THE BIOCHEMICAL SOCIETY

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Several meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

OFFICERS AND COMMITTEE: 1986–1987

Chairman
H. M. Keir, F.R.S.E.

Treasurer
B. Spencer

General Secretary
R. H. Burdon, F.R.S.E.

Publications Secretary
G. B. Ansell

Meetings Secretary
A. D. B. Malcolm

Committee
H. Baum
R. B. Beechey
R. J. Beynon
D. N. Brindley
A. Crafts-Lighty
J. De Bellerocche
S. Doonan
D. Fisher*†
L. A. Fothergill-Gilmore
G. G. Lunt
M. J. Morgan
C. I. Pogson*†

E. D. Saggerson
P. G. Strange
I. P. Trayer
E. J. Wood

* Ex officio Member of Committee
† Representative of Group Secretaries
† Representative of Editorial Board of the Biochemical Journal

Executive Secretary: G. D. Jones (7 Warwick Court, London WC1R 5DP)

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

Genes and Proteins in Immunity

Traditionally, the multiplicity of the reactions involved in immune responses have been a source of excitement to some and yet frustration to many. However, with the advent of modern techniques in molecular biology, a considerable understanding of these complexities has begun to emerge. In recognition of the enormous contribution made to this field by Rodney Porter, the Biochemical Society held a special symposium in his honour in Oxford during July 1985. This volume contains the papers that were presented in tribute at the symposium.

EDITED BY J. KAY, M. A. KERR, A. F. WILLIAMS AND K. B. M. REID

The Aldrich Library of Chemical Standards

Fine-Chemical Standards Kits for Use in Education, Research and Analysis

Chromatography • Colorimetry • Derivatizations • Instrument calibration • Internal standards • Melting points • Spectroscopy • Micro-scale synthesis • Student labs • Titrimetry

The standards are subjected to rigorous instrumental analysis. They are packaged in 2-, 4- or 6-ml screw-cap Wheaton Shorty Vials in 10mg - 2.5g units depending on filling density and type of kit.

The kitcase is 7.5" wide, 9.75" tall and only 1.5" thick for space-saving shelf storage. Standards snap in and out of tray. Kit index lists all standards in tray sequence for easy location. Kits can be arranged by title on kitcase spine.

Sample bottles and custom labels are included with most kits — perfect for storage of extra standards, intermediates, etc. Samples can be logged conveniently into the index in the space provided.

*Trademark of Wheaton Scientifil.

Each set of standards is packaged in the exclusive Aldrich kitcase
