*Ex officio Member of Committee.
†Representative of Editorial Board of the Biochemical Journal.
‡Representative of Group Secretaries.

Executive Secretary
A. I. P. Henton (7 Warwick Court, London WC1R 5DP)

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Several meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].
NOTICE FOR CONTRIBUTORS

The Biochemical Journal places emphasis on the prompt publication of both full-length papers (on average about 6 months after receipt) and rapid papers (on average 10–12 weeks after receipt).

For detailed instructions on the preparation of papers contributors (who need not be members of the Biochemical Society) should refer to Policy of the Journal and Instructions to Authors [Biochem. J. (1978) 169, 1–27] (obtainable free on request, in booklet form, from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP).

Papers submitted for publication should be addressed to the Editorial Manager, Biochemical Journal, 7 Warwick Court, London WC1R 5DP.

Contributors should note that the Biochemical Journal makes no manuscript handling charges, no page charges and no charges for plates. Reprints are available at modest cost at about the same time as publication, and, if an author is a member of the Biochemical Society, 50 reprints are provided free of charge.
NOTICE FOR SUBSCRIBERS

The Biochemical Journal is published and distributed by the Biochemical Society. It is published twice monthly, alternate issues being devoted to Molecular Aspects and to Cellular Aspects of biochemistry. It is planned that in 1979 eight volumes, each volume being made up of three issues, will be published according to the following schedule:

<table>
<thead>
<tr>
<th>Molecular Aspects</th>

*Completes volume, and includes Indexes.

Biochemical Society Transactions. This is a separate publication (see below). Volume 7 will be published in 1979, in six parts.

Subscription Rates to the Biochemical Journal. For non-members of the Biochemical Society the subscription rates for 1979 are shown below.

Subscribers to the Biochemical Journal can subscribe to Biochemical Society Transactions on a joint subscription, saving £15.00 (U.K. and Ireland) or $25.00 (elsewhere). The methods of despatch of both publications are shown below.

Terms are cash with order or against proforma invoice. Orders and subscriptions should be sent to the Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex, or through your normal agent.

Claims regarding issues lost or damaged in transit should be addressed to the Biochemical Society at the address given in the preceding paragraph. Claims cannot be entertained if they are received later than three months after the date of posting, plus such time as would be expected for transit by post.

Back Numbers. Enquiries for volumes 1–19 of the Journal should be addressed to William Dawson & Sons Ltd., Back Issues Department, Cannon House, Park Farm Road, Folkestone, Kent. Quotations for available issues of subsequent volumes and parts of the Journal, and also of Transactions, may be obtained on application to The Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex.

Microforms. The following versions are available.
Details and prices are available on request from the Biochemical Society’s Colchester office.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.

IMPORTANT NOTICE. All subscribers outside the U.K. and Ireland must remit in U.S. $ or the sterling equivalent at the rate of exchange prevailing at the date of payment.

1979
Index of Subjects

Acetylcholinesterase, electric-eel, formation of an unstable covalent intermediate during the inhibition by 1,3,2-dioxaphosphorinane 2-oxides of the activity of (Ashani, Y. & Leader, H.) 781–790

Acetyl-coenzyme A f8-N-Acetylhexosaminidase, placental, human, determination of (Pier, F.) 71–79

β-N-Acetylhexosaminidase, placental, human, determination of the carbohydrate compositions of the A and B isoenzymes of (Freeze, H., Geiger, B. & Miller, A. L.) 749–752

β-N-Acetylhexosaminidases, multiple forms and kinetic properties of, from colonic tumours and colonic mucosa from rats treated with 1,2-dimethylhydrazine (Mian, N., Herries, D. G., Cowen, D. M. & Batte, E. A.) 319–330

Adips, dicarboxylic, derivation of molecular pK values of, from dependences on pH (Dixon, H. B. F.) 249–250

Adenosine triphosphatase, sodium-plus-potassium ion-dependent, kidney, rabbit, lipid-depleted, requirement for negatively charged dispersions of phospholipids for interaction with (Isen de Caldentey, M. & Wheeler, K. P.) 265–273

Albumin, serum, human, partial non-cleavage by cyano- gen bromide of a methionine-cystine bond in (Doyen, N. & Laprese, C.) 251–254

Albumin, serum, ox, effects of sodium dodecyl sulphate on the adsorption of, and other proteins on N-(3-carboxypropionyl)aminoacidyl-Sepharose (Yon, R. J. & Simmonds, R. J.) 417–424

Albumin, serum, ox, interaction of dinitrophenyl groups bound to, with univalent fragments of anti-dinitrophenyl antibody (Knight, C. G. & Green, N. M.) 225–236

Alcohol dehydrogenase, comparison of the kinetics and mechanism of action of pig kidney aldehyde reductase with those of (Davidson, W. S. & Flynn, T. G.) 595–601

Aldehyde reductase, kidney, pig, kinetics and mechanism of action of (Davidson, W. S. & Flynn, T. G.) 595–601

Alkaline phosphatase, see Phosphatase, alkaline

Alkyl ketones, stimulation in vitro by, of the activity of defective Gunn-rat liver uridine diphosphate glucuronyltransferase (Lalani, E.-N. M. A. & Burchell, B.) 993–995

Alveolar proteinosis, characterization of a high-molecular-weight glycoprotein isolated from the pulmonary secretions of human patients with (Sahu, S. & Lynn, W. S.) 153–158

Amino acid sequences, N-terminal, comparison of, of variants of Staphylococcus spp. chloramphenicol acetyltransferase (Fitten, J. E. & Shaw, W. V.) 575–582

Amino acid sequences, N-terminal, determination of, of rabbit uterus uteroglobin and its precursor (Atger, M., Mercier, J.-C., Haze, G., Fridlansky, F. & Milgrom, E.) 985–988

4-Aminobutyrate aminotransferase, brain, rabbit, enzyme-induced inactivation by acetylenic and vinyl analogues of 4-aminobutyrate of, and other aminotransferases (John, R. A., Jones, E. D. & Fowler, L. J.) 721–728

4-Aminobutyrate, enzyme-induced inactivation by acetylenic and vinyl analogues of, of various mammalian aminotransferases (John, R. A., Jones, E. D. & Fowler, L. J.) 721–728

5-Aminolaevulinate synthetase, Rhodopseudomonas spheroides N.C.I.B. 8253, purification and properties of the high-activity form (Davies, R. C. & Neuberger, A.) 649–659

5-Aminolaevulinate synthetase, role of the binding of pyridoxal 5'-phosphate in the control of the activity of, in Rhodopseudomonas spheroides N.C.I.B. 8253 (Davies, R. C. & Neuberger, A.) 661–671

Aminotripeptidase, cytosolic, mucosal, small-intestinal, rabbit, purification and properties of (Douveng, C. & Maroux, S.) 801–808

Anabaena cylindrica, measurement in vivo of the evolution of hydrogen by, that is catalysed by hydrogenase independently of nitrogenase (Daday, A., Lambert, G. R. & Smith, G. D.) 139–144

Anhydrovitamin A3, Saccobranchus fossilis, naturally occurring, identification of, as 3-hydroxyxynhydroretinol (Barua, A. B., Verma, K. & Das, S. R.) 791–799

Antibody, anti-dinitrophenyl, interaction of dinitrophenyl groups bound to ox serum albumin with univalent fragments of (Knight, C. G. & Green, N. M.) 225–236

Anti-dinitrophenyl antibody, interaction of dinitrophenyl groups bound to ox serum albumin with univalent fragments of (Knight, C. G. & Green, N. M.) 225–236

Aorta, chick, additional evidence for the existence of a precursor to tropoelastin in (Heng-Khoo, C. S., Rucker, R. B. & Buckingham, K. W.) 559–567

Ascorbate, mechanism of the reduction by, of single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Aspartate aminotransferase, heart, pig, enzyme-induced inactivation by acetylenic and vinyl analogues of 4-aminobutyrate of, and other aminotransferases (John, R. A., Jones, E. D. & Fowler, L. J.) 721–728
Aspartate aminotransferase, heart, pig, generation by deamination of multiple forms of (Williams, J. A. & John, R. A.) 121–127
Aspartate aminotransferase, mitochondrial, liver, sheep, purification of, and comparison of its kinetic and other properties with those of the cytosolic isoenzyme (Orlacchio, A., Campos-Cavieiras, M., Pashev, I. & Munn, E. A.) 583–593
12-(4-Azido-2-nitrophenoxy)stearoylglucosamine, use of, as a photoreactive probe for the mapping of the envelope proteins of Newcastle-disease virus (Bramhall, J. S., Shifflett, M. A. & Wisnieski, B. J.) 765–768
Azurin, Pseudomonas aeruginosa, mechanism of the reduction by ascorbate of, and of other single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

