Molecular Aspects
Contents of Volume 191, No. 3, 1980

Peptide and Protein Structure

Nearest-neighbour analysis of myoglobin antigenic sites. Nearest-neighbour residues whose replacement can alter the environment of binding-site residue(s) and thus change their characteristics and binding capability

The antibody response to myoglobin is independent of the immunized species. Analysis in terms of replacements in the antigenic sites and in environmental residues of the cross-reaction of fifteen myoglobins with sperm-whale myoglobin antisera raised in different species

Immunological characterization of human plasma fibronectin

Partial purification and characterization of oestrogen receptors in subfractions of hepatocyte plasma membranes

Isolation and characterization of a myeloma-spleen-cell hybrid producing antibody to phenylalanine hydroxylase

Studies on human pregnancy-associated plasma protein A. Purification by affinity chromatography and structural comparison with α2-macroglobulin

Sequence of residues 400–403 of bovine serum albumin

Albumin obscures sex differences in blood protein patterns of rats and humans

Enzymes and Enzyme Kinetics

Procollagen type III N-terminal endopeptidase in fibroblast culture

Evidence for a two-state transition in papain that may have no close analogue in ficin. Differences in the disposition of cationic sites and hydrophobic binding areas in the active centres of papain and ficin

Chloroacetone as an active-site-directed inhibitor of the aliphatic amidase from Pseudomonas aeruginosa

Isolation of β-N-acetylhexosaminidase from rabbit semen and its role in fertilization

Interaction of dinitrophenyl-pepstatins with human cathepsin D and with anti-dinitrophenyl antibody. Development of potential reagents for the localization in vivo of active proteinases at sites of tissue injury

Light-mediated activation of stromal sedoheptulose bisphosphatase

Phosphorylase kinase phosphorylation of skeletal-muscle troponin T

The adaptability, purification and properties of exo-β1,3-glucanase from the fungus Trichoderma reesei

Protein disulphide-isomerase activity in chick-embryo tissues. Correlation with the biosynthesis of procollagen

A. L. Kazim & M. Z. Atassi 673–680

S. S. Twining, H. Lehmann & M. Z. Atassi 681–697

R. J. Pietras & C. M. Szego 743–760

R. G. Reed, F. W. Putnam & T. Peters, Jr. 867–868

B. V. Nusgens, Y. Goebels, H. Shinkai & C. M. Lapierre 699–706

K. Brocklehurst & J. P. G. Malthouse 707–718

M. R. Hollaway, P. H. Clarke & T. Ticho 811–826

A. A. Farooqui & P. N. Srivastava 827–834

I. E. Woodrow & D. A. Walker 845–849

V. V. Risnik, A. B. Dobrovolskii, N. B. Gusev & S. E. Severin 851–854

C. W. Bamforth 863–866

(iii)
Nucleotides, Nucleic Acids and Nucleoproteins

Binding of quinoline analogues of echinomycin to deoxy-ribonucleic acid. Role of the chromophores

K. R. Fox, D. Gauvreau, D. C. Goodwin & M. J. Waring

Methylation of nuclear DNA in Physarum polycephalum

P. A. Whittaker & N. Hardman

729–742

789–862

Lipids

Fatty acid elongation by a particulate fraction from germinating pea

B. R. Jordan & J. L. Harwood

791–797

Membranes

Use of fluorescent probes in the study of phospholipid–sterol bilayers

S. A. Wharton, S. S. G. De Martinez & C. Green

785–790

Physical Biochemistry

Characterization of collagenous meshworks by volume exclusion of dextrans

J. L. Bert, R. H. Pearce, J. M. Mathieson & S. J. Warner

761–768

The multiple complexes formed by the interaction of platelet factor 4 with heparin

