

CONTENTS

Volume 263, No. 2, 1989

REVIEW ARTICLE

- Fuel selection and carbon flux during the starved-to-fed transition M. C. SUGDEN, M. J. HOLNESS & T. N. PALMER 313-323

FULL AND RAPID PAPERS

Proteins

- Effects of thiolation on the immunoreactivity of the ribosome-inactivating protein gelonin V. SINGH & M. R. SAIRAM 417-423
- The quaternary structure in solution of human complement sub-component C1r₂C1s₂ S. J. PERKINS & A. S. NEALIS 463-469
- Desialylation of transferrin by liver endothelium is selective for its triantennary chain S. IRIE & M. TAVASSOLI 491-496
- Primary structure and possible origin of the non-glycosylated basic proline-rich protein of human submandibular/sublingual saliva R. ROBINSON, D. L. KAUFFMAN, M. M. Y. WAYE, M. BLUM, A. BENNICK & P. J. KELLER 497-503
- The identification of sarcoplasmic reticulum terminal cisternae proteins in platelets T. H. FISCHER, D. W. BARTON, K. H. KRAUSE, T. E. WHITE, K. P. CAMPBELL & G. C. WHITE II 605-608

Enzymes

- Detection of CMP-*N*-acetylneuraminic acid hydroxylase activity in fractionated mouse liver L. SHAW & R. SCHAUER 355-363
- Differential induction of class Alpha glutathione *S*-transferases in mouse liver by the anticarcinogenic antioxidant butylated hydroxy-anisole. Purification and characterization of glutathione *S*-transferase Ya₁Ya₁ L. I. MCLELLAN & J. D. HAYES 393-402
- Spectroscopic studies of the type 2 and type 3 copper centres in the mercury derivative of laccase R. TAMILARASAN & D. R. MCMILLIN 425-429
- The purification and characterization of 4-ethylphenol methylene hydroxylase, a flavocytochrome from *Pseudomonas putida* JD1 C. D. REEVE, M. A. CARVER & D. J. HOPPER 431-437
- Purification and characterization of a digestive cysteine proteinase from the American lobster (*Homarus americanus*) M. V. LAYCOCK, T. HIRAMA, S. HASNAIN, D. WATSON & A. C. STORER 439-444
- Fish skeletal muscle contains a novel serine proteinase with an unusual subunit composition E. J. E. FOLCO, L. BUSCONI, C. B. MARTONE & J. J. SÁNCHEZ 471-475
- Isolation, in the intact state, of the pterin molybdenum cofactor from xanthine oxidase J. DEISTUNG & R. C. BRAY 477-483
- Purification and properties of cytochrome *P*-450-dependent 14 α -sterol demethylase from *Candida albicans* C. A. HITCHCOCK, K. DICKINSON, S. B. BROWN, E. G. V. EVANS & D. J. ADAMS 573-579
- Isolation of procathepsin D from mature cathepsin D by pepstatin affinity chromatography. Autocatalytic proteolysis of the zymogen form of the enzyme G. E. CONNER 601-604
- The catalytic mechanism of the hydroxylation reaction of peptidyl proline and lysine does not require protein disulphide-isomerase activity R. MYLLYLÄ, D. D. KASKA & K. I. KIVIRIKKO 609-611

Lipids

- Inhibition of biliary cholesterol and phospholipid secretion during cyclobutylol-induced hydrocholeresis M. J. MONTE, F. CAVA, A. ESTELLER & R. JIMENEZ 513-518
- Stimulation of 5-lipoxygenase activity under conditions which promote lipid peroxidation D. RIENDEAU, D. DENIS, L. Y. CHOO & D. J. NATHANIEL 565-572

Synthesis and degradation of macromolecules

- Prostaglandin-dependent muscle wasting during infection in the broiler chick (*Gallus domesticus*) and the laboratory rat (*Rattus norvegicus*) S. TIAN & V. E. BARACOS 485-490

Intermediary metabolism and metabolic control

- The fuel of the spleen. Studies using a new method for perfusing the rat spleen with whole blood M. A. MINDHAM & P. A. MAYES 325-332
- Effects of hypothyroidism and hyperthyroidism on GDP binding to brown-adipocyte mitochondria from rats J. A. WOODWARD & E. D. SAGGERSON 341-345

CONTENTS (continued)

