REVIEW ARTICLE

The opsin family of proteins

J. B. C. FINDLAY & D. J. C. PAPPIN 625-642

FULL AND RAPID PAPERS

Proteins

Clearance of the heavy and light polypeptide chains of human tissue-type plasminogen activator in rats

D. C. RIJKEN & J. J. EMEIS 643-646

Riboflavin-binding protein. Concentration and fractional saturation in chicken eggs as a function of dietary riboflavin

H. B. WHITE III, J. ARMSTRONG & C. C. WHITEHEAD 671-675

Ca²⁺ and Zn²⁺-binding properties of nitrated S-100b protein from bovine brain

R. S. MANI & C. M. KAY 715-719

The ability of salts to inhibit the reaction between periodate anions and ovotransferrin

J. J. HSUAN 931-934

Enzymes

Rapid purification of tissue inhibitor of metalloproteinases from human plasma and identification as a γ -serum protein

T. E. CAWSTON, D. N. NOBLE, G. MURPHY, A. J. SMITH, C. WOODLEY & B. HAZLEMAN 677-682

Structural comparison of two esterases from *Drosophila mojavensis* isolated by immunoaffinity chromatography

J. PEN, J. VAN BEEUMEN & J. J. BEINTEMA 691-699

Comparison of the processes involved in reduction by the substrate for two homologous flavocytochromes *b₂* from different species of yeast

C. CAPELLÈRE-BLANDIN, M. J. BARBER & R. C. BRAY 745-756

Intermediate *M_r* cytosolic components potentiate hepatic 5'-deiodinase activation by thiols

K. SAWADA, B. C. W. HUMMEL & P. G. WALFISH 787-791

A computer program for enzyme kinetics that combines model discrimination, parameter refinement and sequential experimental design

R. FRANCO, M. T. GAVALDÀ & E. I. CANELA 855-862

Mechanistic studies of the inhibition of hepatic uroporphyrinogen decarboxylase in C57BL/10 mice by iron-hexachlorobenzene synergism

A. G. SMITH, J. E. FRANCIS, S. J. E. KAY, J. B. GREIG & F. P. STEWART 871-878

Monoclonal antibodies against rat kidney γ -glutamyl transpeptidase show species and tissue specificity

J. A. GREEN, N. D. COOK & M. M. MANSON 913-917

Purification and subunit structure of phosphoglycerate dehydrogenase from rabbit liver

K. LUND, D. K. MERRILL & R. W. GUYNN 919-922

Fluorescence technique for comparative studies of substrate-binding subsites in serine proteinases. Application to subtilisins

N. CH. GENOV & R. N. BOTEVA 923-926

Carbohydrates

Oxidation and chemical modification of lung β -galactoside-specific lectin

P. L. WHITNEY, J. T. POWELL & G. L. SANFORD 683-689

Endothelial binding sites for heparin. Specificity and role in heparin neutralization

T. BÂRZU, J. L. M. L. VAN RIJN, M. PETITOU, P. MOLHO, G. TOBELEM & J. P. CAEN 847-854

Lipids

Effect of liposomal phospholipid composition on cholesterol transfer between microsomal and liposomal vesicles

C. BHUVANESWARAN & K. A. MITROPOULOS 647-652

Nucleic acids and molecular genetics

Binuclear platinum(II)-terpyridine complexes. A new class of bifunctional DNA-intercalating agent

W. D. MCFADYEN, L. P. G. WAKELIN, I. A. G. ROOS & B. L. HILLCOAT 757-763

Synthesis and degradation of macromolecules

The role of sterol carrier protein₂ and other hepatic lipid-binding proteins in bile-acid biosynthesis

B. LIDSTRÖM-OLSSON & K. WIKVALL 879-884

CONTENTS (continued)

