, D. V., Bain, J. M. & Burley, R. W.) 619–624

Chlorogloeafritschii, identification by Mössbauer spectroscopy of a non-magnetic iron centre and an iron-storage/transport material in membranes of Anaecystis nidulans and (Evans, E. H., Carr, N. G., Rush, J. D. & Johnson, C. E.) 547–551

Cholesterol, differential tubular reabsorption of sulphated and non-sulphated bile acids in rat kidney during (Barnes, S., Gollan, J. L. & Billing, B. H.) 65–73

Cholesterol, effect of the content of, in the plasma membrane on the cell fusion of chicken and guinea-pig erythrocytes (Gope, M. J., Bruckdorfer, K. R., Hart, C. A. & Lucy, J. A.) 255–263

Cholesterol, identification of 4,4′-dimethylcholesta-7,9,14-trienol as an intermediate in the conversion of dihydro-agnosterol into, in rat liver (Tavares, I. A. F., Munday, K. A. & Wilton, D. C.) 17–20

Cholesterol, pathway for the conversion of dihydroagnosterol into, in rat liver (Tavares, I. A. F., Munday, K. A. & Wilton, D. C.) 11–15

Choline, transport and oxidation of, by rat liver mitochondria (Tyler, D. D.) 571–581

Choline O-sulphate, differential repression of the biosynthesis of arylsulphatases in Aspergillus oryzae grown in the presence of (Burns, G. R. J. & Wynn, C. H.) 415–420

Choriongonadotropin, human, induction by aliphatic monocarboxylates and by inhibitors of the biosynthesis of deoxyribonucleic acid of, in cultured HeLa cells (Ghosh, N. K., Rukenstein, A. & Cox, R. P.) 265–274

Chromatin, ventral-prostate-gland, rat, initiation and elongation of polyribonucleotide chains on, transcribed by homologous ribonucleic acid polymerase B (Thomas, P., Davies, P. & Griffiths, K.) 189–198

Chrysotile asbestos dust, changes in the content of pulmonary surfactant and the metabolism of phosphatidylcholine in the lungs of rats exposed to (Tetley, T. D., Richards, R. J. & Harwood, J. L.) 322–329

Citrate, effects of, on the activity of phosphofructokinases from nervous tissue and muscle from various animal species (Newsholme, E. A., Sugden, P. H. & Williams, T.) 123–129

Collagen, biosynthesis of, in chick-embryo skeletal muscle during development (Nwagwu, M. & Reid, S. A.) 199–204

Collagen, effect of the formation of the triple helix of, on the hydroxylation of lysine residues and the glycosylation of hydroxylsine residues in chick-embryo tendon and cartilage cells (Oikarinen, A., Anttinen, H. & Kivirikko, K. I.) 357–362

Collagen precursor (procollagen), biosynthesis of, by matrix-free chick-embryo artery cells (Schofield, J. D., Harwood, R. & Jackson, D. S.) 437–446

Collagenase, activation by cathepsin B, plasmin and kallikrein of mouse bone procollagenase to (Eckhout, Y. & Vaes, G.) 21–31

Corpora lutea, ovary, rat, induction by lutropin of peroxidase in (Agrawal, P. & Laloraya, M. M.) 205–208

Corpus striatum, rat, effects of noradrenaline on the activation and stability of adenylate cyclase of, and cerebral cortex (Brydon-Golz, S., Ohanian, H. & Bennun, A.) 473–483

Cuckoo-pint (Arum maculatum) spadix, identification of iron–sulphur centres in mitochondria from, with very high rates of cyanide-resistant respiration (Cammack, R. & Palmer, J. M.) 347–355

Cyclic adenosine 3′:5′-monophosphate, see Adenosine 3′:5′-cyclic monophosphate

Cyclic guanosine 3′:5′-monophosphate, see Guanosine 3′:5′-cyclic monophosphate

Cytochrome c, biosynthesis of haem and the prosthetic group of, from 5-aminolaevulinate by rat liver cytosol (Sáez de Córdova, C., Cohén, R. & González-Cadavid, N. F.) 305–313

Vol. 166
Cytochrome P-450, decrease in the concentration of, in rat liver microsomal fraction caused by norethindrone and ethynylestradiol (White, I. N. H. & Muller-Eberhard, U.), 57–64
Cytosol, liver, rat, biosynthesis of haem and the prothetetic group of cytochrome c from 5-aminolaevulinate by (Sáez de Córdova, C., Cohén, R. & González-Cadavid, N. F.), 305–313

Dihydroagnosterol, identification of 4,4',dimethylchol-esta-7,9,14-trienol as an intermediate in the conversion of, into cholesterol in rat liver (Tavares, I. A. F., Munday, K. A. & Wilton, D. C.), 11–15
4,4'-Dimethylcholesta-7,9,14-trienol, identification of, as an intermediate in the conversion of dihydroagnosterol into cholesterol in rat liver (Tavares, I. A. F., Munday, K. A. & Wilton, D. C.), 17–20

Dromaeus novaehollandiae, see Emu

Duck egg, isolation and properties of lipid–protein globules that are stable in concentrated sodium chloride solution from yolk of, and other avian eggs (Vadehra, D. V., Bain, J. M. & Burley, R. W.), 619–624

Egg yolk, chicken, duck and emu, isolation and properties of lipid–protein globules that are stable in concentrated sodium chloride solution from (Vadehra, D. V., Bain, J. M. & Burley, R. W.), 619–624
Ehrlich ascites-tumour cells, modification by diamines of the relative concentrations of polyamines and of the activities of their biosynthetic enzymes in (Kallio, A., Pöösö, H., Guha, S. K. & Jänne, J.), 89–94
Electric organ, Torpedo marmorata, biosynthesis of acetylcoenzyme A in, in relation to the metabolism of acetylcholine (Diebler, M.-F. & Morot-Gaudry, Y.), 447–453
Emu (Dromaeus novaehollandiae) egg, isolation and properties of lipid–protein globules that are stable in concentrated sodium chloride solution from yolk of, and other avian eggs (Vadehra, D. V., Bain, J. M. & Burley, R. W.), 619–624

Endotoxin, effects of the administration of, on the activities of triptophan pyrrolase and 5-aminolaevulinate synthase and evidence for an endogenous regulatory fraction of haem in rat liver (Bissell, D. M. & Hammaker, L. E.), 301–304
Epithelium, seminal-vesicle, guinea-pig, isolated, biosynthesis of cell-specific proteins by (Veneziale, C. M.), 155–166
12,13-Epoxycrithohecenes, structural requirements for the inhibitory action of, on the biosynthesis of protein by rabbit reticulocyte cell-free systems (Carter, C. J. & Cannon, M.), 399–409
Erythrocytes, chicken and guinea-pig, effect of the content of cholesterol in the plasma membrane on the cell fusion of (Hope, M. J., Bruckdorfer, K. R., Hart, C. A. & Lucy, J. A.), 255–263
Erythrocytes, mammalian and avian, evidence that the calcium ion-dependent accumulation of diacylglycerols by, is associated with microvesiculation but not with an efflux of potassium ions (Allan, D. & Michell, R. H.), 495–499
Estrogens, see Oestrogens
Estrone, see Oestrone
Ethanol, effects of chronic administration of benfluorex and of acute administration of, on the activities of some enzymes involved in the biosynthesis of glycerolipids in rat liver and adipose tissue (Pritchard, P. H., Bowley, M., Burditt, S. L., Cooling, J., Glenny, H. P., Lawson, N., Sturton, R. G. & Brindley, D. N.), 639–642
INDEX OF SUBJECTS

