CONTENTS

Volume 249, No. 1, 1988

NC-IUB and JCBN Newsletter 1988 1–III

Policy of the Journal and Instructions to Authors 1–20

REVIEW ARTICLE
Understanding the GABA_A receptor: a chemically gated ion channel 21–32

FULL AND RAPID PAPERS
Proteins
Zinc and copper accumulation and isometallothionein induction in mouse ascites sarcoma S180A cells 69–75
Enzyme-assisted semisynthesis of polypeptide active esters and their use 83–88
A study of the hydration and thermodynamics of warm-water and cold-water fish collagens 127–133
Formation of hydroxyl radicals from hydrogen peroxide in the presence of iron. Is haemoglobin a biological Fenton reagent? 185–190
Suppression of fluorescence of tryptophan residues in proteins by replacement with 4-fluorotryptophan 305–308

Enzymes
Kinetic studies on the effect of heparin and fibrin on plasminogen activators 77–81
Purification and properties of an extracellular glucoamylase from a diastatic strain of Saccharomyces cerevisiae 163–170
Kinetic mechanism of chicken liver xanthine dehydrogenase 171–178
Purification and characterization of a high-M, carbonic anhydrase from sheep parotid gland 201–207
Developmental forms of human skeletal-muscle AMP deaminase. The kinetic and regulatory properties of the enzyme 255–261
Histidine decarboxylase from rat mast cells. Enhanced recovery in cell-free extracts and isotopic labelling 297–300

Lipids
Polyamine inhibition of lipoperoxidation. The influence of polyamines on iron oxidation in the presence of compounds mimicking phospholipid polar heads 33–36
Detection of short-chain carboxyl products of lipid peroxidation from malaria-parasite (Plasmodium vinckei)-infected red blood cells exposed to oxidative stress 63–68
Synthesis of very long chain (up to 36 carbon) tetra, penta and hexaenoic fatty acids in retina 191–200

Gene structure and expression
Long-term dosing studies using mutagenic carcinogens indicate a highly significant correlation between elevations in the level of rat glutathione S-transferase P messenger RNA and liver tumours of hepatocellular origin 105–109

Synthesis and degradation of macromolecules
Induction of mitochondrial proteins in MA-10 Leydig tumour cells with human choriogonadotropin 95–103
CONTENTS (continued)

Identification of radioactive insulin fragments liberated by insulin protease during the degradation of semisynthetic [3H]Gly-[3H]Phe-insulin and [3H]Phe [3H]insulin

Identification by fast atom bombardment mass spectrometry of insulin fragments produced by insulin protease

Intermediate metabolism and metabolic control

Short- and longer-term regulation of very-low-density lipoprotein secretion by insulin, dexamethasone and lipogenic substrates in cultured hepatocytes. A biphasic effect of insulin

Increased lipoprotein lipase content in the adipose tissue of suckling and weaning obese Zucker rats

Brain energy metabolism in streptozotocin-diabetes

Involvement of hormone processing in insulin-activated glucose transport by isolated cardiac myocytes

The dephosphorylation of inositol 1,4-bisphosphate to inositol in liver and brain involves two distinct Li+-sensitive enzymes and proceeds via inositol 4-phosphate

Qualitative and quantitative comparison of glucose transport activity and glucose transporter concentration in plasma membranes from basal and insulin-stimulated rat adipose cells

Enzymes of carnitine acylation. Is overt carnitine palmitoyltransferase of liver peroxisomal carnitine octanoyltransferase?

The soluble carnitine palmitoyltransferase from bovine liver. A comparison with the enzymes from peroxisomes and from the mitochondrial inner membrane

Glutathione reductase directly mediates the stimulation of yeast glucose-6-phosphate dehydrogenase by GSGG

Bioenergetics and transport

The kinetics of transport of lactate and pyruvate into rat hepatocytes. Evidence for the presence of a specific carrier similar to that in erythrocytes

Mechanism of the decrease in hexose transport by mouse mammary epithelial cells caused by fasting

Sodium-gradient-driven, high-affinity, uphill transport of succinate in human placental brush-border membrane vesicles

Isolation and characterization of a plasma membrane calcium pump from Dictyostelium discoideum

Distribution and properties of the glycylsarcosine-transport system in rabbit renal proximal tubule. Studies with isolated brush-border membrane vesicles

The switching of electron flux from the cyanide-insensitive oxidase to the cytochrome pathway in mung-bean (Phaseolus aureus) L. mitochondria

Membranes and receptors

The mechanism of action of GTP on Ca2+ efflux from rat liver microsomal vesicles. Measurement of vesicle fusion by fluorescence energy transfer

Desensitization and recovery of muscarinic and histaminergic Ca2+ mobilization in 1221N1 astrocytoma cells

L-myo-Inositol 1,4,5,6-tetrasphosphate is present in both mammanian and avian cells

L-myo-Inositol 1,4,5,6-tetrasphosphate (3-hydroxy)kinase

Identification of radioactive insulin fragments liberated by insulin protease during the degradation of semisynthetic [3H]Gly-[3H]Phe-insulin and [3H]Phe [3H]insulin

Identification by fast atom bombardment mass spectrometry of insulin fragments produced by insulin protease

Intermedi metabolism and metabolic control

Short- and longer-term regulation of very-low-density lipoprotein secretion by insulin, dexamethasone and lipogenic substrates in cultured hepatocytes. A biphasic effect of insulin

Increased lipoprotein lipase content in the adipose tissue of suckling and weaning obese Zucker rats

Brain energy metabolism in streptozotocin-diabetes

Involvement of hormone processing in insulin-activated glucose transport by isolated cardiac myocytes

The dephosphorylation of inositol 1,4-bisphosphate to inositol in liver and brain involves two distinct Li+-sensitive enzymes and proceeds via inositol 4-phosphate

Qualitative and quantitative comparison of glucose transport activity and glucose transporter concentration in plasma membranes from basal and insulin-stimulated rat adipose cells

Enzymes of carnitine acylation. Is overt carnitine palmitoyltransferase of liver peroxisomal carnitine octanoyltransferase?

The soluble carnitine palmitoyltransferase from bovine liver. A comparison with the enzymes from peroxisomes and from the mitochondrial inner membrane

L-myo-Inositol 1,4,5,6-tetrasphosphate is present in both mammalian and avian cells

L-myo-Inositol 1,4,5,6-tetrasphosphate (3-hydroxy)kinase
CONTENTS (continued)

Cell structure and function
Phospholipid turnover during cell-cycle traverse in synchronous Chinese-hamster ovary cells. Mitogenesis without phosphoinositide breakdown

M. A. TONES, N. A. SHARIF & J. N. HAWTHORNE 51-56

Methods
Principles of a competitive binding assay for the study of the interactions of poorly water-soluble ligands with their soluble binding partners. Application to bilirubin with the use of Sephadex G-10 as a competitive adsorbent

J. A. T. P. MEUWISSEN, M. KINNAERT, G. MICHELS & K. P. M. HEIRWEGH 263-270