Prolonged high intracellular free calcium concentrations induced by ATP are not immediately cytotoxic in isolated rat hepatocytes. Changes in biochemical parameters implicated in cell toxicity	J. F. NAGELKERKE, P. DOGTEROM, H. J. G. M. DE BONT & G. J. MULDER	347-353
Chemical synthesis of all- <i>trans</i> -[11- ³ H]retinoyl β -glucuronide and its metabolism in rats <i>in vivo</i>	A. B. BARUA & J. A. OLSON	403-409
Inhibition of apolipoprotein B net synthesis and secretion from cultured rat hepatocytes by the calcium-channel blocker diltiazem	T. C. KWONG, J. D. SPARKS, D. J. PRYCE, J. F. CIANCI & C. E. SPARKS	411-415
Rapid purification of pig heart NAD ⁺ -isocitrate dehydrogenase. Studies on the regulation of activity by Ca ²⁺ , adenine nucleotides, Mg ²⁺ and other metal ions	G. A. RUTTER & R. M. DENTON	445-452
The binding of Ca ²⁺ ions to pig heart NAD ⁺ -isocitrate dehydrogenase and the 2-oxoglutarate dehydrogenase complex	G. A. RUTTER & R. M. DENTON	453-462
Defective phosphorylation of a calmodulin-binding protein in cystic-fibrosis submandibular glands	D. K. SHORI, R. L. DORMER, M. C. GOODCHILD & M. A. MCPHERSON	613-616
Confirmation of D-aspartic acid in the novel dipeptide β -aspartyl-glycine isolated from tissue extract of <i>Aplysia kurodai</i>	M. SATO, T. YAMAGUCHI, N. KANNO & Y. SATO	617-620
Evidence for tight metabolic control of the receptor-activated polyphosphoinositide cycle in human platelets	V. M. STEEN, O.-B. TYSNES & H. HOLMSEN	621-624
Bioenergetics and transport		
Further characterization of the plasma membrane- and intracellular membrane-associated platelet Ca ²⁺ transport systems	J. ENOUF, R. BREDOUX, N. BOURDEAU, B. SARKADI & S. LEVY-TOLEDANO	547-552
Membranes and receptors		
Relationship between hormonal, GTP and Ins(1,4,5)P ₃ -stimulated Ca ²⁺ uptake and release in pancreatic acinar cells	S. MUALLEM & T. G. BEEKER	333-339
Extracellular nucleotides stimulate receptor-mediated calcium mobilization and inositol phosphate production in human fibroblasts	J. FINE, P. COLE & J. S. DAVIDSON	371-376
Platelet aggregation induced by α_2 -adrenoreceptor and protein kinase C activation. A novel synergism	W. SIESS & E. G. LAPETINA	377-385
Killing of Gram-negative bacteria by complement. Fractionation of cell membranes after complement C5b-9 deposition on to the surface of <i>Salmonella minnesota</i> Re595	S. TOMLINSON, P. W. TAYLOR, B. P. MORGAN & J. P. LUZIO	505-511
Indirect immunofluorescence localization of β -adrenergic receptors and G-proteins in human A431 cells	H. WANG, M. BERRIOS & C. C. MALBON	519-522
Localization of β -adrenergic receptors in A431 cells <i>in situ</i> . Effect of chronic exposure to agonist	H. WANG, M. BERRIOS & C. C. MALBON	533-538
Immunological relationships between receptors for insulin and insulin-like growth factor I. Evidence for structural heterogeneity of insulin-like growth factor I receptors involving hybrids with insulin receptors	M. A. SOOS & K. SIDDLE	553-563
Analysis of the water-soluble products of phosphatidylcholine breakdown by ion-exchange chromatography. Bombesin and TPA (12- <i>O</i> -tetradecanoylphorbol 13-acetate) stimulate choline generation in Swiss 3T3 cells by a common mechanism	S. J. COOK & M. J. O. WAKELAM	581-587
Cell structure and function		
Human fibroblasts release reactive oxygen species in response to interleukin-1 or tumour necrosis factor- α	B. MEIER, H. H. RADEKE, S. SELLE, M. YOUNES, H. SIES, K. RESCH & G. G. HABERMEHL	539-545
Translocation to rat liver mitochondria of phosphatidate phosphohydrolase	M. FREEMAN & E. H. MANGIAPANE	589-595
Phosphorylation of the tight-junction protein ZO-1 in two strains of Madin-Darby canine kidney cells which differ in transepithelial resistance	B. R. STEVENSON, J. M. ANDERSON, I. D. BRAUN & M. S. MOOSEKER	597-599
Methods		
Human serum amyloid A protein. Behaviour in aqueous and urea-containing solutions and antibody production	A. F. STRACHAN, E. G. SHEPHARD, D. U. BELLSTEDT, G. A. COETZEE, D. R. VAN DER WESTHUYZEN & F. C. DE BEER	365-370
A simplified assay for the enzyme responsible for the attachment of myristic acid to the N-terminal glycine residue of proteins, myristoyl-CoA: glycylopeptide N-myristoyltransferase	R. A. J. MCILHINNEY & K. MCGLONE	387-391