Vol. 166

Ethynylestradiol [19-nor-17α-pregna-1,3,5(10)-tri-en-20-yne-3,17-diol], decrease in the concentration of microsomal cytochrome P-450 in rat liver caused by norethindrone (17β-hydroxy-19-nor-17α-preg-4-en-20-yn-3-one) and (White, I. N. H. & Muller-Eberhard, U.) 57–64

Fatty acids, effects of inhibition by the administration of pent-4-enoate of the oxidation of, on gluconeogenesis and the blood concentrations of glucose and ketone bodies of the suckling newborn rat (Pégorier, J.-P., Ferré, P. & Girard, J.) 631–634

Fatty acids, evidence that the biosynthesis of, in the interscapular brown adipose tissue of cold-adapted rats is increased in vivo by insulin by mechanisms involving parallel activation of pyruvate dehydrogenase and acetyl-coenzyme A carboxylase (McCormack, J. G. & Denton, R. M.) 627–630

Fatty acids, unsaturated, effects of depletion of, on the proton permeability and energetic functions of Saccharomyces cerevisiae mitochondria (Haslam, J. M. & Fellows, N. F.) 565–570

Ferredoxin-like centre, identification by Mössbauer spectroscopy of an iron-storage/transport material and, in Chlorogloeoa fritschii and Anacystis nidulans membranes (Evans, E. H., Carr, N. G., Rush, J. D. & Johnson, C. E.) 547–551

Fucase residues, degradation and turnover of glycoproteins containing, in neuroblastoma-N2a-cell plasma membrane (Hudson, J. E. & Johnson, T. C.) 217–223

Galactosamine, altered metabolism of proteins and phospholipids in rat liver plasma membrane after injection of, in vivo (Bachmann, W., Harms, E., Hassels, B., Henninger, H. & Reutter, W.) 455–462

Germination, decline in the biosynthesis of ribonucleic acid and protein with loss of viability during the early hours of imbibition by rye seeds before (Sen, S. & Osborne, D. J.) 33–38

Glucagon, effects of, on the compartmentation of metabolites during gluconeogenesis from lactate in isolated rat liver cells (Siess, E. A., Brocks, D. G., Lattke, H. K. & Wieland, O. H.) 225–235

Glucocorticoids, precocious development of the activity of uridine diphosphate glucuronosyltransferase during organ culture of foetal rat liver in the presence of (Wishart, G. J., Goheer, M. A., Leakey, J. E. A. & Dutton, G. J.) 249–253

Glucogenes, effects of inhibition by the administration of pent-4-enoate of the oxidation of fatty acids on, and the blood concentrations of glucose and ketone bodies of the suckling newborn rat (Pégorier, J.-P., Ferré, P. & Girard, J.) 631–634

Glucose, biosynthesis of glucose-phosphoenolpyruvate phosphotransferase and hexokinase in different strains of Klebsiella aerogenes and the relevance of the enzymes to the utilization of lactate and (Carter, I. S. & Dean, A. C. R.) 643–646

Glucose, effects of inhibition of the activity of phosphofructokinases and the utilization of, in nervous tissue and muscle from various animal species (Newsholme, E. A., Sugden, P. H. & Williams, T.) 123–129

Glucose, effects of inhibition by the administration of pent-4-enoate of the oxidation of fatty acids on gluconeogenesis and the blood concentration of ketone bodies and, of the suckling newborn rat (Pégorier, J.-P., Ferré, P. & Girard, J.) 631–634

Glucose, metabolism and transport of glutamine and, in perfused rat small intestine (Hanson, P. J. & Parsons, D. S.) 509–519

Glucose-phosphoenolpyruvate phosphotransferase, biosynthesis of hexokinase and, in different strains of Klebsiella aerogenes growing in continuous culture (Carter, I. S. & Dean, A. C. R.) 643–646

Glucuronides, precocious development of the activity of uridine diphosphate glucuronosyltransferase catalysing the formation of, during organ culture of foetal rat liver in the presence of glucocorticoids (Wishart, G. J., Goheer, M. A., Leakey, J. E. A. & Dutton, G. J.) 249–253

Glutamate, activation of enzymes involved in the conversion of arginine into proline and, in lactating rat mammary gland (Mezl, V. A. & Knox, W. E.) 105–113

Glutamine, metabolism and transport of glucose and, in perfused rat small intestine (Hanson, P. J. & Parsons, D. S.) 509–519

Glycerolipids, effects of acute administration of ethanol and of chronic administration of benfluorex on the activities of some enzymes involved in the biosynthesis of, in rat liver and adipose tissue (Pritchard, P. H., Bowley, M., Burditt, S. L., Cooling, J., Glenny, H. P., Lawson, N., Sturton, R. G. & Brindley, D. N.) 639–642

Glycine, submitochondrial localization and kinetics of the biosynthesis of hippurate from benzoate and, by rat liver mitochondria (Gatley, S. J. & Sherratt, H. S. A.) 39–47

Glycolysis, characteristics of sarcoplasmic reticulum from pig skeletal muscle with slow rates and rapid rates of, post mortem (McIntosh, D. B., Berman, M. C. & Kench, J. E.) 387–398

Glycoproteins, fucosylated, degradation and turnover of, in neuroblastoma-N2a-cell plasma membrane (Hudson, J. E. & Johnson, T. C.) 217–223

Golgi apparatus, influence of cations at the plasma membrane in controlling the secretion of polysaccharides from, into the medium by sycamore cells in suspension culture (Morris, M. R. & Northcote, D. H.) 603–618

Gonadotropin, chorio-, human, induction by aliphatic monocarboxyoxylates and by inhibitors of the biosynthesis of deoxyribonucleic acid of, in cultured HeLa cells (Ghosh, N. K., Rutenstein, A. & Cox, R. P.) 265–274

Haem, biosynthesis of, and the prosthetic group of cytochrome c from 5-aminoalavulinate by rat liver cytosol (Sáez de Córdova, C., Cohén, R. & González-Cadavid, N. F.) 305–313

Haem, effects of the administration of endotoxin on the activities of tryptophan pyrrolase and 5-amino- laevulinic synthase and evidence for an endogenous regulatory fraction of, in rat liver (Bissell, D. M. & Hammers, L. E.) 301–304

Heart, dog, biosynthesis of protein during hypertrophy of the right ventricle of, after stenosis of the pulmonary artery (Everett, A. W., Taylor, R. R. & Sparrow, M. P.) 315–321

HeLa cells, cultured, induction by oxidative ribonucleic acid of the cellular composition of (Anttinen, H.) 177–178

