SYMPOSIA SERIES No. 42

BIOCHEMISTRY OF THE CELL NUCLEUS

Edited by P. B. Garland and A. P. Mathias
(ISBN 0 904498 03 4) £15.00 U.S. $30.00

The articles of this Symposium deal with aspects of the structure and function of the cell nucleus, at several levels of molecular and biological organization. Although much is already known of the way in which the genetic information of eukaryotic cells is stored, replicated, transcribed and processed, the scale and intricacy of the operation is immense in comparison with the simpler and more amenable bacterial systems. Accordingly our knowledge of the more highly evolved eukaryotic systems is far from complete, both in concept and detail. The articles not only review present knowledge; no less importantly they identify areas where mystery is more obvious than mechanism, and they pose some of the central questions that future research will have to answer.

Biochemistry of the Cell Nucleus will be timely reading for those in life or medical sciences who, either by their teaching or research, or just general intellectual curiosity, desire to deepen their understanding of how the nucleus masterminds the incredibly complex but beautifully co-ordinated activities of the cell.

List of contents and authors:

Multiplicity of Animal Cell Deoxyribonucleic Acid Polymerases by G. Brun & F. Chapeville.
The Heterogeneity of Deoxyribonucleic Acid Polymerase-a by A. M. Holmes, I. P. Hessewood, R. G. Wiekremasinghe & I. R. Johnston.
The Deoxyribonucleic Acid Polymerases of Non-Vertebrate Eukaryotes by A. G. McLennan & H. M. Keir.
An Approach to the Understanding of Messenger Ribonucleic Acid Synthesis, Processing and Regulation in Eukaryotes by R. Williamson.
Chromatin Structure by J. O. Thomas.
Structure and Function of Nuclear Membranes by W. W. Franke.
Mitosis and Microtubule Assembly by M. Jacobs & T. Cavalier-Smith.

SPECIAL PUBLICATION No. 5

Safety in Biological Laboratories

68 pp + xii ISBN 0904498 05 0

A concise, easily readable guide for workers in Life-Science Laboratories from Anatomy through Biophysics . . . Nutrition . . . Veterinary to Zoology. Emphasis is on SAFETY rather than DANGER, on avoidance of risks, elimination of hazards, and on the need for safety consciousness for the benefit of others as well as the worker's own person. Among topics discussed are radiation, animals, pathogens, carcinogens and other dangerous substances, vacuum distillation, fire and electricity as well as such simple operations as emptying autoclaves and connecting plastic tubing to glass tubing. The booklet is intended for all who work in laboratories, from the newest assistant to the head of department (who may come to realize that some of their standard practices contain avoidable elements of danger). So generous discounts are offered for bulk purchase.

The booklet should help every reader to be more likely to survive and to pass on the message: SAFETY IN BIOLOGICAL LABORATORIES.

CONTENTS
Preface
Glossary

Precautions for All Laboratory Workers
By Arthur W. Hartley and Vernon Booth

Electrical Hazards, Fire and Explosion
By Edward Hartree

The Role of the Safety Officer
By Oliver Phillip Edmonds

The Animal House
By Donald W. Jolly

Microbiological Hazards
By Richard D. Barry

Carcinogens, Mutagens, Teratogens
By Donald B. Cater and Edward Hartree

Radiation Hazards
By Philip P. Dentdy

Subject Index

Limited stocks available of earlier volumes

No. 1 BIOCHEMISTRY AND MENTAL ILLNESS
Edited by L. L. IVERSEN and S. P. R. ROSE 251 pp. £4.50 ($12.00)

No. 2 BIOCHEMISTS IN INDUSTRY
Edited by K. W. FULLER 58 pp. £1.25 ($3.50)

No. 3 THE METABOLISM AND FUNCTION OF VITAMIN D
Edited by D. R. FRASER 114 pp. £4.00 ($10.50)

No. 4 MEMBRANE ADENOSINE TRIPHOSPHATASES AND TRANSPORT PROCESSES
Edited by J. R. BRONK 197 pp. £5.00 ($12.50)

Obtainable from your bookseller or agent, or direct from
THE BIOCHEMICAL SOCIETY BOOK DEPOT
P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex

Leaflets giving details of contents of the above publications are available on request.