_Bacillus caldotenax_, simple efficient methods for the purification of malate dehydrogenases from, and other bacteria (Wright, I. P. & Sundaram, T. K.) 441–448
_Bacillus cereus_, inactivation by 6β-bromopenicillanic acid of β-lactamase I from (Knot-Hunziker, V., Orlek, B. S., Sammes, P. G. & Waley, S. G.) 365–367
_Bacillus steatorophilus_ N.C.I.B. 8924, purification, properties and specificity of restriction endodeoxyribonuclease from (Clarke, C. M. & Hartley, B. S.) 49–62
_Bacillus steatorophilus_, simple efficient methods for the purification of malate dehydrogenases from, and other bacteria (Wright, I. P. & Sundaram, T. K.) 441–448
_Bacillus subtilis_, simple efficient methods for the purification of malate dehydrogenases from, and other bacteria (Wright, I. P. & Sundaram, T. K.) 441–448
Benzene dioxygenase system, _Pseudomonas putida_, properties of the iron–sulphur proteins of (Crutcher, S. E. & Geary, P. J.) 393–400
Benzylation oxide, plasma, pig, study by magnetic-resonance and kinetic methods of the properties of cupric ions in (Barker, R., Boden, N., Caygle, G., Charlton, S. C., Henson, R., Holmes, M. C., Kelly, I. D. & Knowles, P. F.) 289–302
2,3-Bis(phospho)-d-glycerate, breakdown of, catalysed by human ferrihaemoglobin (El-Yassin, D. I., Fell, D. A., Lloyd, B. B. & Fisher, R. B.) 373–375
Blood plasma, pig, study by magnetic-resonance and kinetic methods of the properties of cupric ions in benzylation oxide from (Barker, R., Boden, N., Caygle, G., Charlton, S. C., Henson, R., Holmes, M. C., Kelly, I. D. & Knowles, P. F.) 289–302
Blood serum, human, four-straight-line model for the characteristics of the binding of ox trypsin by (Tipping, R. M. & Sellman, S.) 493–499
Blood-group antigen, P_1_, human, purification of turtle-dove egg-white ovomucoid and its activity as a proteinase inhibitor and as (François-Gerard, C., Gerdary, C. & Beeley, J. G.) 679–685
_Bombyx mori_, see Silkworm
Bone, chicken, presence of _O_-phosphoserine and _O_-phosphothreonine residues in non-collagenous proteins and their absence from phosphorylated collagen from (Cohen-Solal, L., Lian, J. B., Kossiva, D. & Glimcher, M. J.) 81–98
_Borrelia microplus_, see Tick
_Botryodiploida theobromae_, separation and characterization of cellulases and β-glucosidases of (Umezurike, G. M.) 9–19
Brain, chicken, rapid aging of neurototoxic esterase from, after inhibition by di-isopropyl phosphorofluoridate (Clother, B. & Johnson, M. K.) 549–558
Brain, ox, intrinsic fluorescence of preparations of myelin sheath isolated from (Crag, A. J. & Rumsby, M. G.) 739–745
Brain, rabbit, enzyme-induced inactivation by acetylenic and vinyl analogues of 4-aminobutyrato 4-aminobutyrate aminotransferase from, and other aminotransferases (John, R. A., Jones, E. D. & Fowler, L. J.) 721–728
Brain, rat, characterization of the chromosomal non-histone proteins of the main classes of nuclei from, fractionated by zonal centrifugation (Tsitsiou, G. S., Cox, D., Mathias, A. P. & Ridge, D.) 331–346
Brain, rat, evidence for the methylation of the precursors of transfer ribonucleic acids in, during postnatal development (Elahi, E. & Sellinger, O. Z.) 381–384
Brain, rat, selective inactivation by sodium deoxycholate of lactate dehydrogenases from, and other tissues (Lehnert, T. & Berlet, H. H.) 813–818
6β-Bromopenicillanic acid, inactivation by, of _Bacillus cereus_ lactamase I (Knot-Hunziker, V., Orlek, B. S., Sammes, P. G. & Waley, S. G.) 365–367
Cadmium(Ii), removal of, from crystallized horse spleen ferritin (Hegenauer, J., Saltman, P. & Halten, L.) 693–695
Calcium ions, effects of pH and, on the intrinsic fluororescence of ox prothrombin fragment I (Scott, M. E., Koehler, K. A. & Hiskey, R. G.) 879–886
Calmodulins, purification and characterization of, from rabbit smooth muscle and other tissues (Grand, R. J. A., Perry, S. V. & Weeks, R. A.) 521–529
_Candida utilis_ C.E.C.T. 1061, purification and characterization of endo-1,3-β-glucanase secreted into the culture medium by (Villa, T. G., Notario, V. & Villanueva, J. R.) 107–114
Carbohydrate compositions, determination of, of the A and B isoenzymes of human placental β-N-acetylhexosaminidase (Freeze, H., Geiger, B. & Miller, A. L.) 749–752
_N-3-Carboxypropionyl)_aminodecyl-Sepharose, effects of sodium dodecyl sulphate on the adsorption of proteins on (Yon, R. J. & Simmonds, R. J.) 417–424
_Carica papaya_, see Papaya
Cartilage, chick-embryo, modified procedure for the preparation of Smith-degraded proteoglycans for use as substrates in the assay of the activity of xylosyl-transferase in extracts of (Sandy, J. D.) 569–574

Vol. 177
INDEX OF SUBJECTS

Cartilage, laryngeal, pig, role of link-protein in the structure of aggregates of hyaluronate and proteoglycans from (Hardingham, T. E.) 237–247

Cathepsin D, spleen, ox, activation by glycine ethyl ester of (Dionysiou-Asteriou, A. & Rakitzis, E. T.) 355–356

Cellulases, Botryodiplodia theobromae, separation and characterization of, and β-glucosidases (Umezurike, G. M.) 9–19

Central nervous system, see Nervous system, central

Chick, additional evidence for the existence of a precursor to tropoelastin in aorta of (Heng-Khoo, C. S., Rucker, R. B. & Buckingham, K. W.) 559–567

Chick embryo, modified procedure for the preparation of Smith-degraded proteoglycans for use as substrates in the assay of the activity of xylosyltransferase in extracts of cartilage of (Sandy, J. D.) 569–574

Chick, purification and characterization of the ferredoxin component of kidney 25-hydroxycholcalciferol of (Kulkoski, J. A. & Ghazarian, G.) 673–678

Chick, ‘affinity’ chromatography of liver oestradiol-17β dehydrogenase from, and other steroid-transforming enzymes on columns of p-(phenoxypropoxy)aniline attached to Sepharose (Renwick, A. G. C., Chambers, S. M. & Wilcox, P.) 401–408

Chicken egg-white, isolation and characterization of thiamin-binding protein from, and its interaction with riboflavin-binding protein (Muniyappa, K. & Adiga, P. R.) 887–894

Chicken, ligand-induced conformational transitions and secondary structure composition of liver pyruvate carboxylase from (McGurk, K. S. & Spivey, H. O.) 697–705

Chicken, presence of O-phosphoserine and O-phosphothreonine residues in non-collagenous proteins and their absence from phosphorylated collagen from bone of (Cohen-Solal, L., Lian, J. B., Kossiva, D. & Glimcher, M. J.) 81–98

Chicken, rapid aging of neurotoxic esterase from brain of, after inhibition by di-isopropyl phosphorofluoridate (Clothier, B. & Johnson, M. K.) 549–558

Chloramphenicol acetyltransferase, Staphyloccocus spp., purification, inhibitor studies and N-terminal amino acid sequences of variants of (Fittion, J. E. & Shaw, W. V.) 575–582

4-Chloro-7-nitrobenzofurazan, anomalous reaction of, with thiols (Nitta, K., Bratcher, S. C. & Kronman, M. J.) 385–392

4-Chloro-7-nitro-2-oxa-1,3-diazole, see 4-Chloro-7-nitrobenzofurazan

Chloroplasts, lettuce-leaf, purification by ion-exchange chromatography of the membrane dicyclohexylcarbodi-imide-binding proteolipid from (Sigrist-Nelson, K. & Azzi, A.) 687–692

Cholecalciferol, 25-hydroxy-, purification and characterization of the ferredoxin component of the chick kidney enzyme responsible for the 1α-hydroxylation of (Kulkoski, J. A. & Ghazarian, J. G.) 673–678

Cholesterol, effect of the ratio of, to phospholipid in human erythrocyte-‘ghost’ membrane on cholesterol exchange (Poznansky, M. J. & Czekanski, S.) 989–991

Cholesterol, utilization of endogenous and exogenous sources of substrate for the biosynthesis of, by isolated rat hepatocytes (Gibbons, G. F. & Pullinger, C. R.) 255–263

Chromatin, Saccharomyces carlsbergensis, isolation and characterization of histones from (Pastink, A., Berkhour, T. A., Mager, W. H. & Planta, R. J.) 917–923

Chromatium vinosum A.T.C.C. 17899, determination of the amino acid sequence of cytochrome c′ from (Ambler, R. P., Daniel, M., Meyer, T. E., Bartsch, R. G. & Kamen, M. D.) 819–823

Chromosomes, characterization of the non-histone proteins of, of the main classes of rat brain nuclei fractionated by zonal centrifugation (Tsitsilou, S. G., Cox, D., Mathias, A. P. & Ridge, D.) 331–346

α-Chymotrypsin, activation by, of silkworm tyrosinase precursor and its relevance to light-induced pigmentation (Kuan, K. N., Lee, Y. Y. & Melius, P.) 981–983

Citrate synthase, heart, pig, formation of diastereoisomers of methylcitrate catalysed by, and its relevance to the appearance of methylcitrate in the urine of human patients with proprionic acidemia (Weidman, S. W. & Drysdale, G. R.) 169–174

Collagen fibres and bundles, possible role for dehydrodihydroxyisoinonorleucine in the formation of, in rat connective tissue (Boucek, R. J., Noble, N. L. & Gunja-Smith, Z.) 853–860

Collagens, various, characterization of the hydroxylysine-linked glycosides of human complement subcomponent Clq and of (Shinkai, H. & Yonemasu, K.) 847–852

Colon, rat, multiple forms and kinetic properties of β-N-acetylhexosaminidases from mucosa of, and from colonic tumours from animals treated with 1,2-dimethylhydrazine (Mian, N., Herries, D. G., Cowen, D. M. & Batte, E. A.) 319–330

Complement, human, characterization of the hydroxylysine-linked glycosides of subcomponent Clq of, and of various collagens (Shinkai, H. & Yonemasu, K.) 847–852

Complement, ox, purification and characterization of component C4 from (Booth, N. A., Campbell, R. D. & Fothergill, J. E.) 959–965

Complement, ox, purification and characterization of subcomponent Clq from (Campbell, R. D., Booth, N. A. & Fothergill, J. E.) 531–540

Component C1, complement, human, characterization of the hydroxylysine-linked glycosides of subcomponent Clq of, and of various collagens (Shinkai, H. & Yonemasu, K.) 847–852

Component C1, complement, ox, purification and characterization of subcomponent Clq of (Campbell, R. D., Booth, N. A. & Fothergill, J. E.) 531–540

Component C4, complement, ox, purification and characterization of (Booth, N. A., Campbell, R. D. & Fothergill, J. E.) 959–965

Connective tissue, rat, possible role for dehydrodihydroxyisoinonorleucine in the formation of collagen fibres and bundles in (Boucek, R. J., Noble, N. L. & Gunja-Smith, Z.) 853–860

1979
INDEX OF SUBJECTS

Copper ion sites, study by nuclear-magnetic-relaxation measurements of the properties of, of ox erythrocyte superoxide dismutase (Boden, N., Holmes, M. C. & Knowles, P. F.) 303–309

Copper ions, study by magnetic-resonance and kinetic methods of the properties of, of pig plasma benzylamine oxidase (Barker, R., Boden, N., Cayley, G., Charlton, S. C., Henson, R., Holmes, M. C., Kelly, I. D. & Knowles, P. F.) 289–302

Copper, type-I, evidence for the presence of, in a product (Compound Cδ) of the reaction of oxygen with the mixed-valence state of ox heart mitochondrial cytochrome c oxidase (Chance, B., Saronio, C. & Leigh, J. S., Jr.) 931–941

Cortisone reductase, Streptomyces dehydrogenans, ‘affinity’ chromatography of, and other steroid-transforming enzymes on columns of p-(phenoxypropoxy)aniline attached to Sepharose (Renwick, A. G. C., Chambers, S. M. & Willcox, P.) 401–408

Corynebacterium ovis, purification and partial characterization of the extracellular toxin produced by (Onon, E. O.) 181–186

Coryphaena hippurus, see Dolphin fish

Creatine kinase, skeletal-muscle, rabbit, reaction of some derivatives of iodoacetamide with (Price, N. C.) 603–612

Cupric ion sites, study by nuclear-magnetic-relaxation measurements of the properties of, of ox erythrocyte superoxide dismutase (Boden, N., Holmes, M. C. & Knowles, P. F.) 303–309