17ß-Hydroxy-19-nor-17a-pregna-4-en-20-yn-3-one (noretindrone), decrease in the concentration of microsomal cytochrome P-450 in rat liver caused by 19-nor-17a-pregna-1,3,5(10)-trien-20-yn-3-17-diol (ethynylestradiol) and (White, I. N. H. & Muller-Eberhard, U.) 57–64

3-Hydroxyretinol, formation of retinoic acid, dehydroretinol and, in the freshwater fish *Saccobranus fossilis* (Barua, A. B. & Goswami, U. C.) 133–136

Inorganic phosphate, see Phosphate, inorganic

Inorganic sulphate, see Sulphate, inorganic

Inosine 5'-monophosphate dehydrogenase, partial purification, properties and regulation of, in rat liver and hepatoma 3924A (Jackson, R. C., Morris, H. P. & Weber, G.) 1–10

Insulin, alterations in the regulation of the biosynthesis of, during pregnancy and starvation studied in isolated rat pancreatic islets of Langerhans (Bone, A. J. & Howell, S. L.) 501–507

Insulin, evidence that the biosynthesis of fatty acids in the interscapular brown adipose tissue of cold-adapted rats is increased in vivo by, mechanisms involving parallel activation of pyruvate dehydrogenase and acetylcoenzyme A carboxylase (McCormack, J. G. & Denton, R. M.) 627–630

Intestine, small, rat, activities of enzymes involved in the metabolism of A1-pyruvols-5-carboxylic acid, and other tissues (Herzfeld, A., Mezl, V. A. & Knox, W. E.) 95–103

Intestine, small, rat, characteristics and postnatal development of the activity of lysosomal acid lipase of (Coates, P. M., Brown, S. A., Junwain, J. & Koldovský, O.) 331–338

Intestine, small, rat, effects of vitamin A nutritional status on the properties of ribonucleic acids of the mucous of, and other tissues (Jayaram, M. & Ganguly, J.) 339–346

Intestine, small, rat, perfused, metabolism and transport of glutamine and glucose in (Hanson, P. J. & Parsons, D. S.) 509–519

Iron, preferential utilization of, bound to diferric transferrin by rabbit reticulocytes in vitro (Zapolski, E. J. & Princiotto, J. V.) 175–179

Iron centre, non-magnetic, identification by Mössbauer spectroscopy of an iron-storage/transport material and, in *Chlorogloea fritschii* and *Anacystis nidulans* membranes (Evans, E. H., Carr, N. G., Rush, J. D. & Johnson, C. E.) 547–551

Iron–sulphur centres, mitochondrial, cuckoo-pint-spadix, identification of, with very high rates of cyanide-resistant respiration (Cammack, R. & Palmer, J. M.) 347–355

Iron-storage/transport material, identification by Mössbauer spectroscopy of a non-magnetic iron centre and, in *Chlorogloea fritschii* and *Anacystis nidulans* membranes (Evans, E. H., Carr, N. G., Rush, J. D. & Johnson, C. E.) 547–551

Islets of Langerhans, pancreatic, mouse, potassium ion-activated hydrolysis of p-nitrophenyl phosphate in plasma membranes of (Lernmark, A., Parman, A. & Täljedal, I.-B.) 181–187
INDEX OF SUBJECTS

661

Islets of Langerhans, pancreatic, rat, isolated, alterations in the regulation of the biosynthesis of insulin during pregnancy and starvation studied in (Bone, A. J. & Howell, S. L.) 501–507

Jejunum, rat, perfused, metabolism and transport of glutamine and glucose in (Hanson, P. J. & Parsons, D. S.) 509–519

Kallikrein, activation by cathepsin B, plasmin and, of mouse bone procollagenase to collagenase (Eeckhout, Y. & Vaes, G.) 21–31

KB cells, human, characterization of the plasma-membrane adenovirus-receptor proteins of (Hennache, B. & Boulander, P.) 237–247

Ketone bodies, effects of inhibition by the administration of pent-4-enolate of the oxidation of fatty acids on gluconeogenesis and the blood concentrations of glucose and, of the suckling newborn rat (Pégorier, J.-P., Ferré, P. & Girard, J.) 631–634

Kidney, rat, activities of enzymes involved in the metabolism of Δ1-pyruvyl-S-carboxylate in, and other tissues (Herzfeld, A., Mezl, V. A. & Knox, W. E.) 95–103

Kidney, rat, effects of age, sex and the administration of methionine on the metabolism of S-adenosylmethionine, S-adenosylhomocysteine and polyamines in, and other tissues (Eloranta, T. O.) 521–529

Kidney, rat, role of pyridoxal phosphate in the biosynthesis of polyamines in, and other tissues (Pegg, A. E.) 81–88

Kidney, rat, role of tubular reabsorption in, in the excretion of bile acids in the urine (Barnes, S., Gollan, J. L. & Billing, B. H.) 65–73

Kidney tumours, rat, regulation of the activity of inosine 5’-monophosphate dehydrogenase in, and liver and hepatoma 3294A (Jackson, R. C., Morris, H. P. & Weber, G.) 1–10

Klebsiella aerogenes, biosynthesis of hexokinase and glucose–phosphenolpyruvate phosphotransferase in different strains of, growing in continuous culture (Carter, I. S. & Dean, A. C. R.) 643–646

Lactate, biosynthesis of glucose–phosphenolpyruvate phosphotransferase and hexokinase in different strains of Klebsiella aerogenes and the relevance of the enzymes to the utilization of glucose and (Carter, I. S. & Dean, A. C. R.) 643–646

Lactation, activities of enzymes involved in the metabolism of arginine in rat mammary gland during (Mezl, V. A. & Knox, W. E.) 105–113

Lead, effects of dietary calcium ions on the absorption of, in the rat (Meredith, P. A., Moore, M. R., & Goldberg, A.) 531–537

Lead acetate, inhibition by, of the fixation of carbon dioxide by rat liver mitochondria (Amatruda, J. M., Staton, A. J. & Kiesow, L. A.) 75–79

Lecithin, see Phosphatidylcholine

Leucocytes, neutrophil, human, subcellular distribution of the activities of superoxide dismutase and myeloperoxidase in (Rest, R. F. & Spitznagel, J. K.) 145–153

Lipase, acid, lysosomal, small-intestinal, rat, characteristics and postnatal development of the activity of (Coates, P. M., Brown, S. A., Jamawan, J. & Koldovský, O.) 331–338

Lipid–protein globules, egg-yolk, chicken, duck and emu, isolation and properties of, that are stable in concentrated sodium chloride solution (Vaderah, D. V., Bain, J. M. & Burley, R. W.) 619–624

Liposomes, phospholipid, use of, for modification of the content of cholesterol in chicken erythrocytes (Hope, M. J., Bruckdorfer, K. R., Hart, C. A. & Lucy, J. A.) 255–263

Liver, mouse, increased rate of biosynthesis and decreased rate of degradation of protein in, during postnatal development (Conde, R. D. & Scornik, O. A.) 115–121

Liver, rat, activities of enzymes involved in the metabolism of Δ1-pyruvyl-S-carboxylate in, and other tissues (Herzfeld, A., Mezl, V. A. & Knox, W. E.) 95–103

