PRINTED IN GREAT BRITAIN
The Biochemical Journal is conducted by the Biochemical Society and is published by the Cambridge University Press.

This Society has been instituted for the purpose of facilitating intercourse between those biologists and chemists who are interested in the investigation of problems common to both, such as the chemical problems connected with Agriculture, Brewing, Animal and Vegetable Physiology and Pathology, &c. Persons interested in Bio-chemistry are eligible for election.

Meetings are held at different centres for the communication of papers to the Society.

The annual subscription is 36s., which includes a copy of the Journal, and becomes due on January 1st. Further information may be obtained on application to the Hon. Sec., Dr C. R. Harlington, Greenfield, Boxmoor, Herts., or to the Hon. Treas., Mr J. Addyman Gardner, 12e Hyde Park Mansions, London, N.W. 1, to whom subscriptions should be sent.

Papers for publication should be sent to Prof. A. Harden, F.R.S., Lister Institute, Chelsea Gardens, S.W. 1. Communications respecting the printing of the articles, or respecting the purchase of offprints should be addressed to the University Press, Cambridge.

The Journal is issued about every two months and the date at which each paper is received by the editors is printed at the beginning of the paper.

All communications respecting the purchase of copies of the parts or volumes, whether current or back issues, or respecting subscriptions in the case of non-members of the Biochemical Society (£3 net per volume (post free) payable in advance) should be addressed to The Cambridge University Press, Fetter Lane, London, E.C. 4, or to the Hon. Treas., Mr J. Addyman Gardner, 12e Hyde Park Mansions, London, N.W. 1. For prices of back numbers and volumes see list on p. 4 of Wrapper.

Quotations can be given for Buckram binding cases and for binding Subscribers' Sets.

The Cambridge University Press has appointed the University of Chicago Press agent for the sale of the Biochemical Journal in the United States of America and has authorised the following subscription price. $15.00 net.

Notice to Contributors.

1. Contributors who are members of the Biochemical Society receive 25 copies of their papers free and can purchase additional copies if notice be given when their proofs are returned. Other contributors may purchase reprints but receive no free copies.

2. Papers forwarded to the Editors for publication are understood not to be offered to any other Journal for prior or simultaneous publication.

3. All communications intended for publication must be type-written.

4. References. References to literature should be arranged alphabetically according to authors' names at the end of the communication, each accompanied by the date, title of Journal, volume and page, thus: Ackermann (1912), Z. Biol. 59, 17. In the text the reference should be indicated by the author's name and the date, enclosed in brackets, thus [Ackermann, 1912]. If reference is made to several papers published by one author in a single year, these should be numbered in sequence and the number quoted along with the year both in the text and in the collected references.

5. Chemical formulae should be written, as far as possible, in a single horizontal line.

6. Illustrations and curves accompanying the papers must be carefully drawn, about twice the size of the finished block, on smooth white Bristol boards or ordinary curve paper in Indian ink. Any lettering on these drawings should be lightly inserted in pencil. Further information can be obtained from the Editors.

MSS. for the successive numbers of Vol. 24 should be in the hands of the Editors before the 1st of January, March, May, July, September and November respectively. Contributors are specially requested to arrange references in the manner uniformly adopted in this Journal.
INDEX

