Cellular Aspects
Contents of Volume 214, No. 1, 1983

Review Article
Intracellular degradation of newly synthesized secretory proteins
R. S. Bienkowski 1–10

Protein Biosynthesis/Molecular Genetics
Protein synthesis in isolated rabbit forelimb muscles. The possible role of metabolites of arachidonic acid in the response to intermittent stretching
R. H. Smith, R. M. Palmer & P. J. Reeds 153–161

Metabolism, Regulation and Control Processes
Insulin and growth factors stimulate the phosphorylation of a Mr 22000 protein in 3T3-L1 adipocytes
P. J. Blackshear, R. A. Nemenoff & J. Avruch 11–19
Observations on the affinity for carnitine, and malonyl-CoA sensitivity, of carnitine palmitoyltransferase I in animal and human tissues. Demonstration of the presence of malonyl-CoA in non-hepatic tissues of the rat
J. D. McGarry, S. E. Mills, C. S. Long & D. W. Foster 21–28
Defective utilization of haem in selenium-deficient rat liver
M. A. Correia & R. F. Burk 53–58
Interaction of malonyl-CoA and related compounds with mitochondria from different rat tissues. Relationship between ligand binding and inhibition of carnitine palmitoyltransferase I
S. E. Mills, D. W. Foster & J. D. McGarry 83–91
Challenge of hepatocytes by glucagon triggers a rapid modulation of adenylate cyclase activity in isolated membranes
C. M. Heyworth & M. D. Houslay 93–98
Insulin and glucagon regulate the activation of two distinct membrane-bound cyclic AMP phosphodiesterases in hepatocytes
C. M. Heyworth, A. V. Wallace & M. D. Houslay 99–110
Effects of polychlorinated biphenyl compounds, 2,3,7,8-tetrachlorodibenzo-p-dioxin, phenobarbital and iron on hepatic uroporphyrinogen decarboxylase. Implications for the pathogenesis of porphyria
H. de Verneuil, S. Sassa & A. Kappas 145–151
Mitochondrial Ca²⁺ transport in lean and genetically obese (ob/ob) mice
D. R. Fraser & P. Trayhurn 163–170
The influence of GDP on Ca²⁺ uptake by mitochondria of brown adipose tissue from lean and genetically obese (ob/ob) mice
P. Trayhurn & D. R. Fraser 171–175
Diurnal variations in food intake and in lipogenesis in mammary gland and liver of lactating rats
M. R. Munday & D. H. Williamson 183–187
Induction of glycolytic enzyme synthesis in proliferating fibroblasts. Study of phosphofructokinase, glucose phosphate isomerase and pyruvate kinase
M. C. Meienhofer, J.-C. Dreyfus & A. Kahn 195–201
The effects of corticosterone, cold exposure and overfeeding with sucrose on brown adipose tissue of obese Zucker rats (fa/ fa)
The role of GTP in prostaglandin E₁ stimulation of adenylate cyclase in platelet membranes
J. M. Stein & B. R. Martin 231–234
Regulation of noradrenaline of the mitochondrial and microsomal forms of glycerol phosphate acyltransferase in rat adipocytes
M. H. Rider & E. D. Saggerson 235–246
The trypsin-sensitive, heat-labile, N-ethylmaleimide-sensitive factor in adipocyte post-microsomal supernatant which affects the assay of adipocyte glycerol phosphate acyltransferase activities
M. H. Rider & E. D. Saggerson 247–255
(23S)-1,23,25-Trihydroxycholecalciferol, an intestinal metabolite of 1,25-dihydroxycholecalciferol
GDP binding to brown-adipose-tissue mitochondria of mice treated chronically with corticosterone

Cell Surfaces and Receptors
Evidence that Mg2+- or Ca2+-activated adenosine triphosphatase in rat pancreas is a plasma-membrane ectoenzyme
Inositol phospholipid metabolism and myoblast fusion
Evidence for surface glycoprotein involvement in the intracellular bioactivity of insulin in rat adipocytes
Formation of complexes between 125I-labelled human or bovine somatotropins and binding proteins in vivo in rat liver and kidney
Endocytosis of liposomes bound to cell surface proteins measured by flow cyttofluorometry
Reversible reduction of insulin receptor affinity by ATP depletion in rat adipocytes
Differential control of insulin and somatostatin-receptor recruitment in isolated pancreatic islets
Segregation into separate rouleaux of erythrocytes from different species. Evidence against the agglomerin hypothesis of rouleaux formation
Stimulation of prostaglandin production through purinceptors on cultured porcine endothelial cells

Developmental Biochemistry
Induction of the branched-chain 2-oxo acid dehydrogenase complex in 3T3-L1 adipocytes during differentiation
Age-related changes in the structure of proteoglycan link proteins present in normal human articular cartilage

Membranes, Transport, Bioenergetics and Photosynthesis
Mineralocorticoid-specificity of aldosterone-induced protein synthesis in giant-toad (Bufo marinus) urinary bladders
Characterization of Ca2+ transport in rat renal brush-border membranes and its modulation by phosphatidic acid
Oxygen affinity of the respiratory chain of Acanthamoeba castellanii
Hepatic microsomal Ca2+-dependent ATPase. Calmodulin-dependence and partial purification
Purines as 'hyper-repressors' of glucose transport. A role for phosphoribosyl diphosphate
Renal brush-border-membrane vesicles prepared from newborn rats by free-flow electrophoresis and their proline uptake

B.J. Letters
A comparison of iodinated and technetium-labelled zymosan for measurement of particle binding and internalization by macrophages