Liver, rat, altered metabolism of proteins and phospholipids in the plasma membrane of, after injection of α-galactosamine in vivo (Bachmann, W., Harms, E., Hassels, B., Henninger, H. & Reutter, W.) 455–462

Liver, rat, biosynthesis of haem and the prosthetic group of cytochrome c from δ-aminolaevulinate by cytosol from (Sáez de Córdova, C., Cohén, R. & González-Cadavid, N. F.) 305–313

Liver, rat, decrease in the concentration of microsomal cytochrome P-450 in, caused by norethindrone and ethynylestradiol (White, I. N. H. & Muller-Eberhard, U.) 57–64

Liver, rat, effects of acute administration of ethanol and of chronic administration of benfluorex on the activities of some enzymes involved in the biosynthesis of glycerolipids in, and adipose tissue (Pritchard, P. H., Bowley, M., Burditt, S. L., Cooling, J., Glenny, H. P., Lawson, N., Sturton, R. G. & Brindley, D. N.) 639–642

Liver, rat, effects of age, sex and the administration of methionine on the metabolism of δ-adenosylmethionine, δ-adenosylhomocysteine and polyamines in, and other tissues (Eloranta, T. O.) 521–529

Liver, rat, effects of the administration of endotoxin on the activities of tryptophan pyrrolase and δ-aminolaevulinate synthase and evidence for an endogenous regulatory fraction of haem in (Bissell, D. M. & Hammaker, L. E.) 301–304

Liver, rat, effects of vitamin A nutritional status on the properties of ribonucleic acid of, and other tissues (Jayaram, M. & Ganguly, J.) 339–346

Liver, rat, foetal, precocious development of the activity of uridine diphosphate glucuronosyltransferase during organ culture of, in the presence of glucocorticoids (Wishart, G. J., Goheer, M. A., Leakey, J. E. A. & Dutton, G. J.) 249–253

Liver, rat, identification of 4,4′-dimethylcholesta-7,9,14-trienol as an intermediate in the conversion of dihydroxyagosterol into cholesterol in (Tavares, I. A. F., Munday, K. A. & Wilton, D. C.) 17–20

Vol. 166
Liver, rat, increased binding of aminoacyl-transfer ribonucleic acids to ribosomes accompanying the regeneration of, after partial hepatectomy (Nicholls, D. McE., Carey, J. & Sendecki, W.) 463–471
Liver, rat, inhibition by lead acetate of the fixation of carbon dioxide by mitochondria from (Amatruda, J. M., Staton, A. J. & Kiesow, L. A.) 75–79
Liver, rat, partial purification, properties and regulation of inosine 5'-monophosphate dehydrogenase in, and hepatoma 3924A (Jackson, R. C., Morris, H. P. & Weber, G.) 1–10
Liver, rat, pathway for the conversion of dihydroagarostierone into cholesterol in (Tavares, I. A. F., Munday, K. A. & Wilton, D. C.) 11–15
Liver rat, perfused, changes in the concentrations of nicotinamide nucleotides and adenine nucleotides during mixed-function oxidation of p-nitroanisole in, from normal and phenobarbital-treated animals (Kauffman, F. C., Evans, R. K. & Thurman, R. G.) 583–592
Liver, rat, perfused, isolated, comparison of the metabolism of oestrone and oestrone sulphate by (Höller, M., Grochtmann, W., Napp, M. & Breuer, H.) 363–371
Liver rat, permeability to bicarbonate ions of the membrane of mitochondria from (Selwyn, M. J. & Walker, H. A.) 137–139
Liver, rat, regenerating, activity of microsomal sialyltransferases in (Serafini-Cessi, F.) 381–386
Liver, rat, role of pyridoxal phosphate in the biosynthesis of polyamines in, and other tissues (Pegg, A. E.) 81–88
Liver, rat, submitochondrial localization and kinetics of the biosynthesis of hiruphane from bozacone and glycine by mitochondria from (Gatley, S. J. & Sherratt, H. S. A.) 39–47
Liver, rat, transport and oxidation of choline by mitochondria from (Tyler, D. D.) 571–581
Lung, rat, changes in the content of pulmonary surfactant and the metabolism of phosphatidylycholine in, of animals exposed to chrysotile asbestos dust (Tetley, T. D., Richards, R. J. & Harwood, J. L.) 323–329
Luteinizing hormone, see Lutropin
Lutropin (luteinizing hormone), induction by, of peroxidase in corpora lutea of rat ovary (Agrawal, P. & Laloraya, M. M.) 205–208
Lysine residues, effect of the formation of the triple helix of collagen on the hydroxylation of, and the glycosylation of hydroxylysine residues in chick-embryo tendon and cartilage cells (Oikarinen, A., Anttinen, H. & Kivistö, K. I.) 357–362
Lysosomes, small-intestinal, rat, characteristics and postnatal development of the activity of acid lipase of (Coates, P. M., Brown, S. A., Jumawan, J. & Koldovský, O.) 331–338

Mammary gland, rat, lactating, activities of enzymes involved in the metabolism of arginine in (Mezil, V. A. & Knox, W. E.) 105–113
Membrane, erythrocyte, effect of the cholesterol content of, on the cell fusion of chicken and guinea-pig erythrocytes (Hope, M. J., Bruckdorfer, K. R., Hart, C. A. & Lucy, J. A.) 255–263
Membrane, mitochondrial, liver, rat, permeability to bicarbonate ions of (Selwyn, M. J. & Walker, H. A.) 137–139
Membrane, plasma, KB-cell, human, characterization of the adenovirus-receptor proteins of (Hennache, B. & Boulanger, P.) 237–247
Membrane, plasma, liver, rat, altered metabolism of proteins and phospholipids in, after injection of p-galactosamine in vivo (Bachmann, W., Harms, E., Hassels, B., Henninger, H. & Reutter, W.) 455–462
Membrane, plasma, neuroblastoma-N2a-cell, degradation and turnover of fucosylated glycoproteins in (Hudson, J. E. & Johnson, T. C.) 217–223
Membrane, plasma, sycamore-cell, influence of cations in controlling the secretion of polysaccharides by the cells in suspension culture (Morris, M. R. & Northcote, D. H.) 603–618
Membranes, Chlorogloea fritschi and Anacystis nidulans, identification by Mössbauer spectroscopy of a non-magnetic iron centre and an iron-storage/transport material in (Evans, E. H., Carr, N. G., Rush, J. D. & Johnson, C. E.) 547–551
Membranes, plasma, islet-of-Langerhans, pancreatic, mouse, potassium ion-activated hydrolysis of p-nitrophenyl phosphate in (Lernmark, Å., Parman, A. & Täljedal, I.-B.) 181–187
Membranes, Saccharomyces cerevisiae, effects of altered composition of sterols of, on oxidative phosphorylation in a haem-deficient mutant (Astin, A. M. & Haslam, J. M.) 287–298
Methionine, effects of age, sex and the administration of, on the metabolism of S-adenosylmethionine, S-adenosylhomocysteine and polyamines in various rat tissues (Eloranta, I. A. F., Haslam, A. & Täljedal, I.-B.) 287–298
Methionine, effects of age, sex and the administration of, on the metabolism of S-adenosylmethionine, S-adenosylhomocysteine and polyamines in various rat tissues (Eloranta, I. A. F., Haslam, A. & Täljedal, I.-B.) 287–298
Microsomal fraction, activity of sialyltransferases of, in regenerating rat liver (Serafini-Cessi, F.) 381–386
Microsomal fraction, liver, rat, decrease in the concentration of cytochrome P-450 in, caused by norethindrone and ethynylestradiol (White, I. N. H. & Muller-Eberhard, U.) 57–64
Mitochondria, cuckoo-pint-spadium, identification of iron–sulphur centres in, with very high rates of cyanide-resistant respiration (Cammack, R. & Palmer, J. M.) 347–355
Mitochondria, liver, rat, inhibition by lead acetate of the fixation of carbon dioxide by (Amatruda, J. M., Staton, A. J. & Kiesow, L. A.) 75–79
Mitochondria, liver, rat, permeability to bicarbonate ions of the membrane of (Selwyn, M. J. & Walker, H. A.) 137–139

