Volume 220, No. 2, 1984

REVIEW ARTICLE
Inositol trisphosphate and diacylglycerol as second messengers
M. J. BERRIDGE 345–360

FULL AND RAPID PAPERS

Proteins
Collagen heterogeneity and quantification in developing bovine nuchal ligament
C. A. CHAMBERS, C. A. SHUTTLEWORTH, S. AYAD & M. E. GRANT 385–394
A collagogenous glycoprotein found in dissociative extracts of foetal bovine nuchal ligament. Evidence for a relationship with type VI collagen
K. R. KNIGHT, S. AYAD, C. A. SHUTTLEWORTH & M. E. GRANT 395–403
Isolation and characterization of the two giant secretory proteins in salivary gland of Chironomus tentans
L. RYDLANDER 423–431
High-affinity binding of Ca\(^{2+}\) to bovine \(\alpha\)-lactalbumin in the absence and presence of EGTA
D. T. W. BRYANT & P. ANDREWS 617–620

Enzymes
Kinetics of chymotrypsin- and papain-catalysed synthesis of [leucine]enkephalin and [methionine]enkephalin
W. KULLMANN 405–416
Kinetic and e.p.r. studies of cyanide and azide binding to the copper sites of dopamine (3,4-dihydroxyphenethylamine) \(\beta\)-mono-oxygenase
N. J. BLACKBURN, D. COLLISON, J. SUTTON & F. E. MABBS 447–454
Characterization of deoxyribonuclease activities derived from control and inflammation-associated mouse peritoneal macrophages
G. E. BROWN, T. P. KARFETSKY, K. RICTOR & A. RAHMAN 561–568
Peptide thioesters and 4-nitroanilides as substrates for porcine pancreatic kallikrein
J. C. POWERS, B. J. MCRAE, T. TANAKA, K. CHO & R. R. COOK 569–573
Partial purification and properties of rat liver glutaminase
M. Patel & J. D. McGIVAN 583–590
The nickel ion environment in jack bean urease
L. ALAGNA, S. S. HASNAIN, B. PIGGOTT & D. J. WILLIAMS 591–595
Differences between the electric fields of the catalytic sites of papain and actinidin detected by using the thiol-located nitrobenzofurazan label as a spectroscopic reporter group
K. BROCKLEHURST, E. SALIH & T. S. LODWIG 609–612

Carbohydrates
Bio synthesis and secretion of dermatan sulphate proteoglycans in cultures of human skin fibroblasts
L. ÖSTER, I. CARLSTEDT, A. MALMSTRÖM & B. SÄRNSTRAND 575–582

Lipids
The biosynthesis of triacylglycerols in microsomal preparations of developing cotyledons of sunflower (Helianthus annuus) L.
S. STYMNE & A. K. STOBART 481–488

Nucleic acids and molecular genetics
Defective processing of ribosomal precursor RNA in Saccharomyces cerevisiae
J. A. MITLIN & M. CANNON 461–467

Synthesis and degradation of macromolecules
Interactive effects of insulin and corticosterone on myofibrillar protein turnover in rats as determined by \(N^2\)-methylhistidine excretion
F. M. TOMAS, A. J. MURRAY & L. M. JONES 469–479
Degradation of proteins in rat liver mitochondrial outer membrane transplanted into different cell types. Evidence for alternative processing
S. M. RUSSELL, J. S. AMENTA & R. J. MAYER 489–498
Ca\(^{2+}\)-activated proteinase in the rat. Quantification by immunoassay in the uterus during pregnancy and involution, and in other tissues
J. S. ELCE, J. E. BAENZIGER & D. C. R. YOUNG 507–512
Hyaluronate is synthesized at plasma membranes
P. PREHM 597–600

(vii)
Contents

Intermediary metabolism and metabolic control

The coupling of metabolic to secretory events in pancreatic islets. The cytosolic redox state
Glycogenolytic effects of the calcium ionophore A23187, but not of vasopressin or angiotensin, in foetal-rat hepatocytes
Physiological significance of altered insulin metabolism in the conscious rat during lactation
Triacylglycerol synthesis in goat mammary gland. The effect of ATP, Mg\(^{2+}\) and glycerol 3-phosphate on the esterification of fatty acids synthesized de novo
Triacylglycerol synthesis in goat mammary gland. Factors influencing the esterification of fatty acids synthesized de novo
Glucose-stimulated protein phosphorylation in the pancreatic islet
A chromosomal phosphoprotein is preferentially released by mild micrococcal-nuclease digestion
A protein inhibitor of phosphofructokinase from the mucosa of rat small intestine. A mechanism for the regulation of glycolysis that is independent of glucose

Bioenergetics and transport

Effect of long-chain fatty acyl-CoA on mitochondrial and cytosolic ATP/ADP ratios in the intact liver cell
Significance of the endo-vinyl group of bilirubin in photochemical reactions
A proton n.m.r. study of iminodipeptide transport and hydrolysis in the human erythrocyte. Possible physiological roles for the coupled system

Membranes and receptors

Structures of the somatostatin receptor and prolactin receptor on rat hepatocytes characterized by affinity labelling
Determination of mitochondrial calcium content in hepatocytes by a rapid cellular fractionation technique. Vasopressin stimulates mitochondrial Ca\(^{2+}\) uptake
Photoaffinity labelling of nucleoside-transport proteins in plasma membranes isolated from rat and guinea-pig liver
Ontogeny, regional distribution and properties of thyroid-hormone receptors in the developing chick brain
Labelling of the integral proteins of sarcoplasmic-reticulum membranes

Cell structure and function

Serum albumin enhances the uptake of \(^{3}H\)cholesterol from phosphatidylcholine vesicles by cultured human fibroblasts

B.J. LETTERS

A note on the organization of the core lipids in porcine low density lipoproteins
The cholesteryl-ester core of porcine low-density lipoproteins
