Volume 240, No. 1, 1986

REVIEW ARTICLE
The purification of eukaryotic polypeptides synthesized in Escherichia coli

F. A. O. MARSTON 1–12

FULL AND RAPID PAPERS

Proteins
Interspecies conservation of structure of interphotoreceptor retinoid-binding protein. Similarities and differences as adjudged by peptide mapping and N-terminal sequencing
T. M. REDMOND, B. WIGGERT, F. A. ROBEY & G. J. CHADER 19–26

Multiple forms of cytochrome P-450 related to forms induced marginally by phenobarbital. Differences in structure and in the metabolism of alkoxyresorufins
C. R. WOLF, S. SEILMAN, F. OESCH, R. T. MAYER & M. D. BURKE 27–33

Cat pancreatic eicosapeptide and its biosynthetic intermediate. Conservation of a monobasic processing site
H. V. NIELSEN, U. GETHER & T. W. SCHWARTZ 69–74

Purification of foetal steroid-binding protein from human serum by affinity chromatography on 5α-androstane-3β,17β-diol 3-hemisuccinate–aminohexyl-Sepharose 6B
M. L. WILKINSON, M. J. IQBAL, A. FORBES, T. P. CORBISHLEY & R. WILLIAMS 75–79

Formation of aryl and arildiazenyl complexes in reactions of arylhydrazines and aryl diazenes with a synthetic model compound of haemoprotein
M. KINUTA, J. L. MATTESON & H. A. ITANO 81–86

Characterization of bovine κ-casein fractions and the kinetics of chymosin-induced macropedite release from carbohydrate-free and carbohydrate-containing fractions determined by high-performance gel-permeation chromatography

Structural characteristics and intermolecular organization of human pulmonary-surfactant-associated proteins
S. W. CRAWFORD, R. P. MECHAM & H. SAGE 107–114

New isolation procedure and further biochemical characterization of glycoproteins IIb and IIIa from human platelet plasma membrane
M. T. EIRRÍN, J. J. CALVETE & J. GONZÁLEZ-RODRÍGUEZ 147–153

Isolation and biochemical characterisation of the α- and β-subunits of glycoprotein IIb of human platelet plasma membrane
J. J. CALVETE & J. GONZÁLEZ-RODRÍGUEZ 155–161

Comparison of the primary structures of ribonuclease U3 isoforms
S. KANAYA & T. UCHIDA 163–170

Chemical modification of the haem propionate of cytochrome c. A re-evaluation of the reaction of cytochrome c with a water-soluble carbodi-imide
A. J. MATHews & T. BRITtain 181–187

Effect of physical environment on the conformation of ricin. Influence of low pH
J.-P. FRÉNOY 221–226

Structure and stability of Ricinus communis haemagglutinin

Oxidative radioiodination damage to human lactoferrin
A. ROSENMUND, C. KUYAS & A. HAEberLI 239–245

Four classes of β-hairpins in proteins
E. J. MILNER-WHITE & R. POET 289–292

Haemosiderin-like properties of free-radical-modified ferritin
M. J. O’CONNELL, H. BAUM & T. J. PETERS 297–300

Enzymes
Phosphorylation of purified bovine heart and rat liver 6- phosphofructo-2-kinase by protein kinase C and comparison of the fructose-2,6-bisphosphatase activity of the two enzymes
M. H. RIDER & L. HUE 57–61

Carboxy groups as essential residues in β-lactamases

Purified rat lens aldose reductase. Polyl production in vitro and its inhibition by aldose reductase inhibitors
P. F. KADOR, J. H. KINOSHiTa, D. R. BRITtain, D. J. MIRLLEES, C. M. SENNITT & D. STRIBLING 233–237

Role of ATP and enzyme-bound nascent peptides in the control of elongation for mycobacillisin synthesis

Purification, N-terminal amino acid sequence and properties of hydroxymethylbilane synthase (porphobilinogen deaminase) from Escherichia coli

Species variants of cathepsin L and their immunological identification
R. W. MASON 285–288
Mechanistic origin of the sigmoidal rate behaviour of rat liver hexokinase D ('glucokinase')
The N-terminal amino acid sequence of pig kidney endopeptidase-24.11 shows homology with pro-sucrase-isomaltase