1977
INDEX OF SUBJECTS

Mitochondria, liver, rat, sub mitochondrial localization and kinetics of the biosynthesis of hippurate from benzoate and glycine by (Gatley, S. J. & Sherratt, H. S. A.) 39–47

Mitochondria, liver, rat, transport and oxidation of choline by (Tyler, D. D.) 571–581

Mitochondria, Saccharomyces cerevisiae, effects of changes in sterol composition on the adenine nucleotide transporter of (Haslam, J. M., Aston, A. M. & Nichols, W. W.) 559–563

Mitochondria, Saccharomyces cerevisiae, effects of depletion of unsaturated fatty acids on the proton permeability and energetic functions of (Haslam, J. M. & Fellows, N. F.) 565–570

Mitochondria, Saccharomyces cerevisiae, inhibition by dibutylichloromethyl chloride of the activity of the adenosine triphosphate synthase complex of (Cain, K., Partis, M. D. & Griffiths, D. E.) 593–602

Mucosa, seminal-vesicle, guinea-pig, isolated, biosynthesis of cell-specific proteins by (Veneziale, C. M.) 155–166

Mucosa, seminal-vesicle, guinea-pig, isolated, effects of castreton and subsequent administration of androgens on the biosynthesis of cell-specific proteins by (Veneziale, C. M., Burns, J. M., Lewis, J. C. & Büchli, K. A.) 167–173

Mucosa, small-intestinal, rat, effects of vitamin A nutritional status on the properties of ribonucleic acids of, and other tissues (Jayaram, R. F. & Mcintosh, R. F.) 339–346

Muscle, effects of citrate on the activity of phosphofructokinases from nervous tissue and, from various animal species (Newsholme, E. A., Sugden, P. H. & Williams, T.) 123–129

Muscle, skeletal, chick-embryo, biosynthesis of collagen in, during development (Nwagwu, M. & Reid, S. A.) 199–204

Muscle, skeletal, pig, slowly glycolysing and rapidly glycolysing, characteristics of sarcoplasmic reticulum from, post mortem (Mcintosh, D. B., Berman, M. C. & Kench, J. E.) 387–398

Myelin, brain, rat, association of sulphogalactosyl-glycerolipid with the formation of, during postnatal development (Pieringer, J., Subba Rao, G., Mandel, P. & Pieringer, R. A.) 421–428

Myeloperoxidase, subcellular distribution of the activities of superoxide dismutase and, in human neutrophil leucocytes (Rest, R. F. & Spitznagel, J. K.) 145–153

Nervous tissue, effects of citrate on the activity of phosphofructokinases from muscle and, from various animal species (Newsholme, E. A., Sugden, P. H. & Williams, T.) 123–129

Neuroblastoma N2a cells, degradation and turnover of fucosylated glycoproteins in the plasma membrane of (Hudson, J. E. & Johnson, T. C.) 217–223

Nicotinamide nucleotides, changes in the concentrations of adenine nucleotides and, during mixed-function oxidation of, in perfused rat liver from normal and phenobarbital-treated rats (Kauffman, F. C., Evans, R. K. & Thurman, R. G.) 583–592

p-Nitroanisole, changes in the concentrations of nicotinamide nucleotides and adenosine nucleotides during mixed-function oxidation of, in perfused liver from normal and phenobarbital-treated rats (Kauffman, F. C., Evans, R. K. & Thurman, R. G.) 583–592

p-Nitrophenyl phosphate, potassium ion-activated hydrolysis of, in mouse pancreatic islet-of-Langerhans plasma membranes (Lernmark, Å., Parman, A. & Täljedal, I.-B.) 181–187

Noradrenaline, effects of, on the activation and stability of adenylate cyclase of rat brain cerebral cortex and corpus striatum (Brydon-Golz, S., Ohanian, H. & Bennun, A.) 473–483

Norethindrone (17β-hydroxy-19-nor-17α-pregna-4-en-20-yn-3-one), decrease in the concentration of microsomal cytochrome P-450 in rat liver caused by ethynylestradiol (19-nor-17α-pregna-1,3,5(10)-tri-en-29-yn-3,17-diol) and (White, I. N. H. & Muller-Eberhard, U.) 553–559

19-Nor-17α-pregna-1,3,5(10)-tri-en-20-yn-3,17-diol (ethynylestradiol), decrease in the concentration of microsomal cytochrome P-450 in rat liver caused by 17β-hydroxy-19-nor-17α-pregna-4-en-20-yn-3-one (norethindrone) and (White, I. N. H. & Muller-Eberhard, U.) 57–64

Oestrogens, comparison of the metabolism of oestrone and oestrone sulphate by isolated perfused rat liver and its relevance to the biliary excretion of (Hölter, M., Groechtmann, W., Napp, M. & Breuer, H.) 363–371

Oestrogens, modulation by thyroid status of the induction by, of plasma riboflavin-binding protein in the immature chick (Murthy, U. S. & Adiga, P. R.) 647–650

Oestrogen, comparison of the metabolism of oestrone sulphate and, by isolated perfused rat liver (Hölter, M., Groechtmann, W., Napp, M. & Breuer, H.) 363–371

Oestrogen sulphate, comparison of the metabolism of oestrone and, by isolated perfused rat liver (Hölter, M., Groechtmann, W., Napp, M. & Breuer, H.) 363–371

Ornithine decarboxylase, Aspergillus nidulans, effect of, 1,4-diaminobutane on the stability of, in vivo and in vitro (Stevens, L. & McKinnon, I. M.) 635–637

Ornithine decarboxylase, effect of pyridoxal phosphate on the activity of, involved in the biosynthesis of polyamines in various rat tissues (Pegg, A. E.) 81–88

Ovary, rat, induction by lutropin of peroxidase in corpora lutea of (Agrawal, P. & Laloraya, M. M.) 205–208

Oxidative phosphorylation, see Phosphorylation, oxidative

Pancreas, mouse, potassium ion-activated hydrolysis of p-nitrophenyl phosphate in islet-of-Langerhans plasma membranes from (Lernmark, Å., Parman, A. & Täljedal, I.-B.) 181–187

Pancreas, rat, alterations in the regulation of the biosynthesis of insulin during pregnancy and starvation studied in islets of Langerhans isolated from (Bone, A. J. & Howell, S. L.) 501–507