Intermediary metabolism and metabolic control

- Synergistic stimulation of Ca^{2+} uptake by glucagon and Ca^{2+} -mobilizing hormones in the perfused rat liver. A role for mitochondria in long-term Ca^{2+} homeostasis
J. G. ALTIN & F. L. BYGRAVE 653-661
- Comparative development of the pyruvate dehydrogenase complex and citrate synthase in rat brain mitochondria
G. D. A. MALLOCH, L. A. MUNDAY, M. S. OLSON & J. B. CLARK 729-736
- 4 β -Phorbol 12-myristate 13-acetate attenuates the glucagon-induced increase in cytoplasmic free Ca^{2+} concentration in isolated rat hepatocytes
J. M. STADDON & R. G. HANSFORD 737-743
- Fat synthesis in adipose tissue. An examination of stoichiometric constraints
D. A. FELL & J. R. SMALL 781-786
- Effects of vasopressin and La^{3+} on plasma-membrane Ca^{2+} inflow and Ca^{2+} disposition in isolated hepatocytes. Evidence that vasopressin inhibits Ca^{2+} disposition
B. P. HUGHES, S. E. MILTON & G. J. BARRITT 793-800
- Action *in vivo* and *in vitro* of 2-tetradecylglycidic acid, 2-tetradecylglycidyl-CoA and 2-tetradecylglycidylcarnitine on hepatic carnitine palmitoyltransferase
P. S. BRADY & L. J. BRADY 801-809
- Age-related augmentation of phosphorylase *b* kinase in hepatic tissue from the glycogen-storage-disease (*gsd/gsd*) rat
D. G. CLARK, S. D. NEVILLE, M. BRINKMAN, P. V. NELSON, R. J. ILLMAN, A. GUTHBERLET & W. D. G. HAYNES 811-816
- Incorporation of haemoglobin haem into the rat hepatic haemoproteins tryptophan pyrrolase and cytochrome *P-450*
J. F. WYMAN, J. L. GOLLAN, W. SETTLE, G. C. FARRELL & M. A. CORREIA 837-846
- Abnormal regulation of insulin secretion in the genetically obese (*ob/ob*) mouse
M. BLACK, H. M. HEICK & N. BÉGIN-HEICK 863-869
- Induction of tyrosine aminotransferase *in utero* by anti-insulin agents
M. H. CAKE 927-929
- ### Bioenergetics and transport
- Stimulation of hexose transport in L6 in rat myoblasts by antibody and by glucose starvation
T. D'AMORE, M. O. CHEUNG, V. DURONIO & T. C. Y. LO 831-836
- PAF-acether (1-*O*-hexadecyl/octadecyl-2-acetyl-*sn*-glycero-3-phosphocholine)-induced fibrinogen binding to platelets depends on metabolic energy
E. KLOPROGGE, P. HASSELAAR & J.-W. N. AKKERMAN 885-891
- ### Membranes and receptors
- The insulin-like effect of sodium vanadate on adipocyte glucose transport is mediated at a post-insulin-receptor level
A. GREEN 663-669
- Ionophore A23187 induces a refractory state in thrombin-activated release of inositol phosphates
J. MOSCAT, F. MORENO, S. IGLESIAS, P. GARCIA-BARRENO & A. M. MUNICIO 709-714
- Mitogenic agents induce redistribution of transferrin receptors from internal pools to the cell surface
D. McV. WARD & J. KAPLAN 721-728
- Effects of Ca^{2+} on phosphoinositide breakdown in exocrine pancreas
C. W. TAYLOR, J. E. MERRITT, J. W. PUTNEY, JR. & R. P. RUBIN 765-772
- A role for calcium in the breakdown of inositol phospholipids in intact and digitonin-permeabilized pancreatic islets
L. BEST 773-779
- Attempts to obtain anti-(D_2 dopamine receptor) antibodies via the anti-idiotypic route
W. M. ABBOTT & P. G. STRANGE 817-823
- Isomers of inositol trisphosphate in exocrine pancreas
J. E. MERRITT, C. W. TAYLOR, R. P. RUBIN & J. W. PUTNEY, JR. 825-829
- Temporal patterns of protein phosphorylation after angiotensin II, A23187 and/or 12-*O*-tetradecanoylphorbol 13-acetate in adrenal glomerulosa cells
P. Q. BARRETT, I. KOJIMA, K. KOJIMA, K. ZAWALICH, C. M. ISALES & H. RASMUSSEN 893-903
- Short term memory in the calcium messenger system. Evidence for a sustained activation of protein kinase C in adrenal glomerulosa cells
P. Q. BARRETT, I. KOJIMA, K. KOJIMA, K. ZAWALICH, C. M. ISALES & H. RASMUSSEN 905-912
- ### Cell structure and function
- Catabolites produced by the deacetylation of hexamethylenebisacetamide play a key role in murine erythroleukaemic-cell differentiation
E. MEILHOC, M.-J. MOUTIN & H. B. OSBORNE 701-707