P. E. Bock, M. Luscombe, S. E. Marshall, D. S. Pepper & J. J. Holbrook

769–776

General Methods

Immobilization of DNA for affinity chromatography and drug-binding studies

A. J. MacDougall, J. R. Brown & T. W. Plumbridge

855–858

Contents of Volume 191, No. 2

Peptide and Protein Structure
New proline-rich proteins in isolated insect Z-discs
The random character of protein evolution and its effect on the reliability of phylogenetic information deduced from amino acid sequences and compositions
Effect of ligand binding on the conformation of human plasma vitamin D binding protein (group-specific component)
The purification and characterization of a third storage protein (convicilin) from the seeds of pea (Pisum sativum L.)
Immunochemical distinction between two different chains of type IV collagen
Study of the 10-nm-filament fraction isolated during the standard microtubule preparation
Phosphorylation of rabbit cardiac-muscle troponin I by phosphorylase kinase. The effect of adrenaline
Human atrial and ventricular myosin light-chain subunits in the adult and during development
A comparative study of myosin and its subunits in adult and neonatal-rat hearts and in rat heart cells from young and old cultures
Heterogeneity of proteins resembling high-mobility-group protein HMG-T in trout testes nuclei
Isolation of a phenylalanine hydroxylase-stimulating monoclonal antibody by rat-myeloma–rat-spleen-cell fusion

Enzymes and Enzyme Kinetics
Properties of spermatozoal superoxide dismutase and lack of involvement of superoxides in metal-ion-catalysed lipid-peroxidation reactions in semen
Dual nucleotide specificity of bovine glutamate dehydrogenase. The role of negative co-operativity
A comparison of potato and vertebrate lactate dehydrogenases
Modification of mouse testicular lactate dehydrogenase by pyridoxal 5'-phosphate
Resolution of protein disulphide-isomerase and glutathione–insulin transhydrogenase activities by covalent chromatography. Properties of the purified protein disulphide-isomerase
Bovine liver thiol–protein disulphide oxidoreductases. An alternative method for differential purification and resolution of protein disulphide-isomerase and glutathione–insulin transhydrogenase
Generation of superoxide anion by the NADH dehydrogenase of bovine heart mitochondria
Identification of the subunits of bovine heart mitochondrial NADH dehydrogenase that are exposed to the phospholipid bilayer by photolabelling with 5-iodonaphth-1-yl azide

G. M. Sainsbury & B. Bullard 333–339

K. G. Gould & P. C. Engel 365–371
D. A. Hillson & R. B. Freedman 373–388
D. A. Hillson & R. B. Freedman 389–393
J. F. Turrens & A. Boveris 421–427
F. G. P. Earley & C. I. Ragan 429–436
Purification of an NADH—(dichlorophenol-indophenol) oxidoreductase from Bacillus stearothermophilus

Further studies on the substrate specificity and inhibition of the stereospecific CS2 secondary alkylsulphohydrolase of Comamonas terrigena

Human cathepsin H

X-ray absorption spectroscopy of xanthine oxidase. The molybdenum centres of the functional and the desulpho forms

Active-site modification of native and mutant forms of inosine 5'-monophosphate dehydrogenase from Escherichia coli K12

Purification of glutamate dehydrogenase from ox brain and liver. Evidence that commercially available preparations of the enzyme from ox liver have suffered proteolytic cleavage

Isotope effect of peroxidation of deuterium-labelled ethanol by liver catalase

Some properties of pig kidney-cortex aldehyde reductase

A neutral endopeptidase in the microvillar membrane of pig intestine. Partial purification and properties

Inhibition of lysosomal α-mannosidase by swainsonine, an indolizidine alkaloid isolated from Swainsona canescens

The interpretation of entropy/enthalpy compensation phenomena in the deacylation of acyl-α-chymotrypsins

1,2-Diacylglycerol kinase of human erythrocyte membranes. Assay with endogenously generated substrate

Metalloproteins

Near-infrared magnetic and natural circular dichroism of cytochrome c oxidase

A Mössbauer spectroscopic investigation of the redox behaviour of the molybdenum–iron protein from Klebsiella pneumoniae nitrogenase. Mechanistic and structural implications

On the sensitivity of metallothioneins to oxidation during isolation

Nucleotides, Nucleic Acids and Nucleoproteins

The EcoRI restriction endonuclease with bacteriophage λ DNA. Kinetic studies

The EcoRI restriction endonuclease with bacteriophage λ DNA. Equilibrium binding studies

Lipids

The presence of lysophosphatidylcholine in chromaffin granules

Complex lipids of a polyol and general-fatty-acid-requiring Butyribrio sp. isolated from the ovine rumen

Structure of diabolic acid-containing phospholipids isolated from Butyribrio sp.