Vol. 166
Pent-4-enoate, effects of inhibition by the administration of, of the oxidation of fatty acids on gluconeogenesis and the blood concentrations of glucose and ketone bodies of the suckling newborn rat (Pégorier, J.-P., Ferré, P. & Girard, J.) 631–634

Peroxidase, induction by lutropin of, in corpora lutea of rat ovary (Agrawal, P. & Laloraya, M. M.) 205–208

Peroxidase, myelo-, subcellular distribution of the activities of superoxide dismutase and, in human neutrophil leukocytes (Rest, R. F. & Spitznagel, J. K.) 145–153

Phenobarbital, changes in the concentrations of nicotinamide nucleotides and adenine nucleotides during mixed-function oxidation of p-nitroanisole in perfused liver from normal rats and from those treated with (Kauffman, F. C., Evans, R. K. & Thurman, R. G.) 583-592

Phosphate, inorganic, involvement of, in the transport and oxidation of choline by rat liver mitochondria (Tyler, D. D.) 571–581

Phosphatidate phosphatase, effects of acute administration of ethanol and of chronic administration of benfluorex on the activity of, in rat liver and adipose tissue (Pritchard, P. H., Bowley, M., Burditt, S. L., Cooling, J., Glenby, H. P., Lawson, N., Sturton, R. G. & Brindley, D. N.) 639–642

Phosphatidylethanolamine, changes in the content of pulmonary surfactant and the metabolism of, in the lungs of rats exposed to chrysotile asbestos dust (Tetley, T. D., Richards, R. J. & Harwood, J. L.) 323–329

Phosphofructokinases, nervous-tissue and muscle, effects of citrate on the activity of, from various animal species (Newsholme, E. A., Sugden, P. H. & Williams, T.) 123–129

Phospholipid liposomes, use of, for modification of the content of cholesterol in chicken erythrocytes (Hope, M. J., Bruckdorfer, K. R., Hart, C. A. & Lucy, J. A.) 255–263

Phospholipids, altered metabolism of proteins and, in rat liver plasma membrane after injection of α-galactosamine in vivo (Bachmann, W., Harms, E., Hassels, B., Henninger, H. & Reutter, W.) 455–462

Phosphorylation, oxidative, effects of depletion of unsaturated fatty acids on the proton permeability and, of *Saccharomyces cerevisiae* mitochondria (Haslam, J. M. & Fellows, N. F.) 565–570

Phosphorylation, oxidative, inhibition by dibutylchloromethyltin chloride of, by *Saccharomyces cerevisiae* mitochondria (Cain, K., Partis, M. D. & Griffiths, D. E.) 593–602

Placenta, rat, uptake of amino acids from maternal plasma by, during pregnancy (Palou, A., Arola, L. & Alemany, M.) 49–55

Plasma, chick, immature, modulation by thyroid status on the induction by oestrogens of riboflavin-binding protein of (Murthy, U. S. & Adiga, P. R.) 647–650

Plasma, rat, maternal and foetal, concentrations of amino acids in (Palou, A., Arola, L. & Alemany, M.) 49–55

Plasma membrane, see Membrane, plasma

Plasmin, activation by cathepsin B, kallikrein and, of mouse bone procollagenase to collagenase (Eeckhout, Y. & Vaes, G.) 21–31

Polyamines, effect of 1,4-diaminobutanone on the stability of ornithine decarboxylase and the biosynthesis of, in *Aspergillus nidulans* (Stevens, L. & McKinnon, I. M.) 635–637

Polyamines, effects of age, sex and the administration of methionine on the metabolism of S-adenosylmethionine, S-adenosylhomocysteine and, in various rat tissues (Eloranta, T. O.) 521–529

Polyamines, modification by diamines of the relative concentrations of, and of the activities of their biosynthetic enzymes in Ehrlich ascites-tumour cells (Kallio, A., Pösö, H., Guha, S. K. & Jänne, J.) 89–94

Polyamines, role of pyridoxal phosphate in the biosynthesis of, in various rat tissues (Pegg, A. E.) 81–88

Polyribonucleotide chains, initiation and elongation of, on rat ventral-prostate-gland chromatin transcribed by homologous ribonucleic acid polymerase B (Thomas, P., Davies, P. & Griffiths, K.) 189–198

Polysaccharides, influence of cations at the plasma membrane in controlling the secretion of, by sycamore cells in suspension culture (Morris, M. R. & Northcote, D. H.) 603–618

Potassium ions, activation by, of the hydrolysis of p-nitrophenyl phosphate in mouse pancreatic islet-of-Langerhans plasma membranes (Lernmark, Å., Parman, A. & Täljedal, I.-B.) 181–187

Potassium ions, evidence that the calcium ion-dependent accumulation of diacylglycerols by erythrocytes from various mammalian and avian species is associated with microvesiculation but not with an efflux of (Allan, D. & Michell, R. H.) 495–499

Pregnancy, alterations in the regulation of the biosynthesis of insulin during, studied in isolated rat pancreatic islets of Langerhans (Bone, A. J. & Howell, S. L.) 501–507

Pregnancy, concentrations of amino acids in maternal and foetal rat plasma during (Palou, A., Arola, L. & Alemany, M.) 49–55

Procollagen, biosynthesis of, by matrix-free chick-embryo artery cells (Schofield, J. D., Harwood, R. & Jackson, D. S.) 437–446

Procollagenase, bone, mouse, activation by cathepsin B, plasmin and kallikrein of, to collagenase (Eeckhout, Y. & Vaes, G.) 21–31

1977
INDEX OF SUBJECTS

Pregesterone, induction by lutropin of peroxidase and its possible role in the biosynthesis of, in corpora lutea of rat ovary (Agrawal, P. & Laloraya, M. M.) 205–208

Proinsulin, alterations in the regulation of the biosynthesis of, and insulin during pregnancy and starvation studied in isolated rat pancreatic islets of Langerhans (Bone, A. J. & Howell, S. L.) 501–507

Proline, activities of enzymes involved in the conversion of arginine into glutamate and, in lactating rat mammary gland (Mezl, V. A. & Knox, W. E.) 105–113

Proline, activities of enzymes involved in the metabolism of Δ¹-proline-5-carboxylate and, in various rat tissues (Herzfeld, A., Mezl, V. A. & Knox, W. E.) 95–103

Prostate gland, ventral, rat, initiation and elongation of polynucleotide chains on chromatin from, transcribed by homologous ribonucleic acid polymerase B (Thomas, P., Davies, P. & Griffiths, K.) 189–198

Protein, biosynthesis of, during hypertrophy of the right ventricle of the dog heart after stenosis of (Everett, A. W., Taylor, R. R. & Sparrow, M. P.) 315–321

Protein, decline in the biosynthesis of ribonucleic acid and, with loss of viability during the early hours of imbibition by rye seeds (Sen, S. & Osborne, D. J.) 33–38

Protein, increased rate of biosynthesis and decreased rate of degradation of, in mouse liver during postnatal development (Conde, R. D. & Scornik, O. A.) 115–121