Accessory factor, a further, necessary for growth of rat (Coward, Key and Morgan) 695
Accessory factor, a second thermostable water-soluble, necessary for the nutrition of the rat (Reader) 689
Acetylcholine (Dudley) 1064
ADAMS, D. R. The rôle of calcium in senile cataract 902
Adrenaline, antagonistic action of, to pituitrin on carbohydrate metabolism (Lambie and Redhead) 606
Albumin, egg, crystalline, osmotic pressure of, (Marrack and Hewitt) 1079
Adoles, determination of small amounts of, by iodimetric method (MacLeod and Robison) 517
Alloxan-dialuric acid equilibrium (Richardson and Cannan) 68
Amino-acids, action of quinones on (Cooper and Haines) 4
Amino-acids of flesh (Rosendale) 161
Ammonia formed by embry kidney tissue, cyanic acid as possible precursor of (Holmes and Watchorn) 199
Anamnia, production of, by surviving kidney tissue (Patey and Holmes) 760
Anaerobiosis and use of pyrogallol (Nicol) 394
Anthocyanins and anthocyanidins, characterisation of, by means of colour reactions (Robertson and Robinson) 35
Antigens, Wassermann, colloidal properties of (Kerridge and Spragg) 969
Antimonytrichloride, liver oils yielding a strong colour reaction with (Schmidt-Nielsen and Schmidt-Nielsen) 1153
Antiscorbutic fraction of lemon juice (Zilva) 1199
Antithrombin, anticoagulant action of (Barratt) 422
Artichoke, Jerusalem, carbohydrates of (Thayse, Bakes and Green) 444
ASHFORD, C. A. and HOLMES, E. G. Contributions to the study of brain metabolism. V. Rôle of phosphates in lactic acid production 748
ASHLEY, J. N. and HARINGTON, C. R. Note on the acetyl derivatives of thyroxine 1178
AVKROYD, W. R. and ROSCOE, M. H. The distribution of vitamin B6 in certain foods 483
Azine compounds, reaction of, with proteolytic enzymes (Richardson and Cannan) 624
Bacillus coli communis, enzymes of, endocellular (Young) 831
Bacillus coli communis, enzymes in, which act on fumaric acid (Woolf) 472
Bacillus coli communis, reduction potential and cell growth of (Quastel and Wooldridge) 115
Bacillus pyocyanus, action of, on citric acid (Butterworth and Walker) 926
Bacteria, decomposition of formic acid by (Stickland) 1187
Baker, L. C., see Drummond, J. C.
Baker, W. E., see Thaysen, A. C.
Barker, H. H. The production of fat from carbohydrate and similar media by a species of Penicillium 1158
Barratt, J. O. W. The anticoagulant action of antithrombin 422
Barton-Wright, E. C. and Boswell, J. G. The biochemistry of dry-rot in wood 110
Battie, M. A. and Smedley-Maclean, I. The catalytic action of cupric salts in promoting the oxidation of fatty acids by hydrogen peroxide 593
Beetles, powder post and death watch, chemistry of destruction of oak wood by (Campbell) 1290
Bence-Jones proteins (Hewitt) 1147
Bile, ox, unconjugated acids of, preparation of (White) 1165
Bios, effect of, on growth and metabolism of yeasts (Copping) 1050
BISH, E. J. B. The determination of small quantities of starch in vegetable tissue 31
Blood, an immediate acid change in shed (Havard and Kerridge) 600
Blood, calcium and phosphorus of, effect of excessive doses of irradiated ergosterol on (Harris and Stewart) 206
Blood, determination of soap in (Stewart and White) 1283
Blood-fat (Channon and Collinson) 663
Blood-fat, the acetone-ether-soluble fraction of (Channon and Collinson) 1212
Blood-phosphate, inorganic, antagonistic effect of pituitrin and adrenaline upon, in carbohydrate metabolism (Lambie and Redhead) 608
Blood-serum, determination of total calcium content of (Hendriks) 1206
Blood-sugar, antagonistic effect of pituitrin and adrenaline upon, in carbohydrate metabolism (Lambie and Redhead) 608
Bone, composition and growth of, effect of ingestion of mineral acid on (Burns) 860
Bone formation in albino rat, effect of guanine on (Burns) 840
Bone formation in albino rat, effect of parathyroid extract on (Burns) 853
Bone phosphatase, preparation and use of (Martland and Robison) 237
Booth, J., see Campbell, W. G.
Boswell, J. G., see Barton-Wright, E. C.
INDEX

BOYD, W. J. Note on the determination of tryptophan by means of p-dimethylamino-benzaldehyde 78

BOYLAND, E. Phosphoric esters in alcoholic fermentation. I. The sequence of the formation of phosphoric esters and carbon dioxide in fermentation by dried yeast 219

Brain, lactic acid content of, relation of, to opisthotonus in rice-fed pigeons (Kinnel and Peters) 1128

Brain, mummified, vitamin D from sterols of (King, Rosenheim and Webster) 166

Brain, rôle of phosphates in lactic acid production in metabolism of (Ashford and Holmes) 748

BROOKS, J. Post-mortem formation of methae-moglobin in red muscle 1391

BUCKLAND, H., see HOYLE, J. C.

