

Molecular Aspects

Contents of Volume 215, No. 2, 1983

Peptide and Protein Structure

- Neurofilaments from ox spinal nerves. Isolation, disassembly, reassembly and cross-linking properties
M. J. CARDEN & P. A. M. EAGLES 227-237
- The proteolytic digestion of ox neurofilaments with trypsin and α -chymotrypsin
T. K. CHIN, P. A. M. EAGLES & A. MAGGS 239-252
- Amino acid sequence determination by g.l.c.-mass spectrometry of permethylated peptides. Optimization of the formation of chemical derivatives at the 2-10 nmol level
K. ROSE, M. G. SIMONA & R. E. OFFORD 261-272
- A new mass-spectrometric C-terminal sequencing technique finds a similarity between γ -interferon and α_2 -interferon and identifies a proteolytically clipped γ -interferon that retains full antiviral activity
K. ROSE, M. G. SIMONA, R. E. OFFORD, C. P. PRIOR, B. OTTO & D. R. THATCHER 273-277
- Endopeptidase-24.11 purified from pig intestine is differently glycosylated from that in kidney
I. S. FULCHER, M. F. CHAPLIN & A. J. KENNY 317-323
- Autoactivation of human complement subcomponent C1r involves structural changes reflected in modifications of intrinsic fluorescence, circular dichroism and reactivity with monoclonal antibodies
C. L. VILLIERS, G. J. ARLAUD & M. G. COLOMB 369-375
- Purification to homogeneity of pig leucocyte catabolin, a protein that causes cartilage resorption *in vitro*
J. SAKLATVALA, V. A. CURRY & S. J. SARFIELD 385-392

Enzymes and Enzyme Kinetics

- New class of sensitive and selective fluorogenic substrates for serine proteinases. Amino acid and dipeptide derivatives of rhodamine
S. P. LEYTUS, W. L. PATTERSON & W. F. MANGEL 253-260
- Benzyl *p*-guanidinothiobenzoate hydrochloride, a new active-site titrant for trypsin and trypsin-like enzymes
R. R. COOK & J. C. POWERS 287-294
- Resolution of myocardial phospholipase C into several forms with distinct properties
M. G. LOW & W. B. WEGLICKI 325-334
- Phosphofructokinase D from the epithelial cells of rat small intestine
S. M. KHOJA & G. L. KELLETT 335-341
- Properties of F_1 -ATPase from the *uncD412* mutant of *Escherichia coli*
J. G. WISE, T. M. DUNCAN, L. R. LATCHNEY, D. N. COX & A. E. SENIOR 343-350
- Bovine lens aldehyde dehydrogenase. Purification and preliminary characterization
H.-H. TING & M. J. C. CRABBE 351-359
- Bovine lens aldehyde dehydrogenase. Kinetics and mechanism
H.-H. TING & M. J. C. CRABBE 361-368
- Intramolecular distances between tryptophan residues and the active-site serine residue in alkaline bacterial proteinases as measured by fluorescence energy-transfer studies
N. C. GENOV, M. SHOPOVA, R. BOTEVA, F. RICCHELLI & G. JORI 413-416

Metalloproteins

- The optical properties of Cu_A in bovine cytochrome *c* oxidase determined by low-temperature magnetic-circular-dichroism spectroscopy
C. GREENWOOD, B. C. HILL, D. BARBER, D. G. EGLINTON & A. J. THOMSON 303-316
- Molecular aspects of embryonic mouse haemoglobin ontogeny
A. PURDIE, R. M. G. WELLS & T. BRITAIN 377-383
- Nitrogenase of *Klebsiella pneumoniae*. Kinetics of the dissociation of oxidized iron protein from molybdenum-iron protein: Identification of the rate-limiting step for substrate reduction
R. N. F. THORNELEY & D. J. LOWE 393-403
- Transient kinetic studies of *Neurospora crassa* cytochrome *c* oxidase
M. BRUNORI, M. C. SILVESTRINI, M. T. WILSON & H. WEISS 425-427

Lipids

- Kinetics and mechanism of phosphatidylcholine and cholesterol exchange between chylomicrons and high-density lipoproteins P. M. LIPPIELLO & M. WAITE 279–286

Carbohydrates and Complex Carbohydrates

- Biosynthesis and metabolism *in vivo* of intervertebral-disc proteoglycans in the mouse G. VENN & R. M. MASON 217–225

- Receptor-mediated endocytosis of proteoglycans by human fibroblasts involves recognition of the protein core J. GLÖSSL, R. SCHUBERT-PRINZ, J. D. GREGORY, S. P. DAMLE, K. VON FIGURA & H. KRESSE 295–301

- Age-related changes in chemical composition and physical properties of mucus glycoproteins from rat small intestine M. D. SHUB, K. Y. PANG, D. A. SWANN & W. A. WALKER 405–411

- The core protein of fibroblast proteoglycan sulphate consists of disulphide-bonded subunits L. CÖSTER, A. MALMSTRÖM, I. CARLSTEDT & L.-Å. FRANSSON 417–419

- The presence of polysaccharide in normal human gastric mucus J. R. CLAMP, B. COOPER, J. M. CREETH, D. ENE, J. BARRETT & M. GOUGH 421–423

B. J. Letters

- What does I_{50} mean? A. NAQUI 429–430

- Phosphatidylinositol phosphodiesterase of rat brain: Ca^{2+} -dependency, pH optima and heterogeneity R. F. IRVINE & R. M. C. DAWSON 431–432