Protein, riboflavin-binding, plasma, chick, modulation by thyroid status of the induction by oestrogens of, in the immature bird (Murthy, U. S. & Adiga, P. R.) 647–650

Protein, structural requirements for the inhibitory action of 12,13-epoxytrichothecenes on the biosynthesis of, by rabbit reticulocyte cell-free systems (Carter, C. J. & Cannon, M.) 399–409

Protein–lipid globules, egg-yolk, chicken, duck and emu, isolation and properties of, that are stable in concentrated sodium chloride solution (Vadehra, D. V., Bain, J. M. & Burley, R. W.) 619–624

Proteins, adenovirus-receptor, plasma-membrane, KB-cell, human, characterization of (Hennache, B. & Boulander, P.) 237–247

Proteins, altered metabolism of phospholipids and, in rat liver plasma membrane after injection of β-galactosamine in vivo (Bachmann, W., Harms, E., Hassels, B., Henninger, H. & Reutter, W.) 455–462

Proteins, cell-specific, biosynthesis of, by isolated guinea-pig seminal-vesicle epithelium (Veneziale, C. M.) 155–166

Proteins, non-collagenous, biosynthesis of collagen and, in chick-embryo skeletal muscle during development (Nwagwu, M. & Reid, S. A.) 199–204

Protons, effects of depletion of unsaturated fatty acids on the energetic functions and permeability towards, of Saccharomyces cerevisiae mitochondria (Haslam, J. M. & Fellows, N. F.) 565–570

Pseudomonas spp., initiation by L-threonine aldolase of the degradation of threonine in (Bell, S. C. & Turner, J. M.) 209–216

Pulmonary artery, biosynthesis of protein during hypertrophy of the right ventricle of the dog heart after stenosis of (Everett, A. W., Taylor, R. R. & Sparrow, M. P.) 315–321

Pulmonary surfactant, changes in the content of, and the metabolism of phosphatidylincholine in the lungs of rats exposed to chrysotile asbestos dust (Tetley, T. D., Richards, J. R. & Harwood, J. L.) 323–329

Pyridoxal phosphate, role of, in the biosynthesis of polyamines in various rat tissues (Pegg, A. E.) 81–88

Δ¹-Propylene-5-carboxylate, activities of enzymes involved in the metabolism of, in various rat tissues (Herzfeld, A., Mezl, V. A. & Knox, W. E.) 95–103

Pyruvate dehydrogenase, evidence that the biosynthesis of fatty acids in the intesacapular brown adipose tissue of cold-adapted rats is increased in vivo by insulin by mechanisms involving parallel activation of acetylcoenzyme A carboxylase and (McCormack, J. G. & Denton, R. M.) 627–630

Red blood cells, see Erythrocytes

Respiration, cyanide-resistant, identification of iron-sulphur centres in cuckoo-plant-spadiix mitochondria with very high rates of (Cammack, R. & Palmer, J. M.) 347–355

Reticulocytes, rabbit, preferential utilization of iron bound to diferric transferrin by, in vitro (Zapolski, E. J. & Princiotto, J. V.) 175–179

Reticulocytes, rabbit, structural requirements for the inhibitory action of 12,13-epoxytrichothecenes on the biosynthesis of protein by cell-free systems obtained from (Carter, C. J. & Cannon, M.) 399–409

Reticulosarcoma, sarco-endoplasmic, characteristics of, from slowly glycolysing and rapidly glycolysing pig skeletal muscle post mortem (McIntosh, D. B., Berman, M. C. & Kench, J. E.) 387–398

Retinoic acid, effects of the administration of, to vitamin A-deficient rats on the properties of ribonucleic acids of liver, small-intestinal mucosa and testis (Jayaram, M. & Ganguly, J.) 339–346

Retinoic acid, formation of dehydroretinol, 3-hydroxyretinol and, in the freshwater fish Saccobranchus fossilis (Barua, A. B. & Goswami, U. C.) 133–136

Retinyl acetate, effects of the administration of, to vitamin A-deficient rats on the properties of ribonucleic acids of liver, small-intestinal mucosa and testis (Jayaram, M. & Ganguly, J.) 339–346

Riboflavin-binding protein, plasma, chick, modulation by thyroid status of the induction by oestrogens of, in the immature bird (Murthy, U.S. & Adiga, P. R.) 647–650

Ribonucleic acid, decline in the biosynthesis of, and protein with loss of viability during the early hours of imbibition by rye seeds (Sen, S. & Osborne, D. J.) 33–38

Ribonucleic acid polymerase B, ventral-prostate-gland, rat, initiation and elongation of polyribonucleotide chains on rat ventral-prostate-gland chromatin transcribed by (Thomas, P., Davies, P. & Griffiths, K.) 189–198

Vol. 166
Saccaromyces cerevisiae, effects of depletion of unsaturated fatty acids on the proton permeability and energetic functions of mitochondria from (Haslam, J. M. & Fellows, N. F.) 556–570

Saccharomyces cerevisiae, effects of changes in sterol composition on the adenine nucleotide transporter of mitochondria from (Haslam, J. M., Astin, A. M. & Nichols, W. W.) 559–563

Saccharomyces cerevisiae, inhibition by dibutylchloromethyltin chloride of the activity of the adenosine triphosphate synthase complex of mitochondria from (Cain, K., Partis, M. D. & Griffiths, D. E.) 593–602

Saccharobranus fossilis, formation of vitamin A in (Barua, A. B. & Goswami, U. C.) 133–136

Salivary gland, submandibular, rat, formation of sulpholipids in (Pritchard, E. T.) 141–144

Sarcoplasmic reticulum, see Reticulum, sarcoplasmic

Secale cereale, see Rye

Seeds, rye, decline in the biosynthesis of ribonucleic acid and protein with loss of viability during the early hours of imbibition by (Sen, S. & Osborne, D. J.) 33–38

Seminal vesicle, guinea-pig, biosynthesis of cell-specific proteins by epithelium isolated from (Venezia, C. M.) 155–156

Seminal vesicle, guinea-pig, effects of castration and subsequent administration of androgens on the biosynthesis of cell-specific proteins by epithelium isolated from (Venezia, C. M., Burns, J. M., Lewis, J. C. & Büchi, K. A.) 167–173

L-Serine hydroxymethyltransferase, evidence for the separate identity of L-threonine aldolase and, in Pseudomonas spp. (Bell, S. C. & Turner, J. M.) 209–216

Sex, effects of the administration of methionine, age and, on the metabolism of S-adenosylmethionine, S-adenosylhomocysteine and polyamines in various rat tissues (Eloranta, T. O.) 521–529

Sialyltransferases, microsomal, activity of, in regenerating rat liver (Serafini-Cessi, F.) 381–386

Skeletal muscle, see Muscle, skeletal

Small intestine, see Intestine, small

Spadix, cuckoo-pint, identification of iron–sulphur centres in mitochondria from, with very high rates of cyanide-resistant respiration (Cammack, R. & Palmer, J. M.) 347–355

Spermidine, modification by diamines of the relative concentrations of, and other polyamines in Ehrlich ascites-tumour cells (Kallio, A., Pösö, H., Guha, S. K. & Jänne, J.) 89–94