BURNS, C. M. Factors influencing bone formation in the albino rat. I. The effect of guanidino intoxication produced by the successive injection of sub-lethal doses of guanidine salts 840

BURNS, C. M. Factors influencing bone formation in the albino rat. II. The effect of the injection of parathyroid extract 853

BURNS, C. M. The effect of the continued ingestion of mineral acid on growth of body and bone and on the composition of bone and of the soft tissues 860

BUTTERWORTH, J. and WALKER, T. K. A study of the mechanism of the degradation of citric acid by B. pyogenes. Part I 926

Cabbage leaf cytoplasm, ether-soluble substances of (Channon and Chibnall) 168, (Chibnall and Channon) 176

Calcium content of blood, effect of excessive doses of irradiated ergosterol on (Harris and Stewart) 206

Calcium content of faeces of rachitic children (Redman) 256

Calcium, determination of total content of blood-serum (Hendriks) 1206

Calcium, in senile cataract, rôle of (Adams) 902

Calcium of cows' milk, effect of cod-liver oil feeding on (Sheehy and Senior) 898

Calcium, salivary, relation of, to dental caries (Horton, Marrack and Price) 1075

CALLOW, E. H. The determination of chloride in animal tissues 648

CAMBDEN, M., see COWARD, K. H.

CAMPBELL, W. G. The degradation of wood by simultaneous action of ethyl alcohol and hydrochloric acid 1223

CAMPBELL, W. G. The chemical aspect of the destruction of oak wood by powder post and death watch beetles—Lytta spp. and Xestobium sp. 1290

CAMPBELL, W. G. and BOOTH, J. The effect of partial decay on the alkali solubility of wood 566

CANNAN, R. K. and RICHARDSON, G. M. The thiol-disulphide system. I. Complexes of thiol-acids with iron 1242

CANNAN, R. K., see also RICHARDSON, G. M.

Carbohydrate metabolism (Kermack, Lambie and Slater) 410, 416; (Lambie and Redhead) 608

Carbohydrate metabolism of resting mammalian nerve (Holmes and Gerard) 738

Carbohydrate metabolism of tumours (Crabtree) 536

Carbohydrates of crab nerve (Holmes) 1182

Carbohydrates of Jerusalem artichoke (Thayan, Bakes and Green) 444

Caries, dental, relation of salivary calcium to (Horton, Marrack and Price) 1075

Carotene, absence of vitamin D from (Moore) 1297

Carotene, association of, with vitamin A activity in carrot root (Moore) 803

Carotene, effect of dietary modifications upon vitamin A activity of (Moore) 1267

Carotene, vitamin A activity of, from red palm oil (Moore) 1287

CARR, F. H., CULHANE, K., FULLER, A. T. and UNDERHILL, S. W. F. A reversible inactivation of insulin 1010

Carrageen mucilage, hydrolysis of (Haas and Russell-Wells) 425

CASE, E. M. Glycolysis in muscle and other tissues 210

”Casein,” different samples of, influence of, on vitamin tests (Coward, Key, Morgan and Cambden) 913

Cataract, senile, rôle of calcium in (Adams) 902

Cell growth and reduction potential (Quastel and Woolridge) 115

CHANNON, H. J. and CHIBNALL, A. C. The ether-soluble substances of cabbage leaf cytoplasm. V. The isolation of p-nona-cosane and di-n-tetradecyl ketone 168

CHANNON, H. J. and COLLINSON, G. A. Blood-fat. I. Preparation and general characteristics 663

CHANNON, H. J. and COLLINSON, G. A. The unsaponifiable fraction of liver-oils. V. The absorption of liquid paraffin from the alimentary tract in the rat and the pig 676

CHANNON, H. J. and COLLINSON, G. A. Blood-fat. II. The acetone-ether-soluble fraction 1212

CHANNON, H. J., see also CHIBNALL, A. C.

CHIBNALL, A. C. and CHANNON, H. J. The ether-soluble substances of cabbage leaf cytoplasm. VI. Summary and general conclusions 176

CHIBNALL, A. C., see also CHANNON, H. J.