Cupric ions, study by magnetic-resonance and kinetic methods of the properties of, of pig plasma benzylamine oxidase (Barker, R., Boden, N., Cayley, G., Charlton, S. C., Henson, R., Holmes, M. C., Kelly, I. D. & Knowles, P. F.) 289–302

Cysteine residue 165, ‘essential’, properties of pig heart lactate dehydrogenase in which, has been modified by thioalkylation (Blaxholm, D. P., Sharma, R. P. & Wilton, D. C.) 769–780

Cysteine residues, evidence for two chemically distinct sites and a role for histidine residues and, in the binding of triethylthion to cat haemoglobin (Elliott, B. M., Aldridge, W. N. & Bridges, J. W.) 461–470

Cytidine monophosphate acyclenucininate synthase, liver, frog, synthesis of cytidine monophosphate sialic acids by using, immobilized on Sepharose 4B (Corfield, A. P., Schauer, R. & Wember, M.) 1–7

Cytidine monophosphate sialic acids, synthesis of, by using frog liver cytidine monophosphate acyclenucininate synthase immobilized on Sepharose 4B (Corfield, A. P., Schauer, R. & Wember, M.) 1–7

Cytochrome c, heart, horse, mechanism of the reduction by ascorbate of, and of other single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Cytochrome c oxidase, membrane-bound, mitochondrial, heart, ox, fully reduced, low-temperature kinetics of the reaction of, with oxygen studied by spectroscopy in the Soret, α-band and near-infrared regions (Clare, G. M. & Chance, E. M.) 613–621

Cytochrome c oxidase, mitochondrial, heart, ox, evidence for the presence of type-I copper in a product (Compound Cγ) of the reaction of oxygen with the mixed-valence state of (Chance, B., Saronio, C. & Leigh, J. S., Jr.) 931–941

Cytochrome c551, Pseudomonas aeruginosa, mechanism of the reduction by ascorbate of, and of other single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Cytosol, liver, rat, purification and properties of a protein factor from, that binds and decaysates initiator transfer ribonucleic acid (Pohlreich, P., Kříž, O., Tuhačková, Z., Dušek, Z. & Hradec, J.) 707–719

Cytosol, mucosal, small-intestinal, rabbit, purification and properties of aminohydroptidase from (Dounemg, C. & Maroux, S.) 801–808

Cytochrome oxidase, Pseudomonas aeruginosa, mechanism of (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Dehydrodihydroxylysinosorine, possible role for, in the formation of collagen fibres and bundles in rat connective tissue (Boucek, R. J., Noble, N. L. & Gunja-Smith, Z.) 853–860

Deoxycholate, sodium, selective inactivation by, of lactate dehydrogenases from various rat tissues (Lehnert, T. & Berlet, H. H.) 813–818

Deoxyribonuclease, endo-, restriction, Bacillus stearothermophilus N.C.I.B. 8924, purification, properties and specificity of (Clarke, C. M. & Hartley, B. S.) 49–62

Deoxyribonucleic acid, use of convolution analysis as a mathematical method for the study of the transcription of, by yeast ribonucleic acid polymerase A (Cooper, C. S. & Quincey, R. V.) 825–831

Deoxyribonucleic acids, specificity of the cleavage of, by Bacillus stearothermophilus N.C.I.B. 8924 restriction endodeoxyribonuclease (Clarke, C. M. & Hartley, B. S.) 49–62

Development, postnatal, evidence for the methylation of the precursors of rat brain transfer ribonucleic acids during (Elahi, E. & Sellingier, O. Z.) 381–384

Diamine oxidase, activities of polyamine oxidase and, in normal and transformed rat kidney cells (Quash, G., Keolouangkhot, T., Gazzolo, L., Ripoll, H. & Saez, S.) 275–282

Diamine oxidases, induction by, of inhibition of the activity of ornithine decarboxylase in rat liver (Kallos, A. & Lofman, M., Pösö, H. & Jänne, J.) 63–69

Dietcysteum discoides, accumulation of uridine diphasphate glucose pyrophosphorylase by axenically grown amoeabae of (Hames, B. D. & Hodson, B. A.) 21–28

Dietcysteum discoides, mechanism of the reduction by ascorbate of cytochrome c from, and of other single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Dihydrofolate reductase, see Tetrahydrofotate dehydrogenase

Di-isopropyl phosphorofluoridate, rapid aging of chicken brain neurotoxic esterase after inhibition by (Clothier, B. & Johnson, M. K.) 549–558
INDEX OF SUBJECTS

1,2-Dimethylhydrazine, multiple forms and kinetic properties of β-N-acetylhexosaminidases from colonic tumours and colonic mucosa from rats treated with (Mian, N., Herries, D. G., Cowen, D. M. & Batte, E. A.) 319–330

Dimethylnitrosamine, persistence of methylated base residues in hamster liver ribonucleic acids after administration of, to the animals (Margison, G. P., Margison, J. M. & Montesano, R.) 967–973

Dinitrophenyl groups, interaction of, bound to ox serum albumin with univalent fragments of anti-dinitrophenyl antibody (Knight, C. G. & Green, N. M.) 225–236

1,3,2-Dioxaphosphorinane 2-oxides, formation of an unstable covalent intermediate during the inhibition by, of the activity of electric-eel acetylcholinesterase (Ashani, Y. & Leader, H.) 781–790

Dissociation constants, molecular, derivation of values for the negative logarithm (pK) of, of dibasic acids from dependences on pH (Dixon, H. B. F.) 249–250

Dodecyl sulphate, sodium, effects of, on the adsorption of proteins on N-(3-carboxypropionyl)aminodecyl-Sepharose (Yon, R. J. & Simmonds, R. J.) 417–424

Dogfish (Squalus acanthias), Egg-white, chicken, Electric eel (Electrophorus electricus), formation of an unstable covalent intermediate during the inhibition by, of the activity of electric-eel acetylcholinesterase (Ashani, Y. & Leader, H.) 781–790

Dolphin fish (Coryphaena hippurus), mechanism of the reduction by ascorbate of cytochrome c from, and of other single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Egg-white, chicken, isolation and characterization of thiamin-binding protein from, and its interaction with riboflavin-binding protein (Muniyappa, K. & Adiga, P. R.) 887–894

Egg-white, turtle-dove, purification of ovomucoid from, and its activity as a proteinase inhibitor and as a human Pi blood-group antigen (François-Gerard, C., Gerday, C. & Beeley, J. G.) 679–685

Elastin, additional evidence for the existence of a precursor to tropoelastin involved in the biosynthesis of, in chick aorta (Heng-Khoo, C. S., Rucker, R. B. & Buckingham, K. W.) 559–567

Electric eel (Electrophorus electricus), formation of an unstable covalent intermediate during the inhibition by 1,3,2-dioxaphosphorinane 2-oxides of the activity of acetylcholinesterase from (Ashani, Y. & Leader, H.) 781–790

Electrophorus electricus, see Electric eel

Enzymes, patterns of apparent co-operativity in a simple random non-equilibrium mechanism for the interaction of substrates, modifiers and, and comparison with equilibrium allosteric models (Whitehead, E. P. & Egmond, M. R.) 631–639

Epidermis, hoof and snout, ox, intraspecies heterogeneity of keratins of (Lee, L. D., Kubilus, J. & Baden, H. P.) 187–196

Erythrocyte 'ghosts', human, effect of the ratio of cholesterol to phospholipid in the membrane of, on cholesterol exchange (Poznarsky, M. J. & Czekanski, S.) 989–991

Erythrocytes, ox, binding of zinc ions to the apoenzyme of superoxide dismutase from (Cass, A. E. G., Hill, H. A. O., Bannister, J. V. & Bannister, W. H.) 477–486

Erythrocytes, ox, study by nuclear-magnetic-relaxation measurements of the properties of the cupric ion sites of superoxide dismutase from (Boden, N., Holmes, M. C. & Knowles, P. F.) 303–309

Escherichia coli, determination of the redox potentials of molybdenum and iron-sulphur centres in nitrate reductase from (Vincent, S. P.) 757–759

Escherichia coli, interaction of the lacZ β-galactosidase of, with competitive inhibitors and the role of magnesium ions and ionizations in the activity of the enzyme (Loeffler, R. S. T., Sinnott, M. L., Sykes, B. D. & Withers, S. G.) 145–152

Escherichia coli K12, polypeptide-chain stoichiometry and lipidic acid content of the pyruvate dehydrogenase complex of (Hale, G. & Perham, R. N.) 129–137

Esterase, neurotoxic, brain, rapid aging of, after inhibition by di-isopropyl phosphorofluoridate (Clothier, B. & Johnson, M. K.) 549–558

Estriadiol, see Oestradiol

Estrogens, see Oestrogens

Ethidium bromide, use of, in a rapid and sensitive method for determination of ribonucleic acid in ribosomal preparations (Mackie, C., Bryant, T. H. E. & Mowbray, J.) 977–979

Eye, sheep, use of cross-linking reagents in an investigation of the organization of rhodopsin in the photoreceptor membrane of rod outer segments of retina of (Brett, M. & Findlay, J. B. C.) 215–223

Fatty acids, compositions of glycolipids and, of two lines of cultured dog kidney cells (Houglan, A. E., Gaus, C. R. & Mayberry, W. R.) 311–317

Ferredoxin component, purification and characterization of, of chick kidney 25-hydroxycholecalciferol 1α-hydroxylase (Kulkoski, J. A. & Ghazarian, J. G.) 673–678

Ferritin, spleen, horse, crystallized, removal of cadmium (II) from (Hegenauer, J., Saltman, P. & Hatlen, L.) 693–695

Formaldehyde dehydrogenase, liver, human, steady-state kinetic model for the mechanism of the reaction catalysed by (Uotila, L. & Mannervik, B.) 869–878

N10-Formyltetrahydrofolate dehydrogenase, roles of pyruvate carboxylase and, in rat liver in the toxic effects of excess of dietary histidine (Scrutton, M. C. & Beis, I.) 833–846

Fowl-pest virus, see Newcastle-disease virus

α-L-Fucosidase, liver, human, subunit composition of (Alhadef, J. A. & Andrews-Smith, G. L.) 753–756

Fumarase, heart, pig, use of affinity chromatography for the purification of (Chaudhuri, S. & Thomas, E. W.) 115–119

β-Galactosidase, lacZ, Escherichia coli, interaction of, with competitive inhibitors and the role of magnesium ions and ionizations in the activity of the enzyme (Loeffler, R. S. T., Sinnott, M. L., Sykes, B. D. & Withers, S. G.) 145–152

1979
INDEX

of SUBJECTS

1,3-β-Glucoamylase/maltase, small-intestine, rat, enzyme activity in partly dissociated fragments of (Flanagan, P. R. & Forstner, G. G.) 487–492

β-Glucosidases, Botryodiplodia theobromae, separation and characterization of, and cellulases (Umezukie, G. M.) 9–19

Glucuronides, endo-, 1,3-fi-Glucanase, Glutathione S-transferase peroxidase, Glycolipids, compositions Glutathione