A. Cornish-Bowden & A. C. Storer 293–296
I. S. Fulcher, D. J. C. Pappin & A. J. Kenny 305–308

Carbohydrates
Electron-microscopic and electrophoretic studies of bovine femoral-head cartilage proteoglycan fractions

Lipids
Metabolism of apolipoprotein E-containing human plasma lipoproteins by rat and human cells in culture
Phosphatidylglycerol of rat lung. Intracellular sites of formation de novo and acyl species pattern in mitochondria, microsomes and surfactant

S. Ranganathan, H. Matsuura, M. Yamamoto & B. A. Kottke 125–130

Synthesis and degradation of macromolecules
Rat heparins. A study of the relative sizes and antithrombin-binding characteristics of heparin proteoglycans, chains and depolymerization products from rat adipose tissue, heart, lungs, peritoneal cavity and skin
Regulation of Ca\(^{2+}\)-dependent protein turnover in skeletal muscle by thyroxine

A. A. Horner 171–179

Intermediary metabolism and metabolic control
Modulation of intracellular cyclic AMP content and rate of lipogenesis in mammary acini in vitro
Decreased rate of ketone-body oxidation and decreased activity of D-3-hydroxybutyrate dehydrogenase and succinyl-CoA:3-oxo-acid CoA-transferase in heart mitochondria of diabetic rats
Specificity of protein phosphatases in the dephosphorylation of protein kinase C
Evidence that activation of acetyl-CoA carboxylase by insulin in adipocytes is mediated by a low-M\(_{r}\) effector and not by increased phosphorylation
The turnover of phosphate bound to myosin light chain-2 in perfused rat heart
Effects of insulin, glucagon, dexamethasone, cyclic GMP and spermine on the stability of phosphatidate phosphohydrolase activity in cultured rat hepatocytes
The role of haem in the regulation of rat liver tryptophan metabolism
The effect of fatty acids and starvation on the metabolism of gluconeogenic precursors by isolated sheep liver cells

R. A. Clegg, I. Mullaney, N. A. Robson & V. A. Zammit 13–18
L. Grinblat, L. F. Pacheco Bolaños & A. O. M. Stoppani 49–56
P. J. Parker, J. Goris & W. Merlevede 63–67
T. A. J. Haystead & D. G. Hardie 99–106
B. P. Herring & P. J. England 205–214
R. A. Pittner, R. Fears & D. N. Brindley 253–257
M. Salter & C. I. Pogson 259–263
M. A. Lomax, I. A. Donaldson & C. I. Pogson 277–280

Bioenergetics and transport
Biochemical and functional characterization of the rat liver glucose-transport system. Comparisons with the adipocyte glucose-transport system
Copper transport from Cu(I)-thionein into apo-caeruloplasmin mediated by activated leucocytes

T. P. Ciaraldi, R. Horuk & S. Matthaei 115–123

Membranes and receptors
G-proteins of fat-cells. Role in hormonal regulation of intracellular inositol 1,4,5-trisphosphate
Characterization of specific V\(_{1a}\) vasopressin-binding sites on a rat mammary-tumour-cell line
Stimulation, by vasopressin and other agonists, of inositol-lipid breakdown and inositol phosphate accumulation in WRK 1 cells
Specificity of inositol phosphate-stimulated Ca\(^{2+}\) mobilization from Swiss-mouse 3T3 cells

P. J. Rapiejko, J. K. Northup, T. Evans, J. E. Brown & C. C. Malbon 35–40
G. Guillon, C. J. Kirk & M.-N. Balestre 189–196
C. J. Kirk, G. Guillon, M.-N. Balestre & S. Jard 197–204
R. F. Irvine, A. J. Letcher, D. J. Lander & M. J. Berridge 301–304
## CONTENTS (continued)

### Cell structure and function

Site recognition by protein-primed T cells shows a non-specific peptide size requirement beyond the essential residues of the site. Demonstration by defining an immunodominant T site in myoglobin  

**Methods**  
Identification of ecdysone 22-long-chain fatty acyl esters in newly laid eggs of the cattle tick *Boophilus microplus*  

**B. J. LETTERS**  
Effect of fructose 1-phosphate on the activation of liver glycogen synthase  

Buffer capacity of intracellular Ca^{2+} indicators
