The Principles of Plant Biochemistry

Part 1

By Muriel Wheldale Onslow, M.A.

This book, which deals only with the higher plants, is intended for the student and for the beginner in research. The problems here considered are, in the main, those concerned with the biochemistry of the sugars and the nitrogen compounds; the former when they take part in cell-wall formation and in respiration, the latter chiefly in connection with the synthesis and the break-down of protein. Oxidising systems are also included, but only such as are known to be characteristic of the above-mentioned group of plants.

D. R. HOOKER, Managing Editor, BALTIMORE

Containing short but comprehensive articles dealing with the recent literature in Physiology, using this term in a broad sense to include Bio-Chemistry, Bio-Physics, Experimental Pharmacology and Experimental Pathology.

TENTATIVE CONTENTS OF VOLUME XI, 1931

An Index to Volumes I to X inclusive will be published in the January Issue

R. W. GERARD: Metabolism of Nerve
PERCIVAL BAILEY: Functions of the Hypothalamus
E. U. STILL: Secretin
W. O. FENN: Energy Changes in Muscular Contraction
W. F. PETERSEN: Disease and Constitution
R. H. JAFFE: The Reticulo-Endothelial System in Immunity
W. H. RUSHTON: The Nature of Electrical Excitation
T. H. MILROY: The Present Status of the Chemistry of Skeletal Muscular Contraction
B. A. McSWINEY: Innervation of the Stomach
J. ARGYLL CAMPBELL: The Tension of Gases in Tissues
E. WALDSCHMIDT-LEITZ: The Mode of Action and Differentiation of Proteolytic Enzymes
H. A. SPOHR: Photosynthesis
C. H. BEST and E. W. McHENRY: Histamine
A. D. HIRSCHFELDER and R. N. BIERER: Local Anesthetics: Relation of Constitution and Action
CARL VOEGTLIN: Testing of Trypanocidal Agents
OSCAR RIDDLE: Factors in the Development of the Secondary Sex Characteristics
ERIC PONDER: Hemolysis

PLANT BIOLOGY
An Outline of the Principles underlying
Plant Activity and Structure
By
H. GODWIN

Illustrated Crown 8vo 8s. 6d. net

Dr Godwin has written this book for first-year medical students, and for biological students of similar status including the higher forms of schools and the introductory classes of training colleges. He has particularly emphasised the physiological point of view and the physico-chemical background of plant-life.

SOLE AGENTS FOR

ANGLE CENTRIFUGES
SWEDISH MANUFACTURE

C1139a. Angle Centrifuge, Hand Driven, Type B, with nickel-plated bonnet arranged for 4-15 ml. tubes, either round, oval or flat, which can be inserted at an angle of 25° for the separation of blood or other liquids difficult of separation, or at an angle of 45° for treating urine and similar fluids which are easily separated. The pressed aluminium tube holders are detachable, and the centrifuge can easily be worked up to a speed of 3000 r.p.m. (1½ revolution per second of the handle = 2800 r.p.m. of the crank shaft.)

£4.5.0

C1140. Angle Centrifuge, Type BE-EM, as described under C1139a, but electrically driven, with motor suitable for direct or alternating current. Speed 3000 r.p.m. Complete with Regulating Rheostat and Connecting Plug.

£7.15.0

All Motor Centrifuges are provided with Universal Motors for both D.C. and A.C. current, of all usual voltages and frequencies.

PHYSIOLOGICAL ABSTRACTS

Monthly, price 5s. net.  
Annual Subscription, post free, 42s.

This Journal is issued by the PHYSIOLOGICAL SOCIETY, acting in co-operation with numerous physiological organisations in Great Britain, America, and other countries. The Editor, Prof. J. MELLANBY, is assisted by a staff of competent abstractors both at home and abroad.

The Journal aims at issuing promptly abstracts of the papers published throughout the world, in physiological and allied sciences (including Plant Physiology).

A number is published at the beginning of each month. Vol. XVI began with the April (1931) issue.

Subscriptions are only taken for April to March of the next year, and are payable in advance.

Back numbers, excepting some which are out of print, may be obtained from the Publishers, or any Bookseller. An extra charge is made for some numbers the stock of which is nearly exhausted. Prices on application.

Binding Cases, price 2s. net, are supplied by the Publishers, who can also arrange for binding; prices on application.

Investigators who wish to have supplies of the Wistar Rat (London strain) for work in the autumn and winter should place orders immediately.

October and November are the months when demand begins to exceed supply, judging by the experience of the last six years.

Breeding stock is also difficult to obtain in that part of the year. If ordered now supplies in the autumn can be guaranteed.