Glycosides, hydroxylysine-linked, Glycine ethyl cat, Haemoglobin, Vol.

characterization of, secreted into the culture medium by (Electricwala, A. H. & Dickinson, F. M.) 449–459

Kellie, A. J.) 487–499

Glutathione S-transferase (Electricwala, A. H. & Dickinson, F. M.) 487–499

Glutathione S-transferase A, liver, rat, kinetic analysis supporting a steady-state random sequential mechanism for the multiple inhibition by derivatives of, and rat liver glutathione S-transferase A (Jakobson, I., Warholm, M. & Mannervik, B.) 861–868

Glutathione peroxidase, liver, guinea-pig, non-selenium-dependent, reduction of lipid hydroperoxides and steroid hydroperoxides catalysed by (Shreve, M. R., Morrissey, P. G. & O’Brien, P. J.) 761–763

Glutathione, reduced, role of, as an allosteric activator in a steady-state kinetic model for the mechanism of the reaction catalysed by human liver formaldehyde dehydrogenase (Uotila, L. & Mannervik, B.) 869–878

Glutathione S-transferase A, liver, rat, kinetic analysis supporting a steady-state random sequential mechanism for the multiple inhibition by glutathione derivatives of (Jakobson, I., Warholm, M. & Mannervik, B.) 861–868

Glutathione S-transferase B (ligandin), liver, rat, effects of modification of the thiol groups on the binding and catalytic activities of (Carne, T., Tipping, E. & Ketterer, B.) 433–439

Glycerol phosphate acyltransferase, liver, rat, evidence for the existence of mitochondrial and microsomal iso-enzymes of (Nimmo, H. G.) 283–288

Glycine ethyl ester, activation by, of ox spleen cathepsin D (Dionyssiou-Asteriou, A. & Rakitzis, E. T.) 355–356

Glycolipids, compositions of fatty acids and, of two lines of cultured dog kidney cells (Hougland, A. E., Gaush, C. R. & Mayberry, W. R.) 311–317

Glycoprotein, high-molecular-weight, characterization of, isolated from the pulmonary secretions of human patients with alveolar proteinosis (Sahu, S. & Lynn, W. S.) 153–158

Glycosides, hydroxylysine-linked, characterization of, of human complement subcomponent Clq and of various collagens (Shinkai, H. & Yonematsu, K.) 847–852

Haemoglobin, cat, evidence for two chemically distinct sites and a role for histidine and cysteine residues in the binding of triethyltin to (Elliott, B. M., Aldridge, W. N. & Bridges, J. W.) 461–470

Haemoglobin, human, effects of sodium dodecyl sulphate on the adsorption of, and other proteins on N-(3-carboxypropionyl)aminodecyl-Sepharose (Yon, R. J. & Simmonds, R. J.) 417–424

Heart, horse, mechanism of the reduction by ascorbate of cytochrome c from, and of other single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Heart muscle, rat, selective inactivation by sodium deoxycholate of lactate dehydrogenases from, and other tissues (Lehnerti, T. & Berlet, H. H.) 813–818

Heart, ox, evidence for the presence of type-I copper in a product (Compound C2) of the reaction of oxygen with the mixed-valence state of mitochondrial cytochrome c oxidase from (Chance, B., Saronio, C. & Leigh, J. S., Jr.) 931–941

Heart, ox, low-temperature kinetics of the reaction of fully reduced mitochondrial membrane-bound cytochrome c oxidase from, with oxygen studied by spectroscopy in the Soret, a-band and near-infrared regions (Clere, G. M. & Chance, E. M.) 613–621

Heart, pig, enzyme-induced inactivation by acetylenic and vinyl analogues of 4-aminobutyrate of aspartate aminotransferase from, and other aminotransferases (John, R. A., Jones, E. D. & Fowler, L. J.) 721–728

Heart, pig, formation of diastereoisomers of methylcitrate catalysed by citrate synthase from, and its relevance to the appearance of methylcitrate in the urine of human patients with propionic acidemia (Weidman, S. W. & Drysdale, G. R.) 169–174

Heart, pig, generation by deamidation of multiple forms of aspartate aminotransferase from (Williams, J. A. & John, R. A.) 121–127

Heart, pig, mechanism of the formation of the adduct between oxidized nicotinamide–adenine dinucleotide and pyruvate that is bound to lactate dehydrogenase from (Wilton, D. C.) 951–957

Heart, pig, preparation of stable complexes of oxidized nicotinamide–adenine dinucleotide and derivatives with lactate dehydrogenase from, with endogenous catalytic activity (Gacesa, P. & Venn, R. F.) 369–372

Heart, pig, properties of lactate dehydrogenase from, in which the 'essential' cysteine residue 165 has been modified by thioalkylation (Bloxbham, D. P., Sharma, R. P. & Wilton, D. C.) 769–780

Heart, pig, use of affinity chromatography for the purification of fumarase from (Chaudhuri, S. & Thomas, E. W.) 115–119

Hen, see Chicken

Hepatocytes, rat, isolated, utilization of endogenous and exogenous sources of substrate for the biosynthesis of cholesterol by (Gibbons, G. F. & Pullinger, C. R.) 255–263

Hexosaminidase, see N-Acetylxahexosaminidase

Histidine, dietary, roles of pyruvate carboxylase and N10-formyltetrahydrofolate dehydrogenase in rat liver in the toxic effects of excess of (Scrutton, M. C. & Beis, I.) 833–846

Histidine residues, evidence for two chemically distinct sites and a role for cysteine residues and, in the binding of triethyltin to cat haemoglobin (Elliott, B. M., Aldridge, W. N. & Bridges, J. W.) 461–470

Vol. 177

Homoserine residue, formation of, during the partial non-cleavage of a methionine–cystine bond in human serum albumin and in ox e-lactalbumin (Doyen, N. & Lapresle, C.) 251–254

Housefly (*Musca domestica*), activity of uridine diphosphate glucosyltransferase in microsomal fraction from (Morello, A. & Repetto, Y.) 809–812

Hyaluronate, role of

Hyaluronate, measurement

Hydrogen, measurement *in vivo* of the evolution of, by *Anabaena cylindrica* that is catalysed by hydrogenase independently of nitrogenase (Daday, A., Lambert, G. R. & Smith, G. D.) 139–144

Hydrogenase, measurement *in vivo* of the evolution of hydrogen by *Anabaena cylindrica* that is catalysed by, independently of nitrogenase (Daday, A., Lambert, G. R. & Smith, G. D.) 139–144

Hydrolases, lysosomal, characterization of, in urine of human patients with mucolipidosis II (I-cell disease) and mucolipidosis III (Kress, C. B. & Miller, A. L.) 409–415

Hydrolases, lysosomal, liver, human, binding by immobilized lectins of (Fiddler, M. B., Ben-Yoseph, Y. & Nadler, H. L.) 175–180

3(17)-β-Hydroxy steroid dehydrogenase, *Pseudomonas testosteroni*, 'affinity' chromatography of, and other steroid-transforming enzymes on columns of p-(phenoxypropoxy)aniline attached to Sepharose (Rennick, A. G. C., Chambers, S. M. & Willcox, P.) 401–408

3-Hydroxyanhydroretinol, identification of the naturally occurring anhydrovitamin A₂ of *Saccobranchus fossilis* as (Barua, A. B., Verma, K. & Das, S. R.) 791–799

25-Hydroxycholecalciferol 1α-hydroxylase, kidney, chick, purification and characterization of the ferredoxin component of (Kulkoski, J. A. & Ghazarian, J. G.) 673–678

Hydroxylsine residues, characterization of the glycosides linked to, of human complement subcomponent C1q and of various collagens (Shinkai, H. & Yonematsu, K.) 847–852

I-cell disease (mucolipidosis II), characterization of lysosomal hydrolases in urine of human patients with, and mucolipidosis III (Kress, B. C. & Miller, A. L.) 409–415

Intestine, large, rat, multiple forms and kinetic properties of β-N-acetylhexosaminidases from mucosa of, and from colonic tumours from animals treated with 1,2-dimethyldrizaine (Mian, N., Herries, D. G., Cowen, D. M. & Batte, E. A.) 319–330

Intestine, small, rabbit, purification and properties of cytosolic aminopeptidase from the mucosa of (Doumenq, C. & Maroux, S.) 801–808

Intestine, small, rat, enzyme activity in partly dissociated fragments of maliase/glucosaminylase from (Flanagan, P. R. & Forstner, G. G.) 487–492

Intestine, small, rat, inhibition by β-2-thienyl-DL-alanine of the activity of phenylalanine hydroxylase in rat liver and kidney and of the transport of phenylalanine by (Wapnin, R. A. & Moak, G. S.) 347–352

Iodoacetamide, reaction of some derivatives of, with rabbit skeletal-muscle creatine kinase (Price, N. C.) 603–612

Iron–sulphur centre, characterization of, of reduced nicotinamide adenine dinucleotide–acceptor oxidoreductase (component C) of *Methyloccocus capsulatus* methane mono-oxygenase complex (Colby, J. & Dalton, H.) 903–908

Iron–sulphur centres, determination of the redox potentials of molybdenum and, in *Escherichia coli* nitrate reductase (Vincent, S. P.) 757–759

Iron–sulphur proteins, properties of, of the *Pseudomonas putida* benzene dioxygenase system (Crutcher, S. E. & Geary, P. J.) 393–400

Keratins, epidermal, hoof and snout, ox, intraspecies heterogeneity of (Lee, L. D., Kubiul, J. & Baden, H. P.) 187–196

Kidney cells, dog, cultured, compositions of glycolipids and fatty acids of two lines of (Hougland, A. E., Gaush, C. R. & Mayberry, W. R.) 311–317

Kidney cells, rat, normal and transformed, activities of diamine oxidase and polyamine oxidase in (Quash, G., Keolouangkhot, T., Gazzolo, L., Ripoll, H. & Saez, S.) 275–282

Kidney, chick, purification and characterization of the ferredoxin component of 25-hydroxycholecalciferol 1α-hydroxylase from (*Kulskoski, J. A. & Ghazarian, J. G.* 673–678

Kidney, pig, kinetics and mechanism of action of aldehyde reductase from (Davidson, W. S. & Flynn, T. G.) 595–601

Kidney, rabbit, requirement for negatively charged dispersions of phospholipids for interaction with lipid-depleted sodium-pluss-potassium ion-dependent adenosine triphosphatase from (Isen de Caldentey, M. & Wheeler, K. P.) 265–273

Kidney, rat, inhibition by β-2-thienyl-DL-alanine of the activity of phenylalanine hydroxylase in, and liver and of the transport of phenylalanine by the small intestine (Wapnin, R. A. & Moak, G. S.) 347–352

α-Lactalbumin, ox, partial non-cleavage by cyanogen bromide of a methionine–cystine bond in (Doyen, N. & Lapresle, C.) 251–254

