(Editors)

Structure and Activity of Natural Peptides
Selected Topics
Proceedings of the Fall Meeting, Gesellschaft für Biologische Chemie,
Tübingen, Germany, September 1979

1981. 17 cm x 24 cm. XII, 634 pages. Numerous illustrations.
Hardcover. DM 150,–; approx. US $71.50 ISBN 3 11 008264 0

CONTENTS (main chapters):
I. Surveys of Selected Topics. II. Isolation of New Peptides.
III. Methods of Purification, Isolation and Characterization of Peptides.
IV. Peptide Syntheses. V. Miscellaneous and Biological Activity of
Peptides.

Writing a Scientific Paper & Speaking at Scientific Meetings

By Vernon Booth

To the newly revised and amplified fifth edition of Writing a Scientific Paper, the author has added the companion essay on Speaking at Scientific Meetings. Widely praised in its earlier editions, this concise compendium of advice is expected to receive renewed acclaim. By both the first-time writers of scientific papers and the alert 'old hand' it will be found of the greatest help in avoiding faults in writing and presenting papers.

Messenger RNA and Ribosomes in Protein Synthesis

Edited by C. F. PHELPS
and H. R. V. ARNSTEIN

The Biochemical Society's Forty-Seventh Symposium, held in London in December 1981, assembled some of the leading workers in this area of biochemistry. The subjects for discussion were chosen for their timeliness and distinctiveness, and included accounts of ribosome and messenger RNA structure and function, initiation factors, caps and ribonucleoproteins, as well as consideration of the processes leading to the distribution of newly synthesized proteins within the cell. The papers presented are now published in this volume.

Boehringer Mannheim have used latest technology in genetic engineering to produce new enzymes such as α-Galactosidase from E. coli, and β-Galactose dehydrogenase S from pseudomonas fluorescens cloned on E. coli.

These enzymes are noted for
☐ High specific activity for greater economy
☐ Exceptional purity for minimal interference
☐ Excellent stability for long term reliability

These are just two of the enzymes which have joined BM's biochemical programme, suitable for analytical, metabolic and molecular studies. There are many more on the way.

Ask us now for the Biochemical Catalogue showing the complete range of enzymes, substrates and cofactors . . . . and join our biotechnology line.
