## CONTENTS

**Volume 243, No. 2, 1987**

### REVIEW ARTICLE
Human cancer and cellular oncogenes

S. Nishimura & T. Sekiya 313–327

### FULL AND RAPID PAPERS

#### Proteins
Isolation and characterization of pig enamelines

H. Limeback 385–390

Expression of myosin light chains during fetal development of human skeletal muscle

F. Pons, A. Damadei & J. J. Leger 425–430

Identification of a liver growth factor as an albumin–bilirubin complex

Quantitative analysis of the interaction between immune complex and C1q complement subcomponent. The role of interdomain interactions in rabbit IgG in binding of C1q to immune precipitates

F. Vonderviszt, J. Török, S. Lakatos, F. Kilár & P. Závodszky 449–456

Resolution and analysis of ‘native’ and ‘activated’ properdin

T. C. Faries, J. T. Finch, P. J. Lachmann & R. A. Harrison 507–517

Tyrosine and tyrosinate fluorescence of pig intestinal Ca²⁺-binding protein

J. D. J. O’Neil & T. Hofmann 611–615

#### Enzymes
The non-Michaelian action of thrombin on peptide p-nitroanilide substrates

Glutathione S-transferases of mouse lung. Selective binding of benzo[a]pyrene metabolites by the subunits which are preferentially induced by t-butylated hydroxyanisole

Dependence of urokinase-type-plasminogen-activator induction on cyclic AMP-dependent protein kinase activation in LLC-PK₁ cells

D. A. Jans, T. J. Resink & B. A. Hemmings 413–418

NADPH-binding component of the superoxide-generating oxidase in unstimulated neutrophils and the neutrophils from the patients with chronic granulomatous disease

T. Umei, K. Takeshige & S. Minakami 467–472

Preferential cross-linking of the small subunit of the electron-transfer flavoprotein to general acyl-CoA dehydrogenase

D. J. Steenkamp 519–524

Ontogenetic changes in adenylate cyclase, cyclic AMP phosphodiesterase and calmodulin in chick ventricular myocardium

P. M. Epstein, D. M. Andrenyak, C. J. Smith & A. J. Pappano 525–531

Identification and characterization of a Ca²⁺–calmodulin-sensitive cyclic nucleotide phosphodiesterase in a human lymphoblastoid cell line

P. M. Epstein, S. Moraski, Jr. & R. Hachisu 533–539

The K₁ β-lactamase of Klebsiella pneumoniae

Properties and prenatal ontogeny of β-D-mannosidase in selected goat tissues

#### Lipids
Interaction of unsaturated fatty acids with anti-oestrogen-binding sites

P. L. H. Hwang 359–364

Determination of arrangement of isoprene units in pig liver dolichol by ¹³C-n.m.r. spectroscopy

Phospholipid and fatty acid composition in mitochondria from spinach (Spinacia oleracea) leaves and petioles. A comparative study

K. Edman & I. Ericson 575–578

#### Nucleic acids and molecular genetics
Transformation of Arthrobacter and studies on the transcription of the Arthrobacter ermA gene in Streptomyces lividans and Escherichia coli

CONTENTS (continued)

Cloning and sequencing of the medium-chain S-acyl fatty acid synthetase thioester hydrolyase cDNA from rat mammary gland  
J. NAGGERT, B. WILLIAMS, D. P. CASHMAN & S. SMITH 597–601

Synthesis and degradation of macromolecules
Skeletal muscle and liver contain a soluble ATP + ubiquitin-dependent proteolytic system  
J. M. FAGAN, L. WAXMAN & A. L. GOLDBERG 335–343
Effects of pressure overload and insulin on protein turnover in the perfused rat heart. Prostaglandins are not involved although their synthesis is stimulated by insulin  
D. M. SMITH & P. H. SUGDEN 473–479
Rapid catabolism of tyrosine-O-sulphated proteins and the formation of free tyrosine O-sulphate as an end product in rat embryo fibroblasts  
M.-C. LIU, M. SUIKO & F. LIPMANN 555–559

Intermediary metabolism and metabolic control
How far does phospholipase C activity depend on the cell calcium concentration? A study in intact cells  
D. RENARD, J. POGGIOLI, B. BERTHON & M. CLARET 391–398
Effect of starvation and diabetes on the sensitivity of carnitine palmitoyltransferase I to inhibition by 4-hydroxyphenylglyoxylate  
T. W. STEPHENS & R. A. HARRIS 405–412
Inhibition of ferrochelatase during differentiation of murine erythroleukaemia cells  
A. FADIGAN & H. A. DAILEY 419–424
Regulation of fatty acid synthesis and malonyl-CoA content in mouse brown adipose tissue in response to cold-exposure, starvation or re-feeding  
M. G. BUCKLEY & E. A. RATH 437–442
Regulation of hepatic very-low-density lipoprotein secretion in rats fed on a diet high in unsaturated fat  
G. F. GIBBONS & C. R. PULLINGER 487–492
Glycogenolytic and haemodynamic responses to heat-aggregated immunoglobulin G and prostaglandin E2 in the perfused rat liver  
The activity of the pyruvate dehydrogenase complex in heart and liver from mice during the development of obesity and insulin resistance  
The inhibition of thrombin-dependent positive-feedback reactions is critical to the expression of the anticoagulant effect of heparin  
Regulation of rat foetal lipogenesis in brown adipose tissue in vivo and in isolated brown adipocytes during the last day and after prolonged gestation  
C. Roncero, M. Lorenzo & M. Benito 617–620

Bioenergetics and transport
The stimulation by salts of hexose phosphate uptake by Escherichia coli  
R. C. ESSENBERG 345–350
Some electron-transfer reactions involving carbodi-imide-modified cytochrome c  
A. J. Mathews & T. BrittAIrn 379–384
The control of electron flux through cytochrome oxidase  
M. P. MurPhy & M. D. Brand 499–505
Hydrogen peroxide production in uncoupled mitochondria of the parasitic nematode worm Nippostrongylus brasiliensis  
T. A. PagEt, M. Fry & D. Lloyd 589–595

Membranes and receptors
Heterogeneity of growth-hormone receptors detected with monoclonal antibodies to human growth hormone  
H. THOMAS, I. C. Green, M. WAllIS & R. Aston 365–372
Similarities and differences in phorbol ester- and luteinizing-hormone-induced desensitization of rat tumour Leydig-cell adenylate cyclase  
C. J. DIX, A. D. HaBBERFIELD & B. A. COOKE 373–377
Activation of phospholipase C associated with isolated rabbit platelet membranes by guanosine 5'-[y-thiol]triphosphate and by thrombin in the presence of GTP  
J. K. HrBolich, M. Culty & R. J. HaSSL 457–465
Glucose transporters in isolated chromaffin cells. Effects of insulin and secretagogues  
E. G. DelICado & M. T. MIRAS Portugal 541–547

Methods
The use of gel chromatography for the determination of sizes and relative molecular masses of proteins. Interpretation of calibration curves in terms of gel-pore-size distribution  
M. le MAIRE, A. GhAZI, J. V. MOLLer & L. P. AGGERBECK 399–404
CONTENTS (continued)
The synthesis of fluorescent chlorotriazinylaminofluorescein-concanavalin A and its use as a glycoprotein stain on sodium dodecyl sulphate/polyacrylamide gels
Separation and characterization of pentacarboxylic porphyrinogen isomers by high-performance liquid chromatography with electrochemical detection

C. W. Mahoney & A. Azzi 569-574

F. Li, C. K. Lim & T. J. Peters 621-623