Lactate dehydrogenase, heart, pig, mechanism of the formation of the adduct between oxidized nicotinamide–adenine dinucleotide and pyruvate that is bound to (Wilton, D. C.) 951–957

Lactate dehydrogenase, heart, pig, preparation of stable complexes of oxidized nicotinamide–adenine dinucleotide and derivatives with, with endogenous catalytic activity (Gaesa, P. & Venn, R. F.) 369–372

---

1979
INDEX OF SUBJECTS

Liver, guinea-pig, reduction of lipid hydroperoxides and steroid hydroperoxides catalysed by a non-selenium-dependent glutathione peroxidase from (Shreve, M. R., Morrissey, P. G. & O'Brien, P. J.) 761–763
Liver, hamster, persistence of methylated base residues in ribonucleic acids of, after administration of dimethyluric acid to the animals (Margison, G. P., Margison, J. M. & Montesano, R.) 967–973
Liver, human, binding by immobilized lectins of lysosomal hydrolases from (Fiddler, M. B., Ben-Yoseph, Y. & Nadler, H. L.) 175–180
Liver, human, partial purification of human milk alkaline phosphatase and comparison of its properties with those of the isoenzymes from, and placenta (Hamilton, T. A., Görgnicki, S. Z. & Sussman, H. H.) 197–201
Liver, human, steady-state kinetic model for the mechanism of the reaction catalysed by formaldehyde dehydrogenase from (Uotila, L. & Mannervik, B.) 869–878
Liver, human, subunit composition of α-L-fucosidase from (Alhadeff, J. A. & Andrews-Smith, G. L.) 753–756
Liver, mouse, properties of mitochondrial monoamine oxidase from, of obese–hyperglycaemic (ob/ob) animals (Tong, J. H., Limson-Zamora, M., D'Iorio, A. & Bégin-Heick, N.) 943–949
Liver, rabbit, use of 31P nuclear-magnetic-resonance spectroscopy to study the metabolism of nucleotides by microsomal uridine diphosphate glucuronyltransferase and nucleoside diphosphatase from (Finch, S. A. E., Slater, T. F. & Stier, A.) 925–930
Liver, rat, comparison of endogenous and exogenous ribonucleic acids as primers for the activity of polyuridylic polymerase in ribosomes from (Hayashi, T. T. & MacFarlane, K.) 895–902
Liver, rat, effects of modification of the thiol groups on the binding and catalytic activities of (Carne, T., Tipping, E. & Ketterer, B.) 433–439
Liver, rat, evidence for the existence of isoenzymes of glycerol phosphate acyltransferase in the mitochondrial and microsomal fractions of (Nimmo, H. G.) 283–288
Liver, rat, Gunn, stimulation in vitro by alkyl ketones of the activity of defective uridine diphosphate glucuronyltransferase from (Lalani, E.-N. M. A. & Burchell, B.) 993–995
Liver, rat, induction by diaminos of inhibition of the activity of ornithine decarboxylase in (Kallio, A., Löfman, M., Pöösö, H. & Jänne, J.) 63–69
Liver, rat, inhibition by β-2-thienyl-dl-alanine of the activity of phenylalanine hydroxylase in, and kidney and of the transport of phenylalanine by the small intestine (Wapir, R. A. & Moak, G. S.) 347–352

Vol. 177

Lactate dehydrogenase, heart, pig, properties of, in which the 'essential' cysteine residue 165 has been modified by thioalkylation (Bloxham, D. P., Sharma, R. P. & Wilton, D. C.) 769–780
Lactate dehydrogenases, selective inactivation by sodium deoxycholate of, from various rat tissues (Lehnert, T. & Berlet, H. H.) 813–818
Lactobacillus casei MTX/R, circular-dichroism studies of the binding of ligands to tetrahydrofolate dehydrogenase from (Hood, K., Bayley, P. M. & Roberts, G. C. K.) 425–432
Lactuca scariata, see Lettuce
Large intestine, see Intestine, large
Larynx, pig, role of link-protein in the structure of aggregates of hyaluronate and proteoglycans from cartilage of (Hardingham, T. E.) 237–247
Leaves, lettuce, purification by ion-exchange chromatography of the chloroplast membrane dicyclohexylcarbodi-imide-binding proteolipid from (Sigrist-Nelson, K. & Azzi, A.) 687–692
Legumin, pea-seed, use of immunoaffinity chromatography for the purification of (Casey, R.) 509–520
Lettuce (Lactuca scariata) leaves, purification by ion-exchange chromatography of the chloroplast membrane dicyclohexylcarbodi-imide-binding proteolipid from (Sigrist-Nelson, K. & Azzi, A.) 687–692
Ligandin (glutathione S-transferase B), liver, rat, effects of modification of the thiol groups on the binding and catalytic activities of (Carne, T., Tipping, E. & Ketterer, B.) 433–439
Lipid hydroperoxides, reduction of steroid hydroperoxides and, catalysed by a non-selenium-dependent guinea-pig liver glutathione peroxidase (Shreve, M. R., Morrissey, P. G. & O'Brien, P. J.) 761–763
Lipoic acid, poly peptide-chain stoichiometry and content of, of Escherichia coli K12 pyruvate dehydrogenase complex (Hale, G. & Perham, R. N.) 129–137
Liver cells, rat, isolated, utilization of endogenous and exogenous sources of substrate for the biosynthesis of cholesterol by (Gibbons, G. F. & Pullinger, C. R.) 255–263
Liver, chicken, 'affinity' chromatography of oestradiol-17β dehydrogenase from, and other-steroide-transforming enzymes on columns of p-(phenoxypropoxy)aniline attached to Sepharose (Renwick, A. G. C., Chambers, S. M. & Willcox, P.) 401–408
Liver, chicken, ligand-induced conformational transitions and secondary structure composition of pyruvate carboxylase from (McGurk, K. S. & Spivey, H. O.) 697–705
Liver, dogfish, kinetic studies on glutamate dehydrogenase from (Electricwala, A. H. & Dickinson, F. M.) 449–459
Liver, frog, synthesis of cytidine monophosphate sialic acids by using cytidine monophosphate acetylneuraminate synthase from, immobilized on Sepharose 4B (Corfield, A. P., Schauer, R. & Wember, M.) 1–7

Vol. 177
Liver, rat, kinetic analysis supporting a steady-state random sequential mechanism for the multiple inhibition by glutathione derivatives of glutathione S-transferase A from (Jakobsen, I., Warholm, M. & Aanerik, B.) 861–868
Liver, rat, purification and properties of a cytosol protein factor from, that binds and deacylates initiator transfer ribonucleic acid (Pohlreich, P., Kfiiz, O., Tuháčková, Z., Dušek, Z. & Hradek, J.) 707–719
Liver, rat, roles of pyruvate carboxylase and N^15-formyl-tetrahydrodehydrogenase in, in the toxic effects of excess of dietary histidine (Scrutton, M. C. & Beis, I.) 833–846
Liver, rat, selective inactivation by sodium deoxycholate of lactate dehydrogenases from, and other tissues (Lehnert, T. & Berlet, H. N.) 813–818
Liver, rat, subcellular distribution and substrate specificity of the activities of acetyl-coenzyme A deacetylase in (Grigat, K.-P., Koppe, K., Seufert, C.-D. & Söling, H.-D.) 71–79
Liver, sheep, purification of mitochondrial aspartate aminotransferase from, and comparison of its kinetic and other properties with those of the cytosolic isoenzyme (Orlacchio, A., Campos-Cavieres, M., Pashev, I. & Munn, E. A.) 583–593
Lung, human, characterization of a high-molecular-weight glycoprotein isolated from the pulmonary secretions of, of patients with alveolar proteinosis (Sahu, S. & Lynn, W. S.) 153–158
Lysine residues, interaction of dinitrophenyl groups bound to, of ox serum albumin with univalent fragments of anti-dinitrophenyl antibody (Knight, C. G. & Green, N. M.) 225–236
Lysosomes, characterization of hydrolases derived from, in urine of human patients with mucolipidosis II (I-cell disease) and mucopolysaccharide III (Kress, B. C. & Miller, A. L.) 409–415
Lysosomes, liver, human, binding by immobilized lectins of hydrolases from (Fiddler, M. B., Ben-Yousef, Y. & Nadler, H. L.) 175–180
α_Macroglubulin, human, identification of distinctive forms of, by using the numerical relationship between the binding of ox trypsin in the α- and β-modes (Topping, R. M. & Craven, A. H.) 501–508
Magnesium ions, interaction of Escherichia coli lacZ β-galactosidase with competitive inhibitors and the role of, and ionizations in the activity of the enzyme (Loeffler, R. S. T., Sinnott, M. L., Sykes, B. D. & Withers, S. G.) 145–152
Malate dehydrogenases, bacterial, simple efficient methods for the purification of (Wright, I. P. & Sundaram, T. K.) 441–448
Malate/glucosamylase, small-intestine, rat, enzyme activity in partly dissociated fragments of (Flanagan, P. R. & Forstner, G. G.) 487–492
Melanin, activation by α-chymotrypsin of silkworm tyrosinase precursor and its relevance to the light-induced formation of (Kuan, K. N., Lee, Y. Y. & Melius, P.) 981–983
Membrane, chloroplast, lettuce-leaf, purification by ion-exchange chromatography of the dicycylexylcarbodi-imide-binding proteolipid from (Sigrist-Nelson, K. & Azzi, A.) 687–692
Membrane, erythrocyte-ghost, human, effect of the ratio of cholesterol to phospholipid in, on cholesterol exchange (Poznansky, M. J. & Czekanski, S.) 989–991
Membrane, mitochondrial, heart, ox, low-temperature kinetics of the reaction of fully reduced cytochrome c oxidase bound to, with oxygen studied by spectroscopy in the Soret, α-band and near-infrared regions (Clore, G. M. & Chance, E. M.) 613–621
Membrane, photoreceptor, rod-outter-segment, retina, sheep, use of cross-linking reagents in an investigation of the organization of rhodopsin in (Brett, M. & Findlay, J. B. C.) 215–223
Membrane, plasma, kidney, dog, composition of glycolipids of, from two cultured cell lines (Hougland, A. E., Gaush, C. R. & Mayberry, W. R.) 311–317
Membrane, plasma, liver, rat, disaggregation of adenylate cyclase from, during polyacrylamide-gel electrophoresis in mixtures of ionic and non-ionic detergents (Newby, A. C. & Chrambach, A.) 623–630
Menstrual cycle, direct immunoassay of oestrogen glucuronides in female human urine during (Baker, T. S., Jennison, K. M. & Kellie, A. E.) 729–738
Methane mono-oxygenase complex, Methylococcus capsulatus, characterization of the iron–sulphur centre of reduced nicotinamide–adenine dinucleotide–acceptor oxidoreductase (component C) of (Colby, J. & Dalton, H.) 903–908
Methionine-cystine bond, partial non-cleavage by cyanogen bromide of, in human serum albumin and in ox α-lactalbumin (Doyen, N. & Lapresle, C.) 251–254
Methylation, evidence for, of the precursors of rat brain transfer ribonucleic acids during postnatal development (Elahi, E. & Selingler, O. Z.) 381–384
Methylcitrate, formation of diastereoisomers of, catalysed by pig heart citrate synthase and its relevance to the appearance of methylcitrate in the urine of human patients with propionic acidemia (Weidman, S. W. & Drysdale, G. R.) 169–174
Methylococcus capsulatus, characterization of the iron–sulphur centre of reduced nicotinamide–adenine dinucleotide–acceptor oxidoreductase (component C) of methane mono-oxygenase complex from (Colby, J. & Dalton, H.) 903–908
Methylococcus capsulatus, comparison of the substrate and electron-donor specificities of methane mono-oxygenases from Methylobacterium methanica, Methylosinus trichosporium and (Stirling, D. I., Colby, J. & Dalton, H.) 361–364
Methyloboacterium methanica, comparison of the substrate and electron-donor specificities of methane mono-oxygenases from Methylococcus capsulatus, Methylosinus trichosporium and (Stirling, D. I., Colby, J. & Dalton, H.) 361–364

