THE BIOCHEMICAL SOCIETY

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Several meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Chairman
R. H. Burdon, F.R.S.E.

Committee
H. Baum*§
R. J. Beynon
P. H. W. Butterworth
C. J. Coulson
D. R. Burton†
P. J. England
R. B. Freedman
K. Gull
D. S. Jones
A. J. Kenny
R. D. Marshall
G. Powell

C. Rice-Evans
L. J. Rogers
K. Snell
A. J. Turner†‡
R. T. Walker
P. J. D. Weitzman

Meetings Secretary
A. D. B. Malcolm

Publications Secretary
C. I. Pogson

* Ex officio Member of Committee
† Representative of Group Secretaries
‡ Representative of Editorial Board of the Biochemical Journal
§ Representative of Professional and Educational Committee

Executive Secretary: G. D. Jones (7 Warwick Court, London WC1R 5DP)

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)].

PLANT MEMBRANES – STRUCTURE, ASSEMBLY AND FUNCTION

Edited by J.L. HARWOOD and T.J. WALTON

This book records the proceedings of a meeting organized by the Phytochemical Society of Europe, the Membrane Group of the Biochemical Society and the Plant Metabolism Group of the Society for Experimental Biology and held at University College Cardiff in April 1988. Papers cover membrane structure and its modification by different factors, synthesis of membrane components and membrane assembly, molecular function of membrane components and physiological aspects of membranes.

KERATAN SULPHATE

Chemistry, Biology,
Chemical Pathology

Edited by

HELMUT GREILING
&
JOHN E. SCOTT

Keratan sulphate is unique, standing at a crossroads, sharing the potential of both typical glycoproteins and typical proteoglycans. In one direction lie immunology, cell development and oncogenesis; in the other, important roles in the ultrastructure and function of corneal, joints and intervertebral discs. This book, the first in the field, is the fruit of the first full international symposium on keratan sulphate. The challenge of new viewpoints produced controversy, but also much common ground; this is revealed by the edited discussions, grouped for continuity, which follow the main sections. The bibliography is collected into one section, providing much of the literature on keratan sulphate in one place.

Contents: PART I - CHEMISTRY: Structure of keratan sulphate proteoglycans: core proteins, linkage regions, carbohydrate chains (Stuhlsatz, Keller, Becker, Oehm, Lennartz, Fisher & Greiling); Structural and conformational analysis of keratan sulphate oligosaccharides and related carbohydrate structures (Rbunsell); Discussion. PART II - IMMUNOLOGY: Keratan sulphate oligosaccharides, members of a family of antigens of the poly-N-acetyl-lactosamine series (Feizi); Studies of keratan sulphates of aorta and cartilage utilizing MAb 6D2 (Baker). Detection and purification of corneal keratan sulphate proteoglycan from non-corneal tissues (Funderburgh & Conrad); Discussion. PART III - BIOSYNTHESIS: Biosynthesis of skeletal and corneal keratan sulphate (Balduin, De Luca & Castellani); Keratan sulphate proteoglycans: chemistry and biosynthesis of the linkage regions (Hascall & Kimmel); Discussion. PART IV - REGULATION OF BIOSYNTHESIS: Factors affecting the pathway for the biosynthesis of keratan sulphate (Mason & Sweeney); Sulphation, chain elongation and chain termination in keratan sulphate biosynthesis (Keller, Stuhlsatz & Greiling); Keratan sulphate: a functional substitute for chondroitin sulphate in O2-deficient tissues? (Scott, Stockwell, Balduin & De Luca); Discussion. PART V - DEGRADATION: Substrate specificity of keratan sulphate-degrading enzymes (endo-β-galactosidase, keratanase and keratanase II) from micro-organisms (Nakazawa, Ito, Yamagata & Suzuki); Degradation of keratan sulphate proteoglycans (Kresse); Discussion. PART VI - KERATAN SULPHATE IN THE TISSUES: The chemical morphology of keratan sulphate proteoglycans (Scott); Articular cartilage keratan sulphate: maturation, ageing, biomechanical and scale effects (Stockwell); Proteoglycans of mammalian corneal stroma (Damle & Gregory); Discussion; Developmental aspects of keratan sulphate (Citrin, Covington, Kublin, Gregory & Damle); Keratan sulphate proteoglycans in organ and cell culture (Dahl); Discussion. PART VII - CHEMICAL PATHOLOGY: Studies of the metabolism of keratan-sulphate-bearing proteoglycans of cartilage (Thonar, Williams, Sweet, Maiko, Nen, Schnitzer & Kuehn); Serum keratan sulphate in rheumatoid arthritis and different clinical subsets of osteoarthritis (Seibel, Towbin, Brown, Kiefer, Muller & Paulsson); Factors affecting the determination of keratan sulphate using monoclonal antibodies in immunoassay procedures (Casson, Brooks, Sattoungi, Recliff, Hardingham & Muir); Discussion; Alterations in the synthesis of keratan sulphate proteoglycan in corneal wound healing and in macular corneal dystrophy (Hassell, SundarRaj, Citrin, Midura & Hascall); Distribution of keratan sulphate-containing proteoglycans in human aorta and their possible role in the calcification of aorta (Greiling, Loffler & Stuhlsatz); Discussion. Bibliography. Index.

J. KAY

List of contents and authors:

Alpha and Beta Adrenergic and Muscarinic Cholinergic Receptor Structure by J. C. Venter,
A. R. Kerlavage & C. M. Fraser; Soluble and Membrane-Bound Muscarinic Acetylcholine
Receptors by N. J. M. Birdsall, E. C. Hulme, M. Keen, E. K. Pedder, D. Poyner,
J. M. Stockton & M. Wheatley; The GABA_A Receptor and its Antibodies by
F. A. Stephenson, C. Mamalaki, S. O. Casalotti & E. A. Barnard; Expression of cDNAs for
Acetylcholine Receptor Subunits in the Yeast Cell Plasma Membrane by N. Fujita, M. T. Sweet,
T. D. Fox, N. Nelson, T. Claudio, J. M. Lindstrom & G. P. Hess; The Vertebrate Glycine
Receptor Protein by H. Betz, B. Schmitt, C.-M. Becker, G. Grenningloh & A. Rienitz;
Structural Features of Growth Factor Receptors with Oncogenic Potential by E. Chen,
L. Coussens, Y.-C. Liao, D. Smith, T. L. Yang-Feng, J. McGrath, C. Van Beveren,
Genes Encoding Molluscan Gonadotropin Hormones by J. F. Jackson, E. Vreugdenhil,
K. J. Johnson & F. K. Hall; Expression and Function of the Human Calcitonin/α-CGRP Gene
in Health and Disease by R. K. Craig, J. H. Riley, M. R. Edbrooke, P. M. Broad,
S. M. Foord, S. J. Al-Kazwini, J. J. Holman & I. Marshall; Brain-Specific Gene Expression
by R. J. Milner, C. Lai, D. Lenoir, K. Nave, C. Bakht & B. Malfroy; Molecular Basis for
the Function of Ionic Channels by S. Numa; The Hormonal Regulation of Adenylate Cyclase by
D. Feder, M. J. Im, T. Pfeuffer, M. Hakman, E. J. M. Helmreich & A. Levitzki;
Receptor-Stimulated Inositol Phospholipid Hydrolysis and Neural Function by M. J. Berridge;
Subject Index.

165 pp. ISBN 0 904498 19 0 £30.00 (US $55.00)