CHICK, H. The effect on vitamin B12 of treatment with nitrous acid 514

CHICK, H. and ROSCOE, M. H. An attempt to separate vitamin B12 from vitamin B1 in yeast and a comparison of its properties with those of the antineuritic vitamin B1 584

CHICK, H. and ROSCOE, M. H. A method for the assay of the antineuritic vitamin B12, in which the growth of young rats is used as a criterion 498

Chloride, determination of, in animal tissues (Callow) 648

Chondrus crispus, see Carrageen

CHRISTIAN, B. C. and HILDITCH, T. P. Seed fats of the Umbelliferae. II. The seed fats of some cultivated species 327

Citric acid, action of E. pyogenes on (Butterworth and Walker) 929
CLENSHAW, E. and SMEDLEY-MACLEAN, I. The nature of the unsaponifiable fraction of the lipid matter extracted from green leaves 107.

Cod-liver oil feeding, effect of, on calcium and phosphorus of cows' milk (Sheehy and Senior) 898.

Collagen, action of acids and alkalis on (Knaggs) 1308.

COLLIN, G. and HILDITCH, T. P. Regularities in the glyceride structure of vegetable seed-fats 1273.

COLLISON, G. A., see CHANNON, H. J.

Colloidal properties of serum (Voge) 1137.

Colloidal properties of Wassermann antigens (Kermack and Spragg) 959.

Colour reaction for ergosterol (Rosenheim) 47.

Colour reactions, characterisation of anthocyanins and anthocyanidins by means of (Robertson and Robinson) 35.

Complement, haemolytic, of guinea-pig serum and lipase, relationship of (Gordon and Wormald) 730.

Corpuscles and plasma, distribution of reducing substances in (Herbert and Groen) 339.

CORRAN, R. F. The influence of various substances on lipase action 188.

COWARD, K. H., KEY, K. M., MORGAN, B. G. and CAMBEE, M. The influence of different samples of "casein" on vitamin tests 913.

Crab nerve, carbohydrates of (Holmes) 1182.

Creatine in voluntary amphibian muscle, condition of (Duhière) 921.

CRYTSHERE, F. M. Observations on the iodeine content of the thyroid and ovary of the fowl during the growth, laying, and moulting periods 1044.

CULHANE, K., see also CARR, F. H.

Cupric salts, catalytic action of (Battie and Smedley-MacLean) 935.

CUTTBERSON, D. P. The influence of prolonged muscular rest on metabolism 1328.

Cyanic acid as possible precursor of ammonia and urea formed by embryro kidney tissue growing in vitro (Holes and Watchorn) 199.

Cyanide, effect of, on respiration of animal tissues (Dixon and Elliott) 812.

Cyanophoric plant, determination of nitrogenous constituents of (Robinson) 1099.

Cystine yield and total sulphur in wool, relation between (Rimbington) 41.

Cystine yield and total sulphur, relation between, in animal hairs (Rimbington) 726.

Cystinuria, protein metabolism in (Robson) 138.

Cytoplasm, cabbage leaf, ether-soluble substances of (Channon and Chibnall) 168; (Chibnall and Channon) 176.

DAFT, F. S. A study of factors said to influence the nitrogen distribution of gelatin 149.

DENNISON, M. H., see KORENCHEVSKY, V.

Dextrose, effect of, on glycogen content of muscle in depaencreatised cats (Kermack, Lambie and Slater) 416.

Dialuric acid-alloxan equilibrium (Richardson and Cannan) 68.

Diamino-acid content of fish (Rosedale) 161.

DICKENS, F. and SIMER, F. Observations on tissue glycolysis: the effect of fluoride and some other substances 936.

Dihydroxycetone, effect of, on glycogen content of muscle in depaencreatised cats (Kermack, Lambie and Slater) 416.

Di-3:5-Di-iodotyrosine, isolation of, from thyroid gland (Harington and Randall) 373.

p-Dimethylbenzaldehyde, determination of tryptophan using (Boyd) 78.

Disulphide-thiol system (Cannan and Richardson) 1242.

Di-n-tetradecyl ketone, isolation of, from cabbage leaf cytoplasm (Channon and Chibnall) 168.

DROCZOWSKI, A. The extractive purines of muscle 1346.

Dogs, depaencreatised, effect of fat and lipase or lecitin on sugar excretion of (Soskin) 1385.

