Volume 252, No. 3, 1988

FULL AND RAPID PAPERS

Proteins
A kinetic and equilibrium study of ligand binding to the monomeric and dimeric haem-containing globins of two chitons
Effect of specific proteolytic cleavages on tubulin polymer formation

S. E. SMITH, T. BRITTAINT & R. M. G. WELLS 673–678
L. SERRANO, F. WANDOSELL, J. DE LA TORRE & J. AVILA 683–691

Enzymes
A new alcohol dehydrogenase, reactive towards methanol, from Bacillus stearothermophilus
A collagen-binding glycoprotein on the surface of mouse fibroblasts is identified as dipetidyl peptide IV
Hyaluronidase in ram semen. Quantitative determination, and isolation of multiple forms
Preliminary characterization of the multiple forms of ram sperm hyaluronidase
Studies on the genetic linkage of bilirubin and androsterone UDP-glucuronyltransferases by cross-breeding of two mutant rat strains
Evidence that the pyromethane cofactor of hydroxymethylbilane synthase (porphobilinogen deaminase) is bound through the sulphur atom of a cysteine residue
Carbon isotope effects on the decarboxylation of carboxylic acids. Comparison of the lactate oxidation reaction and the degradation of pyruvate on H2O2
Investigation by electron paramagnetic resonance spectroscopy of the molybdenum centre of respiratory nitrate reductase from Paracoccus denitrificans

M. C. SHEEHAN, C. J. BAILEY, B. C. A. DOWDS & D. J. McCONNELL 661–666
B. BAUVOIS 723–731
R. A. P. HARRISON 865–874
R. A. P. HARRISON 875–882
F. NAGAI, H. HOMMA, H. TANASE & M. MATSUI 897–900
G. J. HART, A. D. MILLER & A. R. BATTERSBY 909–912
E. MELZER & H.-L. SCHMIDT 913–915
N. TURNER, A. BALLARD, R. C. BRAY, S. FERGUSON 925–926

Lipids
Δ⁴- and Δ¹⁰-desaturase activities and phosphatidic acid formation in microsomal preparations from the developing cotyledons of common borage (Borago officinalis)
No evidence for vitamin K-dependent carboxylation of canine surfactant apoproteins, 28–36 kDa
Damage to DNA concurrent with lipid peroxidation in rat liver slices
Lipid characteristics of Friend erythroleukaemia cells differentiated by dimethyl sulphoxide or hexamethylenebisacetamide, and of non-inducible clones treated with the inducers

G. GRIFFITHS, A. K. STOBART & S. STYMNE 641–647
R. WALLIN, M. SEATON & L. F. MARTIN 851–856
C. G. FRAGA & A. L. TAPPEN 893–896
A. FALLANI, A. ARCEANGELI & S. RUGGIERI 917–920

Gene structure and expression
Structure of a full-length cDNA clone for the preproα2(1) chain of human type I procollagen. Comparison with the chicken gene confirms unusual patterns of gene conservation
Studies on protein kinases involved in regulation of nucleocytoplasmic mRNA transport
Escherichia coli promoter — 10 and — 35 region homologies correlate with binding and isomerization kinetics

H. KUIVANIEMI, G. TROMP, M.-L. CHU & D. J. PROCKOP 633–640
G. M. STUDNICKA 825–831

Synthesis and degradation of macromolecules
The relationship between inhibition of plasminogen-activator activity and prostatic involution
Import of rat liver mitochondrial transhydrogenase
Biosynthesis of secreted β-hexosaminidase in Tetrahymena thermophila. A comparison of the wild type with a secretory mutant

P. S. RENNIE, J.-F. BOWDEN, N. BRUCHOVSKY & H. CHENG 759–764
L. N. Y. WU, I. M. LUBIN & R. R. FISHER 833–836
P. HÜNSELER, A. TIEDTKE & K. VON FIGURA 837–842

(xi)
CONTENTS (continued)