1979
Methylosinus trichosporium, comparison of the substrate and electron-donor specificities of methane monoxygenases from Methylococcus capsulatus, Methylomonas methanica and (Stirling, D. I., Colby, J. & Dalton, H.) 361–364

Methylosinus fraction, housefly, activity of uridine diphosphate glucosyltransferase (Morello, A. & Repetto, Y.) 809–812

Mucosa, small-intestinal, rabbit, purification and properties of cytosolic aminotriptase (from (Doumeng, C. & Maroux, S.) 801–808

Musca domestica, see Housefly

Muscle, skeletal, heart, rat, selective inactivation by sodium deoxycholate of lactate dehydrogenases from, and other tissues (Lehnert, T. & Berlet, H. H.) 813–818

Muscle, skeletal, rabbit, reaction of some derivatives of iodoacetamide with creatine kinase from (Price, N. C.) 603–612

Muscle, smooth, rabbit, purification and characterization of troponin C-like proteins (calmodulins) from, and other tissues (Grand, R. J. A., Perry, S. V. & Weeks, R. A.) 521–529

Myelin sheath, brain, ox, isolated, intrinsic fluorescence of preparations of (Crag, A. J. & Rumsby, M. G.) 739–745

Myometrium, uterus, rat, activities of proteinases and proteinase inhibitor in, during pregnancy and involution (Afting, E. G., Becker, M. L. & Elce, J. S.) 99–106

Nervous system, central, ox, intrinsic fluorescence of preparations of myelin sheath isolated from (Crag, A. J. & Rumsby, M. G.) 739–745

Neurotoxic esterase, see Esterase, neurotoxic

Newcastle-disease virus, use of 12-(4-azido-2-nitrophenoxo)stearoylglucosamine as a photoreactive probe for the mapping of the envelope proteins of (Bramhall, J. S., Shiflett, M. A. & Wisnieski, B. J.) 765–768

Nicotinamide–adenine dinucleotide, oxidized, mechanism of the formation of the adduct between pyruvate and, that is bound to pig heart lactate dehydrogenase (Wilco, D. C.) 951–957

Nicotinamide–adenine dinucleotide, oxidized, preparation of stable complexes of, and derivatives with pig heart lactate dehydrogenase with endogenous catalytic activity (Gacesa, P. & Venn, R. F.) 369–372

Nicotinamide–adenine dinucleotide phosphate, reduced, circular-dichroism studies of the binding of, and other ligands to Lactobacillus casei MTX/R tetrahydrofolate dehydrogenase (Hood, K., Bayley, P. M. & Roberts, G. C. K.) 425–432

Nicotinamide–adenine dinucleotide (reduced)–acceptor oxidoreductase (component C), characterization of the iron–sulphur centre of, of Methylococcus capsulatus methane mono-oxogenase complex (Colby, J. & Dalton, H.) 903–908

Nitrate reductase, Escherichia coli, determination of the redox potentials of molybdenum and iron–sulphur centres in (Vincent, S. P.) 757–759

Nitrogenase, measurement in vivo of the evolution of hydrogen by Anabaena cylindrica that is catalysed by nitrogenase independently of (Daday, A., Lambert, G. R. & Smith, G. D.) 139–144

Non-histone proteins, see Proteins, non-histone

Nuclei, brain, rat, characterization of the chromosomal non-histone proteins of the main classes of, fractionated by zonal centrifugation (Tsitsilou, S. G., Cox, D., Mathias, A. P. & Ridge, D.) 331–346
Nucleoside diphosphatase, microsomal, liver, rabbit, use of \[^{31}\text{P}\] nuclear-magnetic-resonance spectroscopy to study the metabolism of nucleotides, and uridine diphosphate glucuronyltransferase (Finch, S. A. E., Slater, T. F. & Stier, A.) 925–930

Nucleotide residues, methylated, persistence of, in hamster liver ribonucleic acids after administration of dimethyl-hydrazine to the animals (Margison, G. P., Margison, J. M. & Montesano, R.) 967–973

Nucleotides, use of \[^{31}\text{P}\] nuclear-magnetic-resonance spectroscopy to study the metabolism of, by rabbit liver microsomal uridine diphosphate glucuronoltransferase and nucleoside diphosphatase (Finch, S. A. E., Slater, T. F. & Stier, A.) 925–930

Oestrogens, direct immunoassay of glucuronides of, in female human urine (Baker, T. S., Jennison, K. M. & Kellie, A. E.) 729–738

Oestradiol-17\(\beta\) dehydrogenase, liver, chicken, ‘affinity’ chromatography of, and other steroid-transforming enzymes on columns of \((p\text{-phenoxypropoxy})aniline\) attached to Sepharose (Renwick, A. G. C., Chambers, S. M. & Wilcox, P.) 401–408

Organophosphorus compounds, formation of an unstable covalent intermediate during the inhibition by, of the activity of electric-eel acetylcholinesterase (Ashani, Y. & Leader, H.) 781–790

Organophosphorus compounds, rapid aging of chicken brain neurotoxic esterase after inhibition by (Clother, B. & Johnson, M. K.) 549–558

Ornithine aminotransferase, liver, rat, enzyme-induced inactivation by acetylenic and vinyl analogues of 4-aminobutyrate and, other aminotransferases (John, R. A., Jones, E. D. & Fowler, L. J.) 721–728

Ornithine decarboxylase, induction by diamines of the activity of, in rat liver (Kallio, A., Löfman, M., Pösö, H. & Jänne, J.) 63–69

Ovomucoid, egg-white, turtle-dove, purification of, and its activity as a proteinase inhibitor and as a human P1-blood-group antigen (François-Gerard, C., Gerday, C. & Beeley, J. G.) 679–685

Oxygen, evidence for the presence of type-I copper in a product (Compound C) of the reaction of, with the mixed-valence state of ox heart mitochondrial cytochrome \(c\) oxidase (Chance, B., Saronio, C. & Leigh, J. S., Jr.) 931–941

Oxygen, low-temperature kinetics of the reaction of fully reduced ox heart mitochondrial membrane-bound cytochrome \(c\) oxidase with, studied by spectroscopy in the Soret, \(\alpha\)-band and near-infrared regions (Clore, G. M. & Chance, E. M.) 613–621

Pea (\textit{Pisum sativum}) seeds, use of immunoaffinity chromatography for the purification of legumin from (Casey, R.) 509–520

Penicillinase (\(\beta\)-lactamase I), \textit{Bacillus cereus}, inactivation by \(6\beta\)-bromopenicillanic acid of (Knott-Hunziker, V., Orlek, B. S., Sammes, P. G. & Waley, S. G.) 365–367

pH, derivation of molecular \(pK\) values of dibasic acids from dependences on (Dixon, H. B. F.) 249–250

pH, effects of calcium ions and, on the intrinsic fluorescence of ox prothrombin fragment 1 (Scott, M. E., Koehler, K. A. & Hiskey, R. G.) 879–886

Phenobarbital, induction by, of the activity of microsomal uridine diphosphate glucosyltransferase in the housefly (Morello, A. & Repetto, Y.) 809–812

Phenol oxidase precursor, silkworm, activation by \(\alpha\)-chymotrypsin of, and its relevance to light-induced pigmentation (Kuan, K. N., Lee, Y. Y. & Melius, P.) 981–983

\((p\text{-Phenoxypropoxy})aniline\), ‘affinity’ chromatography of steroid-transforming enzymes on columns of, attached to Sepharose (Renwick, A. G. C., Chambers, S. M. & Wilcox, P.) 401–408

Phenylalanine hydroxylase, inhibition by \(\beta\)-2-thienyl-\(\text{DL-}\)alanine of the activity of, in rat liver and kidney of and the transport of phenylalanine by the small intestine (Wapnir, R. A. & Moak, G. S.) 347–352

Phenylalanine, inhibition by \(\beta\)-2-thienyl-\(\text{DL-}\)alanine of the activity of phenylalanine hydroxylase in rat liver and kidney of and the transport of, by the small intestine (Wapnir, R. A. & Moak, G. S.) 347–352

Phenyl-[\(^2\text{H}\)]glyoxal, synthesis of, from \([\text{2-H}]\)acetophenone, and its use in the modification of arginine residues in enzymes (Augustus, B. W. & Hutchinson, D. W.) 377–379

Phenylketonuria, limitations of the potential usefulness of \(\beta\)-2-thienyl-\(\text{DL-}\)alanine as an inducer of, in the rat (Wapnir, R. A. & Moak, G. S.) 347–352

Phosphatase, alkaline, milk, human, partial purification of, and comparison of its properties with those of the placental and liver isoenzymes (Hamilton, T. A., Gornicki, S. Z. & Sussman, H. M.) 197–201

Phospholipid, effect of the ratio of cholesterol to, in human erythrocyte-‘ghost’ membrane on cholesterol exchange (Poznansky, M. J. & Czekanski, S.) 989–991

Phospholipids, requirement for negatively charged dispersions of, for interaction with lipid-depleted rabbit kidney sodium-plus-potassium ion-dependent adenosine triphosphatase (Isern, B. & Wheeler, K. P.) 265–273

O-Phosphoserine residues, presence of \(O\)-phosphothreonine and, in non-collagenous proteins and their absence from phosphorylated collagen from chicken bone (Cohen-Solal, L., Lian, J. B., Kossiva, D. & Glimcher, M. J.) 81–98

O-Phosphothreonine residues, presence of \(O\)-phosphoserine and, in non-collagenous proteins and their absence from phosphorylated collagen from chicken bone (Cohen-Solal, L., Lian, J. B., Kossiva, D. & Glimcher, M. J.) 81–98

INDEX OF SUBJECTS
INDEX OF SUBJECTS

Pisum sativum, see Pea

Placenta, human, determination of the carbohydrate compositions of the A and B isoerythinoses of β-N-acetyllhexosaminidase from (Freeze, H., Geiger, B. & Miller, L.) 749–752

