## REVIEW ARTICLE

Carbohydrates as antigenic determinants of glycoproteins

T. FEIZI & R. A. CHILDS 1-12

## FULL AND RAPID PAPERS

### Proteins

Purification and renaturation of recombinant human interleukin-2

M. P. WEIR & J. SPARKS 85-91

Reversible association of half-molecules of ovotransferrin in solution.

A. BROWN-MASON, S. A. BROWN, 103-109

Basis of co-operative binding to reticulocytes

N. D. BUTCHER & R. C. WOODWORTH

Glucose autoxidation and protein modification. The potential role of 'autoxidative glycosylation' in diabetes

S. P. WOLFF & R. T. DEAN 243-250

### Enzymes

Kinetic studies on the reaction catalysed by phosphofructokinase from *Trypanosoma brucei*

C. N. CRONIN & K. F. TIPTON 13-18

Immunochemical evidence for multiple steroid-inducible hepatic cytochromes P-450 in the rat

K. A. HOSTETLER, S. A. WRIGHTON, 27-33

P. KREMERS & P. S. GUZELIAN

Analysis of enzyme kinetics by using integrated rate equations. Arginine decarboxylase

T. T. COX & E. A. BOEKER 59-65

Analytical methods for fitting integrated rate equations. A discontinuous assay

E. A. BOEKER 67-74

Different sites of inhibition of carnitine palmitoyltransferase by malonyl-CoA, and by acetyl-CoA and CoA, in human skeletal muscle

S. ZIERZ & A. G. ENGEL 205-209

Isolation and partial characterization of a vitamin K-dependent carboxylase from bovine aortae

L. J. M. VAN HAARLEM, M. M. W. ULRICH, 251-255

H. C. HEMKER, B. A. M. SOUTE &

C. VERMEER

Affinity-labelling of the anti-inflammatory drug and prostaglandin-binding site of 3 $\alpha$ -hydroxysteroid dehydrogenase of rat liver cytosol with 17 $\beta$ - and 21-bromoacetoxy steroids

T. M. PENNING, K. E. CARLSON & 269-276

R. B. SHARP

Myeloperoxidase-dependent oxidative inactivation of neutrophil neutral proteinases and microbicidal enzymes

M. C. M. VISSERS & C. C. WINTERBOURN 277-280

The behaviour of leucine aminopeptidase towards thiono-peptides

R. E. BEATTIE, D. T. ELMORE, 285-288

C. H. WILLIAMS & D. J. S. GUTHRIE

Distinction between 'A'-esterases and arylesterases. Implications for esterase classification

M. I. MACKNESS, H. M. THOMPSON, 293-296

A. R. HARDY & C. H. WALKER

### Carbohydrates

Structural studies on sialylated and sulphated O-glycosidic mannose-linked oligosaccharides in the chondroitin sulphate proteoglycan of brain

T. KRUSIUS, V. N. REINHOLD, 229-234

R. K. MARGOLIS & R. U. MARGOLIS

### Lipids

Phospholipid synthesis in isolated alveolar type II cells exposed *in vitro* to paraquat and hyperoxia

H. P. HAAGSMAN, E. A. J. M. SCHUURMANS, 119-126

J. J. BATENBURG & L. M. G. VAN GOLDE

Structure of two new aminophospholipids from *Methanobacterium thermoautotrophicum*

J. K. G. KRAMER, F. D. SAUER & 139-143

B. A. BLACKWELL

Studies on the metal-ion and lipoxygenase-catalysed breakdown of hydroperoxides using electron-spin-resonance spectroscopy

M. J. DAVIES & T. F. SLATER 167-173

Output of lysosomal contents and cholesterol into bile can be stimulated by taurodehydrocholate

K. RAHMAN & R. COLEMAN 289-292

Effect of Adriamycin on heart mitochondrial DNA

C. N. ELLIS, M. B. ELLIS & 309-312

W. S. BLAKEMORE

### Nucleic acids and molecular genetics

Observations on the structure of two human 7SK pseudogenes and on homologous transcripts in vertebrate species