Stereospecific distribution of palmitic acid in the triacylglycerols of rat adipocytes. Effects of varying the composition of the substrate fatty acid in vitro
Carbohydrates and Complex Carbohydrates
The teichuronic acid from the walls of Bacillus licheniformis A.T.C.C. 9945
The acid lability of the glycosidic bonds of l-iduronic acid residues in glycosaminoglycans
Antigenic determinants of a plant proteoglycan, the Gladiolus style arabinogalactan-protein

Physical Biochemistry
Fluorescence-polarization studies on binding of 4-methylumbelliferyl β-D-galactopyranoside to Ricinus communis (castor-bean) agglutinin
Magnetization curves of haemoproteins measured by low-temperature magnetic-circular-dichroism spectroscopy
The photoinduced isomerization of bilirubin in cationic detergent solutions

Peptide and Protein Structure
Nearest-neighbour analysis of myoglobin antigenic sites. Nearest-neighbour residues whose replacement can alter the environment of binding-site residue(s) and thus change their characteristics and binding capability
The antibody response to myoglobin is independent of the immunized species. Analysis in terms of replacements in the antigenic sites and in environmental residues of the cross-reaction of fifteen myoglobins with sperm-whale myoglobin antisera raised in different species
Immunological characterization of human plasma fibronectin
Partial purification and characterization of oestrogen receptors in subfractions of hepatocyte plasma membranes
Isolation and characterization of a myeloma–spleen-cell hybrid producing antibody to phenylalanine hydroxylase
Studies on human pregnancy-associated plasma protein A. Purification by affinity chromatography and structural comparison with α₂-macroglobulin
Sequence of residues 400–403 of bovine serum albumin
Albumin obscures sex differences in blood protein patterns of rats and humans

Enzymes and Enzyme Kinetics
Procollagen type III N-terminal endopeptidase in fibroblast culture
Evidence for a two-state transition in papain that may have no close analogue in ficin. Differences in the disposition of cationic sites and hydrophobic binding areas in the active centres of papain and ficin
Chloroacetone as an active-site-directed inhibitor of the aliphatic amidase from Pseudomonas aeruginosa

Contents of Volume 191, No. 3
Isolation of $\beta$-N-acetyhexosaminidase from rabbit semen and its role in fertilization

Interaction of dinitrophenyl-pepstatins with human cathepsin D and with anti-dinitrophenyl antibody. Development of potential reagents for the localization in vivo of active proteinases at sites of tissue injury

Light-mediated activation of stromal sedoheptulose bisphosphatase

Phosphorylase kinase phosphorylation of skeletal-muscle troponin T

The adaptability, purification and properties of exo-$\beta$1,3-glucanase from the fungus Trichoderma reesei

Protein disulphide-isomerase activity in chick-embryo tissues. Correlation with the biosynthesis of procollagen

Nucleotides, Nucleic Acids and Nucleoproteins

Binding of quinoline analogues of echinomycin to deoxyribonucleic acid. Role of the chromophores

Methylation of nuclear DNA in Physarum polycephalum

Lipids

Fatty acid elongation by a particulate fraction from germinating pea

Membranes

Use of fluorescent probes in the study of phospholipid-sterol-bilayers

Physical Biochemistry

Characterization of collagenous meshworks by volume exclusion of dextrans

The multiple complexes formed by the interaction of platelet factor 4 with heparin

General Methods

Im mobilization of DNA for affinity chromatography and drug-binding studies
