SPECIAL PUBLICATION No. 5

Safety in Biological Laboratories

68 pp + xii  ISBN 0904498 05 0

A concise, easily readable guide for workers in Life-Science Laboratories from Anatomy through Biophysics . . . Nutrition . . . Veterinary to Zoology. Emphasis is on SAFETY rather than DANGER, on avoidance of risks, elimination of hazards, and on the need for safety consciousness for the benefit of others as well as the worker's own person. Among topics discussed are radiation, animals, pathogens, carcinogens and other dangerous substances, vacuum distillation, fire and electricity as well as such simple operations as emptying autoclaves and connecting plastic tubing to glass tubing. The booklet is intended for all who work in laboratories, from the newest assistant to the head of department (who may come to realize that some of their standard practices contain avoidable elements of danger). So generous discounts are offered for bulk purchase.

The booklet should help every reader to be more likely to survive and to pass on the message: SAFETY IN BIOLOGICAL LABORATORIES.

CONTENTS

Preface
Glossary
Precautions for All Laboratory Workers
  By Arthur W. Hartley and Vernon Booth
Electrical Hazards, Fire and Explosion
  By Edward Hartree
The Role of the Safety Officer
  By Oliver Phillip Edmonds
The Animal House
  By Donald W. Jolly
Microbiological Hazards
  By Richard D. Barry
Carcinogens, Mutagens, Teratogens
  By Donald B. Cater and Edward Hartree
Radiation Hazards
  By Philip P. Dendy

Subject Index

Limited stocks available of earlier volumes

No. 1 BIOCHEMISTRY AND MENTAL ILLNESS
Edited by L. L. IVERSEN and S. P. R. ROSE 251 pp. £4.50 ($12.00)

No. 2 BIOCHEMISTS IN INDUSTRY
Edited by K. W. FULLER 58 pp. £1.25 ($3.50)

No. 3 THE METABOLISM AND FUNCTION OF VITAMIN D
Edited by D. R. FRASER 114 pp. £4.00 ($10.50)

No. 4 MEMBRANE ADENOSINE TRIPHOSPHATASES AND TRANSPORT PROCESSES
Edited by J. R. BRONK 197 pp. £5.00 ($12.50)

Obtainable from your bookseller or agent, or direct from

Biochemistry of Genetic Engineering

Edited by P. B. Garland and R. Williamson

pp. 145 (ISBN 0 904498 08 5) £12.50 (US$27.50)

A Biochemical Society Symposium held in London in July 1978

The Biochemical Society's Forty-Fourth Symposium held at University College London in July 1978 reviewed in a two day meeting the exciting and rapidly expanding area of Genetic Engineering. Leaders in the field gave general introductions to the biochemical basis, practice and aims of many aspects of the subject, illustrated with accounts of current research. Subjects included ranged from the enzymology of restriction nucleases, ligases and polymerases, proceeded through vectors and hosts for recombinant DNA, considered in depth selected plant and animal systems, and concluded with industrial prospects and social perspectives. These excellent and well-received presentations form the basis of this publication, which will serve not only as a readable introduction to the biochemistry of genetic engineering but also as a valuable account of the activities of a number of leading laboratories as of summer 1978.

List of contents and authors:

Preface.

Restriction Nucleases, Ligases and Polymerases in Genetic Manipulation by A. D. B. Malcolm.

Safe and Useful Vector Systems by W. J. Brammar.

Plasmid Vectors for Genetic Manipulation in vitro by D. J. Sherratt.

Analysis of Restriction-Fragment Patterns from Complex Deoxyribonucleic Acid Species by E. M. Southern.

Primary-Sequence Changes in the Differentiation of Immunoglobulin Genes by T. H. Rabbitts.

SV40 and Polyoma Viruses: their Analysis by Deoxyribonucleic Acid Recombination in vitro and their Use as Vectors in Eukaryotic Systems by P. W. J. Rigby.

Genetic Manipulation Advisory Group (GMAG) and the Environment for Genetic Engineering in Britain by R. Williamson.

Genetic Engineering: Do We Need It? How Would We Do It? by A. J. Hale.

June, 1979 Proceedings of the
International Society of
Hypertension

A Supplement to Volume 57 of
Clinical Science

This Supplement is devoted to the Proceedings of the Sixth Meeting of the International Society of Hypertension held in Göteborg in June 1979. It contains over 100 papers from leading authorities in the field of hypertension throughout the world.

December 1979. 487 pages. Paper, £26.00 ($60.00) post free

Also available
Proceedings of the Second Meeting of the International Society of Hypertension, Milan, 1972
August 1972. 340 pages, 41 illustrations. Paper, £6.25 ($18.00) post free

Proceedings of the Third Meeting of the International Society of Hypertension, Milan, 1974
June 1975. 324 pages, 64 illustrations. Paper, £10.30 ($30.00) post free

Proceedings of the Fourth Meeting of the International Society of Hypertension, Sydney, 1976
December 1976. 722 pages, 71 illustrations. Paper, £25.00 ($60.00) post free

Proceedings of the Fifth Meeting of the International Society of Hypertension, Paris, 1978
December 1978. 417 pages. Paper, £15.00 ($34.00) post free

Order From:
THE BIOCHEMICAL SOCIETY BOOK DEPOT,
P.O. BOX 32,
COMMERCE WAY, COLCHESTER CO2 8HP, ENGLAND
(or through your bookseller)
Guarantee

All Research Biochemicals from Boehringer Mannheim are guaranteed by-

Strict – To ensure consistency and reliability of your research reagents.

Quality Control

Careful Packaging – High grade brown bottles and silicon rubber stoppers to keep the reagents in perfect condition.

Delivery – Just phone or Telex your order for same day despatch by 1st Class letter post.
