REVIEW ARTICLE

FULL AND RAPID PAPERS
Proteins
Secretion of Bacillus subtilis levansucrase. Fe(III) could act as a cofactor in an efficient coupling of the folding and translocation processes R. Chambert, F. Benyahia & M.-F. Petit-Glatron 375–382
Isolation of bovine type X collagen and immunolocalization in growth-plate cartilage T. Kirsch & K. von der Mark 453–459
The complement component C4 of mammals A. W. Dodds & S. K. A. Law 495–502

Enzymes
The contributions of Ca\(^{2+}\), phospholipids and tissue-factor apoprotein to the activation of human blood-coagulation Factor X by activated Factor VII V. J. J. Bom & R. M. Bertina 327–336
Proteolytic release of keratinocyte transglutaminase R. H. Rice, X. Rong & R. Chakravarty 351–357
Characterization of the glycosyl-phosphatidylinositol-anchored human renal dipeptidase reveals that it is more extensively glycosylated than the pig enzyme N. M. Hooper, J. N. Keen & A. J. Turner 429–433
Characterization of the active site of human multicatalytic proteinase R. W. Mason 479–484
Phosphoglucoisomerase-catalysed interconversion of hexose phosphates. Kinetic study by \(^{13}\)C n.m.r. of the phosphoglucoisomerase reaction in \(^{2}H_2\)O R. Willem, F. Malaisse-Lagae, R. Ottinger & W. J. Malaisse 519–524
The synthesis of arginylfluoroalkanes, their inhibition of trypsin and blood-coagulation serine proteinases and their anticoagulant activity T. Ueda, C.-M. Kam & J. C. Powers 539–545
Investigations of the structural basis of the interaction of calpain II with phospholipid and with carbohydrate C. Crawford, N. R. Brown & A. C. Willis 575–579
Cytidylate cyclase: development of assay and determination of kinetic properties of a cytidine 3',5'-cyclic monophosphate-synthesizing enzyme R. P. Newton, B. J. Salvage & N. A. Hakeem 581–586

Carbohydrates
Conformational equilibria of the L-iduronate residue in nonsulphated di-, tetra- and hexa-saccharides and their alditols derived from dermatan sulphate Y. Inoue, Y. Inouye & K. Nagasawa 533–538

Lipids
\(\alpha\)-Tocopherol consumption during low-density-lipoprotein oxidation W. Jessup, S. M. Rankin, C. V. De Whalley, J. R. S. Hoult, J. Scott & D. S. Leake 399–405
Detection of new epitopes formed upon oxidation of low-density lipoprotein, lipoprotein (a) and very-low-density lipoprotein. Use of an antiserum against 4-hydroxynonenal-modified low-density lipoprotein G. Jürgens, A. Ashy & H. Esterbauer 605–608

Gene structure and expression
Selective overexpression of the QUTE gene encoding catabolic 3-dehydroquinase in multicopy transformants of Aspergillus nidulans

Molecular cloning, sequencing and expression of cytochrome c4 from Rhodospirillum rubrum

Synthesis and degradation of macromolecules

Collagen synthesis by cultured rabbit aortic smooth-muscle cells. Alteration with phenotype

Differential regulation of actin and myosin isoenzyme synthesis in functionally overloaded skeletal muscle

The effect of glutamine on protein turnover in chick skeletal muscle in vitro

Contents (continued)

Intermediate metabolism and metabolic control

How does fluoroaluminate activate human platelets?

Product–precursor relationships amongst inositol polyphosphates. Incorporation of \(^{33}\text{P}^\text{I}\) into myo-inositol 1,3,4,6-tetraakis-phosphate, myo-inositol 1,3,4,5-tetraakisphosphate, myo-inositol 3,4,5,6-tetraakisphosphate and myo-inositol 1,3,4,5,6-pentakisphosphate in intact avian erythrocytes

Maximum activities of key enzymes of glycolysis, gluconeolysis, pentose phosphate pathway and tricarboxylic acid cycle in normal, neoplastic and suppressed cells

Insulin resistance of glucose metabolism in isolated brown adipocytes of lactating rats. Evidence for a post-receptor defect in insulin action

Experimental determination of the phosphorylation state of phenylalanine hydroxylase

Compartmentation of acetyl CoA studied by analysis of tricarboxylic acid cycle acids and 3-hydroxybutyrate in bile of rats given \([2,2,2-^3\text{H}]\) ethanol

Mass measurement of inositol 1,4,5-triphosphate and \(^{3}H\)-1,2-diacylglycerol in bombesin-stimulated Swiss 3T3 mouse fibroblasts

Bioenergetics and transport

Transport systems for polyamines in the established renal cell line LLC-PK\(_1\). Polarized expression of an Na\(^+\)/dependent transporter

Membranes and receptors

Granulocyte-macrophage colony-stimulating factor can stimulate macrophage proliferation via persistent activation of Na\(^+\)/H\(^+\) antiport. Evidence for two distinct roles for Na\(^+\)/H\(^+\) antiport activation

Calcium- and guanine-nucleotide-dependent exocytosis in permeabilized rat mast cells. Modulation by protein kinase C

A 48 kDa collagen-binding phosphoprotein isolated from bovine aortic endothelial cells interacts with the collagenous domain, but not the globular domain, of collagen type IV

Molecular target sizes of inositol 1,4,5-trisphosphate receptors in liver and cerebellum

Guanine nucleotide regulation of inositol phospholipid hydrolysis and CD3-antigen phosphorylation in permeabilized T lymphocytes

Mitochondria have Fe(III) receptors

Heterogeneity of \([H]n\)inositol 1,4,5-trisphosphate binding sites in adrenal-cortical membranes. Characterization and validation of a radioreceptor assay

Bombesin receptor in membranes from Swiss 3T3 cells. Binding characteristics, affinity labelling and modulation by guanine nucleotides

CONTENTS (continued)

Muscarinic-receptor-mediated changes in intracellular Ca\(^{2+}\) and inositol 1,4,5-trisphosphate mass in a human neuroblastoma cell line, SH-SY5Y

Delivery of iron to human cells by bovine transferrin. Implications for the growth of human cells in vitro

Fluoroaluminate mimics agonist application in single rat hepatocytes
