REVIEW ARTICLE

Structure and function of repetitive DNA in eukaryotes

N. HARDMAN

1-11

FULL AND RAPID PAPERS

Proteins

A study of the kinetics of the reaction of ligands with the liganded states of mouse embryonic haemoglobins

T. BRITTAI, J. SUTHERLAND &
C. GREENWOOD

151-155

Enzymes

Robust regression of enzyme kinetic data

A. CORNISH-BOWDEN & L. ENDRENYI

21-29

Human liver sulphamate sulphohydrolase. Determinations of native protein and subunit M_r values and influence of substrate aglycone structure on catalytic properties

C. FREEMAN & J. J. HOPWOOD

83-92

The cellulase of *Penicillium pinophilum*. Synergism between enzyme components in solubilizing cellulose with special reference to the involvement of two immunologically distinct cellobiohydrolases

T. M. WOOD & S. I. MCCRAE

93-99

Genetic deficiency of androsterone UDP-glucuronosyltransferase activity in Wistar rats is due to the loss of enzyme protein

M. MATSUI & F. NAGAI

139-144

Trypanosoma cruzi adenylate cyclase activity. Purification and characterization

M. TORRUELLA, M. M. FLAWIÁ,
C. EISENSCHLOS, L. MOLINA Y VEDIA,
C. P. RUBINSTEIN & H. N. TORRES

145-150

Purification and characterization of β -*N*-acetylhexosaminidase I₂ from human liver

N. N. DEWJI, D. R. DE-KEYZER
& J. L. STIRLING

157-162

Catalytic unit-independent phosphorylation and dephosphorylation of type II regulatory subunit of cyclic AMP-dependent protein kinase in rat liver plasma membranes

Z. KISS, Y. LUO & G. VEREB

163-168

Carbohydrates

Monoclonal antibodies to different protein-related epitopes of human articular cartilage proteoglycans

T. T. GLANT, K. MIKECZ & A. R. POOLE

31-41

Use of the photoaffinity cross-linking agent *N*-hydroxysuccinimidyl-4-azidosalicylic acid to characterize salivary-glycoprotein-bacterial interactions

E. J. BERGEY, M. J. LEVINE, M. S. REDDY,
S. D. BRADWAY & I. AL-HASHIMI

43-48

The affinity of newly synthesized proteoglycan for hyaluronic acid can be enhanced by exposure to mild alkali

A. H. K. PLAAS & J. D. SANDY

221-223

Nucleic acids and molecular genetics

The *serC-aroA* operon of *Escherichia coli*. A mixed function operon encoding enzymes from two different amino acid biosynthetic pathways

K. DUNCAN & J. R. COGGINS

49-57

Insertion of transposon Tn7 into the *Escherichia coli glmS* transcriptional terminator

N. J. GAY, V. L. J. TYBULEWICZ &
J. E. WALKER

111-117

The effect of *HhaI* methylation on DNA local structure

K. R. FOX

213-216

Synthesis and degradation of macromolecules

Glycoprotein metabolism in normal and β -mannosidase-deficient cultured goat skin fibroblasts

L. W. HANCOCK, M. Z. JONES &
G. DAWSON

175-183

Evidence that lysosomes are not involved in the degradation of microfibrillar proteins in rat skeletal muscle

B. B. LOWELL, N. B. RUDERMAN &
M. N. GOODMAN

237-240

Intermediary metabolism and metabolic control

Response of tissue diamine oxidase activity to polyamine administration

A. PERIN, A. SESSA & M. A. DESIDERIO

119-123

Kinetics of metabolic pathways. A system *in vitro* to study the control of flux

N. V. TORRES, F. MATEO,
E. MELÉNDEZ-HEVIA & H. KACSER

169-174

Utilization of [¹⁵N]glutamate by cultured astrocytes

M. YUDKOFF, I. NISSIM, K. HUMMELER &
D. PLEASURE

185-192

CONTENTS (continued)

Modulation of cyclic AMP action in the dog thyroid by its agonist and antagonist S_p - and R_p -adenosine 3',5'-monophosphorothioate	C. ERNEUX, J. VAN SANDE, B. JASTORFF & J. E. DUMONT	193-197
Copper + zinc and manganese superoxide dismutases inhibit deoxyribose degradation by the superoxide-driven Fenton reaction at two different stages. Implications for the redox states of copper and manganese	J. M. C. GUTTERIDGE & J. V. BANNISTER	225-228
Lipolysis in rat adipocytes during recovery from lactation. Response to noradrenaline and adenosine	R. G. VERNON & E. FINLEY	229-231
Modulation of pyruvate dehydrogenase kinase activity in cultured hepatocytes by glucagon and <i>n</i> -octanoate	H. R. FATANIA, T. C. VARY & P. J. RANDLE	233-236
Bioenergetics and transport		
Changes in permeability to protons and other cations at high proton motive force in rat liver mitochondria	G. C. BROWN & M. D. BRAND	75-81
A direct interaction between Photosystem I and the chloroplast coupling factor	B. HUCHZERMAYER, A. LOEHR & I. WILLMS	217-220
ATP binding to bovine heart cytochrome <i>c</i> oxidase. A photoaffinity labelling study	C. MONTECUCCO, G. SCHIAVO & R. BISSON	241-243
Membranes and receptors		
Phosphoinositide reorganization in human erythrocyte membrane upon cholesterol depletion	H. M'ZALI & F. GIRAUD	13-20
Decreased tyrosine kinase activity of insulin receptor isolated from rat adipocytes rendered insulin-resistant by catecholamine treatment <i>in vitro</i>	H. HÄRING, D. KIRSCH, B. OBERMAIER, B. ERMEL & F. MACHICAO	59-66
Desensitization and antagonism of vasopressin-induced phosphoinositide metabolism and elevation of cytosolic free calcium concentration in human platelets	W. K. POLLOCK & D. E. MACINTYRE	67-73
Role of phospholipase C and protein kinase C in vasoconstrictor-induced prostaglandin synthesis in cultured rat renal mesangial cells	J. PFEILSCHIFTER, A. KURTZ & C. BAUER	125-130
A reassessment of the assay for the asialoglycoprotein receptor and its use in the quantification of receptor distribution in hepatocytes	D. A. W. GRANT & N. KADERBHAI	131-137
Lithium-induced reduction in intracellular inositol supply in cholinergically stimulated parotid gland	C. P. DOWNES & M. A. STONE	199-204
Antigen-stimulated metabolism of inositol phospholipids in the cloned murine mast-cell line MC9	M. W. MUSCH & M. I. SIEGEL	205-212
Interaction of 4-hydroxynonenal-modified low-density lipoproteins with the fibroblast apolipoprotein B/E receptor	W. JESSUP, G. JURGENS, J. LANG, H. ESTERBAUER & R. T. DEAN	245-248
Methods		
Application of a rapid and efficient h.p.l.c. method to measure bilirubin and its conjugates from native bile and in model bile systems. Potential use as a tool for kinetic reactions and as an aid in diagnosis of hepatobiliary disease	W. SPIVAK & W. YUEY	101-109