P. HUMPHRIES, S. E. H. RUSSELL, 281-284

P. MCWILLIAM, S. MCQUAID, C. PEARSON

& M. M. HUMPHRIES

### Synthesis and degradation of macromolecules

Ornithine decarboxylase production *in vitro* by using mouse cDNA

J. R. GLASS, M. MACKRELL, J. J. DUFFY & 127-132

E. W. GERNER

**CONTENTS (continued)**

|   |   |         |
|---|---|---------|
| Fractional synthesis rates <i>in vivo</i> of skeletal-muscle myosin isoenzymes  | P. GREGORY, R. B. LOW & W. S. STIREWALT   | 133-137 |
| An isotopic method for measurement of muscle protein synthesis and degradation <i>in vivo</i>   | E. J. BARRETT, J. H. REVKIN, L. H. YOUNG, B. L. ZARET, R. JACOB & R. A. GELFAND | 223-228 |
| Dexamethasone modulates the metabolism of type IV collagen and fibronectin in human basement-membrane-forming fibrosarcoma (HT-1080) cells  | A. OIKARINEN, T. SALO, L. ALA-KOKKO & K. TRYGGVASON                             | 235-241 |
| Age-specific nuclear proteins in the nematode worm <i>Caenorhabditis elegans</i>  | L. A. MEHEUS, J. J. VAN BEEUMEN, A. V. COOMANS & J. R. VANFLETEREN              | 257-261 |
| <b>Intermediary metabolism and metabolic control</b>  |   |         |
| Developmental changes in hepatic fructose 2,6-bisphosphate content and phosphofructokinase-1 activity in the transition of chicks from embryonic to neonatal nutritional environment  | M. J. HAMER & A. J. DICKSON   | 35-39   |
| The stimulation by sodium fluoride of plasma-membrane Ca <sup>2+</sup> inflow in isolated hepatocytes. Evidence that a GTP-binding regulatory protein is involved in the hormonal stimulation of Ca <sup>2+</sup> inflow  | B. P. HUGHES & G. J. BARRITT  | 41-47   |
| Evidence that Ca <sup>2+</sup> fluxes and respiratory, glycogenolytic and vasoconstrictive effects induced by the action of platelet-activating factor and L- $\alpha$ -lysophosphatidylcholine in the perfused rat liver are mediated by products of the cyclo-oxygenase pathway | J. G. ALTIN, P. DIETER & F. L. BYGRAVE  | 145-150 |
| Stereoselective formation and hydration of 12-methylbenz[a]anthracene 5,6-epoxide enantiomers by rat liver microsomal enzymes   | S. K. YANG, M. MUSHTAQ, H. B. WEEMS, D. W. MILLER & P. P. FU                    | 191-204 |
| Hepatic uptake of amino acids at mid-lactation in the rat   | J. CASADO, M. PASTOR-ANGLADA & X. REMESAR                                       | 297-300 |
| <b>Bioenergetics and transport</b>  |   |         |
| Cytochrome <i>b</i> <sub>2</sub> , an electron carrier between flavocytochrome <i>b</i> <sub>2</sub> and cytochrome <i>c</i> . Rapid kinetic characterization of the electron-transfer parameters with ionic-strength-dependence  | C. CAPELLÈRE-BLANDIN & J. ALBANI  | 159-165 |
| Stimulation of the respiration rate of rat liver mitochondria by sub-micromolar concentrations of extramitochondrial Ca <sup>2+</sup>   | J. D. JOHNSTON & M. D. BRAND  | 217-222 |
| Toxic effects of ozone on murine L929 fibroblasts. Damaging action on transmembrane transport systems   | J. VAN DER ZEE, T. M. A. R. DUBBELMAN & J. VAN STEVENINCK                       | 301-304 |
| <b>Membranes and receptors</b>  |   |         |
| Effect of cyclic AMP-dependent protein kinase on insulin receptor tyrosine kinase activity  | J.-F. TANTI, T. GRÉMEAUX, N. ROCHET, E. VAN OBBERGHEN & Y. LE MARCHAND-BRUSTEL  | 19-26   |
| Stimulation of polyphosphoinositide hydrolysis by thrombin in membranes from human fibroblasts  | M. J. REBECCHI & O. M. ROSEN  | 49-57   |
| Isolation from human chronic-lymphocytic-leukaemia cells of membrane glycoproteins associated with Fc-receptor functions. Physical parameters and production of polyclonal antibodies   | G. GORINI, G. A. MEDGYESI, M. GARAVINI, K. J. DORRINGTON & J. DOWN              | 75-83   |
| Extraction of peripheral proteins is accompanied by selective depletion of certain glycerophospholipid classes and changes in the phosphorylation pattern of acetylcholine-receptor-rich-membrane proteins  | I. C. BONINI DE ROMANELLI, A. M. ROCCAMO DE FERNÁNDEZ & F. J. BARRANTES         | 111-118 |
| Selective internalization of arachidonic acid by endothelial cells  | E. R. HALL, C. E. MANNER, J. CARINHAS, R. SNOPKO & M. RAFELSON                  | 151-157 |
| The effect of concanavalin A on the rat electro-olfactogram. Differential inhibition of odorant response  | S. G. SHIRLEY, E. H. POLAK, R. A. MATHER & G. H. DODD                           | 175-184 |
| The effect of concanavalin A on the rat electro-olfactogram at various odorant concentrations   | S. G. SHIRLEY, E. H. POLAK, D. A. EDWARDS, M. A. WOOD & G. H. DODD              | 185-189 |
| Evidence from studies employing radioactively labelled fatty acids that the stimulation of flux through the diacylglycerol pool is an early action of vasopressin on hepatocytes  | L. B. PICKFORD, A. J. POLVERINO & G. J. BARRITT                                 | 211-216 |
| Metabolism of inositol 1,4,5-trisphosphate in permeabilized rat aortic smooth-muscle cells. Dependence on calcium concentration   | M. F. ROSSIER, A. M. CAPPONI & M. B. VALLOTTON                                  | 305-307 |
| <b>Cell structure and function</b>  |   |         |
| Properties of highly viscous gels formed by neurofilaments <i>in vitro</i> . A possible consequence of a specific inter-filament cross-bridging   | J.-F. LETERRIER & J. EYER   | 93-101  |
| The levels of nicotinamide nucleotides in liver microsomes and their possible significance to the function of hexose phosphate dehydrogenase  | C. BUBLITZ & C. A. LAWLER   | 263-267 |
