CONTENTS

Volume 255, No. 1, 1988

REVIEW ARTICLE
Techniques used in the identification and analysis of function of pertussis toxin-sensitive guanine nucleotide binding proteins

FULL AND RAPID PAPERS

Proteins
The primary structures of six human salivary acidic proline-rich proteins (PRP-1, PRP-2, PRP-3, PRP-4, PIF-s and PIF-f)

Phosphorylation of human serum amyloid A protein by protein kinase C

Purification and characterization of CS2, a sialic acid-specific haemagglutinin of enterotoxigenic Escherichia coli

Enhanced thermodynamic stability of β-lactoglobulin at low pH. A possible mechanism

A monoclonal antibody to aromatic amino acid hydroxylases. Identification of the epitope

Caldesmon–calmodulin interaction. Study by the method of protein intrinsic tryptophan fluorescence

Design and biological activity of a new generation of synthetic C3a analogues by combination of peptidic and non-peptidic elements

Erythrocyte protein 4.1 associates with tubulin

Heterogeneity in the human erythrocyte Band 3 anion-transporter revealed by Triton X-114 phase partitioning

Characterization of an antibody directed against a 128 kDa glycoprotein involved in the thrombogenicity of the elastin-associated microfibrils

Conversion of biosynthetic human proinsulin to partially cleaved intermediates by collagenase proteinases adsorbed to isolated rat adipocytes

The binding characteristics of the cytochrome c iron

Probable detection of Kil peptide derived from colicin E1 plasmid in the envelope fraction of Escherichia coli HB101 carrying pEAP31

Enzymes
The metabolism of neuropeptides. Hydrolysis of peptides by the phosphoramidon-insensitive rat kidney enzyme 'endopeptidase-2' and by rat microvillar membranes

A survey of the kinetic parameters of class C β-lactamases. Penicillins

A survey of the kinetic parameters of class C β-lactamases. Cephalosporins and other β-lactam compounds

Resolution and characterization of the glycine-cleavage reaction in pea leaf mitochondria. Properties of the forward reaction catalysed by glycine decarboxylase and serine hydroxymethyltransferase

Extracellular superoxide dismutase in the vascular system of mammals

Cyclic AMP-dependent protein kinase activity in Trypanosoma cruzi

Fluorine compounds inhibit the conversion of active type-1 protein phosphatases into the ATPMg-dependent form

Factors affecting the isopenicillin N synthetase reaction

CONTENTS (continued)

Carbohydrates
Characterization of an oligosaccharide-pyrophosphodolichol pyrophosphatase activity in yeast

M. Belard, R. Cacan & A. Verbert 235–242

Lipids
The use of two populations of hepatocytes with different triacylglycerol contents as a model to study the accumulation of liver lipid in the laying hen

K. E. Cross & P. F. Dodds 259–265

Gene structure and expression
Nucleotide sequence of the gene encoding the GMP reductase of *Escherichia coli* K12

S. C. Andrews & J. R. Guest 35–43

The structure of the human glutathione S-transferase π gene

Expression of 5-aminolaevulinate synthase and cytochrome P-450 mRNAs in chicken embryo hepatocytes in vivo and in culture. Effect of porphyrinogenic drugs and haem

Synthesis and degradation of macromolecules
Undifferentiated F9 embryonal carcinoma cells produce a short-chain collagen molecule

B. D. Smith & C. T. BALDWIN 85–89

Intermediary metabolism and metabolic control
Regulation of 3-hydroxy-3-methylglutaryl-CoA reductase mRNA contents in human hepatoma cell line Hep G2 by distinct classes of mevalonate-derived metabolites

L. H. Cohen & M. Griffioen 61–67

The calcium ionophore A23187 is a potent stimulator of the vitamin D3-25 hydroxylase in hepatocytes isolated from normocalcaemic vitamin D-depleted rats

N. BENBRAHIM, C. Dubé, S. VALLIERES & M. GASCON-BARRÉ 91–97

Zonation of glycogen and glucose syntheses, but not glycolysis, in rat liver

K. S. Chen & J. Katz 99–104

1D-my-o-Inositol 1,4,5-trisphosphate dephosphorylation by rat enterocytes involves an intracellular 5-phosphatase and non-specific phosphatase activity at the cell surface

C. Rubiera, G. Velasco, R. H. Michell, P. S. LAZO & S. B. SHEARS 131–137

The effect of ketone bodies on alanine and glutamine metabolism in isolated skeletal muscle from the fasted chick

G. Wu & J. R. Thompson 139–144

Methylothioadenosine toxicity and metabolism to methionine in mammalian cells

Carnitine metabolism in the vitamin B-12-deficient rat

E. P. Brass & S. P. STABLER 153–159

DL-α-Difluoromethyl[3,4-3H]arginine metabolism in tobacco and mammalian cells. Inhibition of ornithine decarboxylase activity after arginase-mediated hydrolysis of DL-α-difluoromethylarginine to DL-α-difluoromethylornithine

Epidermal-growth-factor stimulation of gluconeogenesis in isolated rat hepatocytes involves the inactivation of pyruvate kinase

S. K. MOULE & J. F. McGIVAN 361–364

Effects of pregnancy on tryptophan metabolism and disposition in the rat

A. A.-B. BADAWY 369–372

Bioenergetics and transport
Purification of the human erythrocyte nucleoside transporter by immunoaffinity chromatography

Superoxide generation by the electrogenic NADPH oxidase of human neutrophils is limited by the movement of a compensating charge

L. M. Henderson, J. B. CHAPPELL & O. T. G. Jones 285–290

Inhibition by cyclosporin A of a Ca2+-dependent pore in heart mitochondria activated by inorganic phosphate and oxidative stress

M. CROMPTON, H. ELLINGER & A. COSTI 357–360
CONTENTS (continued)

Membranes and receptors
Regulation of GH3-cell function via adenosine A1 receptors. Inhibition of prolactin release, cyclic AMP production and inositol phosphate generation
Evidence that agonists stimulate bivalent-cation influx into human endothelial cells
Identification of Na+,P1-binding protein in kidney and intestinal brush-border membranes
Extracellular ATP increases free cytosolic calcium in rat parotid acinar cells. Differences from phospholipase C-linked receptor agonists
Two components of hormone-evoked calcium release from intracellular stores of pancreatic acinar cells
Ca2+ mobilization primes protein kinase C in human platelets. Ca2+ and phorbol esters stimulate platelet aggregation and secretion synergistically through protein kinase C
Is there a tripeptidyl peptidase in the renal brush-border membrane?

Cell structure and function
Rapid transient elevations of cytosolic calcium triggered by thyrotropin releasing hormone in individual cells of the pituitary line GH3B6
Glycolysis in permeabilized L-929 cells

Methods
A new h.p.l.c. isolation procedure for chicken and goose erythrocyte histones
Enzyme-linked immunosorbent assays for Z-DNA

W. HELLIGER, H. LINDNER, S. HAUPTORENZ & B. PUSCHENDORF
M. J. THOMAS & J. S. STROBL
