VOLUME 4

ESSAYS IN MEDICAL BIOCHEMISTRY

Edited by V. MARKS and C. N. HALES

129 pp. £4.50 (US $10.00) by surface mail to overseas addresses

In this latest volume of Essays in Medical Biochemistry articles are included on the influences of amino acids on brain mechanisms, on the biochemical significance of hormonal control mechanisms for normal bone and in cancer, and on the structure and variations of $\alpha_1$-antitrypsin, all topics of increasing interest and relevance for the research worker and the clinician.

List of Contents and Authors:

The Role of Amino Acids in the Brain
By J. H. Quastel

Biochemical Regulators of Bone Resorption and the Significance in Cancer
By T. J. Martin and D. Atkins

$\alpha_1$-Antitrypsin: Structure, Variation and Disease
By R. W. Carrell and M. C. Owen

Still Available:

VOLUME 1 131 pp. £2.00 (US $5.00)
VOLUME 2 187 pp. £4.00 (US $8.00)
VOLUME 3 152 pp. £4.50 (US $9.00)

Order From:
THE BIOCHEMICAL SOCIETY BOOK DEPOT,
P.O. BOX 32,
COMMERCE WAY, COLCHESTER CO2 8HP, ENGLAND
(or through your bookseller)
No. 36 NEUROTRANSMITTERS AND METABOLIC REGULATION  
*Edited by R. M. S. SMELLIE*  
169 pp. £4.00 (US$12.00)

No. 37 THE STRUCTURE AND FUNCTIONS OF EUKARYOTIC RIBOSOMES  
*Edited by R. M. S. SMELLIE*  
130 pp. £3.50 (US$10.50)

No. 38 NITROGEN METABOLISM IN PLANTS  
*Edited by T. W. GOODWIN and R. M. S. SMELLIE*  
351 pp. £8.00 (US$20.00)

No. 39 CALCIUM AND CELL REGULATION  
*Edited by R. M. S. SMELLIE*  
151 pp. £5.00 (US$13.50)

No. 40 THE METABOLISM AND FUNCTION OF GLYCOPROTEINS  
*Edited by R. M. S. SMELLIE and J. G. BEELEY*  
189 pp. £7.00 (US$17.50)

No. 41 BIOCHEMICAL ADAPTATION TO ENVIRONMENTAL CHANGE  
*Edited by R. M. S. SMELLIE and J. F. PENNOCK*  
240 pp. £10.00 (US$20.00)

No. 42 BIOCHEMISTRY OF THE CELL NUCLEUS  
*Edited by P. B. GARLAND and A. P. MATHIAS*  
244 pp. £15.00 (US$20.00)

No. 43 SUBSTRATE MOBILIZATION AND ENERGY PROVISION IN MAN  
*Edited by P. B. GARLAND and C. N. HALES*  
228 pp. (ISBN 0 904 498 07 7) £15.00 (US$32.00)

List of contents and authors:  
*The Redox State and Regulation of Amino Acid Metabolism in Man* by T. T. Aoki, R. J. Finley & G. F. Cahill, Jr.  
*Regulation of Pyruvate Oxidation and the Conservation of Glucose* by P. J. Randle, P. H. Sugden, A. L. Kerbe and P. M. Radcliffe.  
*Hormonal Control of Adipose-Tissue Lipolysis* by C. N. Hales, J. P. Luzio & K. Siddle.  
*Physiological Aspects of the Regulation of Ketogenesis* by D. H. Williamson & E. Whitelaw.  
*Substrate Cycles: their Metabolic, Energetic and Thermic Consequences in Man* by E. A. Newsholme.

Available from your bookseller or agent, or direct from

THE BIOCHEMICAL SOCIETY BOOK DEPOT  
P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex

Leaflets giving details of contents of the later volumes  
are available on request
This compendium, previously published under the title of *Collected Tentative Rules and Recommendations of the Commission on Biochemical Nomenclature* has now been updated and published in its third edition for the International Union of Biochemistry by the Biochemical Society under the title: *Biochemical Nomenclature and Related Documents*.

The compendium, prepared by the IUB Committee of Editors of Biochemical Journals, collects together all the current rules and recommendations on nomenclature that have emanated from the IUPAC-IUB and IUB nomenclature committees. As such it is an indispensable part of the library of all biochemists.

The price is £3.50/US$7.00, postage-paid (vi plus 223 pages, paper bound). A 20% discount is allowable on orders for 10 or more copies to a single address. Payment must accompany the order.

Biochemistry of Genetic Engineering

Edited by P. B. Garland and R. Williamson
pp. 145 (ISBN 0 904498 08 5) £12.50 (US$27.50)

A Biochemical Society Symposium held in London in July 1978

The Biochemical Society’s Forty-Fourth Symposium held at University College London in July 1978 reviewed in a two day meeting the exciting and rapidly expanding area of Genetic Engineering. Leaders in the field gave general introductions to the biochemical basis, practice and aims of many aspects of the subject, illustrated with accounts of current research. Subjects included ranged from the enzymology of restriction nucleases, ligases and polymerases, proceeded through vectors and hosts for recombinant DNA, considered in depth selected plant and animal systems, and concluded with industrial prospects and social perspectives. These excellent and well-received presentations form the basis of this publication, which will serve not only as a readable introduction to the biochemistry of genetic engineering but also as a valuable account of the activities of a number of leading laboratories as of summer 1978.

List of contents and authors:
Preface.
Restriction Nucleases, Ligases and Polymerases in Genetic Manipulation by A. D. B. Malcolm.
Safe and Useful Vector Systems by W. J. Brammar.
Plasmid Vectors for Genetic Manipulation in vitro by D. J. Sherratt.
Analysis of Restriction-Fragment Patterns from Complex Deoxyribonucleic Acid Species by E. M. Southern.
Application of Site-Directed Mutagenesis to Ribonucleic Acid and Deoxyribonucleic Acid Genomes by C. Weismann, H. Weber, T. Taniguchi, W. Müller & F. Meyer.
Primary-Sequence Changes in the Differentiation of Immunoglobulin Genes by T. H. Rabbitts.
SV40 and Polyoma Viruses: their Analysis by Deoxyribonucleic Acid Recombination in vitro and their Use as Vectors in Eukaryotic Systems by P. W. J. Rigby.
Genetic Manipulation Advisory Group (GMAG) and the Environment for Genetic Engineering in Britain by R. Williamson.
Genetic Engineering: Do We Need It? How Would We Do It? by A. J. Hale.

Guarantee

All Research Biochemicals from Boehringer Mannheim are guaranteed by-

- **Strict Quality Control** – To ensure consistency and reliability of your research reagents.

- **Careful Packaging** – High grade brown bottles and silicon rubber stoppers to keep the reagents in perfect condition.

- **Delivery** – Just phone or Telex your order for same day despatch by 1st Class letter post.