Intermediary metabolism and metabolic control
Hydroxyl-radical-induced iron-catalysed degradation of 2-deoxy-ribose. Quantitative determination of malondialdehyde
Defect in signal transduction at the level of the plasma membrane accounts for inability of insulin to activate pyruvate dehydrogenase in white adipocytes of lactating rats
Evidence of functional α2-adrenergic receptors in adult-rat adipocytes by using the agonist UK 14304
Polyamines and insulin production in isolated mouse pancreatic islets
Insulin regulation of pyruvate kinase activity in cultured rat hepatocytes, in the presence of vasopressin, ionophore A23187 or 4β-phorbol 12β-myristate 13α-acetate
Glucose-induced insulin resistance of skeletal-muscle glucose transport and uptake
Amino acid and glucose uptake by rat brown adipose tissue. Effect of cold-exposure and acclimation
Epidermal-growth-factor-induced formation of inositol phosphates in human A431 cells. Differences from the effect of bradykinin

Bioenergetics and transport
Electrogenicity of phosphate transport by renal brush-border membranes
Radiation-inactivation studies on brush-border-membrane vesicles. General considerations, and application to the glucose and phosphate carriers
Separate binding sites for antimycin and mucedin in the respiratory chain of the bacterium Paracoccus denitrificans and their occurrence in other denitrifying bacteria
Photochemistry in the isolated Photosystem II reaction-centre core complex

Membranes and receptors
Erythrocyte-binding studies on an acidic lectin from winged bean (Psophocarpus tetragonolobus)
Occupancy of adenosine receptors raises cyclic AMP alone and in synergy with occupancy of chemoattractant receptors and inhibits membrane depolarization
The time-dependent distribution of 125I-asialo-orosomucoid-horse-radish peroxidase and 125I-immunoglobulin A among three endosomal subfractions isolated from rat liver
Alkaline phosphatase relieves desensitization of adenylate cyclase-coupled β-adrenergic receptors in avian erythrocyte membranes
Comparison of p25 presequence peptide and melittin. Red blood cell haemolysis and band 3 aggregation
Mannose 6-phosphate/insulin-like growth factor II-binding proteins in human serum and urine. Their relation to the mannose 6-phosphate/insulin-like growth factor II receptor
Insulin-induced myosin light-chain phosphorylation during receptor capping in IM-9 human B-lymphoblasts
Lowering of the extracellular Na+ concentration enhances high-K+-induced formation of inositol phosphates in the guinea-pig ileum
Calmodulin antagonists increase the amount of mRNA for the low-density-lipoprotein receptor in skin fibroblasts

Cell structure and function
Influence of the phosphorylation state of neurofilament proteins on the interactions between purified filaments in vitro
Intracellular processing and transport of influenza-virus envelope proteins in Madin–Darby canine kidney cells. Effects of the carboxylic ionophores monensin and Nigericin
CONTENTS (continued)

Recruitment of actin to the cytoskeletons of human monocyte-like cells activated by complement fragment C5a. Is protein kinase C involved?

Phosphorylation of the subunits of cytochrome b$_{558}$ upon triggering of the respiratory burst of human neutrophils and macrophages

**Methods**

Purification of anthrax-toxin components by high-performance anion-exchange, gel-filtration and hydrophobic-interaction chromatography

**BJ LETTERS**

Starvation of phosphorylase kinase-deficient rats is accompanied by partial hepatic glycogen depletion

Suppression of hepatic glucose output after glucose re-feeding in the gsd/gsd rat

Further validation of the Mulder and van Doorn kinetic procedure for the measurement of microsomal UDP-glucuronosyltransferase activities

The specific activity of hexose 6-phosphates in liver

Compartmentation of glucose 6-phosphate in hepatocytes

P. Banks, M. D. Barker & D. R. Burton 765–769

R. C. Garcia & A. W. Segal 901–904

C. P. Quinn, C. C. Shone, P. C. B. Turnbull & J. Melling 753–758

P. C. Calder & R. Geddes 927–928

M. J. Holness, T. N. Palmer & M. C. Sugden 928–929

B. Antoine, J. A. Boutin & G. Siest 930–931

J. Katz 932

N. Kalant, M. Parriott & M. Lemieux 932–933
