Cellular Aspects

Contents of Volume 192, No. 2, 1980

Protein Biosynthesis/Molecular Genetics
Relative distribution of post-nuclear poly(A)-containing RNA abundance groups within the nuclear and post-nuclear polyadenylated and non-polyadenylated RNA populations of the lactating guinea-pig mammary gland
I. C. Bathurst, R. K. Craig, D. G. Herries & P. N. Campbell

The inhibitory action of L-dihydroxyphenylalanine (L-dopa) in the presence of a monoamine oxidase inhibitor on protein synthesis in vivo and the partial amelioration of this by methionine supplementation
A. H. Bone & H. R. Taufek

Protein Turnover
General characteristics of normal and stress-enhanced protein degradation in Lemna minor (duckweed)
R. J. Cooke & D. D. Davies

Biosynthesis of rat liver pyruvate kinase. Measurement of enzyme lifetime and the rate of synthesis at weaning
T. J. Hopkirk & D. P. Bloxham

Measurement of the rates of protein synthesis in rabbits. A method for the estimation of rates of change in the specific radioactivities of free amino acids during continuous infusions
G. E. Lobley, S. P. Robins, R. M. Palmer & I. McDonald

Measurement of the synthesis rates of collagens and total protein in rabbit muscle
R. M. Palmer, S. P. Robins & G. E. Lobley

A rapid and convenient technique for measuring the rate of protein synthesis in tissues by injection of [3H]phenylalanine
P. J. Garlick, M. A. McNurlan & V. R. Preedy

Metabolism, Regulation and Control Processes
Correlation of nuclear acceptor sites for oestrogen receptors with gene transcription in vitro
R. N. Taylor, G. E. Swaneck & R. G. Smith

Regulation of heparan sulphate metabolism by adenosine 3':5'-cyclic monophosphate in hepatocytes in culture
P. R. Sudhakaran, W. Sinn & K. von Figura

Tryptophan pyrrolase in haem regulation. Experiments with administered haematin and the relationship between the haem saturation of tryptophan pyrrolase and the activity of 5-aminolaevulinate synthase in rat liver
A. N. Welch & A. A.-B. Badawy

The effect of hyperphenylalaninaemia on glycine metabolism in developing rat brain
C. E. Isaacs & O. Greengard

Inhibition of rat brain tryptophan metabolism by ethanol withdrawal and possible involvement of the enhanced liver tryptophan pyrrolase activity
A. A.-B. Badawy N. F. Punjani, C. M. Evans & M. Evans

Use of a novel rapid preparation of fat-cell plasma membranes employing Percoll to investigate the effects of insulin and adrenaline on membrane protein phosphorylation within intact fat-cells
G. J. Belsham, R. M. Denton & M. J. A. Tanner

Studies on the incorporation of [32P]phosphate into pyruvate dehydrogenase in intact rat fat-cells. Effects of insulin
W. A. Hughes, R. W. Brownsey & R. M. Denton

The latent collagenase and gelatinase of human polymorphonuclear neutrophil leucocytes
G. Murphy, U. Bretz, M. Baggilini & J. J. Reynolds

The preparation and purification of isolated rat corpus-luteum cells and their use in studying the relationship between cholesterol biosynthesis and the lutropin-stimulated formation of progesterone
B. C. McNamara, C. E. G. Cranra, R. Booth & D. A. Stansfield
Reduced lysyl oxidase activity in skin fibroblasts from patients with Menkes' syndrome

Metal ion interactions in the control of haem oxygenase induction in liver and kidney

The metabolism of L-tryptophan by isolated rat liver cells. Quantification of the relative importance of, and the effect of nutritional status on, the individual pathways of tryptophan metabolism

Interrelationship of glycogen metabolism and lactose synthesis in mammary epithelial cells of mice

Changes in sterol biosynthesis accompanying cessation of glial cell growth in serum-free medium

Ornithine decarboxylase activity in insulin-deficient states

The regulation of pyruvate oxidation during membrane depolarization of rat brain synaptosomes

Nucleocytoplasmic transport of RNA. The effect of 3'-deoxyadenoosine triphosphate on RNA release from isolated nuclei

Thyroid-hormone effects on ornithine decarboxylase

Cell Surfaces and Receptors

The determination and localization of sialic acid in guinea-pig granulocytes

The role of extra-hepatic tissues in the receptor-mediated plasma clearance of glycoproteins terminated by mannose or N-acetylglucosamine

Fluid endocytosis by rat liver and spleen. Experiments with 125I-labelled poly(vinylpyrrolidone) in vivo

Developmental Biochemistry

The role of glycogen synthase phosphatase in the glucocorticoid-induced deposition of glycogen in foetal rat liver

Synthesis of apoprotein B of very low density lipoprotein in embryonic chick liver. Development of responsiveness to oestrogen

Membranes, Transport, Bioenergetics and Photosynthesis

The two cytochromes c in the facultative methylotroph Pseudomonas AM1

The purification and properties of the soluble cytochromes c of the obligate methylotroph Methylophilus methylotrophus

The electron-transport chains of the obligate methylotroph Methylophilus methylotrophus

Isolation of α-subunits of factor F, from submitochondrial particles and the reconstitution of active ATPase from isolated α-subunits and β-subunits bound to the mitochondrial membrane