Placenta, human, partial purification of human milk alkaline phosphatase and comparison of its properties with those of the isoerythinoses from, and liver (Hamilton, T. A., Görnick, S. Z. & Sussman, H. H.) 197–201

Plasma membrane, see Membrane, plasma

Plasma, pig, study by magnetic-resonance and kinetic methods of the properties of cupric ions in benzylamine oxidase from (Barker, R., Boden, N., Cayley, G., Charlton, S. C., Henson, R., Holmes, M. C., Kelly, I. D. & Knowles, P. F.) 289–302

Polyamine oxidase, activities of (Hayashi, Y. C., Dao, D. D., Yon, Y. C., & Kronman, M. J.) 385–392

Polyamine oxidase, activities of in normal and transformed rat kidney cells (Quash, G., Keolouangkhot, T., Gazzolo, L., Ripoll, H. & Saës, S.) 275–282

Polyuridylicate polymerase, comparison of endogenous and exogenous ribonuclease acids as primers for the activity of, in rat liver ribosomes (Hayashi, T. T. & MacFarlane, K.) 895–902

Pregnancy, activities of proteinases and proteinase inhibitor in rat uterus myometrium during, and involution (Afting, E.-G., Becker, M. L. & Elce, J. S.) 99–106

Propionic acidemia, formation of diastereoisomers of methylcitrate catalysed by pig heart citrate synthase and its relevance to the appearance of methylcitrate in the urine of human patients with (Weidman, S. W. & Drysdale, G. R.) 169–174

Protease, see Proteinase

Protein factor, cytosolic, liver, rat, purification and properties of, that binds and decayslate inhibitor transfer ribonuclease acid (Poholreich, P., Kňž, O., Tuháčková, Z., Dusek, Z. & Hradec, J.) 707–719

Protein, riboflavin-binding, chicken-egg-white, isolation and characterization of chicken-egg-white thiamin-binding protein and its interaction with (Muniyappa, K. & Adiga, P. R.) 887–894

Protein, thiamin-binding, chicken-egg-white, isolation and characterization of, and its interaction with riboflavin-binding protein (Muniyappa, K. & Adiga, P. R.) 887–894

Protein-poly saccharides, see Proteoglycans

Proteinase inhibitor, purification of turtle-dove egg-white ovomucoid and its activity as a human P1-blood-group antigen and as (François-Gerard, C., Gerday, C. & Beeley, J. G.) 679–685

Proteinase inhibitor, tick, characterization of, with allergenic activity (Willadsen, P. & Riding, G. A.) 41–47

Proteins, anomalous reaction of 4-chloro-7-nitrobenzo- furazan with thiol groups of (Nitta, K., Bratcher, S. C. & Kronman, M. J.) 385–392

Proteins, effects of sodium dodecyl sulphate on the adsorption of, on N-(3-carboxypropionyl)aminodecyl-Sepharose (Yon, R. J. & Simmonds, R. J.) 417–424

Proteins, envelope, Newcastle-disease-virus, use of 12-(4-azido-2-nitrophenoxyl)esteroylglycosamine as a photoreactive probe for the mapping of (Bramhall, J. S., Shiflett, M. A. & Wisnieski, B. J.) 765–768

Proteins, iron-sulphur, properties of, of the Pseudomonas putida benzene dioxygenase system (Crutcher, S. E. & Geary, P. J.) 393–400

Proteins, non-collagenous, presence of O-phosphoserine and O-phosphothreonine residues in, and their absence from phosphorylated collagen from chicken bone (Cohen-Solal, L., Lian, J. B., Kossiva, D. & Glimerch, M. J.) 81–98

Proteins, non-histone, chromosomal, characterization of, of the main class of rat brain nuclei fractionated by zonal centrifugation (Tsitilou, S. G., Cox, D., Mathias, A. P. & Ridge, D.) 331–346

Proteins, redox, single-site, mechanism of the reduction by ascorbate of (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Proteins, troponin C-like (calmodulins), purification and characterization of, from rabbit smooth muscle and other tissues (Grand, R. J. A., Perry, S. V. & Weeks, R. A.) 521–529

Proteoglycans, cartilage, laryngeal, pig, role of link-protein in the structure of aggregates of hyaluronate and (Hardingham, T. E.) 237–247

Proteoglycans, Smith-degraded, modified procedure for the preparation of, for use as substrates in the assay of the activity of xylosyltransferase in extracts of chick-embryo cartilage (Sandy, J. D.) 569–574

Proteolipid, dicyclohexyarkodi-imide-binding, membrane, chloroplast, lettuce-leaf, purification by ion-exchange chromatography of (Sigrist-Nelson, K. & Azzi, A.) 687–692

Prothrombin fragment I, ox, effects of calcium ions and pH on the intrinsic fluorescence of (Scott, M. E., Koehler, K. A. & Hiskey, R. G.) 879–886

Pseudomonas aeruginosa, mechanism of the reduction by ascorbate of cytochrome c551 and azurin from, and of other single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Pseudomonas indigoferra, simple efficient methods for the purification of malate dehydrogenases from, and other bacteria (Wright, I. P. & Sundaram, T. K.) 441–448

Pseudomonas putida, properties of the iron–sulphur proteins of the benzene dioxygenase system from (Crutcher, S. E. & Geary, P. J.) 393–400

Pseudomonas testosteroni, 'affinity' chromatography of 3(17)β-hydroxy steroid dehydrogenase from, and other steroid-transforming enzymes on columns of p-(phenoxypropoxy)aniline attached to Sepharose (Renwick, A. G. C., Chambers, S. M. & Willcox, P.) 401–408

Vol. 177
Pulmonary secretions, human, characterization of a high-molecular-weight glycoprotein isolated from, of patients with alveolar proteinosis (Sahu, S. & Lynn, W. S.) 153–158

Pyruvate carboxylase, liver, pyruvate carboxylase, dehydrogenase blood (McGurk, K. S. & Spivey, H. O.) 697–705

Pyruvate carboxylase, roles of N^10-formyltetrahydrofolate dehydrogenase and, in rat liver in the toxic effects of excess of dietary histidine (Scrutton, M. C. & Beis, I.) 833–846

Pyruvate dehydrogenase complex, Escherichia coli K12, polypeptide-chain stoichiometry and lipoid acid content of (Hale, G. & Perham, R. N.) 129–137

Pyruvate, mechanism of the formation of the adduct between oxidized nicotinamide–adenine dinucleotide and, that is bound to pig heart lactate dehydrogenase (Wilton, D. C.) 951–957

Red blood cells, see Erythrocytes

Redox potentials, determination of, of molybdenum and iron–sulphur centres in Escherichia coli nitrate reductase (Vincent, S. P.) 757–759

Redox proteins, single-site, mechanism of the reduction by ascorabe of (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Restriction endonuclease, see Deoxyribonuclease, endo-, restriction

Retina, sheep, use of cross-linking reagents in an investigation of the organization of rhodopsin in the photoreceptor membrane of rod outer segments of (Brett, M. & Findlay, J. B. C.) 215–223

Rhodopseudomonas spheroides N.C.I.B. 8253, purification and properties of the high-activity form of 5-aminolaevulinate synthetase from (Davies, R. C. & Neuberger, A.) 649–659

Rhodopseudomonas spheroides N.C.I.B. 8253, role of the binding of pyridoxal 5'-phosphate in the control of the activity of 5-aminolaevulinate synthetase in (Davies, R. C. & Neuberger, A.) 661–671

Rhodopsin, use of cross-linking reagents in an investigation of the organization of, in the photoreceptor membrane of rod outer segments of sheep retina (Brett, M. & Findlay, J. B. C.) 215–223

Riboflavin-binding protein, chicken-egg-white, isolation and characterization of chicken-egg-white thiamin-binding protein and its interaction with (Muniyappa, K. & Adiga, P. R.) 887–894

Ribonucleic acid polymerase A, deoxyribonucleic acid-dependent, yeast, use of cf convolution analysis as a mathematical method for the study of transcription by (Cooper, C. S. & Quincey, R. V.) 825–831

Ribonucleic acid polymerase, Escherichia coli, anomalous reaction of 4-chloro-7-nitrobenzofuran with thiol groups of, and other proteins (Nitta, K., Bratcher, S. C. & Kronman, M. J.) 385–392

Ribonucleic acid, transfer, initiator, purification and properties of a rat liver cytosolic protein factor that binds and deacylates (Pohlreich, P., Klíž, O., Tuháčková, Z., Dušek, Z. & Hradec, J.) 707–719

Ribonucleic acid, use of ethidium bromide in a rapid and sensitive method for determination of, in ribosomal preparations (Mackie, C., Bryant, T. H. E. & Mowbray, J.) 977–979

Ribonucleic acids, endogenous and exogenous, comparison of, as primers for the activity of polyuridilate polymerase in rat liver ribosomes (Hayashi, T. T. & MacFarlane, K.) 895–902

Ribonucleic acids, liver, hamster, persistence of methylated base residues in, after administration of dimethylnitrosamine to the animals (Margison, G. P., Margison, J. M. & Montesano, R.) 967–973

Ribonucleic acids, transfer, brain, rat, evidence for the methylation of precursors of, during postnatal development (Elahi, E. & Sel linger, O. Z.) 381–384

Ribosomes, liver, rat, comparison of endogenous and exogenous ribonucleic acids as primers for the activity of polyuridilate polymerase in (Hayashi, T. T. & MacFarlane, K.) 895–902

Ribosomes, use of ethidium bromide in a rapid and sensitive method for determination of ribonucleic acid in preparations of (Mackie, C., Bryant, T. H. E. & Mowbray, J.) 977–979

Saccharomyces carlsbergensis, isolation and characterization of histones of chromatin from (Pastink, A., Berk hout, T. A., Mager, W. H. & Planta, R. J.) 917–923

Saccharomyces cerevisiae, use of convolution analysis as a mathematical method for the study of transcription by deoxyribonucleic acid-dependent ribonucleic acid polymerase A from (Cooper, C. S. & Quincey, R. V.) 825–831

Saccobranchus fossilis, identification of the naturally occurring anhydrovitamin Aₐ of, as 3-hydroxyanhydro retinol (Barua, A. B., Verma, K. & Das, S. R.) 791–799

Salivary gland, submandibular, pig, isolation and properties of kallikrein from (Lemon, M., Fiedler, F., För g-Brey, B., Hirschauer, C., Leysath, G. & Fritz, H.) 159–168

Seeds, pea, use of immunoaffinity chromatography for the purification of legumin from (Casey, R.) 509–520

Serum albumin, see Albumin, serum

Serum, human, four-straight-line model for the characteristics of the binding of ox trypsin by (Topping, R. M. & Sellman, S.) 493–499

