

B.D.H. VITAMIN-FREE DIET

(FOR FEEDING RATS)

THE demand for a vitamin-free diet ready for use in rat feeding experiments as carried out in testing for Vitamin A and Vitamin B has led to the introduction of the B.D.H. Vitamin-free Diet. The Diet consists of inactivated casein, starch, a hardened vegetable oil, and a mixture of salts. Every batch is biologically tested in the B.D.H. Physiological Laboratories before it is passed for issue.

“SCIENTIA,”

INTERNATIONAL REVIEW OF SCIENTIFIC SYNTHESIS
Published every month (each number containing 100 to 120 pages)

Editor: EUGENIO RIGNANO

IS THE ONLY REVIEW the contributors to which are really international.

IS THE ONLY REVIEW that has a really world-wide circulation.

IS THE ONLY REVIEW of scientific synthesis and unification that deals with the fundamental questions of all sciences: the history of the sciences, mathematics, astronomy, geology, physics chemistry, biology, psychology and sociology.

IS THE ONLY REVIEW therefore which, while immediately interesting students of biology and physiology by its numerous and important articles and reports relating to these sciences, presents them also the means of knowing, in a summary and synthetic form, the chief problems of all the other branches of knowledge.

IS THE ONLY REVIEW that among its contributors can boast of the most illustrious men of science in the whole world. A list of more than 350 of these is given in each number.

The articles are published in the language of their authors, and every number has a supplement containing the French translation of all the articles that are not French. The review is thus completely accessible to those who know only French. (Write for a free copy to the General Secretary of “Scientia,” Milan, sending Sixpence in stamps of your country, merely to cover packing and postage.)

PHYSIOLOGICAL REVIEWS

PUBLISHED BY THE
AMERICAN PHYSIOLOGICAL SOCIETY

UNDER THE EDITORIAL DIRECTION OF

W. H. HOWELL, BALTIMORE
CHARLES W. EDMUNDS, ANN ARBOR
WALTER J. MEEK, MADISON
J. J. R. MACLEOD, TORONTO
LAWRENCE J. HENDERSON, CAMBRIDGE,
MASS.
E. B. KRUMBHAAR, PHILADELPHIA
D. R. HOOKER, *Managing Editor*, BALTIMORE

Containing short but comprehensive articles dealing with the recent literature in Physiology, using this term in a broad sense to include Bio-Chemistry, Bio-Physics, Experimental Pharmacology and Experimental Pathology.

TENTATIVE CONTENTS OF VOLUME VII, 1927

Additional Articles will be announced later

- | | |
|--|---|
| CHARLES A. DOAN: The Transfusion Problem | L. R. DRAGSTEDT: Physiology of the Parathyroids. |
| C. L. A. SCHMIDT: Excretory Function of Bile | J. C. MEAKINS: Arterial Hypertension and Hypotension, Their Clinical Significance |
| MICHAEL HEIDELBERGER: The Chemical Nature of Immune Substances | SWALE VINCENT: Current Views on "Internal Secretion" |
| J. S. HALDANE: Acclimatisation to High Altitudes | CHARLES C. MACKLIN: The Bronchial Musculature |
| GEORGE B. WALLACE: Specificity in the Reaction of Drugs | C. E. FERREE: Color Vision |
| J. F. MCCLENDON: Iodine and the Food Supply | EDGAR ALLEN AND E. A. DOISY: Ovarian Hormones |
| LAWRENCE BECKING AND G. S. PARKS: Metabolism of Autotrophic Microorganisms | S. L. WARREN: Physiological Action of X-Rays |
| H. C. BAZETT: Physiological Responses to Heat | H. M. VERNON: Industrial Fatigue |
| HENRY LAURENS: Physiological Responses to Light | E. V. MCCOLLUM: Isolation of Vitamins |
| WALTER J. MEEK: Regulation of Vascular Tone | J. A. GARDNER: Origin and Significance of Cholesterol |
| E. S. SUNDSTROM: Physiological Effect of Tropical Climate | T. P. NASH: Phlorhizin |
| H. L. VAN DE SANDE-BAKHUYZEN AND CARL L. ALSBERG: The Growth Curve in Annual Plants. | S. A. ASDELL: The Growth and function of the corpus luteum. |