Spermidine, role of pyridoxal phosphate in the biosynthesis of, and other polyamines in various rat tissues (Pegg, A. E.) 81–88

Spermine, modification by diamines of the relative concentrations of, and other polyamines in Ehrlich ascites-tumour cells (Kallio, A., Pösö, H., Guha, S. K. & Jänne, J.) 89–94

Spermine, role of pyridoxal phosphate in the biosynthesis of, and other polyamines in various rat tissues (Pegg, A. E.) 81–88

Starvation, alterations in the regulation of the biosynthesis of insulin during, studied in isolated rat pancreatic islets of Langerhans (Bone, A. J. & Howell, S. L.) 501–507

Stenosis, pulmonary-artery, biosynthesis of protein during hypertrophy of the right ventricle of the dog heart after (Everett, A. W., Taylor, R. R. & Sparrow, M. P.) 315–321

Steroids, glucocorticoid, precocious development of the activity of uridine diphosphate glucuronosyltransferase during organ culture of foetal rat liver in the presence of (Wishart, G. J., Goheer, M. A., Leakey, J. E. A. & Dutton, G. J.) 249–253

Sterols, effects of changes in the composition of, on the adenine nucleotide transporter of Saccharomyces cerevisiae mitochondria (Haslam, J. M., Astin, A. M. & Nichols, W. W.) 559–563

Sterols, membrane, effects of altered composition of, on oxidative phosphorylation in a haem-deficient mutant of Saccharomyces cerevisiae (Astin, A. M. & Haslam, J. M.) 287–298

Streptozocin-disease, see Diabetes, streptozocin-induced

Submandibular gland, rat, formation of sulpholipids in (Pritchard, E. T.) 141–144

Sulpholipids, formation of, in rat submandibular salivary gland (Pritchard, E. T.) 141–144

Supernatant fraction, see Cytosol

Superoxide dismutase, subcellular distribution of the activities of myeloperoxidase and, in human neutrophil leucocytes (Rest, R. F. & Spitznagel, J. K.) 145–153

Sycamore (Acer pseudoplatanus) cells, influence of cations at the plasma membrane in controlling the secretion of polysaccharides by, in suspension culture (Morris, M. R. & Northcote, D. H.) 603–618

1977
INDEX OF SUBJECTS

Taurocholate, role of tubular reabsorption in rat kidney in the excretion of, and other bile acids in the urine (Barnes, S., Gollan, J. L. & Billing, B. H.) 65-73

Tendon cells, chick-embryo, effect of the formation of the triple helix of collagen on the hydroxylation of lysine residues and the glycosylation of hydroxylysine residues in, and cartilage cells (Oikarinen, A., Anttinenn, H. & Kivirikko, K. I.) 357-362

Testis, rat, effects of vitamin A nutritional status on the properties of ribonucleic acids of, and other tissues (Jayaram, M. & Ganguly, J.) 339-346

Testosterone, effects of castration and subsequent administration of, on the biosynthesis of cell-specific proteins by isolated guinea-pig seminal-vesicle epithelium (Veneziale, C. M., Burns, J. M., Lewis, J. C. & Büchi, K. A.) 167-173

Threonine, initiation by L-threonine aldolase of the degradation of, in Pseudomonas spp. (Bell, S. C. & Turner, J. M.) 209-216

L-Threonine aldolase, initiation by, of the degradation of threonine in Pseudomonas spp. (Bell, S. C. & Turner, J. M.) 209-216

Thyroid gland, chick, modulation by hyperthyroid and hypothyroid status of, of the induction by oestrogens of plasma riboflavin-binding protein in the immature bird (Murthy, U. S. & Adiga, P. R.) 647-650

Torpedo marmorata, biosynthesis of acetyl-coenzyme A in the electric organ of, in relation to the metabolism of acetylcholine (Diebler, M.-F. & Morot-Gaudry, Y.) 447-453

Transfer ribonucleic acid, see Ribonucleic acid, transfer

Transferrin, diferric, preferential utilization of iron bound to, by rabbit reticulocytes in vitro (Zapolski, E. J. & Princiotto, J. V.) 175-179

L-(3-Trifluoromethylphenyl)-2-[N-(2-benzyloxyethyl)-amino]propane (benfluorex), effects of acute administration of ethanol and of chronic administration of, on the activities of some enzymes involved in the biosynthesis of glycerolipids in rat liver and adipose tissue (Pritchard, P. H., Bowley, M., Burditt, S. L., Cooling, J., Glenny, H. P., Lawson, N., Sturton, R. G. & Brindley, D. N.) 639-642

Tryptophan pyrrolase, effects of the administration of endotoxin on the activities of 5-amino-5-oxovalerate synthase and, and evidence for an endogenous regulatory fraction of haem in rat liver (Bissell, D. M. & Hammond, L. E.) 301-304

Tyrosine, incorporation of, into protein during hypertrophy of the right ventricle of the dog heart after stenosis of the pulmonary artery (Everett, A. W., Taylor, R. R. & Sparrow, M. F.) 315-321

Tyrosine O-sulphate, differential repression of the biosynthesis of arylsulphatases in Aspergillus oryzae grown in the presence of (Burns, G. R. J. & Wynn, C. H.) 415-420

Uridine diphosphate glucuronosyltransferase, precocous development of the activity of, during organ culture of foetal rat liver in the presence of glucocorticoids (Wishart, G. J., Goheer, M. A., Leakey, J. E. A. & Dutton, G. J.) 249-253

Urine, role of tubular reabsorption in the kidney in the excretion of bile acids in, in the rat (Barnes, S., Gollan, J. L. & Billing, B. H.) 65-73

Valine, structural requirements for the inhibitory action of 12,13-epoxytrichothecenes on the incorporation of, into protein by rabbit reticulocyte cell-free systems (Carter, C. J. & Cannon, M.) 399-409

Virus, adeno-, see Adenovirus

Vitamin A, effects of the nutritional status of, on the properties of ribonucleic acids of rat liver, small-intestinal mucosa and testis (Jayaram, M. & Ganguly, J.) 339-346

Vitamin A, formation of, in the freshwater fish Saccobranchus fossilis (Barua, A. B. & Goswami, U. C.) 133-136

Vitamin B-6, see Pyridoxal phosphate

Vitamin C, see Ascorbate

Yeast (Saccharomyces cerevisiae), effects of altered composition of membrane sterols on oxidative phosphorylation in a haem-deficient mutant of (Astin, A. M. & Haslam, J. M.) 287-298

Yeast (Saccharomyces cerevisiae), effects of changes in sterol composition on the adenine nucleotide transporter of mitochondria from (Haslam, J. M., Astin, A. M. & Nichols, W. W.) 559-563

Yeast (Saccharomyces cerevisiae), effects of depletion of unsaturated fatty acids on the proton permeability and energetic functions of mitochondria from (Haslam, J. M. & Fellows, N. F.) 565-570

Yeast (Saccharomyces cerevisiae), inhibition by dibutylchloromethyltin chloride of the activity of the adenosine triphosphate synthase complex of mitochondria from (Cain, K., Partis, M. D. & Griffiths, D. E.) 593-602

Vol. 166
