

BIOCHEMICAL SOCIETY SYMPOSIA NO. 47

Messenger RNA and Ribosomes in Protein Synthesis

Edited by C. F. PHELPS
and H. R. V. ARNSTEIN

The Biochemical Society's Forty-Seventh Symposium, held in London in December 1981, assembled some of the leading workers in this area of biochemistry. The subjects for discussion were chosen for their timeliness and distinctiveness, and included accounts of ribosome and messenger RNA structure and function, initiation factors, caps and ribonucleoproteins, as well as consideration of the processes leading to the distribution of newly synthesized proteins within the cell. The papers presented are now published in this volume.

List of contents and authors:

Preface. Prokaryotic Ribosome Structure: a Kinetic View by **C. G. Kurland**. *Structural Aspects of Eukaryotic Ribosomes* by **R. A. Cox & J. M. Kelly**. *The Secondary Structure of Ribosomal RNA, and its Organization within the Ribosomal Subunits* by **R. Brimacombe**. *Secondary Structure of Eukaryotic Messenger RNA* by **C. P. H. Vary & J. N. Vournakis**. *Studies on the Structure and Biogenesis of Yeast Ribosomes* by **M. Cannon**. *Translation Mechanism in Prokaryotes: Structure and Expression of Escherichia coli Initiation Factor IF3 Gene* by **M. Grunberg-Manago, M. Springer, J. A. Plumbridge, S. Blanquet, G. Fayat & C. Sacerdot**. *How do Eukaryotic Ribosomes Recognize the Unique AUG Initiator Codon in Messenger RNA?* by **M. Kozak**. *5'-Terminal Caps, Cap-Binding Proteins and Eukaryotic mRNA Function* by **A. J. Shatkin, E. Darzynkiewicz, Y. Furuichi, H. Kroath, M. A. Morgan, S. M. Tahara & M. Yamakawa**. *Association of an M_r 50000 Cap Binding Protein with the Cytoskeleton in BHK Cells* by **H. Trachsel, A. Zumbé, C. Stähli, M. Hübelin & N. Sonenberg**. *Messenger Ribonucleoprotein Complexes in Gene Expression* by **H. R. V. Arnstein**. *Mechanism of Protein Translocation Across the Endoplasmic Reticulum* by **P. Walter & G. Blobel**. *Synthesis and Maturation of the Erythrocyte Anion Transport Protein — an Internal Sequence for Membrane Insertion* by **H. F. Lodish & W. A. Braell**. *Subject Index*.

BIOTECHNOLOGY

Edited by C. F. PHELPS
and P. H. CLARKE

The fourteen contributions forming this volume were presented at a London meeting of the Biochemical Society including the Society's Forty-Eighth Symposium 'Biotechnology', in December 1982. With today's increasing pressures to develop latest laboratory findings into practical industrial processes as quickly as possible the chosen theme of this Symposium was a timely one. The papers represent up-to-date reports from international biochemists whose work is of direct relevance to the wide areas of interests concerned with biotechnology, together with glimpses of the early development of its techniques and a look at its exciting future.

List of contents and authors:

Preface. How Biotechnology Developed at University College London by E. M. Crook. *The Future of Biotechnology* by P. Dunnill. *Carbohydrate Transformations by Immobilized Cells* by C. Bucke. *Biological Halogenation and Epoxidation* by S. L. Neidleman & J. Geigert. *High-Productivity Alcohol Fermentations using Zymomonas mobilis* by M. L. Skotnicki, R. G. Warr, A. E. Goodman, K. J. Lee & P. L. Rogers. *The Problem of Lignin Biodegradation* by L. Wallace, A. Paterson, A. McCarthy, U. Raeder, L. Ramsey, M. MacDonald, R. Haylock & P. Broda. *Special Bacterial Polysaccharides and Polysaccharases* by T. Harada. *A New Era of Exploitation of Microbial Metabolites* by A. L. Demain. *Industrial Prospects for Thermophiles and Thermophilic Enzymes* by B. S. Hartley & M. A. Payton. *Anaerobic Fermentations – Some New Possibilities* by J. G. Morris. *Xenobiotic Degradation in Industrial Sewage: Haloaromatics as Target Substrates* by H. J. Knackmuss. *Genetic Analysis and Manipulation of Catabolic Pathways in Pseudomonas* by P. R. Lehrbach & K. N. Timmis. *Plant Cell Cloning and Culture Products* by L. H. Jones. *A Hybrid Promoter and Portable Shine-Dalgarno Regions of Escherichia coli* by H. A. De Boer, L. J. Comstock, A. Hui, E. Wong & M. Vasser. *Subject Index.*

257 pp. ISBN 0 904498 15 8 £25.00 (US \$57.50)

Boehringer Mannheim are extending their range of restriction enzymes and buffers

Aha III, Sau I (MstII) and Stu I are part of the rapidly expanding programme of restriction enzymes from **Boehringer Mannheim**. Not only is our range *wider* than ever, but each new enzyme is supplied with a comprehensive batch-specific data sheet for optimal control of experimental conditions.

Boehringer Mannheim's range of buffers is expanding too. Each one undergoes the highest standard of purification and quality control to provide you with a reliable yet economical preparation. *Tris*, for example, is notable for its low level of heavy metal contamination, whilst *Hepes* is suitable as a cell culture buffer since it is function tested for cell growth.

A new book "*Biochemicals for Molecular Biology*" presents information on our range of products for the **Molecular Biologist**. We will send a copy to you on request.
