The Biochemical Journal places emphasis on the prompt publication of Full-length Papers (on average about 6 months after receipt), Rapid Papers (on average within 3 months of receipt), Reviews and BJ Letters. It is the Journal's policy to publish papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimental-ly, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary or inconclusive experiments should not be described.

Papers are accepted from non-members and members of the Biochemical Society. Prospective authors should note that the Biochemical Journal offers rapid publication and makes no manuscript handling charges, no page charges and no charges for plates (except colour). Five reprints are provided free of charge; further copies are available at modest cost. The paragraphs below are a summarized version of information provided in the Biochemical Society’s Policy of the Journal and Instructions to Authors (Biochem. J. 1985 225, i-26) Copies are available from the Editorial Office.

The following types of submission are considered by the Editorial Board:

1. **Full-length Papers** (normally eight printed pages maximum)
2. **Rapid Papers** (four printed pages maximum)
3. **Letters** (two printed pages maximum)
4. **Reviews** (usually solicited)

**Full-length Papers and Rapid Papers**

Full-length Papers should not normally exceed eight printed pages, including figures and tables. Longer papers may be acceptable if their content justifies their length. Indeed, the Board's desire to restrict the length of papers should not lead authors to split their work into two or more shorter papers. For example, a single paper consisting of ten printed pages will normally be considered more favourably than two papers each of six pages dealing with the same material. Authors should remember that short papers are generally published with the least delay.

All papers that can be accommodated in four pages of the Journal will be treated as Rapid Papers. They receive priority treatment and it is aimed for their publication to be within 3 months of receipt. However, the criteria of reviewing and the appearance of Rapid Papers in the Journal are identical with those of Full-length Papers. In order to achieve the accelerated schedule, reviewers are asked to deal with the paper within 48 h of receipt. Rapid Papers are not normally supplied to authors. However, authors are given details of any editing of Rapid Papers at the same time that the typescripts are sent to the printer, with a request that any essential amendments be sent to the Editorial Secretary as soon as possible. The scientific editorial staff in the Editorial Office check the proofs to ensure that they tally exactly with the edited typescripts and make any necessary alterations indicated by the authors.

Papers submitted for publication should be addressed to the Editorial Secretary, The Biochemical Journal, 7 Warwick Court, London WC1R 5DP, U.K. Three copies of the typescript should be submitted. The typescript should bear the name and address of the author to whom correspondence (including proofs) should be sent. An additional copy of the synopsis should be enclosed. The top copy should be accompanied by the original artwork (see the Appendix to Policy of the Journal and Instructions to Authors for advice on the preparation of figures). Photocopies of line drawings are acceptable for the other two copies but glossy prints (not photocopies) of all the half-tone figures must be provided.

It is useful if the author encloses copies of relevant preceding papers, especially if these were not published in the Biochemical Journal. If the paper submitted refers to a paper 'in the press' in another journal the reviewers will not have access to this material and it is important that the author should include photocopies of the relevant typescript together with documentary evidence that it has been accepted for publication. Any reference to a 'personal communication' must be supported by documentary evidence from the individual quoted showing that agreement with the quotation is given.

Before preparing papers, authors should consult the current issue of the Journal to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and citation of references. Typescripts should be in double-spaced typing throughout (including the references and legends of tables and figures) on sheets of uniform size with wide margins.

Full-length Papers should not normally exceed 6000 words in length, and Rapid Papers must not exceed 3000 words, each inclusive of title, synopsis and references. Authors must assess what proportion of a page's contents (such as tables, figures and schemes) will occupy and reduce the number of text words accordingly at the rate of 80 words per full page of the Journal. Authors should state under which section of the contents list they wish their paper to appear:

- Proteins
- Enzymes
- Carbohydrates
- Lipids
- Nucleic acids and molecular genetics
- Synthesis and degradation of macromolecules
- Intermediary metabolism and metabolic control
- Bioenergetics and transport
- Membranes and receptors
- Cell structure and function
- Methods

**BJ Letters and Reviews**

BJ Letters are intended to provide an opportunity to discuss, criticize or expand specific points made in published work, or to present a new hypothesis. They should not be comments on general aspects of the biochemical world, nor should they be used as an alternative to a Rapid Paper. If a letter is polemical in nature, a reply may be solicited from other interested parties before its publication. Letters must not exceed 1200 words, which is approximately the equivalent of two printed pages.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication; however, prospective writers of reviews should first consult the Chairman of the Editorial Board.
