

## THE BIOCHEMICAL SOCIETY

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Several meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

## Genes and Proteins in Immunity

Traditionally, the multiplicity of the reactions involved in immune responses have been a source of excitement to some and yet frustration to many. However, with the advent of modern techniques in molecular biology, a considerable understanding of these complexities has begun to emerge. In recognition of the enormous contribution made to this field by Rodney Porter, the Biochemical Society held a special symposium in his honour in Oxford during July 1985. This volume contains the papers that were presented in tribute at the symposium.

# Deuterated Solvents in Ampules

• Quality • Convenience • Variety

High-purity deuterated solvents are very hygroscopic and require careful handling to protect them from contamination by atmospheric moisture. The ideal package is the flame-sealed ampule containing the exact amount of material you require.

The following products are assayed before and after packaging to insure that *the quality we produce is the quality you receive*. The greatest value for your particular need can be found below in packs of 5 or 10 ampules. Ampules contain 0.5 or 1ml of solvent.