Silic acid, cytidine monophosphate, synthesis of, by using frog liver cytidine monophosphate a clyneuramine synthase immobilized on Sepharose 4B (Cordfield, A. P., Schauer, R. & Wem ber, M.) 1–7

Silkworm (Bombyx mori), activation by α-chymotrypsin of tyrosinase precursor from, and its relevance to light-induced pigmentation (Kuan, K. N., Lee, Y. Y. & Melius, P.) 981–983

Skeletal muscle, see Muscle, skeletal

Slime mould (Dictyostelium discoideum), accumulation of uridine diphosphate glucose pyrophosphorylase by axenically grown amoebae of (Hames, B. D. & Hodson, B. A.) 21–28

Slime mould (Dictyostelium discoideum), mechanism of the reduction by ascorbate of cytochrome c from, and of other single-site redox proteins (Al-Ayash, A. I. & Wilson, M. T.) 641–648

Small intestine, see Intestine, small
Smooth muscle, see Muscle, smooth
Sodium deoxycholate, selective inactivation by, of lactate dehydrogenases from various rat tissues (Lehnert, T. & Berlet, H. H.) 813-818
Sodium dodecyl sulphate, effects of, on the adsorption of proteins on N-(3-carboxypropionyl)aminodecyl-Sepharose (Yon, R. J. & Simmonds, R. J.) 417-424
Spleen, horse, removal of cadmium(II) from crystallized ferritin from (Hegenauer, J., Saltman, P. & Hatlen, L.) 693-695
Spleen, ox, activation by glycine ethyl ester of cathepsin D from (Dionysiu-Asteriou, A. & Rakitzis, E. T.) 355-356
Squalus acanthias, see Dogfish
Staphylococcus spp., purification, inhibitor studies and N-terminal amino acid sequences of variants of chloramphenicol acetyltransferase from (Filton, J. E. & Shaw, W. V.) 575-582
Steroid hydroperoxides, reduction of lipid hydroperoxides and, catalysed by a non-selenium-dependent guinea-pig liver glutathione reductase (Shreve, M. R., Morrissey, P. G. & O'Brien, P. J.) 761-763
Streptomyces dehydrogenans, 'affinity' chromatography of cortisone reductase from, and other steroid-transforming enzymes on columns of p-(phenoxypropoxy)-aniline attached to Sepharose (Renwick, A. G. C., Chambers, S. M. & Willcox, P.) 401-408
Streptomyces R61, effects of nucleophiles on the breakdown of the benzylpenicilloxy-enzyme complex EI* formed between benzylpenicillin and exocellular Dd-carboxypeptidase-peptidyltransferase from (Marquet, A., Frère, J.-M., Ghysen, J.-M. & Loffet, A.) 909-916
Streptopelia risoria, see Turtle dove
Subcomponent C1q, complement, human, characterization of the hydroxysine-linked glycosides of, and of various collagens (Shinkai, H. & Yonemasu, K.) 847-852
Subcomponent C1q complement, ox, purification and characterization of (Campbell, R. D., Booth, N. A. & Fothergill, J. E.) 531-540
Submandibular gland, pig, isolation and properties of kallikrein from (Lemon, M., Fiedler, F., Förg-Brey, B., Hirschauer, C., Leysath, G. & Fritz, H.) 159-168
Supernatant fraction, see Cytosol
Superoxide dismutase, erythrocyte, ox, study by nuclear-magnetic-relaxation measurements of the properties of the cupric ion sites of (Boden, N., Holmes, M. C. & Knowles, P. F.) 303-309
Tetrahydrofolate dehydrogenase, Lactobacillus casei MTX/R, circular-dichroism studies of the binding of ligands to (Hood, K., Bayley, P. M. & Roberts, G. C. K.) 425-432
Thermoactinomyces sacchari, simple efficient methods for the purification of malate dehydrogenases from, and other bacteria (Wright, I. P. & Sundaram, T. K.) 441-448
Thermoactinomyces fusca, simple efficient methods for the purification of malate dehydrogenases from, and other bacteria (Wright, I. P. & Sundaram, T. K.) 441-448
Thermus aquaticus, simple efficient methods for the purification of malate dehydrogenases from, and other bacteria (Wright, I. P. & Sundaram, T. K.) 441-448
Thiamin-binding protein, chicken-egg-white, isolation and characterization of, and its interaction with riboflavin-binding protein (Muniyappa, K. & Adiga, P. R.) 887-894
β-2-Thieryl-dL-alanine, inhibition by, of the activity of rat liver and kidney phenylalanine hydroxylase and of the transport of phenylalanine by the small intestine (Wapnir, R. A. & Moak, G. S.) 347-352
Thioalkylation, properties of pig heart lactate dehydrogenase in which the 'essential' cysteine residue 165 has been modified by (Bloxbom, D. P., Sharma, R. P. & Wilton, D. C.) 769-780
Thiol groups, effects of modification of, on the binding and catalytic activities of rat liver ligandin (Carne, T., Tipping, E. & Ketterer, B.) 433-439
Thiols, anomalous reaction of 4-chloro-7-nitrobenzofurazan with (Nitta, K., Bratcher, S. C. & Kronman, M. J.) 385-392
Tick (Boophilus microplus), characterization of a proteinase inhibitor with allergenic activity from (Willadsen, P. & Riding, G. A.) 41-47
Toxin, extracellular, Corynebacterium ovis, purification and partial characterization of (Onon, E. O.) 181-186
Transcription, use of convolution analysis as a mathematical method for the study of, by yeast deoxyribonucleic acid-dependent ribonucleic acid polymerase A (Cooper, C. S. & Quincey, R. V.) 825-831
Transfer ribonucleic acid, see Ribonucleic acid, transfer
Triethyltin, aorta, chick, additional evidence for the existence of a precursor to (Heng-Khoo, C. S., Rucker, R. B. & Buckingham, K. W.) 559-567
Troponin C-like proteins (calmodulins), purification and characterization of, from rabbit smooth muscle and other tissues (Grand, R. J. A., Perry, S. V. & Weeks, R. A.) 521-529
Trypsin inhibitor, soya-bean, effects of sodium dodecyl sulphate on the adsorption of, and other proteins on N-(3-carboxypropionyl)aminodecyl-Sepharose (Yon, R. J. & Simmonds, R. J.) 417-424
Trypsin inhibitor, tick, characterization of, with allergenic activity (Willadsen, P. & Riding, G. A.) 41-47
Trypsin, ox, four-straight-line model for the characteristics of the binding of, by human blood serum (Topping, R. M. & Sellman, S.) 493-499
Trypsin, ox, identification of distinctive forms of human \( \alpha_2 \)-macroglobulin by using the numerical relationship between the binding of, in the \( \alpha \)- and \( \beta \)-modes (Topping, R. M. & Craven, A. H.) 501-508
Tryptophan residues, intrinsic fluorescence characteristics of tyrosine residues and, of preparations of isolated ox brain myelin sheath (Crag, A. J. & Rumsby, M. G.) 739-745
Tumours, colonic, rat, multiple forms and kinetic properties of \( \beta \)-N-acetylhexosaminidases from, and from colonic mucosa from animals treated with 1,2-dimethylhydrazine (Mian, N., Herries, D. G., Cowen, D. M. & Batte, E. A.) 319-330

Vol. 177
Turtle dove (*Streptopelia risoria*), purification of egg-white ovomucoid from, and its activity as a proteinase inhibitor and as a human P$_1$-blood-group antigen (Francois-Gerard, C., Gerday, C. & Beeley, J. G.) 679–685

Tyrosinase precursor, silkworm, activation by $\alpha$-chymotrypsin of, and its relevance to light-induced pigmentation (Kuan, K. N., Lee, Y. Y. & Melius, P.) 981–983

Tyrosine residues, intrinsic fluorescence characteristics of tryptophan residues and, of preparations of isolated ox brain myelin sheath (Crang, A. J. & Rumsby, M. G.) 739–745

Uridine diphosphate glucose pyrophosphorylase, accumulation of, by axenically grown amoebae of *Dictyostelium discoideum* (Hames, B. D. & Hodson, B. A.) 21–28

Uridine diphosphate glucosyltransferase, activity of, in housefly microsomal fraction (Morello, A. & Repetto, Y.) 809–812

Uridine diphosphate glucuronyltransferase, liver, Gunn rat, defective, stimulation in *vitro* by alkyl ketones of the activity of (Lalani, E.-N. M. A. & Burchell, B.) 993–995

Uridine diphosphate glucuronyltransferase, microsomal, liver, rabbit, use of $^{31}$P nuclear-magnetic-resonance spectroscopy to study the metabolism of nucleotides by, and nucleoside diphosphatase (Finch, S. A. E., Slater, T. F. & Stier, A.) 925–930

Urine, characterization of lysosomal hydrolases in, of human patients with mucolipidosis II (I-cell disease) and mucolipidosis III (Kress, B. C. & Miller, A. L.) 409–415

Urine, human, female, direct radioimmunoassay of oestrogen glucuronides in (Baker, T. S., Jennison, K. M. & Kellie, A. E.) 729–738

Uteroglobin, uterus, rabbit, determination of the $N$-terminal amino acid sequences of, and its precursor (Atger, M., Mercier, J.-C., Haze, G., Fridlansky, F. & Milgrom, E.) 985–988

Uterus, rabbit, determination of the $N$-terminal amino acid sequences of uteroglobin and its precursor from (Atger, M., Mercier, J.-C., Haze, G., Fridlansky, F. & Milgrom, E.) 985–988

Virus, Newcastle-disease, see Newcastle-disease virus

Vitamin A$_2$, anhydro-, *Saccobranchus fossilis*, naturally occurring, identification of, as 3-hydroxyanhydroretinol (Barua, A. B., Verma, K. & Das, S. R.) 791–799

Vitamin B$_1$, see Thiamin

Vitamin B$_2$, see Riboflavin

Vitamin C, see Ascorbate

Vitamin D$_3$, see Cholecalciferol

Xanthine oxidase, milk, relationship between the Rapid and Very Rapid electron-paramagnetic-resonance signals given by molybdenum of (Bray, R. C., Gutteridge, S., Stotter, D. A. & Tanner, S. J.) 357–360

Xylosyltransferase, modified procedure for the preparation of Smith-degraded proteoglycans for use as substrates in the assay of the activity of, in extracts of chick-embryo cartilage (Sandy, J. D.) 569–574

Yeast (*Candida utilis* C.E.C.T. 1061), purification and characterization of endo-1,3-β-glucanase secreted into the culture medium by (Villa, T. G., Notario, V. & Villanueva, J. R.) 107–114

Yeast (*Saccharomyces carlsbergensis*), isolation and characterization of histones of chromatin from (Pastink, A., Berkhout, T. A., Mager, W. H. & Planta, R. J.) 917–923

Yeast (*Saccharomyces cerevisiae*), use of convolution analysis as a mathematical method for the study of transcription by deoxyribonucleic acid-dependent ribonucleic acid polymerase A from (Cooper, C. S. & Quincey, R. V.) 825–831