DRUMMOND, J. C. and BAKER, L. C. Further studies of the chemical nature of vitamin A 274.

DRUMMOND, J. C., see also GUHA, B. C.

Dry-rot in wood, biochemistry of (Barton-Wright and Boswell) 110.

DUDLEY, H. W. Observations on acetycholine 1064.

DULIBÈRE, W. The condition of creatine in amphibian voluntary muscle 921.

ELLIOTT, K. A. C., see Dixon, M.

Embryo kidney tissue, cyanic acid as possible precursor of ammonia and urea formed by (Holmes and Watchorn) 199.

Embyronic avian femora and limb-buds, growth, development and phosphatase activity of, cultivated in vitro (Fell and Robison) 767.

Enzyme action, dilatometric studies in (Sreenivasaya and Sastry) 975.

Enzymes, molecular constitution and accessibility to (Muray) 292.
Enzymes of Bacillus coli communis (Young) 831
Enzymes of Bacillus coli communis which act on fumaric acid (Woolf) 472
Enzymes, proteolytic, of green malt, adsorption and elution of (Hopkins) 1022
Enzymes, proteolytic, reaction of, with azine compounds (Richardson and Cannan) 624
Ergosterol, irradiated, effect of, on calcium and phosphorus content of blood (Harris and Stewart) 206
Ergosterol, irradiated, effects of large doses of (Hirata and Buckland) 558
Ergosterol, irradiated, specificity of vitamin D in poisoning by (Harris and Moore) 261
Ergosterol, photochemical reactions of (Reerink and van Wijk) 1254
Ergosterol, specific colour reaction for (Rosenheim) 47
Ergot of rye, vitamin D in (Mellany, Surie and Harrison) 710
Ether-soluble substances of Flax, vitamin D in (Mellany, Surie and Harrison) 188 (Chibnall and Chibnall) 175
Facees of rachitic children, hydrogen ion concentration and calcium and phosphorus content of (Redman) 256
Fat and lipase, influence of, on sugar excretion of pancreaticised dogs (Szöke) 1386
Fat of blood, the acetone-ether-soluble fraction of Bacillus Fluoride, effect of, on fucoids, fucose, mannitol, and mannan as metabolic products of (Haas and Hill) 1005
Furofuradehyde, substances yielding, in straws (Norman) 1353
Furofuradehyde-yielding substances, rôle of, in the decomposition of straws (Norman) 1367
Gaseous exchange, antagonistic effect of pituitrin and adrenaline upon, in carbohydrate metabolism (Lambie and Redhead) 608
Gelatin, absorption of water by (Plesch) 358
Gelatin, nitrogen distribution of (Daff) 149
Gelatin, swelling of, effect of bicarbonate ions on (Miller) 876
Gérard, R. W., see Holmes, E. G.
Glucogenic and insulin (Goldblatt) 243
Glucose and glycogen, comparison of, in lactic acid fermentation and phosphor ester accumulation in muscle extracts (Stiven) 583
Glyceride structure of seed-fats, regularities in (Collin and Hilditch) 1273
Glycogen and glucose, comparison of, in lactic acid fermentation and phosphor ester accumulation in muscle extracts (Stiven) 583
Glycogen content of muscle in depancreatized cats, effect of dextrose and dihydroxyacetone on (Kermack, Lambie and Slater) 416
Glycolysis in muscle (Case) 210
Glycolysis, tissue, effect of fluoride on (Dickens and Śimer) 936
Glyoxaline derivatives, antineuritic properties of, in larger quantities of (Collin and Hilditch) 524
Goldblatt, M. W. The action of insulin in normal young rabbits 83
Goldblatt, M. W. Insulin and glucogenogenesis 243
Gordon, J. and Wormald, A. The relationship between haemolytic complement of guinea-pig serum and lipase 730
Green, B. M., see Thaysen, A. C.
Groen, J., see Herbert, F. K.
Growth, effect of ingestion of acid on (Burns) 860
Growth of yeasts, effect of bios on (Copping) 1050
Guandine, effect of, on bone formation in albino rat (Burns) 840
Guha, B. C. and Drummond, J. C. Observations on the concentration of vitamin B1 880
Golland, J. M. and Peters, R. A. The alleged antineuritic properties of certain quinoline and glyoxaline derivatives 1122
